FEDERAL REGISTER

VOLUME 16 NUMBER 129

Washington, Wednesday, July 4, 1951

TITLE 3—THE PRESIDENT

PROCLAMATION 2934

SUPPLEMENTAL QUOTA ON IMPORTS OF LONG-STAPLE COTTON

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS pursuant to section 22 of the Agricultural Adjustment Act of 1933 as amended by section 31 of the act of August 24, 1935, 49 Stat. 750, 773, as amended by section 5 of the act of February 29, 1936, 49 Stat. 1148, 1152, and as reenacted by section 1 of the act of June 3, 1937, 50 Stat. 246 (7 U. S. C. 624), the President issued a proclamation on September 5, 1939 (No. 2351, 54 Stat. 2640), limiting the quantities of certain cotton and cotton waste which might be entered, or withdrawn from warehouse, for consumption, which proclamation was suspended in part or modified by the President's proclamations of December 19, 1940 (No. 2450, 54 Stat. 2769), March 31, 1942 (No. 2544, 56 Stat. 1944), June 29, 1942 (No. 2560, 56 Stat. 1963), February 1, 1947 (No. 2715, 61 Stat. 1049), June 9, 1947 (No. 2734, 61 Stat. 1071), July 20, 1948 (No. 2800, 62 Stat. 1534), September 3, 1949 (No. 2856, 63 Stat. 1294), October 4, 1950 (No. 2905, 15 F. R. 6801), and October 12, 1950 (No. 2907, 15 F. R. 6953); and

WHEREAS the said proclamation of September 5, 1939, as suspended in part and modified, provides that the total quantity of cotton having a staple of 1⅛ inches or more but less than 1 11/16 inches in length which may be entered, or withdrawn from warehouse, for consumption in any year commencing February 1 shall not exceed 45,656,420 pounds; and

WHEREAS the limitation on the entry of cotton having a staple of 1⅛ inches or more in length was imposed by the said proclamation of September 5, 1939 after a finding by the President, on the basis of an investigation and report of the United States Tariff Commission made under the provisions of the said section 22 of the Agricultural Adjustment Act of 1933, as amended, that such cotton was being imported into the United States under such conditions and in sufficient quantities as to tend to render ineffective or materially interfere with the program undertaken with respect to cotton under the Soil Conservation and Domestic Allotment Act, as amended; and

WHEREAS the imposition of annual quotas on cotton having a staple of 1⅛ inches or more in length was recommended by the United States Tariff Commission in its report (Report No. 137, 2d Series) in connection with which it was stated, in finding No. 5, that the quotas recommended "will prevent imports from interfering with the cotton program and at the same time will permit American industry to secure needed supplies of specialized types of cotton"; and

WHEREAS the total quantity of cotton having a staple of 1⅛ inches or more but less than 1 11/16 inches in length which may be entered for consumption or withdrawn from warehouse for consumption under the said proclamation of September 5, 1939, as suspended in part and modified, during the quota year ending at the close of January 31, 1952, has already been entered, or withdrawn from warehouse, for consumption; and

WHEREAS pursuant to the said section 22 of the Agricultural Adjustment Act of 1933, as further amended by the acts of January 25, 1940, 54 Stat. 17, and July 3, 1948, 62 Stat. 1247, 1248, and by Public Law 579, 81st Congress, approved June 28, 1950, the United States Tariff Commission has made a supplemental investigation to determine whether changed circumstances require the modification of the said proclamation of September 5, 1939, to permit an additional quantity of harsh or rough cotton having a staple of 1⅛ inches or more but less than 1⅜ inches in length to be entered, or withdrawn from warehouse, for consumption during the remainder of the quota year ending at the close of January 31, 1952, in order to meet the special requirements of domestic manufacturers for this particular type of cotton; and

WHEREAS in the course of the said supplemental investigation, after due notice, a public hearing was held on June 13, 1951, at which parties interested were given opportunity to be present, to produce evidence, and to be heard, and, in addition to the hearing, the Commission made such investigation as it deemed necessary for a full disclosure and presentation of the facts; and

WHEREAS the Commission has made findings of fact and has transmitted to me a report of such findings and its recommendations based thereon, together with a transcript of the evidence submitted at the hearing, and has also transmitted a copy of such report to the Secretary of Agriculture; and

WHEREAS the Commission has recommended that an additional quantity of 1,500,000 pounds of harsh or rough cotton (except cotton of perished staple, grabbots, and cotton pickings), white in color, and having a staple of $1\frac{3}{16}$ inches or more but less than $1\frac{3}{8}$ inches in length be permitted entry during the quota year ending at the close of January 31, 1952, in order to enable domestic users to obtain their essential requirements for such cotton:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby find and declare, on the basis of the said supplemental investigation and report of the United States Tariff Commission, that changed circumstances require the modification of the said proclamation of September 5, 1939, as suspended in part and modified, so as to permit the entry for consumption, or withdrawal from warehouse for consumption, during the quota year ending at the close of January 31, 1952, of 1,500,000 pounds of harsh or rough cotton (except cotton of perished staple, grabbots, and cotton pickings), white in color, and having a staple of $1\frac{3}{16}$ inches or more but less than $1\frac{3}{8}$ inches in length, in addition to the quantity of cotton having a staple of $1\frac{1}{4}$ inches or more but less than $1\frac{11}{16}$ inches in length the entry of which has already been made during the said quota year under the said proclamation of September 5, 1939, as suspended in part and modified, which additional quantity I find should be permitted entry to carry out the purposes of section 22 of the Agricultural Adjustment Act of 1933, as amended. Accordingly, pursuant to the said section 22 of the Agricultural Adjustment Act of 1933, as amended, I hereby modify the said proclamation of September 5, 1939, so as to permit during the quota year ending at the close of January 31, 1952, the entry for consumption, or withdrawal from warehouse for consumption, of an additional quantity of 1,500,000 pounds of harsh or rough cotton (except cotton of perished staple, grabbots, and cotton pickings), white in color, and having a staple of $1\frac{3}{16}$ inches or more but less than $1\frac{3}{8}$ inches in length, which additional quantity I hereby find and declare may be entered for consumption, or withdrawn from warehouse for consumption, during such quota year without rendering or tending to render ineffective or materially interfering with the domestic program undertaken with respect to cotton, or reducing substantially the amount of any product processed in the United States from cotton produced in the United States.

This proclamation shall become effective on the fifth day after the date thereof.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 29th day of June in the year of our Lord nineteen hundred and [SEAL] and fifty-one, and of the Independence of the United States of America the one hundred and seventy-fifth.

HARRY S. TRUMAN

PART 643—OILSEEDS

SUBPART—1951-CROP CASTOR BEAN PRODUCTION AND PROCUREMENT PROGRAM

§ 643.567 *1951-crop castor beans.* In order to assure increased supplies of castor oil for National defense purposes, the Secretary of Agriculture is carrying out, through Commodity Credit Corporation, a program for the domestic production and procurement of 1951-crop castor beans on an estimated 78,000 acres. The program is being made available to farmers who enter into contracts either with Commodity Credit Corporation, or with private companies under contract with Commodity Credit Corporation, in areas for which adapted seed is available within the States of Oklahoma, Texas, California, Arizona, and any other State approved by the President of Commodity Credit Corporation. Detailed terms and conditions under which castor beans will be purchased are contained in such contracts with farmers. Generally, the price to be paid farmers for castor beans will be the higher of 10 cents per pound or the market price in effect at the time and place of delivery, upon the basis of the adjusted net weight determined by making certain deductions from the out-of-hull weight of the castor beans for excess moisture, foreign material, and cracked and broken beans. The market price will be determined under a formula approved by the President of CCC, using the estimated average yield of castor oil and pomace multiplied by the respective market prices for castor oil and pomace, less usual commercial margins for processing, storage, transportation, and other costs. Premiums above the prices so determined will be paid for certain improved varieties of castor beans retained for planting seed. The production of castor beans is being encouraged in concentrated areas to facilitate receiving and hulling of beans. Technical guidance will be available to farmers participating in the program, and harvesting machinery will be available for rental or purchase by farmers and toll operators of farm machinery. Information and contract forms with respect to the program may be obtained from the appropriate State committee of the Production and Marketing Administration in areas where the program is in operation or by writing to the Fats and Oils Branch, Production and Marketing Administration, Department of Agriculture, Washington 25, D. C.

PART 674—FARM STORAGE FACILITIES

SUBPART—FARM STORAGE FACILITY LOAN PROGRAM

This bulletin states the requirements with respect to the Farm Storage Facility Loan Program formulated by Commodity Credit Corporation (hereinafter referred to as "CCC") and the Production and Marketing Administration (hereinafter referred to as "PMA"). The program will be carried out by PMA under the general supervision and direction of the President, CCC.

AUTHORITY: §§ 674.135 to 674.143, issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup., 714b. Interpret or apply sec. 5, 62 Stat. 1072; 15 U. S. C. Sup., 714c.

§ 674.135 *Administration.* The program will be administered by PMA, under the general direction and supervision of the President, CCC, and in the field will be carried out by State PMA and PMA county committees (hereinafter called state and county committees). State and county committees do not have authority to modify or waive any provisions of this bulletin or amendments or supplements hereto.

§ 674.136 *Availability of loans*—(a) *Area.* Loans will be available in all States.

(b) *Time.* Loan applications may be submitted from July 1, 1951, through June 30, 1952.

(c) *Source.* All forms and documents will be made available through the offices of county committees. Disbursements on loans will be made by approved lending agencies under agreements with CCC, or by drafts drawn on CCC by the State committee.

§ 674.137 *Approved lending agencies.* An approved lending agency shall be any bank, partnership, individual, or other legal entity which has entered into a lending agency agreement for storage loans (Form PMA 97B or other form prescribed by CCC).

§ 674.138 *Eligible borrowers.* Any person who, as tenant, landlord, or land owner-operator, produces one or more of the commodities listed in § 674.139, a landowner who rents for cash his land on which one or more of such commodities are produced, and any two or more of such persons who wish to join together in purchasing or constructing a facility, will be eligible for loans for the purchase or construction of eligible storage facilities needed by them, except that tenants will not be eligible for loans on immovable facilities unless the property on which the facility is to be located is held under an assignable long term lease (i. e., a lease which will run at least ten years beyond maturity of the loan) and the tenant has obtained, either in the lease or separately, the written consent of the owner of the land to construct the facility thereon. The term "person" means an individual, partnership, corporation or other legal entity.

§ 674.139 *Eligible structures.* (a) New farm storage facilities of movable or immovable type, and additions to existing immovable facilities, which meet the requirements for eligible storage under the CCC price support loan programs and which have not been purchased or partially constructed prior to the date application is made, will be eligible under this program provided such facilities are to be used for the storage of cottonseed, corn, wheat, rye, oats, barley, grain sorghums, soybeans, flaxseed, rice, dry edible beans, dry peas, or peanuts produced by or on land owned by the eligible borrower: *And provided, further,* That loans for the construction of immovable facilities for cottonseed, beans, peas, or peanuts, will be approved only in areas for which the State committee determines that existing privately owned storage facilities for such commodity or commodities in the area concerned are not adequate. The term "storage facility" includes operating equipment which is necessary for the proper handling and conditioning of the agricultural commodity to be stored and without which the facility cannot be operated.

(b) Loans will not be available for the repair, remodeling, refinancing, or maintenance of existing facilities; for the purchase of secondhand facilities; to provide storage facilities for commodities which the borrower intends to purchase or store for others; or to provide storage facilities which the borrower intends to lease to others, except in the case of landlords who rent the facility together with the land on which the commodity to be stored in such facility is produced.

§ 674.140 *Terms and conditions of loan*—(a) Term. The maximum term of the loan will be approximately five years, except that the term of an individual loan may be extended for one year by the county committee in case of catastrophic losses of crops or other conditions beyond the control of the borrower. Loans will be payable in equal annual principal payments with interest at four percent per annum on the unpaid balance. Loans will be secured by chattel mortgages on the storage facilities, real estate mortgage, deed of trust, or other security instrument approved by CCC, on the borrower's farm or other property on which the facility is to be located, or on a sufficient acreage of the farm which, in the judgment of the county committee, will make the site easily accessible for use of other farmers in the area, and constitute a salable unit. A first mortgage will be required except that where a first mortgage is not obtainable, a second mortgage loan may be made provided the prior lien on the farm is small enough that the borrower's equity in the farm, in the opinion of the county committee, is sufficient to assure his continued tenure of the farm, and provided the prior lien-holder subordinates his lien as to the structure and the site on which it is located, with the right of access to the storage facility. No second mortgage loans will be made on structures not located on the farm.

(b) *Amount of loan.* The maximum amount loaned shall be $30 per ton of the rated storage capacity for cottonseed and forty-five cents (45¢) per bushel for all other commodities, or eighty-five percent (85%) of the cost incurred whichever is less. The cost incurred shall include the expenditures of the borrower which are necessary for the purchase, delivery, and erection of the facility, and the cost of that operating equipment which is necessary for the proper handling and conditioning of the agricultural commodity to be stored and without which the facility cannot be operated. In determining the cost incurred, the applicant's and other labor usually employed on the farm, the cost of all equipment placed in the facility which is not necessary for its operation, and the cost of permanent foundations for movable facilities shall be excluded. In computing the capacity of the storage facility, two and one-half (2½) cubic feet shall be considered equivalent to one bushel of ear corn, ninety (90) cubic feet equivalent to one ton of cottonseed, and one and one-fourth (1¼) cubic feet equivalent to one bushel of all other commodities.

(c) *Repayment of loan.* Payment will be due annually in equal principal payments beginning the next January 31 following the fiscal year period July 1 through June 30, in which the loan is made. CCC shall be authorized to prepay, or require the borrower to prepay, the amount of any annual installment out of the proceeds from any price support loan or purchase agreement due the borrower within 12 months preceding the date on which the installment falls due. Any past due installment may be deducted and paid out of any amounts (except amounts due the borrower out of appropriated funds when the loan is held by a lending agency) due the borrower under any program carried out by the Department of Agriculture. In addition, any farm-storage payments due the borrower by CCC for storage of commodities in such farm-storage facilities may be applied to any installment past due or next maturing, and any excess thereover may be applied on the remaining principal. The loan may be paid in part or in full by the borrower at any time before maturity. Upon payment of farm-storage facility loans secured by mortgages or deeds to secure debt which are held by CCC or secured by deeds of trust under which CCC is beneficiary, the county committees should be requested to release or obtain the release of such instruments of record. The chairman of each county committee is authorized to act as agent of CCC in releasing or obtaining the release of such instruments. Upon payment of loans secured by instruments held by a lending agency or under which a lending agency is beneficiary, the lending agency should be requested to release or obtain the release of such instrument or instruments.

(d) *Insurance.* If the total amount loaned is $1,000 or more, insurance on a movable storage facility shall be required in an amount sufficient to cover the loan and with coverage for hazards existent in the area. Insurance shall be required on an immovable storage facility in like amount and coverage regardless of the size of the loan. All insurance shall be maintained during the life of the loan and the cost shall be borne by the borrower, and the policy shall contain a clause making any loss thereunder payable to CCC, and to any other holder of a note secured by the storage facility as their interests may appear.

(e) *Maintaining storage facility.* The borrower shall be required to maintain the storage facility in condition and keep it available for storage until the loan is paid. The borrower shall not use the facility for any purpose other than the storage of grain in the production of which he has an interest without the written consent of the State PMA Committee, except that landlords may rent the facility together with the land on which the commodity to be stored in such facility is produced.

§ 674.141 *Disbursement of loan.* In the case of movable storage facilities, disbursement will be made in full at the time of completion of the facility and after the facility has been inspected and approved by the county committee. In the case of immovable storage facilities, disbursement will be made either in full at the time of completion and approval of the facility or on a partial advance plan, as elected by the borrower in his application for a loan. Under the partial advance plan, the proceeds of the loan will be disbursed in the following manner: 10 percent upon the execution of the security instrument, an additional 20 percent when the construction is one-half completed, an additional 20 percent when the construction is three-fourths completed, and the remainder when the construction is fully completed. Final and complete disbursement of the loan proceeds on movable or immovable structures will not be made under any plan until the borrower furnishes satisfactory evidence of the payment of any debts on the facility in excess of the amount discharged with the loan.

§ 674.142 *Service fees.* There shall be collected from the applicant at the time the application is made, a service fee of eighteen cents (18¢) per ton of the rated storage capacity of the structure to be acquired or erected for the storage of cottonseed and a fee of ¼ cent per bushel of the rated capacity for all other commodities, but in no case shall the fee be less than $2.50. If the loan is rejected or is not completed, the minimum fee of $2.50 shall be retained by the county committee and the balance returned to the applicant.

§ 674.143 *Sale or conveyance of security.* When a borrower desires to sell or convey the facilities or other property securing a loan without repaying the loan in full, he shall apply to Chairman of the county committee for approval of the sale or conveyance on behalf of CCC. If such approval is granted, the borrower and his purchaser shall execute an assumption agreement in form prescribed by CCC under which the borrower remains liable for the balance of the indebtedness and the purchaser assumes the balance of the indebtedness and agrees to comply with all the terms, conditions, covenants, and agreements set out in the security instruments. Approval of the transaction on behalf of CCC shall be shown by signature of the Chairman of the county committee in the space provided in the assumption agreement. The Chairman of each county committee is authorized to approve such transactions on behalf of CCC with respect to facilities located within the county, by executing the consent provision in the assumption agreement. The assumption agreement form may be obtained from the county committee office.

Issued this 29th day of June 1951.

PART 674—FARM STORAGE FACILITIES

SUBPART—PROGRAM TO FINANCE THE PURCHASE OF MECHANICAL DRIERS FOR FARM COMMODITIES

This bulletin states the requirements with respect to the Program to Finance the Purchase of Driers for Farm Commodities formulated by Commodity Credit Corporation (hereinafter referred to as "CCC") and the Production and Marketing Administration (hereinafter referred to as "PMA"). The program will be carried out by PMA under the general supervision and direction of the President, CCC.

674.156 Availability of loans.
674.157 Approved lending agencies.
674.158 Eligible borrowers.
674.159 Eligible driers.
674.160 Terms and conditions of loan.
674.161 Disbursement of loans.
674.162 Service charges.
674.163 Sale or conveyance of security.

AUTHORITY: §§ 674.155 to 674.163, issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup., 714b. Interpret or apply secs. 4, 5, 62 Stat. 1070, as amended, 1072; 15 U. S. C. Sup., 714b, 714c.

§ 674.155 *Administration.* The program will be administered by PMA, under the general direction and supervision of the President, CCC, and in the field will be carried out by State PMA and PMA County committees (hereinafter called state and county committees). State and county committees do not have authority to modify or waive any provisions of this bulletin or amendments or supplements hereto.

§ 674.156 *Availability of loans*—(a) *Area.* Loans will be available in any state in the continental United States.

(b) *Time.* Loan applications may be submitted from July 1, 1951, through June 30, 1952.

(c) *Source.* Loans may be obtained directly from CCC or through approved lending agencies. Application for loan shall, in either case, be made to the county committee.

(d) *Approved forms.* Approved forms shall consist of "Application for Loan on Storage Equipment", "Storage Equipment Loan Commitment", "Promissory Note-Storage Equipment Loans", "Storage Equipment Chattel Mortgage", "Assumption Agreement", and such other forms as may be prescribed by CCC. Forms may be obtained from the office of the county committee for both direct and lending agency loans.

§ 674.157 *Approved lending agencies.* An approved lending agency shall be any bank, partnership, individual, or other legal entity which has entered into a lending agency agreement for storage equipment loans (Commodity Credit Corporation Form 505 or other form prescribed by CCC).

§ 674.158 *Eligible borrowers.* Any person who as tenant, landlord, or land owner-operator produces one or more of the commodities listed in § 674.159, a landowner who rents for cash his land on which one or more of such commodities are produced, and any two or more of such persons who wish to join together in purchasing such equipment, will be eligible for loans for the purchase of mechanical driers needed by them, provided such persons have storage facilities suitable for adaptation to artificial drying. The term "person" means an individual, partnership, corporation or other legal entity.

§ 674.159 *Eligible driers.* (a) New mechanical driers of a mobile type which have been approved on the basis of the borrower's facilities and requirements by the county committee in accordance with instructions issued by the President of Commodity Credit Corporation will be eligible under this program provided such driers are to be used in connection with the storage of corn, oats, barley, grain sorghums, wheat, rye, soybeans, flax, rice, dry edible beans and peas, peanuts, or cottonseed.

(b) Loans will not be available for repair, maintenance, or reconditioning of driers, nor for the purchase of second hand driers, nor for the purchase of driers for use in connection with the storage of commodities which the borrower intends to purchase or store for others.

§ 674.160 *Terms and conditions of loan*—(a) *Term.* The maximum term of the loan will be for a period of approximately three years, except that the term of particular loans may be extended, at the option of CCC, under conditions prescribed by the President, CCC. Loans will be payable in equal annual principal payments with interest at four percent per annum on the unpaid balance. Loans will be secured by chattel mortgages covering the driers.

(b) *Amount of loan.* The maximum amount to be loaned on any single drier will be seventy-five percent of the delivered cost to the producer of such drier.

(c) *Repayment of loan.* Payment will be due annually in equal principal payments beginning the next January 31 following the fiscal year period, July 1 through June 30, in which the loan is made. CCC shall be authorized to prepay or require the borrower to prepay the amount of any annual installment out of the proceeds from any price support loan or purchase agreement due the borrower within twelve months preceding the date on which the installment falls due. Any past due installment may be deducted and paid out of any amounts (except amounts due the borrower out of appropriated funds when the loan is held by a lending agency) due the borrower under any program carried out by the Department of Agriculture. The loan may be paid in part or in full by the borrower at any time before maturity. Upon payment of a loan secured by a mortgage which is held by CCC, the county committee should be requested to release the mortgage of record by filing an instrument of release or by a marginal release on the county records. Upon payment of loans secured by mortgages held by a lending agency, the lending agency should be requested to release such mortgage. The chairman of each county committee is authorized to act as agent of CCC in executing or obtaining such releases.

(d) *Insurance.* The borrower will be required to provide insurance in an amount sufficient to cover the loan, and with coverage for fire and other hazards common to the area for such equipment, as determined necessary by the county committee. The insurance shall be maintained during the life of the loan, shall contain a loss payable clause in favor of the holder of the note and CCC, as their interest may appear, and the cost shall be borne by the borrower.

(e) *Maintaining driers.* The borrower shall be required to maintain the drier in good condition and repair.

§ 674.161 *Disbursement of loans.* Loans will be disbursed to borrowers by lending agencies under agreement with CCC or direct by CCC. Direct loans to borrowers may be disbursed by means of sight drafts issued by State PMA Offices.

§ 674.162 *Service charges.* A service charge (fee) of $2.50 or .5 of one percent of the amount of the loan, whichever is greater, shall be paid by the borrower at the time the application is made. If the loan is rejected or is not completed, the minimum fee of $2.50 shall be retained by the county committee and the balance returned to the applicant.

§ 674.163 *Sale of conveyance of security.* When a borrower desires to sell or convey the mechanical drier securing a loan without repaying the loan in full, he shall apply to Chairman of the county committee for approval of the sale or conveyance on behalf of CCC. If such approval is granted, the borrower and his purchaser shall execute an assumption agreement in form prescribed by CCC under which the borrower remains liable for the balance of the indebtedness and the purchaser assumes the balance of the indebtedness and agrees to comply with all the terms, conditions, covenants, and agreements set out in the security instruments. Approval of the transaction on behalf of CCC shall be shown by signature of the Chairman of the county committee in the space provided in the assumption agreement. The Chairman of each county committee is authorized to approve such transactions on behalf of CCC with respect to mechanical driers located within the county, by executing the consent provision in the assumption agreement. The assumption agreement form may be obtained from the county committee office.

TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 58—GRADING AND INSPECTION OF DAIRY PRODUCTS

On June 5, 1951, notice was published in the FEDERAL REGISTER (F. R. Doc. 51-6481; 16 F. R. 5280) regarding proposed issuance of regulations governing the grading, inspection, sampling, grade labeling, and supervision of packaging of butter, cheese, and other manufactured or processed dairy products pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act of 1951 (Pub. Law 759, 81st Cong., approved September 6, 1950), or any future act of Congress conferring like authority.

These regulations are essentially the same as Part 55 with respect to dairy products and the only principal revisions and additions made are as follows: The hourly rate for the grading service is increased from $3.00 to $3.60; a new fee schedule is included to cover the grading of swiss cheese; and a new section provides for denial of grading service under certain conditions involving fraudulent grade labeling practices by users of the service.

After consideration of all relevant matters presented, including the proposals in the aforesaid notice, the Department finds that it is unnecessary and contrary to the public interest to postpone the effective date of these regulations until 30 days after publication in the FEDERAL REGISTER, because: (1) Promulgation of these rules and regulations superseding Part 55 with respect to Dairy Products, is necessary for continuation without interruption of the grading and inspection services on dairy products, and (2) Applicants for the service will not experience any hardship by virtue of any additional requirements that may be contained in Part 58, nor need there be any special preparations made; therefore, the rules and regulations hereinafter set forth are promulgated to become effective July 1, 1951.

The rules and regulations are as follows:

DEFINITIONS

§ 58.1 *Meaning of words.* Words in the regulations in this part in the singular form shall be deemed to import the plural and vice versa, as the case may demand.

§ 58.2 *Terms defined.* For the purpose of the regulations in this part, unless the context otherwise requires, the following terms shall be construed, respectively, as follows:

(a) *Act.* "Act" means the following provisions of the Department of Agriculture Appropriation Act of 1951 (Pub. Law 759, 81st Cong.), or any future act of Congress conferring like authority:

• • • For enabling the Secretary to investigate and certify, in one or more jurisdictions, to shippers and other interested parties the class, quality, and condition of cotton, tobacco, fruits, and vegetables, whether raw, dried, canned, or otherwise processed, poultry, butter, hay, and other perishable farm products when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe, including payment of such fees as will be reasonable and as nearly as may be to cover the cost for the service rendered • • •

(b) *Administration.* "Administration" means the Production and Marketing Administration of the Department.

(c) *Administrator.* "Administrator" means the Administrator of the Production and Marketing Administration of the Department, or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated by the Administrator, the authority to act in his stead.

(d) *Applicant.* "Applicant" means an interested party who requests any grading service, appeal grading, or regrading with respect to any product.

(e) *Class.* "Class" means any subdivision of a product based on essential physical characteristics that differentiate between major groups of the same kind, species, or method of processing.

(f) *Condition.* "Condition" means any condition (including, but not being limited to, the state of preservation, cleanliness, soundness, wholesomeness, or fitness for human food) of any product which affects its merchantability.

(g) *Department.* "Department" means the United States Department of Agriculture.

(h) *Grader.* "Grader" means any employee of the Department authorized by the Secretary, or any other person to whom a license has been issued by the Secretary, to investigate and certify, in accordance with the act and this part, to shippers of products and other interested parties the class, quality, and condition of such products.

(i) *Grading.* "Grading" means (1) the act of determining, according to the regulations, the class, quality, or condition of any product by examining each unit thereof or a representative sample drawn by a grader or sampler; (2) the act of issuing a grading certificate; or (3) the act of identifying, when requested by the applicant, any product by means of official identification pursuant to the act and this part.

(j) *Grading certificate.* "Grading certificate" means a statement, either written or printed, issued by a grader, pursuant to the act and this part, relative to the class, quality, and condition of products.

(k) *Grading service.* "Grading service" or "continuous inspection" means (1) any grading, in accordance with the act and the regulations, of any product;

(2) continuous supervision, including quality control, in any official plant, of the preparation or packaging of any product; (3) any regrading of any previously graded product; or (4) any appeal grading of any previously graded product.

(l) *Inspector.* "Inspector" means any employee of the Department authorized by the Secretary, or any other person to whom a license has been issued by the Secretary, to inspect and certify the condition of products.

(m) *Interested party.* "Interested party" means any person financially interested in a transaction involving any grading, appeal grading, or regrading of any product.

(n) *Office of grading.* "Office of grading" means the office of any grader, sampler, or inspector.

(o) *Official identification.* "Official identification" means the symbol represented by a stamp, label, seal, mark, or other device approved by the Administrator, affixed to any product or to any container thereof, stating that the product was graded or inspected and indicating the class, quality, grade, or condition of such product.

(p) *Official plant.* "Official plant" means one or more buildings, or parts thereof, comprising a single plant in which the facilities and methods of operation therein have been approved by the Administrator as suitable and adequate for operation under inspection or grading service and in which inspection or grading is carried on in accordance with the regulations in this part.

(q) *Person.* "Person" means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether incorporated or not.

(r) *Product or products.* "Product" or "products" means butter, cheese (whether natural or processed), milk, cream, milk products (whether dried, evaporated, or condensed), and such other perishable farm products as the Secretary may hereafter designate. Such term shall also include any food product which is prepared or manufactured from any of the aforesaid products if such products constitute at least 50 percent, by weight, of all the ingredients used in the preparation or manufacture of such food product.

(s) *Quality.* "Quality" means the inherent properties of any product which determine its relative degree of excellence.

(t) *Regulations.* "Regulations" means the provisions of this part.

(u) *Sampler.* "Sampler" means any employee of the Department authorized by the Secretary, or any other person to whom a license has been issued by the Secretary, to draw samples of products for grading by a grader or for lot analysis under the act and this part.

(v) *Sampling.* "Sampling" means the act of taking samples of any product for grading.

(w) *Sampling report.* "Sampling report" means a statement, either written or printed, issued by a sampler, identifying samples taken by him for grading.

(x) *Secretary.* "Secretary" means the Secretary of the Department or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

(y) *Supervisor of packaging.* "Supervisor of packaging" means any employee of the Department authorized by the Secretary, or any other person to whom a license has been issued by the Secretary, to supervise the packaging and grade labeling of products.

ADMINISTRATION

§ 58.3 *Authority.* The administrator shall perform, for and under the supervision of the Secretary, such duties as the Secretary may require in the enforcement and administration of the provisions of the act and this part.

GRADING SERVICE

§ 58.4 *Kind of service.* Any grading service performed in accordance with this part may be for class, quality, and condition, or any combination thereof, and such service shall be subject to supervision at any time by the Administrator.

§ 58.5 *Where grading service is offered.* Any product may be graded, inspected, and sampled wherever a grader, sampler, or inspector is available and the facilities and the conditions are satisfactory for the conduct of the grading service.

§ 58.6 *Filing of application.* An application for grading, inspection, or sampling of a specified lot of any product shall be regarded as filed only when made pursuant to this part.

APPLICATION FOR GRADING, INSPECTION AND SAMPLING

§ 58.7 *Who may obtain grading, inspection and sampling service.* An application for grading, inspection, or sampling service may be made by any interested person, including, but not being limited to, the United States, any State, county, municipality, or common carrier, and any authorized agent of the foregoing.

§ 58.8 *How to make application.* An application for any grading service may be made in any office of grading, or with any grader, sampler, or inspector at or nearest the place where the service is desired. Such application for service may be made orally (in person or by telephone), in writing, or by telegraph. If an application for grading service is made orally, the office of grading, grader, sampler, or inspector with whom such application is made, or the Administrator, may require that the application be confirmed in writing.

§ 58.9 *Form of application.* Each application for grading, inspecting, or sampling a specified lot of any product shall include such information as may be required by the Administrator in regard to the product and the premises where such product is to be graded, inspected, or sampled.

§ 58.10 *Granting of application.* An application for continuous inspection may be approved only with respect to an official plant.

§ 58.11 *When application may be rejected.* Any application for grading service or sampling service may be rejected by the Administrator (a) whenever the product involvd is owned by, or located on the premises of, a person currently denied the benefits of the act, or (b) for noncompliance by the applicant with the act or the regulations; and each such applicant shall be notified immediately of the reasons for the rejection.

§ 58.12 *When application may be withdrawn.* An application for grading service may be withdrawn by the applicant at any time before the service is performed upon payment, by the applicant, of all expenses incurred by the Administration in connection with such application.

§ 58.13 *Authority of applicant.* Proof of the authority of any person applying for any grading service may be required in the discretion of the Administrator.

§ 58.14 *Accessibility and condition of product.* Each product for which grading service is requested shall be so conditioned and placed as to permit a proper determination of the class, quality, or condition of such product.

§ 58.15 *Disposition of graded product.* Any product, or sample thereof, which has been graded may be returned to the applicant at his request and at his expense if such request was made at the time of application for the grading service. In the event the aforesaid request was not made at the time of application for the grading service, the product or sample may be disposed of in such manner as the Administrator may approve.

§ 58.16 *Basis of grading service.* Products shall be graded in accordance with such standards, methods, and instructions as may be issued, or approved, by the Administrator. The supervision of packaging graded products shall be in accordance with such instructions as may be issued, or approved, by the Administrator.

§ 58.17 *Order of service.* Grading service shall be performed, insofar as practicable, in the order in which applications therefor are made except that precedence may be given to any such applications which are made by the United States (including, but not being limited to, any instrumentality or agency thereof) and to any application for an appeal grading.

§ 58.18 *Grading certificates and sampling report forms.* Grading certificates (including appeal grading certificates and regrading certificates) and sampling report forms shall be issued on forms approved by the Administrator.

§ 58.19 *Grading certificate issuance.* Each grader and each inspector shall issue a grading certificate covering each product graded; but in no case shall a grader or inspector sign any certificate covering any product not graded by him.

§ 58.20 *Disposition of grading certificates.* The original of any grading certificate, issued pursuant to § 58.19, and not to exceed four copies thereof, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. One copy shall be filed in the office of grading serving the area in which the grading service was performed, and all other copies shall be filed in such manner as the Administrator may approve. Additional copies of any such certificate may be supplied to any interested party as provided in § 58.41.

§ 58.21 *Advance information.* Upon request of an applicant, all or part of the contents of any grading certificate issued to such applicant may be telephoned or telegraphed to him, or to any person designated by him, at applicant's expense.

APPEAL GRADING AND REGRADING

§ 58.22 *When appeal grading may be requested.* An application for an appeal grading may be made by any interested party who is dissatisfied with any determination stated in any grading certificate, if the identity of the samples, or the product, has not been lost; and such application for an appeal grading shall be made within two days following the day on which the grading was performed. Upon approval by the Administrator, the time within which an application for an appeal grading may be made may be extended.

§ 58.23 *How to obtain appeal grading.* Appeal grading may be obtained by filing a request therefor, (a) with the Administrator, (b) with the grader or inspector who issued the grading certificate with respect to which the appeal grading is requested, (c) with the immediate superior of such grader or inspector, or (d) with the officer in charge of any office of grading. The application for appeal grading shall state the reasons therefor and may be accompanied by a copy of the aforesaid grading certificate or any other information the applicant may have secured regarding the product, at the time of grading, from which the appeal is requested. Such application may be made orally (in person or by telephone), in writing, or by telegraph. If made orally, written confirmation may be required.

§ 58.24 *Record of filing time.* A record showing the date and hour when each such application for appeal grading is received shall be maintained in such manner as the Administrator may prescribe.

§ 58.25 *When an application for an appeal grading may be refused.* If it appears to the Administrator that the reasons for an appeal grading are frivolous or not substantial, or that the quality or condition of the products has undergone a material change since the grading from which the appeal is made, or the identical products graded cannot be made accessible for regrading, or the act or this part has not been complied with, the Administrator may refuse the applicant's request for the appeal grading; and such applicant shall be promptly notified of the reason for such refusal.

§ 58.26 *When an application for an appeal grading may be withdrawn.* An application for appeal grading may be withdrawn by the applicant at any time before the appeal grading is made upon payment, by the applicant, of all expenses incurred by the Administration in connection with such application.

§ 58.27 *Order in which appeal gradings are performed.* Appeal gradings shall be performed, insofar as practicable, in the order in which applications therefor are received; and any such application may be given precedence pursuant to § 58.17.

§ 58.28 *Who shall make appeal gradings.* An appeal grading of any graded product shall be made by any grader (other than the one from whose grading the appeal is made) designated for this purpose by the Administrator; and, whenever practical, such appeal grading shall be conducted jointly by two such graders.

§ 58.29 *Appeal grading certificate.* Immediately after an appeal grading has been completed, an appeal grading certificate shall be issued showing the results of such appeal grading. Such certificate shall thereupon supersede the grading certificate for the product involved and such supersedure shall be effective as of the time of issuance of the grading certificate with respect to which the appeal is made. Each appeal grading certificate shall clearly set forth the number and the date of the grading certificate which it supersedes. The provisions of § 58.18 to § 58.21, both inclusive, shall, whenever applicable, also apply to appeal grading certificates except that copies of such appeal grading certificates shall be furnished each interested party of record.

§ 58.30 *Regrading of a graded product; application for regrading of a graded product*—(a) *Regrading of a graded product.* Whenever the immediate superior of a grader has evidence that such grader incorrectly graded a product, such superior shall immediately make a regrading of the product.

(b) *Application for regrading of a graded product.* An application for the regrading of any previously graded product may be made at any time by any interested party; and such application shall clearly indicate the reasons for requesting the regrading. The provisions of the regulations relative to grading service shall apply to regrading service.

§ 58.31 *Regrading certificate.* Immediately after a regrading has been completed, a regrading certificate shall be issued showing the results of such regrading; and such certificate shall thereupon supersede, as of the time of issuance of the regrading certificate, the grading certificate previously issued for the product involved. Each regrading certificate shall clearly set forth the number and date of the grading certificate which it supersedes. The provisions of § 58.18 to § 58.21, both inclusive, shall, whenever applicable, also apply to regrading certificates except that copies of such regrading certificates shall be furnished each interested party of record.

§ 58.32 *Superseded certificates.* When any grading certificate is superseded in accordance with this part, such certificate shall become null and void and, after the effective time of the supersedure, shall no longer represent the class, quality, or condition of the product described therein. If the original and all copies of such superseded certificate are not delivered to the person issuing the regrading or appeal grading certificate, he shall notify such persons as he considers necessary to prevent fraudulent use of the superseded certificate.

AUTHORIZATION AND LICENSING OF GRADERS, INSPECTORS, SAMPLERS, AND SUPERVISORS OF PACKAGING

§ 58.33 *Who may be authorized or licensed.* Any person possessing proper qualifications, as determined by an examination for competency, held at such time and in such manner as may be prescribed by the Administrator, may, (a) if an employee of the Department, be authorized by the Secretary, or (b) if not an employee, be licensed by the Secretary, as a grader, inspector, sampler, or supervisor of packaging for the performance of the applicable duties. Each prospective licensee, other than a State employee, shall, prior to the issuance of the license, procure and deliver to the Administration a surety bond, issued by such surety as may be approved by the Administrator, in the amount of $1,000 for the proper performance of the duties of such person as a licensee under the act and this part. Each authorization, and each license, issued by the Secretary shall be countersigned by the Administrator.

§ 58.34 *Suspension or revocation of authority or license.* Pending final action by the Secretary, the Administrator may, whenever he deems such action necessary, suspend the authority or license issued to any person pursuant to this part, by giving written notice of such suspension to such person, accompanied by a statement of the reasons therefor. Within seven days after receipt of the aforesaid notice, such person may file a written appeal with the Secretary, supported by any argument or evidence such person may wish to offer as to why his authority or license should not be suspended or revoked. After the expiration of the aforesaid seven day period and consideration of such argument and evidence, the Secretary will take such action as he deems appropriate with respect to such suspension or revocation.

§ 58.35 *Cancellation of authority or license.* Upon termination of any person's services as a grader, inspector, sampler, or supervisor of packaging, he shall surender the authority or license, issued to him pursuant to this part, for cancellation by the Administrator.

§ 58.36 *Surrender of authority or license.* Each authority, and each license, that is suspended or revoked, or has expired, shall be surrendered by the holder thereof to his immediate superior.

FEES AND CHARGES

§ 58.37 *Payment of fees and charges.* (a) Fees and charges for any grading service shall be paid by the interested party, making the application for such grading service, in accordance with the applicable provisions of this section and § 58.38 to § 58.48, both inclusive; and, if so required by the grader, inspector, or sampler, such fees and charges shall be paid in advance.

(b) Fees and charges for any grading service performed by any grader, inspector, or sampler who is a salaried employee of the Department, shall, unless otherwise required pursuant to paragraph (c) of this section, be paid by the interested party making application for such grading service by check, draft, or money order payable to the Treasurer of the United States and remitted promptly to the Administration.

(c) Fees and charges for any grading service under a cooperative agreement with any State or person shall be paid in accordance with the terms of such cooperative agreement by the interested party making application for any such grading service.

§ 58.38 *On a fee basis.* (a) Unless otherwise provided herein, the fees to be charged and collected for any service (other than for an appeal grading) performed, in accordance with this part, on a fee basis shall be based on the applicable rates specified in § 58.43 to § 58.46, both inclusive.

(b) In the event the aforesaid applicable rates are deemed by the Administrator to be inadequate fully to reimburse the Administration for all costs and other items paid or incurred by the Administration in connection with such service, the fees for such service shall not be based on the rates specified in § 58.43 to § 58.46, both inclusive, but shall be based on the time required to perform such service and the travel of each grader, inspector, sampler, and supervisor of packaging at the rate of $3.60 per hour for the time actually required.

(c) If an applicant requests that grading service be performed (1) on a holiday, he may be charged a rate double the rate otherwise applicable, and (2) on a non-work day, he may be charged a rate one and one-half times the otherwise applicable rate.

§ 58.39 *Fees for grading samples.* The fee to be charged for the grading of each lot of samples of any product shall be based on the actual time required to perform the service and shall be at the rate of $3.60 per hour, with a minimum charge of $1.80 for each such lot of samples.

§ 58.40 *Fees for appeal grading.* The fees to be charged for any appeal grading shall be double the fees specified in the grading certificate from which the appeal is taken: *Provided*, That the fee for any appeal grading requested by the United States, or any agency or instrumentality thereof, shall be the same as set forth in the grading certificate from which the appeal is taken. If the result of any appeal grading discloses that a material error was made in the grading appealed from, no fee shall be required.

§ 58.41 *Fees for additional copies of grading certificates.* Additional copies of any grading certificates, other than those provided for in § 58.20, may be supplied to any interested party upon payment of a fee of $1.50 for each set of five, or fewer copies.

§ 58.42 *Traveling expenses and other charges.* Charges may be made to cover the cost of traveling and other expenses incurred by the Administration in connection with the performance of any grading service.

§ 58.43 *Butter and cheese grading fees.* For each grading or regrading of any lot of butter, cheddar cheese, or swiss cheese, the following fees, on the basis of the net weight of such lot or the actual number of churnings of butter, vats of cheddar cheese, or wheels of swiss cheese comprising such lot, shall be applicable:

(a) When all the packages in any such lot are not individually identified by churning of butter or vat of cheddar cheese, the following fees shall be effective:

For 500 pounds or less	$1.80
For 501 to 1,500 pounds, inclusive	2.70
For 1,501 to 3,000 pounds, inclusive	3.60
For 3,001 to 6,000 pounds, inclusive	4.50
For 6,001 to 10,000 pounds, inclusive	6.50
For 10,001 to 15,000 pounds, inclusive	8.50
For 15,001 to 20,000 pounds, inclusive	10.50
For each additional 10,000 pounds, or fraction thereof, in excess of 20,000 pounds	2.50

(b) When all the packages in any such lot are individually identified by churning of butter or vat of cheddar cheese, the following fees shall be effective:

For 5 or less churnings or vats (total weight less than 18,000 pounds)	$2.00
For each additional churning or vat in excess of 5, an additional charge of	.30
For any lot of butter or cheddar cheese weighing at least 18,000 pounds, the minimum charge shall be	6.00

(c) When all the wheels of swiss cheese are individually identified by kettle of swiss cheese, the following fees shall be effective:

For 5 or less wheels	$2.00
For each additional wheel	.20

§ 58.44 *Milk sampling fees.* (a) For each sampling of any lot of dry milk, the following fees shall be applicable:

For 1,500 pounds or less	$1.75
For 1,501 to 3,000 pounds, inclusive	2.50
For 3,001 to 6,000 pounds, inclusive	3.25
For 6,001 to 10,000 pounds, inclusive	4.00
For each additional 10,000 pounds, or fraction thereof, in excess of 10,000 pounds	2.00

(b) For each lot of evaporated or condensed milk, the following fees shall be applicable:

For 50 packages or less	$1.75
For 51 to 200 packages, inclusive	2.50
For 201 to 400 packages, inclusive	3.25
For 401 to 600 packages, inclusive	4.00
For each additional 500 packages, or fraction thereof, in excess of 600 packages	1.00

§ 58.46 *Additional charges.* With respect to any grading service performed in a freight or express car or any other place where the entire lot of the product is not readily accessible to the grader, inspector or sampler, if the time required for the performance of such service is greater than would otherwise be required if the entire lot were readily accessible, as aforesaid, a fee of $4.00 shall be charged in addition to the applicable rates specified in § 58.43 to § 58.45, both inclusive.

§ 58.47 *On a contract basis.* Fees to be charged and collected for any service, other than for an appeal grading, on a contract basis, shall be such as are provided in such contract. The fees to be charged for any appeal grading shall be as provided in § 58.38 to § 58.45, both inclusive.

§ 58.48 *Fees for grading service performed under cooperative agreement.* The fees to be charged and collected for any service performed under cooperative agreement shall be those provided for by such agreement.

MARKING, BRANDING, AND IDENTIFYING PRODUCT

§ 58.49 *Authority to use official identification.* Whenever the Administrator determines that the granting of authority to any person to package any product, graded pursuant to this part, and to use official identification, pursuant to § 58.49 to § 58.57, both inclusive, will not be inconsistent with the act and this part, he may authorize such use of official identification. Any application for such authority shall be submitted to the Administrator in such form as he may require.

§ 58.50 *Approval of official identification.* Any grade label, inspection mark, or packaging material which is to be used as official identification shall be used only in such manner as the Administrator may prescribe; and such label, inspection mark, and packaging material shall be of such form and contain such information as the Administrator may require. No grade label, inspection mark, or packaging material may be used in the identification of any graded or inspected product unless finished copies or samples of such grade label, inspection mark, and packaging material have been approved by the Administrator.

§ 58.51 *Information required on official identification label.* Each grade or inspection label which is to be used as official identification shall conspicuously indicate the U. S. grade of the product it identifies and appropriate terminology if manufactured or processed under continuous inspection. It shall also include the appropriate phrase: "Officially graded," "Officially inspected," "Federal-State graded," or "Government graded." When required by the Administrator, the grade or inspection label shall also include all or any portion of the information set forth in paragraphs (a) and (b) of this section.

(a) The grade identification label on butter packaging material shall be stamped or perforated with the date of grading and the number of the grading certificate issued on the product.

(b) The grade or inspection label on packaging material for dairy products other than butter shall be stamped or perforated with a code number to indicate lot and date packed.

§ 58.52 *Time limit for packaging graded butter with grade identification labels.* Any lot of butter which is graded pursuant to this part may be packaged only within seven days immediately following the date of grading.

§ 58.53 *Supervisor of packaging required.* The official identification of any graded or inspected product, as provided in § 58.50 to 58.57, both inclusive, shall be done only under the supervision of a grader, inspector, or supervisor of packaging. The authority to use grade or inspection identification labels may be granted by the Administrator only to applicants who utilize the services of a supervisor of packaging in accordance with this part.

PREREQUISITES TO PACKAGING PRODUCTS WITH GRADE IDENTIFICATION LABELS

§ 58.54 *Packing and packaging room and equipment shall be clean and sanitary.* Each applicant who is granted the authority to package any product with a grade identification label and who operates, for such purpose, a printing and packaging room, shall maintain the room and the equipment therein in a clean and sanitary condition and, in addition, in accordance with the instructions of the Administrator.

§ 58.55 *Facilities for incubating butter samples required.* Each applicant granted the authority, as aforesaid, to package graded butter with grade identification labels shall provide and maintain a cabinet of suitable construction, equipped with temperature control, for the purpose of incubating samples of graded butter. Suitable facilities for the purpose of cleaning and sterilizing the equipment used in performing such incubation also shall be provided by such applicant.

§ 58.56 *Incubation of butter samples to determine keeping quality.* Samples of butter may be taken by a grader, pursuant to the instructions of the Administrator, from any lot of butter which is submitted for grading and packaging with grade identification labels, for the purpose of determining, by subsequent examination, whether such butter possesses satisfactory keeping quality, as determined by the grader in accordance with such standards as the Administrator may prescribe.

§ 58.57 *Butter of known unsatisfactory keeping quality shall not be eligible for packaging with grade identification labels.* Any butter produced in a creamery whose production of butter, within 30 days prior to current grading, has shown unsatisfactory keeping quality, as evidenced by the keeping quality test pursuant to § 58.56, shall not be packaged with any grade identification label until it is determined, by the grader, that such butter possesses satisfactory keeping quality.

MISCELLANEOUS

§ 58.58 *Fraud or misrepresentation.* Any wilful misrepresentation or deceptive or fraudulent practice found to be made or committed by any person in connection with:

(a) The making or filing of any application for any grading service, appeal, or regrading service;

(b) The use of any grading certificate, issued pursuant to this part, or the use of any official identification;

(c) The use of the words "Government graded," "Officially graded," "Federal-State graded," or words of similar import in the labeling or advertising of any product without stating in conjunction therewith the official U. S. grade of the product;

(d) The use of any of the aforesaid words or an official identification in the labeling or advertising of any product that has not been graded pursuant to this part;

(e) The use of a facsimile form which simulates in whole or in part any official identification for the purpose of purporting to evidence the U. S. grade of any product; or

(f) Any wilful violation of the regulations or the supplementary rules and instructions issued by the Administrator; may be deemed sufficient cause for debarring such person from any or all benefits of the act after opportunity for hearing has been accorded him; and pending investigation and hearing the Administrator may direct, without hearing, that such person shall be denied the benefits of the act.

§ 58.59 *Fraudulent grade labeling practices.* The Administration will not render grading service for any person found or discovered to be wilfully using in the labeling of any product any words, numerals, letters, or facsimile form which simulates in whole or in part any identification purporting to be a grade when such product does not comply with any recognized standards in general use for such grade, and such activity may be deemed sufficient cause for debarring such person from any or all benefits of the act after opportunity for hearing has been accorded him; and pending investigation and hearing the Administrator may direct, without hearing, that such person shall be denied the benefits of the act.

§ 58.60 *Political activity.* All graders, inspectors, and samplers are forbidden during the period of their respective appointments or licenses, to take an active part in political management or in political campaigns. Political activities in city, county, state, or national elections, whether primary or regular, or in behalf of any party or candidate, or any measure to be voted upon, is prohibited. This applies to all appointees, including, but not being limited to, temporary and cooperative employees and employees on leave of absence with or without pay. Wilful violation of this section will constitute grounds for dismissal in the case of appointees and revocation of licenses in the case of licensees.

§ 58.61 *Report of violations.* Each grader, inspector, sampler, and supervisor of packaging shall report, in the manner prescribed by the Administrator, all violations and noncompliances under the act and this part of which such grader, inspector, sampler, or supervisor of packaging has knowledge.

§ 58.62 *Interfering with a grader, inspector, or sampler.* Any further bene-

fits of the act may be denied any applicant who either personally or through an agent or representative interferes with or obstructs, by intimidation, threats, assault, or in any other manner, a grader, inspector, or sampler in the performance of his duties.

§ 58.63 *Publications.* Publications under the act and this part shall be made in the FEDERAL REGISTER, the Service and Regulatory Announcements of the Department, and such other media as the Administrator may approve for the purpose.

§ 58.64 *Identification.* Each grader, inspector, sampler, and supervisor of packaging shall have in his possession at all times, and present upon request, while on duty, the means of identification furnished by the Department to such person.

Issued at Washington, D. C., this 29th day of June 1951.

Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

PART 728—WHEAT

SUBPART—1952-53

Sec.
728.201 Basis and purpose.
728.202 National marketing quota for wheat for 1952-53 marketing year.
728.203 1952 acreage allotments for wheat.

AUTHORITY: §§ 728.201 to 728.203 issued under sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 304, 332, 333, 335, 371, 52 Stat. 38, as amended; 7 U. S. C. 1301, 1304, 1332, 1333, 1335, 1371.

§ 728.201 *Basis and purpose.* The regulations contained in §§ 728.201 to 728.203 are issued to announce that no national marketing quota for wheat shall be in effect during the marketing year beginning July 1, 1952, and that no national, State, county, or farm acreage allotments for wheat will be established for the 1952 crop under the provisions of Title III of the Agricultural Adjustment Act of 1938, as amended.

Section 335 of the act provides, in effect, that whenever in the calendar year 1951 the Secretary of Agriculture determines (a) that the total supply of wheat for the 1951-52 marketing year will exceed the normal supply for such marketing year by more than 20 per centum, or (b) that the total supply of wheat for the 1950-51 marketing year is not less than the normal supply for such marketing year and that the average farm price for wheat for three consecutive months of such marketing year does not exceed 66 per centum of parity, the Secretary shall, not later than July 1, 1951, proclaim such fact and a national marketing quota shall be in effect on the marketing of wheat during the 1952-53 marketing year. Section 332 of the act requires the Secretary, not later than July 15 of each marketing year, to ascertain and proclaim the total supply and the normal supply of wheat for such marketing year and proclaim the national acreage allotment for the next crop of wheat.

Section 371 (b) of the act authorizes the Secretary of Agriculture to dispense with marketing quotas or acreage allotments for any basic agricultural commodity if he finds, after appropriate investigation, that such action is necessary to effectuate the declared policy of the act, or to meet a national emergency or increase in export demand for the commodity. Section 304 of the act provides that in carrying out the purposes of the act, it shall be the duty of the Secretary to give due regard to the maintenance of a continuous and stable supply of agricultural commodities from domestic production adequate to meet consumer demand at prices fair to both producers and consumers.

The findings and determinations made in § 728.202, which are based on the latest available statistics of the Federal Government, show that no national marketing quota for wheat for the 1952-53 marketing year is required. Accordingly, § 728.202 states that no such quota will be in effect for that marketing year.

Pursuant to section 371 (b) of the act, an investigation has been made to determine whether acreage allotments should be in effect for the 1952 wheat crop. On the basis of that investigation, it is hereby found and determined that it is necessary, in order to effectuate the declared policy of the act and to meet the present national emergency in food production, to dispense with national, State, county, and farm acreage allotments for the 1952 wheat crop. That action is made effective by the issuance of § 728.203.

Prior to taking the action herein, public notice was given (16 F. R. 5454), in accordance with the Administrative Procedure Act (5 U. S. C. 1003), that the Secretary was preparing to determine whether marketing quotas are required for the 1952 wheat crop, and to determine and proclaim the national acreage allotment for that wheat crop. The notice also stated that the Secretary had under consideration the matter of dispensing with marketing quotas and acreage allotments under the applicable provisions of the act, including sections 304 and 371 (b). All written submissions which were received within the period stated in the notice have been considered within the limits permitted by the Agricultural Adjustment Act of 1938, as amended.

§ 728.202 *National marketing quota for wheat for the 1952-53 marketing year.* The total supply of wheat for the 1951-52 marketing year is determined to be 1,477 million bushels. The normal supply of wheat for such marketing year is determined to be 1,273 million bushels. This indicated total supply does not exceed the normal supply by more than 20 per centum. The average farm price for wheat has not been as low as 66 per centum of the parity price for wheat for three successive months in the 1950-51 marketing year. Therefore, no national marketing quota for wheat shall be in effect during the 1952-53 marketing year.

§ 728.203 *1952 acreage allotments for wheat.* No national, State, county, or farm acreage allotments will be established for the 1952 wheat crop.

Issued at Washington, D. C., this 29th day of June 1951.

Secretary of Agriculture.

[957.308 Amdt. 1]

PART 957—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND IN MALHEUR COUNTY, OREG.

LIMITATION OF SHIPMENTS

Findings. 1. Pursuant to Order No. 57, as amended (7 CFR Part 957), regulating the handling of Irish potatoes grown in certain designated counties in Idaho and in Malheur County, Oregon, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Idaho-Eastern Oregon Potato Committee, established pursuant to said amended order, and upon other available information, it is hereby found that the amended limitation of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of Irish potatoes grown in the area regulated by Order No. 57, as amended

Order, as amended. The provisions of subparagraphs (2) and (3) of paragraph (b) (§ 957.308—16 F. R. 5833) are hereby amended to read as follows:

(2) During the period beginning 12:01 a. m., m. s. t., July 3, 1951, and ending 12:01 a. m., m. s. t., November 1, 1951, no handler shall ship Russet Burbank potatoes which do not comply with the aforesaid grade and size requirements and which are more than "moderately skinned," as such term is defined in the U. S. Standards for Potatoes (7 CFR 51.366), which means that not more than 10 percent of the potatoes in any lot have more than one-half of the skin missing or feathered; no handler shall ship red skin varieties if more than 20 percent of the potatoes in any lot have more than one-half of the skin missing or feathered and no handler shall ship the White Rose variety of potatoes if more than 35 percent of the potatoes in any lot have more than one-half of the skin missing or feathered: *Provided,* That during such period not to exceed 200 hundredweight of each variety of such potatoes may be handled for any producer without regard to the aforesaid skinning requirements if the handler thereof reports, prior to such handling, the name and address of the producer of such potatoes, and each shipment hereunder is handled as an identifiable entity.

(3) The limitations set forth in subparagraphs (1) and (2) of this paragraph shall not be applicable to shipments of potatoes for the following purposes: (i) Seed, (ii) export, (iii) sale to the Federal government under programs authorized by the Secretary of Agriculture, (iv) canning, dehydration, or manufacture or conversion into starch, flour, meal, and alcohol, and (v) charity: *Provided,* That each handler making special purpose shipments pursuant hereto shall file an application with the committee to do so, shall have each of such shipments (except shipments of seed potatoes) inspected and shall pay assessments in connection therewith, and for each such shipment made pursuant to subdivisions (ii), (iv) and (v) of this subparagraph, shall furnish a copy of the bill of lading applicable thereto to the committee: *Provided further,* That each handler making shipments of potatoes pursuant to subdivision (ii) of this subparagraph shall include in his application applicable thereto, the export certificate number and shall enter such number on the Federal-State inspection certificate and bill of lading applicable to such shipment, and that each application to ship potatoes pursuant to subdivisions (iv) and (v) of this subparagraph shall be accompanied by the applicant handler's certification and the buyer's certification that the potatoes to be shipped are to be used for the purposes stated in the application.

PART 962—FRESH PEACHES GROWN IN GEORGIA

REGULATION BY SIZE

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 62, as amended (7 CFR Part 962; 15 F. R. 4105), regulating the handling of fresh peaches grown in the State of Georgia, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Industry Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of peaches, as hereinafter set forth, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than July 5, 1951. Shipments of peaches, grown in the State of Georgia, are currently subject to regulation by size (Peach Order 1, as amended; 16 F. R. 5314, 5741) pursuant to the said amended marketing agreement and order; recommendation as to the need for amending such size regulation not later than July 5, 1951, in order to effectuate the declared policy of the act, was made at the meeting of the said committee on June 28, 1951, after consideration of all available information relative to the supply and demand conditions for such peaches, and such recommendation and supporting information were promptly submitted to the Department; the said meeting of the committee was held, after due notice thereof, to consider the amendment of such size regulation, and interested persons were afforded an opportunity to submit their views thereon at this meeting; the provisions of this amendment, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers and growers of such peaches; and compliance with the provisions of this amendment will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof. *It is therefore ordered,* As follows:

The provisions in subparagraphs (1) and (2) of paragraph (b) of § 962.306 (Peach Order 1, as amended; 16 F. R. 5314, 5741) are hereby amended to read as follows:

(1) Any peaches of the Brackett, Early Elberta, Elberta, Early Hale, Hale Haven, Halberta, Hardin's Pride, J. H. Hale, Krummel, Murray Hale, Rio Oso Gem, Southland, Sullivan Elberta, White Hale, or Woodland Cling varieties of a size smaller than 1⅞ inches in diameter, except that not more than ten (10) percent, by count, of such peaches contained in any bulk lot or any lot of packages may be of a size smaller than 1⅞ inches in diameter, but not more than fifteen

(15) percent, by count, of such peaches in any individual package in any lot may be of a size smaller than 1⅞ inches in diameter; or

(2) Any peaches of any variety not listed in subparagraph (1) of this paragraph of a size smaller than 1¾ inches in diameter, except that not more than ten (10) percent, by count, of such peaches contained in any bulk lot or any lot of packages may be of a size smaller than 1¾ inches in diameter, but not more than fifteen (15) percent, by count, of such peaches in any individual package in any lot may be of a size smaller than 1¾ inches in diameter.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 29th day of June 1951, to become effective at 12:01 a. m., e. s. t., July 5, 1951.

[Peach Order 2, Amdt. 1]

PART 962—FRESH PEACHES GROWN IN GEORGIA

REGULATION BY GRADE

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 62, as amended (7 CFR Part 962; 15 F. R. 4105), regulating the handling of fresh peaches grown in the State of Georgia, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Industry Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of peaches, as hereinafter set forth, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than July 5, 1951. Shipments of peaches, grown in the State of Georgia, are currently subject to regulation by grade (Peach Order 2; 16 F. R. 5741) pursuant to the said amended marketing agreement and order; recommendation as to the need for amending such grade regulation not later than July 5, 1951, in order to effectuate the declared policy of the act, was made at the meeting of the said committee on June 28, 1951, after consideration of all available information relative to the supply and demand conditions for such peaches, and such recommendation and supporting information were promptly submitted to the Department; the said meeting of the committee was held, after due notice thereof, to consider the amendment of such grade regulation, and interested persons were afforded an opportunity to submit their views thereon at this meeting; the provisions of this amendment, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers and growers of such peaches; and compliance with the provisions of this amendment will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof. *It is therefore ordered,* As follows:

The provisions in paragraph (b) (1) of § 962.307 (Peach Order 2; 16 F. R. 5741) are hereby amended to read as follows:

(1) During the period beginning at 12:01 a. m., e. s. t., July 5, 1951, and ending at 12:01 a. m., e. s. t., September 1, 1951, no handler shall ship to destinations other than in the adjacent markets any peaches which do not meet the requirements of the U. S. No. 1 grade, except that (i) not to exceed fifteen (15) percent, by count, of the peaches contained in any bulk lot or any lot of packages may consist of peaches which do not meet the requirements of such grade, but not more than ten (10) percent, by count, of the peaches in any such lot shall consist of peaches with defects causing serious damage, and not more than one (1) percent, by count, of the peaches in any such lot shall consist of peaches which are not free from decay, and (ii) not to exceed twenty-two (22) percent, by count, of the peaches contained in any individual package in any lot may consist of peaches which do not meet the requirements of such grade, but not more than fifteen (15) percent, by count, of the peaches contained in any such individual package shall consist of peaches with defects causing serious damage and not more than two (2) percent of the peaches contained in any such individual package shall consist of peaches which are not free from decay.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 29th day of June 1951, to become effective at 12:01 a. m., e. s. t., July 5, 1951.

PART 987—IRISH POTATOES GROWN IN MAINE

ORDER TERMINATING MARKETING AGREEMENT AND ORDER AND PROVIDING FOR LIQUIDATION OF ASSETS

Pursuant to the applicable provisions of Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C., 601 et seq.), hereinafter referred to as the "act," and of the marketing agreement and order (7 CFR Part 987) regulating the handling of Irish potatoes grown in Maine, hereinafter referred to as the "order," it is hereby found and determined that the provisions of said order will, on and after 11:59 p. m., e. s. t., June 30, 1951, no longer tend to effectuate the declared policy of the act.

It is therefore ordered, That, subject to the terms and conditions which are set forth below, the provisions of said order be, and they are hereby, terminated effective at 11:59 p. m., e. s. t., June 30, 1951.

Under date of May 11, 1951, there was issued an order (16 F. R. 4588) directing that a referendum be conducted among producers of Irish potatoes grown in Maine for the purpose of determining whether persons who were such producers during a representative period specified by the Secretary favored the termination of the order which is being terminated by this document. The referendum conducted pursuant to the aforesaid referendum order developed that, of the producers who voted in such referendum, 72.7 percent by number favored or approved termination of said order, and that such producers who favored or approved termination of said order produced for market 71.9 percent of the production represented in the referendum.

It is hereby further ordered, That the liquidation action in this instance shall be handled by the State of Maine Potato Committee as constituted at the effective time of the termination of the said order, and in accordance with the terms and conditions which are set forth therein for application to liquidation action, said terms and conditions being set forth in § 987.10 (c) thereof. To implement such indicated terms and conditions: *It is hereby further ordered,* As follows:

(1) Said committee members, as joint trustees, shall conduct the liquidation action subject to the general supervision and control of the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington, D. C.

(2) Said trustees shall keep books, and other appropriate records of their operations, which shall reflect clearly all of their acts and transactions as trustees, which books and other records shall be subject, at any time, to examination by the Secretary or his designated representative.

(3) Any furniture, fixtures, or other personal property shall be sold by the trustees under such conditions and in such manner as may be approved in writing by the aforesaid Director of the Fruit and Vegetable Branch; and any funds derived from such sales shall become a part of the liquid assets for distribution to handlers after all obligations have been paid.

(4) Any balance of money remaining in excess of liabilities shall be disbursed to persons who were handlers during the current fiscal year; and such disbursement shall be made to each handler in the proportion that his respective contribution to the assessment fund for that fiscal year bears to the total contributions to the assessment fund for that fiscal year by all handlers.

(5) Said trustees shall be reimbursed for expenses necessarily incurred by them in the performance of their duties hereunder, and each may receive compensation at a rate which shall not exceed $10 for each day, or portion thereof, spent by him on such work.

With respect to violations, rights accrued, or liabilities incurred under the order being terminated prior to the effective time of such termination action, all provisions of said order in effect prior to the effective time of such termination action shall be deemed to continue in full force and effect for the purpose of sustaining any proper suit, action, or other proceeding with regard to any such violation, right, or liability.

It is hereby found and determined that it is necessary, in the public interest, to make this termination and liquidation order effective not later than 11:59 p. m., e. s. t., June 30, 1951, since the current fiscal year will expire on that date, and it is desirable, administratively, to make such action effective as of that time; and the effect of said action will not impose liabilities on persons covered thereunder, but, to the contrary, will relieve them from existing liabilities. In these circumstances, it is impracticable, unnecessary, and contrary to the public interest to follow the requirements as to notice, public procedure thereon, and the delaying of the effective date of this action for 30 days after the publication of this order in the FEDERAL REGISTER, which would otherwise be necessary to be followed under section 4 of the Administrative Procedure Act (5 U. S. C. 1001 et seq.).

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter B—Economic Regulations

[Regs. Serial No. ER-164]

PART 291—CLASSIFICATION AND EXEMPTION OF IRREGULAR AIR CARRIERS

OPERATIONAL LIMITATIONS ON EXERCISE OF TEMPORARY EXEMPTION BY LARGE IRREGULAR CARRIERS; EXTENSION OF EFFECTIVE DATE

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 28th day of June 1951.

By Amendment No. 1 to Part 291, adopted March 2, 1951, with an original effective date of April 6, 1951, the Board modified the operational limitations on the exercise of the temporary exemption to engage in air transportation granted to the Large Irregular Carriers pursuant to Part 291 and section 416 (b) of the Civil Aeronautics Act. These operational limitations relate to the number, frequency and regularity of flights conducted by such Large Irregular Carriers.

Since the adoption of Amendment No. 1 to Part 291 on March 2, 1951, the Board has by successive actions postponed the effective date of Amendment No. 1 to July 5, 1951, pending the result of the study of Amendment No. 1 by the Senate Select Committee on Small Business. On June 27, 1951, in an action brought in the United States District Court for the District of Columbia by two of the Large Irregular Carriers operating pursuant to Part 291, the Court entered a judgment granting to the plaintiffs a permanent injunction restraining the Board from enforcing Amendment No. 1. The Board has instructed its General Counsel to request the Solicitor General for permission to note an appeal to the Circuit Court of Appeals from this judgment.

In view of the ruling of the District Court and in order to clarify the status of Amendment No. 1 with respect to all Large Irregular Carriers to which it would by its terms be applicable, the Board has decided to postpone further the effective date of Amendment No. 1 until a reasonable time following the completion of the appeal proceedings referred to above.

For the reasons stated above notice and public procedures hereon are impracticable. Since no additional burden is imposed on any person, the postponement may be made effective without prior notice.

The Civil Aeronautics Board hereby postpones the effective date of Amendment No. 1 to Part 291 to such date as may later be fixed by the Board following the completion of any appeal by the Board to the Court of Appeals from the judgment in American Air Transport et al. v. Civil Aeronautics Board, Civil Action No. 1295-51, U. S. D. C. D. C.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

PART 2—RULES OF PRACTICE

COMPLAINTS, DEFAULTS, CONSENT SETTLEMENTS

The Commission on June 26, 1951, amended § 2.5 of its rules of practice (§§ 2.1 to 2.31) so as to make said section read as follows, effective thirty days from date of publication in the FEDERAL REGISTER:

NOTE: In said section, the number to the right of the decimal point corresponds with the Roman number in the Commission's rules of practice, as included in its publication, Rules, Policy, Organization, and Acts.

§ 2.5 *Complaints, defaults, consent settlements.* (a) Complaints: Whenever the Commission shall have reason to believe that there is a violation of law over which the Commission has jurisdiction, and in case of violation of the Federal Trade Commission Act, if it shall appear to the Commission that a proceeding by it in respect thereof would be to the interest of the public, the Commission shall issue and serve upon the proper parties a complaint stating its charges and containing a notice of a hearing upon a day and at the place therein fixed, at least thirty (30) days after the service of said complaint.

(b) Defaults: In the "Notice" portion of the complaint there may be set forth a provisional order to cease and desist which the Commission shall have reason to believe should issue if the facts in the record shall be found to be as alleged in the complaint. If the complaint contains such order, it shall also state that such order shall issue, unless the respondent shall file an answer within the time designated in the complaint; shall appear at the time and place so fixed; and shall show cause why the said order to cease and desist should be not be entered by the Commission, in which event such provisional order to cease and desist shall be without effect.

(c) Consent settlements: At any time after the issuance of complaint and prior to the commencement of the taking of evidence, all respondents in any case may jointly move the trial examiner to suspend proceedings before him for a reasonable time to permit negotiations by counsel upon a consent settlement dispositive of the proceeding.[1] Such suspension, and the time thereof, will be in the discretion of the trial examiner, after considering representations of counsel for both sides and the reasonable probability of an agreement being reached that would result in a substantial saving in time and expense.

(d) In the event a consent settlement is agreed upon by counsel, it shall be submitted to the Commission through the trial examiner, who shall transmit with such proposal any comment thereon he may deem appropriate and the record in the proceeding in which the settlement is tendered. In the event the proposal is rejected by the Commission, the case will be returned to the trial examiner to proceed in regular course and the proposal will not become a part of the record. In the event a consent settlement is accepted, the case will be concluded by the entry therein by the Commission of the order and other matters included in such settlement in accordance with its terms.

(e) Every consent settlement shall dispose of the entire proceeding as to all parties and shall include, in addition to

[1] In the case of proceedings already instituted, such motion may be made within thirty (30) days from the effective date of this rule, if the taking of evidence has not been completed and if a substantial saving in time and expense will result.

the order to cease and desist, admission of jurisdictional facts and also a statement of the acts and practices which the Commission had reason to believe were unlawful; but a respondent need not admit, though he may not deny, any of the matters contained in such statement. A consent settlement will not be accepted unless each respondent consents to the entry of the admitted jurisdictional facts and the said statement of acts and practices as the findings as to the facts of the Commission, and to the entry of the order to cease and desist.

(f) Pursuant to a change of law or facts, or when the public interest so requires, a consent settlement may be altered, modified, or set aside in whole or in part upon consent of all parties. All consent settlements shall contain an agreement that if consent to a change desired is not obtained, the Commission or any respondent may file a motion in the case to set aside such consent settlement in whole or in part on the grounds of change of law or fact or that the public interest so requires; and after opportunity for hearing upon the issues formed, the Commission may, if it finds that a change of law or fact, or the public interest so requires, set aside the consent settlement or any part thereof which is separable from the remaining provisions without changing their effect. Thereafter, the Commission may, by adversary proceedings pursuant to the original complaint, or a new or amended and supplemental complaint, undertake corrective action as to any acts or practices not prohibited by any remaining provisions of the consent settlement.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46)

Promulgated as of this date in pursuance of the action of the Federal Trade Commission under date of June 26, 1951, effective 30 days from date of publication in the FEDERAL REGISTER.

By direction of the Commission.

Chapter II—Railroad Retirement Board

PART 325—REGISTRATION AND CLAIMS FOR BENEFITS

DAY OF REGISTRATION

Pursuant to the general authority contained in section 12 of the act of June 25, 1938 (52 Stat. 1094, 1107; 45 U. S. C. 362), § 325.12 (c) (4) of the regulations of the Railroad Retirement Board under such act (9 F. R. 3192) is amended by Board Order 51-180, dated June 14, 1951, to read as follows:

§ 325.12 *Registration.* * * *

(c) *Day of registration.* * * *

(4) If an employee does not register with respect to any day within the time hereinabove specified, because, after making reasonable efforts, he was unable to find an unemployment claims agent to take his registration, or because an unemployment claims agent at an employment office where such employee would otherwise have registered was not ready and willing to take his registration, or because such employee was given misinformation by an unemployment claims agent, a countersigning agent, the supervisor of such claims agent or countersigning agent, a railway labor organization official, or an employee of the Board, such employee may register with respect to such day at any time within one year of such day, and shall submit to an unemployment claims agent, to a duly authorized field representative of the Board, or to an office of the Board, a written statement explaining why he did not register with respect to such day within the time specified.

(Sec. 12, 52 Stat. 1094, 1107; 45 U. S. C. 362)

Dated: June 27, 1951.

2. Paragraphs (b) and (d) of § 590.354–2 are rescinded and the following substituted therefor:

§ 590.354–2 *Applicability.* • • •

(b) Policies with respect to dissemination of information to unsuccessful bidders and offerors concerning awards are set forth in §§ 401.407, 591.407 and 592.150 of this title. Instructions pertaining to synopses of awards are set forth in §§ 590.355 to 590.355–4.

• • • • • •

(d) The procurement is effected by any purchasing office in the continental United States, including (1) principal purchasing offices listed in § 590.253–2 of this part and (2) all other field purchasing offices and activities located in the continental United States.

3. Sections 590.355 through 590.355–4 are added as follows:

§ 590.355 *Synopses of contract awards.*

§ 590.355–1 *Statement of policy.* It is the policy of the Army, consistent with security requirements, that information be disseminated as widely as possible, each week, with respect to awards of unclassified contracts, exceeding $25,000 in amount, whether entered into after formal advertising or negotiation. One objective of this policy is to provide opportunities for small business concerns to learn of and solicit subcontracting work.

§ 590.355–2 *Applicability.* In accordance with the policy stated in § 590.355–1, instructions in § 590.335 to 590.355–4 shall apply to all contracts (including contracts for the construction, alteration or repair of buildings, bridges, roads, or other kinds of real property, whether entered into after formal advertising or negotiation, When:

(a) The contract amount exceeds $25,000.

(b) The contract is unclassified and dissemination of information with respect thereto does not constitute a security risk.

(c) The contract is entered into by any purchasing office in the continental United States, including (1) principal purchasing offices listed in § 590.253–2 and (2) all other field purchasing offices and activities located in the continental United States.

§ 590.355–3 *Action by purchasing offices.* (a) Purchasing offices will obtain all necessary information for inclusion in synopses of contract awards from contract files and, when necessary, directly from contractors.

(b) Purchasing offices will obtain information, at the earliest possible time, as to whether suppliers are in need of assistance to locate and contact subcontractors. If such assistance is desired, the supplier will be requested to indicate (1) the industry, craft, process or component item in or for which he desires subcontractors in connection with the contract awarded or to be awarded, (2) any restrictions as to general area in which subcontractors should be located.

(c) Purchasing offices will prepare and forward single copies of synopses of contract awards to each of the addressees listed below, by air mail, before the close of business at the end of each week. If past experience indicates that ordinary mail will insure Monday delivery to any addressee, ordinary mail will be used.

(d) Addressees to be furnished with synopses of contract awards are:

(1) Procurement Information Center, Office of the Under Secretary of the Army, Old Post Office Building, Twelfth and Pennsylvania Avenue NW., Washington 25, D. C.

(2) Small Business Division, U. S. Department of Commerce, Room 6427, Commerce Building, Washington 25, D. C.

(3) Administrative Office, U. S. Department of Commerce, Room 1014, 610 South Canal Street, Chicago 7, Illinois.

(e) A copy of each synopsis of contract awards shall be made available for examination by interested persons at each purchasing office.

(f) Where a contractor indicates need for assistance in letting subcontracts, a synopsis of award of the prime contract will be repeated and forwarded to the addressees listed above each week, as long as the need continues for such assistance. The purchasing office will aggressively encourage the contractor to employ this medium of publicizing his subcontracting requirements.

§ 590.355–4 *Contents of synopsis of contract awards.* Synopses of contract awards will contain the following information: (a) Name of purchasing office (b) name and address of the contractor (c) brief description of the commodity or service being procured; description will be clear, concise and abbreviated wherever possible, with a minimum number of words for description but sufficient for understanding by interested persons; it will consist of a minimum general description of the item or service procured and will include, when appropriate, commonly used names of supply items, basic materials from which fabricated, general size or dimensions, etc., but will not include information which, in the opinion of the purchasing office may constitute a security risk (d) statement of industries, crafts, processes or component items in or for which subcontracts are available and subcontractors are desired by prime contractors, in substantially the following form: "Prime contractor has subcontracts open for the following: (Insert here industries, crafts, processes or component item applicable)", (insert following clause where applicable) and desires that subcontractors be located in (insert here general area indicated by prime contractor, if any, such as: Southeast states, New England, West Coast, etc.).

4. Section 590.810 is added as follows:

§ 590.810 *Retention of Procurement Action Reports.* Individual Procurement Action Report (DD Form 350) and Procurement Action Report—Monthly Summary (DA AGO Form 377) or comparable forms submitted by contracting officers to higher headquarters indicating the status of Procurement Actions may be destroyed after six (6) months. Such material is considered nonrecord material under the provisions of paragraph 93, SR 345–920–1 (Special regulation pertaining to disposition of records).

PART 591—PROCUREMENT BY FORMAL ADVERTISING

Part 591 is amended by rescinding §§ 591.451 through 591.451–3 and substituting the following § 591.451 in lieu thereof:

§ 591.451 *Synopses of awards.* Synopses of awards of formally advertised contracts will be prepared and distributed as required by §§ 590.355 to 590.–355–4 of this subchapter.

PART 592—PROCUREMENT BY NEGOTIATION

Part 592 is amended as indicated below:

1. Rescind § 592.151–2 and substitute the following in lieu thereof:

§ 592.151–2 *Synopses of awards.* Synopses of contract awards of negotiated contracts will be prepared and distributed as required by §§ 590.355 to 590.–355–4 of this subchapter.

2. Rescind § 592.408 and substitute the following in lieu thereof:

§ 592.408 *Letter contract.* The primary purpose of authorizing the use of letter contracts preliminary to definitive contracts is to expedite the beginning of production so that deliveries will be obtained in time to meet phased requirements, particularly in support of troops in combat and the expansion of the Armed Forces. It is essential, however, that letter contracts be converted to definitive contracts at the earliest practicable date.

3. Rescind § 592.408–3 and substitute the following in lieu thereof:

§ 592.408–3 *Supersedure by definitive contract.* (a) Letter contracts will be superseded by definitive contracts at the earliest practicable date. Consequently, definitive contracts will be executed promptly after proper consideration has been given, when possible, to such factors as:

(1) Reasonable assurance that the terms reached are the minimum acceptable to the contractor and are fair both to the Government and the contractor;

(2) Relationship to precedents as to price redetermination and profit established by similar contracts with Army, Navy, Air Force, or other Government agencies;

(3) The effect on future contract negotiation with the contractor; and

(4) The primary importance of meeting phased delivery requirements.

(b) In converting letter contracts to definitive contracts, the pricing elements involved in profit rates will be carefully evaluated: profit rates of 8 percent (of cost) or higher will be reviewed with particular care, and all definitive contracts containing a profit rate of 10 percent or higher will be submitted to the Assistant Chief of Staff, G–4, Department of the Army (Attn.: Chief, Current Procurement Branch) for review and referral to the Under Secretary of the Army for approval, regardless of the contract amount involved.

PART 596—CONTRACT CLAUSES AND FORMS

Part 596 is amended by rescinding § 596.103–11 and substituting the following in lieu thereof:

§ 596.103–11 *Default*—(a) *Application.* (1) If the contractor (i) fails to make delivery of the supplies or to perform the services within the time specified in the contract, or (ii) fails to perform any provision of the contract other than the delivery schedules, or (iii) so fails to make progress as to endanger performance of his contract in accordance with the terms thereof, the contractor may be said to be in default.

(2) Defaults may be excusable or nonexcusable. Defaults are excusable when they arise out of the causes set forth in clause (b) of the Default article (see § 406.103–11) of this title).

(3) Paragraphs (b) through (i) of this section apply to contracts other than those under the Federal Supply Schedule. Paragraph (j) of this section applies to contracts under the Federal Supply Schedule.

(b) *Termination of contracts by agreement.* (1) When default occurs in the performance of a contract, the contract may be terminated by supplemental agreement with the contractor: *Provided:*

(i) If the default is not excusable, that the contractor agrees to pay excess costs

incurred in repurchase and damages resulting from delay.

(ii) If the default is excusable, that the Contracting Officer makes findings of fact to that effect and the contractor agrees to termination without cost to the Government.

(iii) If a performance bond has been filed, that the surety thereon is a party to the supplemental agreement.

(c) *Completion of contract after default.* (1) In the event that default has occurred in a contract by reason of nonexcusable delay, which results in actual damage to the Government, and the Contracting Officer deems it to be in the best interests of the Government to permit the contractor to complete performance of the contract, a supplemental agreement may be entered into providing for completion of performance notwithstanding such default, if the contractor assumes liability for the actual damages. The surety, if any, should either be a party to the supplemental agreement or should execute and deliver to the Contracting Officer, simultaneously with the execution of a supplemental agreement with the contractor, a written consent extending the terms of any performance bond to cover such supplemental agreement. The agreement should distinctly state that the Government's rights to accrued damages are not thereby waived.

(2) If a performance bond has been filed in connection with the contract, or otherwise, and action outlined in subparagraph (1) of this paragraph is not deemed to be in the best interests of the Government, an agreement may be entered into with the surety, providing for completion of performance of the contract upon the same terms and conditions as the original contract, less actual damages resulting from delay, and further providing for payment directly to the surety. Such agreement should clearly state that all rights against the contractor and the surety are reserved so far as the surety does not cure defaults of the contractor. The contractor will be furnished promptly with a findings of fact as indicated in paragraph (d) (2) of this section, adapting subdivision (iv) of that paragraph to the action taken.

(d) *Termination pursuant to Default Article.* (1) (i) Where the contractor and/or his surety elect not to complete performance of the contract after being afforded an opportunity to do so (see paragraph (c) of this section) or (ii) when the contracting officer deems it to be in the best interests of the Government to terminate the contract following default thereof, and the default consists of the failure on the part of the contractor to make delivery of the supplies or to perform the services within the time specified in the contract or any extension thereof, the procedure set forth in subparagraphs (2) to (4) of this paragraph will be followed.

(2) The contractor will be given notice in writing which will include the following:

(i) Reference to contract number, date, and portion of contract as to which his right to proceed is terminated.

(ii) That his right to proceed further with performance under the contract is thereby terminated.

(iii) A specific description of the acts or omissions constituting the default.

(iv) That the supplies, services or construction required by the contract will be procured in the open market against his account, and that he will be held liable for any excess costs.

(v) That the Government reserves all rights and remedies provided by law or under the contract, in addition to charging excess costs. (Where liquidated damages are provided for, substitute a reference thereto.)

(vi) That the notice constitutes a findings of fact pursuant to the Disputes article from which he has the right of appeal as specified therein.

(3) The same distribution will be made of the termination notice as was made of the contractual documents. In addition thereto, a copy will be furnished to the Disbursing Officer who will be advised to withhold further payments to the contractor pending additional instructions.

(4) Notice of termination of a contract will be furnished to the contractor within a reasonable time after the default occurs, or after efforts to arrange for compliance with the terms of the contract have resulted in failure. This requirement must be complied with in order to fulfill the Government's obligation to mitigate damages.

(5) If the default consists of the failure to perform any provision of the contract other than as specified in subparagraph (1) of this paragraph, or if the contractor so fails to make progress as to endanger performance of the contract, a notice of termination will not be issued unless the Contracting Officer has previously notified the contractor in writing of the specific default or failure, and has by the terms of such notice afforded the contractor an opportunity to cure such default or failure within a period of time which shall be not less than 10 days from the date of receipt of such notice. The notice of termination in such cases will refer to the notice of default.

(e) *Repurchase against contractor's account.* (1) In the event of termination of a contract for default, the Government is under a duty to mitigate damages.

(2) Accordingly, where the supplies or services are still required after termination, repurchase will be made against the contractor's account either from other contractors or Government facilities (i) as soon as possible after termination, (ii) of supplies or services similar to those called for in the contract, (iii) at as reasonable a price as practicable considering the quantity and quality required by the Government and the time within which the supplies or services are required; (iv) in construction contracts, the work will be let according to the same plans and specifications to such other responsible contractor who offers the lowest price or it will be completed by Government plant and hired labor.

(f) *Action by Contracting Officer.* (1) If repurchase will not be effected, compute actual or liquidated damages (when clause contained in § 406.105–5 of this title is used), and make written demand upon contractor for the amount thereof.

(2) If repurchase is effected, compute excess costs and actual (or liquidated damages, when clause contained in § 406.105–5 of this title is used), and make written demand upon the contractor for the total amount.

(3) Forward the report required by paragraph (g) of this section, together with any checks, money orders, or funds in any form received from the contractor. No report is required where the contract is unnumbered and no repurchase, or actual or liquidated damages are involved.

(g) *Report of Termination of Contract.* A Report of Termination of Contract will be furnished to the Disbursing Office, in quadruplicate, within thirty (30) days after such termination, setting forth the following information:

(1) Procuring activity involved.

(2) Fiscal year of procurement involved.

(3) Original appropriation involved.

(4) With respect to terminated contract:

(i) Name and address of contractor.

(ii) Contract or P. O. number.

(iii) Date of award or execution.

(iv) Contract item and specification.

(v) Contract quantity.

(vi) Unit price.

(vii) Quantity and/or time payment discount.

(viii) Total contract cost.

(ix) Status of payments and deliveries under contract, including voucher citations.

(x) Statement of amount withheld, if any.

(xi) Statement of actual or liquidated damages accrued, if any (other than excess costs on repurchase).

(xii) Description of default resulting in termination.

(5) Statement as to whether repurchase has been or will be effected. If applicable, a negative reply is desired, together with statement of reasons why repurchase has not been or will not be effected. If repurchase is effected subsequent to date of report, a follow-up report will be forwarded.

(6) If repurchase is effected, set forth information with respect to repurchase contract, adapting subparagraphs (4) (i) to (ix) of this paragraph to such repurchase contract.

(7) State amount of excess cost (subparagraph (6) (viii) of this paragraph minus subparagraph (4) (viii) of this paragraph).

(8) State total amount of excess cost and actual or liquidated damages.

(9) Whether efforts have been made to collect the amount set forth in subparagraph (8) of this paragraph. If collected, forward the check, money order or funds to Disbursing Officer with report. If uncollectible, a statement to that effect.

(10) Attach 4 copies of the following:

(i) Terminated contract.

(ii) Repurchase contract, if any.

(iii) Notice of termination.

(iv) Notice to cure default, if any (see paragraph (d) (5) of this section).

(v) Computation of liquidated or actual damages.

(vi) Correspondence from contracting officer to delinquent contractor relative to the indebtedness.

(11) Attach original and 3 copies of correspondence from delinquent contractor to contracting officer relative to indebtedness.

(12) Attach 4 copies of any other papers or documents deemed to be required as evidence for prosecution of claim or litigation against defaulting contractor.

(h) *Amount chargeable against defaulting contractor.* A purchase or purchases against the account of a defaulting contractor must not exceed the quantity originally ordered with consideration given, of course, to the variation clause, if any, in the contract, and must be secured if practicable on the same unit basis, such as each, dozen, pound. However, this does not preclude the Government from entering into one contract with the completing contractor which includes additional needed supplies provided that the excess costs to be charged against the account of the defaulting contractor are determined as provided in the preceding sentence of this paragraph. In any event, actual damages (or liquidated damages, if clause contained in § 406.105–5 of this title is used) resulting from delay, may be assessed in addition to excess costs.

(i) *Action by Disbursing Officer.* (1) Upon receipt of the Report of Termination of Contract, the Disbursing Officer will proceed, when necessary, to effect collection of excess costs and actual or liquidated damages by deduction of the amount thereof from any funds payable to the defaulting contractor.

(2) If the entire amount is collected by set-off, such action will be indicated by indorsement to the Report of Terminated Contract, together with applicable voucher citations, and a statement of the name of the Disbursing Officer and D. O. Symbol No. The Report and indorsement will be disposed of as follows:

(i) The original and quadruplicate copy will be transmitted to the Chief of Finance, for forwarding of the original to the General Accounting Office.

(ii) The duplicate copy will be filed in the Office of the Disbursing Officer.

(iii) The triplicate copy will be sent to the Contracting Officer marked for information only.

(3) In the event that collection of excess cost and/or damages is effected by means of contractor's check, money order, cash, or any means other than set-off against another account due to the contractor, the Disbursing Officer will in addition to taking action required by subparagraph (2) of this paragraph, submit together with the Report, the required number of copies of Standard Form No. 1044 (Schedule of Collections), properly completed in accordance with AR 35–3510, dated May 2, 1951.

(4) If the Disbursing Officer finds it impracticable to collect the entire amount due, or if no repurchase, excess costs or damages are involved, he will indicate his action and recommendation by indorsement to the Report of Termination of Contract, and distribute the report and indorsement as follows:

(i) The original and quadruplicate copy to the Chief of Finance, for forwarding of the original to the General Accounting Office.

(ii) The duplicate copy will be filed in the office of the Disbursing Officer.

(iii) The triplicate copy will be transmitted to the Contracting Officer and, where applicable, with a notation to the effect that the excess costs and/or damages could not be collected and that the matter has been reported to the Chief of Finance, for reference to the General Accounting Office.

(j) *Action in connection with Federal Supply Schedule Contracts*—(1) *Action by Contracting Officer*—(i) *Ordering office.* Before declaring a contractor in default, it is suggested that ordinarily ordering offices should notify the contractor in writing that unless satisfactory performance occurs by a specified date, which should allow a reasonable time for performance, his right to proceed further under the purchase order will be considered terminated and he will be held liable for any excess costs resulting from purchasing the supplies or services elsewhere. This step would not be taken ordinarily when the default involves an attempted fraud on the United States, or when it obviously would be futile, as for example, when the contractor has already declined to perform. Where excess costs are anticipated, the ordering office may likewise decide to withhold sufficient funds due the contractor as offset security. Ordering offices will endeavor to minimize excess costs to be charged against the contractor and to collect, by check or set-off, excess costs owed. Such collected funds are usually for deposit into the Treasury as miscellaneous receipts.

(ii) *Federal Supply Service.* Where ordering offices are notified by the Federal Supply Service that it has declared the contractor in default, ordering offices will thereafter refuse to accept further performance by the contractor or place further purchase orders with him. Ordering offices will thereafter purchase against the account of the contractor from replacing contractors designated by the Federal Supply Service or in such other manner as directed by the Federal Supply Service.

(2) *Reports.* Ordering offices will report to the Purchase Branch, Federal Supply Service, Washington 25, D. C., the details concerning all material instances of unsatisfactory performance by the contractor, whether or not properly adjusted and settled. Ordering offices will also report, as may be directed by the Federal Supply Service, all purchases made against the account of a contractor placed in default by the Federal Supply Service.

(k) *Excusable delay.* Where, following termination for default, it is subsequently determined that the contractor's delay was excusable, the procedure outlined in clause (e) of the Default article (see § 406.103–11 of this title) will be followed.

(l) *Applicability to oversea commands.* This section is applicable to oversea commands (so far as it is not in conflict with local law applicable to the contract), except that reports required by paragraphs (f) and (g) of this section will be furnished in quintuplicate and will be forwarded to the Officer of the oversea command, who will thereafter forward the original and one copy to the Chief of Finance, Department of the Army.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 22, Amendment 15]

CPR 22—MANUFACTURERS' GENERAL CEILING PRICE REGULATION

EXPANSION OF EXEMPTION OF SOFT SURFACE FLOOR COVERINGS

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105) and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 15 to Ceiling Price Regulation 22 is hereby issued.

STATEMENT OF CONSIDERATIONS

Because of the spiraling cost of imported wool, manufacturers who normally make carpets exclusively of wool or synthetic fibers are being forced to turn to substitute materials. Accordingly, Supplementary Regulation 11 to the General Ceiling Price Regulation is being broadened simultaneously with the issuance of this amendment to cover these substitute materials. Supplementary Regulation 11 to the General Ceiling Price Regulation as revised will embrace all floor coverings manufactured in the weaves, or by the manufacturing processes, customarily employed for carpets made of wool, regardless of the nature of the material actually used. This requires a corresponding change in Ceiling Price Regulation 22 so as to exclude from it, not only floor coverings made of wool and synthetic yarn, as it does at present, but also the floor coverings brought within Supplementary Regulation 11 by the new revision.

AMENDATORY PROVISIONS

Ceiling Price Regulation 22 is amended by changing subparagraph (3) of paragraph (e) of Appendix A to read as follows:

(3) Soft surface floor coverings which are either entirely made of wool or which, regardless of what material is employed, are woven on a chenille, wilton, velvet or axminster loom or are produced by the manufacturing process that produces punched felt. Ceiling prices for these floor coverings are established by Supplementary Regulation

11, Revision 2, to the General Ceiling Price Regulation.

(Sec. 704, Pub. Law 774, 81st Cong.)

Effective date. This amendment shall become effective July 2, 1951.

MICHAEL V. DISALLE,
Director of Price Stabilization.

JULY 2, 1951.

[General Ceiling Price Regulation, Supplementary Regulation 11, Revision 2]

GCPR, SR 11, REV. 2—SOFT SURFACE FLOOR COVERINGS

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this revision of Supplementary Regulation No. 11 (16 F. R. 3830) to the General Ceiling Price Regulation (16 F. R. 808) is hereby issued.

STATEMENT OF CONSIDERATIONS

The wool carpeting manufactured in this country is made from wool imported from abroad. This imported wool is not subject to price control and has doubled in price since November, 1950. Since wool constitutes half the cost of the finished carpet, recognition has necessarily had to be given to its spiralling cost in fixing ceiling prices for carpet manufacturers. Less than two months after the issuance of the General Ceiling Price Regulation, this Office found it necessary because of the continued mounting cost of imported wool to permit manufacturers of carpeting to adjust upward the prices they had in effect during December, 1950, and January, 1951. This adjustment was designed to compensate for the increases in cost of raw wool and direct labor to that date and for the increases in cost up to December 31, 1950, of the other raw materials, such as cotton, jute and rayon, employed by carpet manufacturers. The result of this upward adjustment in selling prices necessitated by rising costs has been to raise carpet prices to the point where consumers who ordinarily would be in the market for wool carpeting find themselves unable to purchase at the prevailing prices. In order to recover their customary market, carpet manufacturers who under normal conditions manufacture only all-wool carpets are finding themselves forced to turn to substitute materials which will permit them to produce a product whose selling price will be in line with the buying habits and ability to pay of the consuming public. It is desirable that encouragement be given manufacturers to utilize such substitute and lower cost materials, in place of wool, since only in that way will lower price carpeting be kept on the market.

The primary purpose of this revision of Supplementary Regulation 11 is to provide a method for pricing the new carpets made of various substitute yarns. The fairest and most equitable method for pricing these new carpets is by reference to the ceiling prices of the all-wool carpets for which they are being substituted. In other regulations issued by this Office, where a new product is priced by reference to the ceiling price of an older one, the principle has been established that a new product is priced by applying to its direct cost the same percentage markup as its manufacturer would enjoy on the one used as the criterion. This is the principle adopted in this regulation for the bulk of the new carpetings being priced.

However, it was urged by representatives of the carpet industry that while this method is generally fair, here, where the substitute materials in the new product are markedly lower in cost than the materials customarily employed, this method of pricing new commodities would seriously reduce the manufacturers' dollar operating margin and would discourage the production of low end merchandise. Industry representatives have pointed out that the use of substitute materials will not affect any of their other costs of operation, and, in particular their overhead cost, and that they will be unable to produce and sell inexpensive carpeting unless they are permitted to sell this carpeting at a figure high enough to cover their normal operating expenses. To eliminate any obstacles to the production of low end merchandise, this regulation permits the manufacturer the same dollar operating margin on low price carpeting as he enjoyed on certain all-wool carpeting. It is believed that this will have the effect of making production of inexpensive carpeting attractive to manufacturers and of stimulating the search for substitute materials to replace imported wool. The selling prices below which the manufacturer will be permitted to retain his normal dollar markup have been fixed on an industry basis by taking the low end constituting approximately 20 percent of total industry production. Experience under the regulation will soon show whether or not the cut-off points selected are proper or not. Those cut-off points may be reexamined and changed in the light of such experience.

While, for the most part, the use of fibres other than wool for the production of carpeting on heavy carpet looms is the result of the various dislocations and shortages created by the present emergency, some manufacturers, even prior to the Korean incident had turned to such alternate fibres. In order to establish prices for all manufacturers on the same basis, regardless of when production of carpeting made of cotton or other fibres in place of wool started, the regulation requires that all carpeting be priced by reference to the ceiling prices of an all-wool product.

Carpet manufacturers are required to price by comparison to an all-wool carpeting because this is the product which they normally and customarily made and which is basic to the industry. While there are manufacturers who normally make only carpets of other natural fibres, they do so on different and lighter looms from those employed by manufacturers of wool carpets. Consequently, it is not believed that there are any manufacturers covered by this regulation for whom an all-wool carpeting is not the most representative of their pre-Korean products.

Supplementary Regulation 11 as originally issued, permitted retailers and other intermediate distributors only to "pass through" to the next buyer so much of the cost of a floor covering to them as was the result of the higher price of imported wool since the issuance of the General Ceiling Price Regulation. Retailers and other sellers to the ultimate consumer were not permitted to take their usual mark-up on this element of cost. The purpose was to hold to an absolute minimum the unavoidable increase in the cost of a finished product consequent on a rise in raw material costs. The retailer, it is believed, was adequately compensated for handling the merchandise by continuing to receive his usual margin on what would have been the cost of the merchandise to him but for the dramatic increase in the cost of imported wool.

To the extent, however, that manufacturers now turn to cheaper substitute materials for wool examination of the "pass through" provision is necessary. The retailer it is to be assumed will again be handling a large number of low cost units involving greater expense per unit. Moreover, encouragement should be given retailers to handle low end floor coverings just as it is given manufacturers to produce such coverings. Consequently the "pass through" has been eliminated on the same low end items on which the manufacturer is permitted to retain his dollar margin of profit.

On high cost floor coverings made of wool or of a blend of wool and synthetic materials the initial justification for the "pass through" is still present. To the extent that wool or a synthetic material is used, the manufacturer's selling price on a floor covering reflects the sharp rise in the cost of these raw materials since the beginning of this year. Protection of the consumer demands that the retailer be permitted only to "pass through" such higher cost of such raw materials and not be permitted to pyramid it further by taking his usual margin.

This is accomplished by extending to all higher cost floor coverings containing wool or synthetic material the division between the "basic price" and the "permitted increase" first applied to floor coverings dealt in during the period from December 19, 1950 to January 15, 1951. Sellers, who calculate their ceiling price by taking their normal markup on the cost of the merchandise to them, are not permitted to include the "permitted increase" either in figuring the cost of the floor covering to them or in calculating the amount of their markup but add it to the ceiling otherwise determined.

Normal industry practices are recognized in the provisions governing the ceiling prices of distributors. Wholesalers, who normally buy at a discount from the manufacturer and sell at the same price, are given the same ceiling price of the manufacturer.

Because the General Ceiling Price Regulation to which this is supplementary is a freeze regulation, it is inevitable that it caught and froze accidental inequities. Information has been submitted to this Office which indicated that during the period fixed by this supplementary regulation as a base period, the prices of certain manufacturers were out of line with those of their competitors. Since it is not the intention of this Office to disturb existing business patterns, provision is made in this regulation for the adjustment of prices of any seller who, due to special circumstances, was not in his normal competitive relationship during the base period.

In the judgment of the Director of Price Stabilization the ceiling prices established by this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950.

So far as practicable the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in the furtherance of the objectives of the Defense Production Act of 1950, and to relevant factors of general applicability.

Prior to the issuance of this revision to SR 11, there has been repeated consultation with industry representatives. Representatives of this Office have met on April 27, May 10, May 11, and May 18, 1951 with a special sub-committee appointed by the Industry Advisory Committee on Soft Surface Floor Coverings. This sub-committee includes representatives of companies which account for approximately sixty per cent of the total production of soft surface floor coverings affected by this supplementary regulation. The recommendations made by this subcommittee have been given serious consideration in the formulation of this regulation.

REGULATORY PROVISIONS

Sec.

1. What this revised supplementary regulation does.
2. Ceiling prices on sales by a manufacturer of a floor covering of wool or synthetic material dealt in during the base period.
3. Ceiling prices on sales by a manufacturer of a floor covering which cannot be priced under section 2 of this regulation.
4. Ceiling prices on sales by a manufacturer of a floor covering which cannot be priced under either section 2 or section 3 of this regulation.
5. Ceiling prices on sales by a wholesaler.
6. Manufacturers and wholesalers who cannot price under other sections.
7. Sales to a wholesaler.
8. Notification of "permitted increase".
9. Addition of "permitted increase".
10. Retention of present ceilings.
11. Adjustment of a manufacturer's ceiling prices.
12. Modification of ceiling prices by the Director of Price Stabilization.

AUTHORITY: Sections 1 to 13 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong.; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 C. F. R. 1950 Supp.

SECTION 1. *What this revised supplementary regulation does.* This revised supplementary regulation establishes ceiling prices for sales of soft surface floor coverings which are either entirely made of wool or which are within the following categories: Chenille, wilton, velvet, axminster and punched felt. It does not establish ceiling prices for sales at retail, but does contain a provision affecting the determination of retail ceiling prices. Insofar as sales of floor coverings covered by this regulation are concerned, this regulation supersedes all regulations previously issued by OPS, including CPR 22 and the previous Revision 1 of Supplementary Regulation 11, except that all provisions of the General Ceiling Price Regulation, not inconsistent with the provisions of this regulation, remain in effect, and apply to floor coverings covered by this regulation.

SEC. 2. *Ceiling prices on sales by a manufacturer of a floor covering of wool or synthetic material dealt in during the base period.* If you are a manufacturer, your ceiling price for any unit of floor covering whose face is entirely made of wool, of synthetic materials, or of a blend of both, and which you sold or offered for sale during the period from December 19, 1950 to January 15, 1951, is your mill or zone price for the applicable zone for that unit of floor covering contained in your price list in effect for deliveries during that period, plus 15 percent of your mill price.

SEC. 3. *Ceiling prices on sales by a manufacturer of a floor covering which cannot be priced under section 2 of this regulation—(a) Punched felt, axminster, velvet and wilton floor coverings whose face is not 100 percent wool.* (1) If you are a manufacturer, you determine your ceiling price for a unit of punched felt, axminster, velvet or wilton floor covering whose face is not entirely made of wool, and for which you have no price under section 2 of this regulation, by the method outlined in subparagraph (2) of this paragraph, provided that the ceiling price so determined is no higher than: $2.10 a square yard at the mill for a unit of punched felt floor covering; $5.50 a square yard at the mill for a unit of axminster floor covering; $7.50 a square yard at the mill for a unit of velvet floor covering; and $9.50 a square yard at the mill for a unit of wilton floor covering.

(2) First, calculate the difference between the current unit direct cost of the new unit of floor covering being priced and the current unit direct cost of a "comparison floor covering". Paragraph (d) of this section explains how you select a comparison floor covering. If the current unit direct cost of the unit of floor covering being priced is greater than that of the comparison floor covering, you add the difference to the ceiling price of the comparison floor covering as determined under section 2 of this regulation; the result is your ceiling price for the unit of floor covering being priced. If the current unit direct cost of the unit of floor covering being priced is smaller than that of the comparison floor covering, you subtract the difference from the ceiling price of the comparison floor covering; the result is your ceiling price on the unit of floor covering being priced.

(b) *All other floor coverings (not in new categories nor sold to a new class of purchaser).* If you are a manufacturer, you determine your ceiling price for a unit of floor covering, other than one for which you are able to determine a ceiling price under either section 2 or paragraph (a) of this section, including a floor covering whose face is entirely made of wool, a chenille floor covering and a punched felt, axminster, velvet or wilton floor covering which cannot be priced under paragraph (a) of this section, by applying to the current unit direct cost of that floor covering the percentage markup over the current unit direct cost of a "comparison floor covering" (using your ceiling price for the comparison floor covering determined under section 2 of this regulation).

(c) *Current unit direct cost.* "Current unit direct cost" as used in this section means the sum of the amounts (not higher than permitted by law) which it costs you, or if you are not currently producing it, would cost you for direct labor and materials to produce the floor covering at the time you use the pricing method provided by this section. Current unit direct materials cost shall be computed upon the basis of current replacement prices for materials and current unit direct labor cost shall be computed upon the basis of current wage rates for direct labor. The method used in computing current unit direct materials cost and current unit direct labor cost for the floor covering being priced and for the comparison floor covering shall be the same in every respect. The computation should be made on square yard basis.

(d) *Selection of a comparison floor covering.* The comparison floor covering to be used must be in the same category as the floor covering being priced; it must be a floor covering whose face is entirely made of wool; and must be one which you sold or offered for sale during the period from December 19, 1950 to January 15, 1951. The comparison floor covering used shall be the first of the following available:

(1) A floor covering that you are now manufacturing differing from the floor covering being priced only by reason of a minor change in color or pattern.

(2) A floor covering that you are no longer manufacturing differing from the floor covering being priced only by reason of a minor change in color or pattern.

(3) A floor covering that you are now manufacturing which is most nearly like the floor covering being priced and which has a current unit direct cost the same or lower than that of the floor covering being priced.

(4) A floor covering that you are no longer manufacturing which is most nearly like the floor covering being priced and whose current unit direct cost would be the same or lower than that of the floor covering being priced.

(5) A floor covering that you are now manufacturing which is most nearly like the floor covering being priced and whose current unit direct cost is next higher to that of the floor covering being priced.

(6) A floor covering that you are no longer manufacturing which is most nearly like the floor covering being priced and whose current unit direct cost would be next higher to that of the floor covering being priced.

(e) *Required report.* Before selling any floor covering for which you have determined a ceiling price under this section, you must file the report, required by paragraph (f) of this section on OPS Public Form No. 30, with the Director of Price Stabilization, Washington 25, D. C., and the sample required by paragraph (g) of this section. Copies of the form may be obtained upon request to the Consumer Durable Goods Division, Office of Price Stabilization, Washington 25, D. C. You may not sell the floor covering until 15 days after mailing your report and either the sample or a request for its waiver; thereafter, you may sell the floor covering at your proposed ceiling price unless and until notified by the Director of Price Stabilization that your proposed ceiling price has been disapproved or that more information is required. In the event that more information is required you may not sell until 15 days after mailing the additional information.

(f) *Information required in report.* Your report should state the name and address of your company and the specifications of the floor covering being priced which shall include the following:

The category.
Your name, number or other designation of the article.
The pitch of the article.
The number of wires or rows, per inch.
The height of the pile, or the size of the wires, or the cut tuft length.
The number of frames.
The number of shots in the weave.
With respect to the pile yarn: The material and the weight per square yard.
With respect to the back, the chain, the stuffer, and the filling: The material and the weight per square yard.
The total weight per square yard.

In addition, your report should give your name, number or other designation of the comparison floor covering, the category in which it falls and should explain why you have selected it as a comparison floor covering. It should show a detailed breakdown of the current unit direct cost, computed on a square yard basis, of the comparison floor covering and of the floor covering being priced; the ceiling price of the comparison floor covering; the proposed ceiling price for the floor covering being priced. A report relating to a floor covering being priced under paragraph (b) of this section should also show the gross dollar margin per square yard and the percentage markup over current unit direct cost of the comparison floor covering. Your ceiling prices, when determined, shall reflect your customary price differentials, including discounts, allowances, premiums and extras, based upon differences in classes or location of purchasers, or in terms and conditions of sale or delivery.

(g) *Sample.* You should submit with your report a 9" x 12" sample of the floor covering being priced and a 9" x 12" sample of the comparison floor covering. The Director of Price Stabilization may waive this sample requirement at your request. A request for such waiver should either be submitted with your report or prior to filing it and should explain why the request is being made.

SEC. 4. *Ceiling prices on sales by a manufacturer of a floor covering which cannot be priced under either section 2 or section 3 of this regulation.* If you are a manufacturer and you cannot determine ceiling price under either section 2 or section 3 of this regulation for a unit of floor covering, your ceiling price for that unit of floor covering is the same as the ceiling price of your most closely competitive seller selling a comparable unit of floor covering to the same class of purchaser. A ceiling price so determined must be in line with the level of ceiling prices otherwise established by this regulation. You will be unable to price a floor covering under section 3 of this regulation, if during the period from December 19, 1950 to January 15, 1951 you neither sold nor offered for sale any comparison floor covering entirely made of wool in the same category as the floor covering you wish to price. You also will be unable to use section 3 of this regulation if you need to determine your ceiling price to a new class of purchaser.

(b) *Required report.* Before selling any unit of floor covering for which you have determined a ceiling price under this section, you must file the report required by paragraph (c) of this section with the Director of Price Stabilization, Washington 25, D. C., and the sample required by paragraph (d) of this section. You may not sell the floor covering until 15 days after mailing your report and the sample; thereafter, you may sell the floor covering at your proposed ceiling price unless and until notified by the Director of Price Stabilization that your proposed ceiling price has been disapproved or that more information is required. In the event that more information is required you may not sell until 15 days after mailing the additional information.

(c) *Information required in report.* Your report should state the name and address of your company; the category in which the floor covering to be priced is; the most comparable categories dealt in by you during the period from December 19, 1950 to January 15, 1951; the name and address of your most closely competitive seller; a statement of his ceiling price on a comparable floor covering; his name or number for the comparable floor covering and a description of it; his customary price differentials; your proposed ceiling price, and, if you are selling to an entirely new class of purchaser, a description of such class of purchaser. Your report should also give the same specifications for the floor covering you are pricing as are listed in section 3 (f) of this regulation. If you are starting a new business, you should include a statement whether you or the principal owner of your business are now or during the past 12 months have been engaged in any capacity in the same or a similar business at any other establishment, and, if so, the trade name and address of each such establishment.

(d) *Sample.* You should submit with your report a 9" x 12" sample of the floor covering to be priced and a 9" x 12" sample of the comparable unit of floor covering referred to in the report.

SEC. 5. *Ceiling prices on sales by a wholesaler.* If you are a wholesaler, your ceiling price for any unit of floor covering covered by this regulation shall be the same as the ceiling price of the manufacturer of such unit of floor covering to the same class of purchaser.

SEC. 6. *Manufacturers and wholesalers who cannot price under other sections.* (a) If you claim that you are unable to determine your ceiling price for a unit of floor covering under any of the foregoing provisions of this regulation, you may apply in writing to the Director of Price Stabilization, Washington 25, D. C. for the establishment of a ceiling price.

(b) Your application should contain your proposed ceiling price, an explanation of why you are unable to determine your ceiling price under any other provision of this regulation and of the method used by you to determine your proposed ceiling price. If you are a manufacturer, your report should state the name and address of your company, the specifications and the current unit direct cost, computed on a square yard basis, of the unit of floor covering being priced. A 9" x 12" sample of the floor covering being priced should be submitted with your report. You may not sell the floor covering until the Director of Price Stabilization notifies you, in writing, of your ceiling price.

SEC. 7. *Sales to a wholesaler.* On any sale to a wholesaler no smaller percentage of discount shall be given than the discount in effect with the seller during the period from December 19, 1950 to January 15, 1951.

SEC. 8. *Notification of "permitted increase."* Any manufacturer or wholesaler of floor covering must break down his invoice price into two parts to show the "basic price" and the "permitted increase" on any sale except to a wholesaler of a unit of floor covering which contains any wool or synthetic material and whose ceiling price is not the same as its basic price as defined in section 13 of this regulation. To each invoice rendered in conection with a sale to a retailer or interior decorator shall be affixed (by rubber stamp or other convenient means) this statement:

The amount on this invoice shown as the "basic price" is the cost on which you apply your markup under OPS Ceiling Price Regulation 7. The amount shown as "permitted increase" may be added to your price after applying your mark-up. The total becomes your ceiling price.

SEC. 9. *Addition of "permitted increase."* (a) If you are a seller, other than a manufacturer or wholesaler, and you determine your ceiling price for a unit of floor covering under section 3 of the General Ceiling Price Regulation, you may add to your ceiling price so established an amount equal to the "permitted increase." The result becomes your new ceiling price.

(b) If you are a seller, other than a manufacturer or wholesaler, and you determine your ceiling price for a unit of floor covering under section 5 of the General Ceiling Price Regulation and either your ceiling price on the comparison floor covering or the net invoice cost to you of the floor covering being priced includes a "permitted increase", such "permitted increase" should be ignored in making your calculation. Thus, if both your ceiling price for the comparison floor covering and the net invoice cost of the floor covering being priced include a permitted increase, you must treat the "permitted increase" as follows:

(1) First, subtract from your ceiling price on the comparison floor covering the "permitted increase".

(2) Next subtract from the result of paragraph (a) of this section, the "basic price" of the comparison floor covering. This will give you the dollar margin over cost of the comparison floor covering.

(3) Divide this dollar margin by the "basic price" of the comparison floor covering. This will give you your percentage mark-up.

(4) Apply this percentage mark-up to the "basic price" of the floor covering being priced. This will give you your dollar mark-up.

(5) Then add to the dollar mark-up the "basic price" and the "permitted increase" on the floor covering being priced. The result is your ceiling price on the unit of the floor covering being priced.

Example: You are pricing a unit of floor covering for which the invoice to you shows a "basic price" of $50.00 and a "permitted increase" of $2.50, the total cost to you being $52.50. Your comparison floor covering had a "basic price" of $60.00 and a "permitted increase" of $9.00. Your ceiling price on the comparison floor covering was $99.00. (1) $99.00 minus $9.00 is $90.00. $90.00 is your ceiling price minus the "permitted increase" of the comparison floor covering. (2) $90.00 minus $60.00 is $30.00. $30.00 is the dollar margin over cost which you received on the comparison floor covering. (3) $30.00 divided by $60.00 is 50 percent. This is the percentage mark-up for the comparison floor covering. (4) 50 percent of $50.00, the "basic price" of the floor covering being priced, is $25.00, your dollar mark-up. (5) $25.00 plus $50.00, the "basic price" plus $2.50, the "permitted increase" is $77.50. This is your ceiling price for the floor covering being priced.

SEC. 10. *Retention of present ceilings.* Until August 1951, you may continue to sell any floor coverings for which you determine your ceiling price under sections 3, 4, 5 or 6 of this regulation and which, prior to the effective date of this regulation, you sold or offered for sale upon the basis of a ceiling price determined under a regulation previously issued by the OPS, at the ceiling price previously determined.

SEC. 11. *Adjustment of a manufacturer's ceiling prices.* The Director of Price Stabilization on an application for adjustment made in accordance with Price Procedural Regulation 1 may adjust your ceiling prices if, because of special circumstances during the period from December 19, 1950 to January 15, 1951, they are abnormally low in relation to the ceiling prices on comparable floor coverings sold by closely competitive manufacturers. An application for such an adjustment should be sent to the Director of Price Stabilization, Washington 25, D. C., and should set forth the facts as to the special circumstances which resulted in your ceiling prices being abnormally low in relation to those of your competitors. It should give the name or number, and the description of the floor coverings on which you are asking a price adjustment; the names and addresses of two of your most closely competitive sellers; a statement of their ceiling prices on floor coverings comparable to those sold by you and their name or number for the comparable floor coverings; and your present ceiling prices and your proposed ceiling prices.

SEC. 12. *Modification of ceiling prices by the Director of Price Stabilization.* The Director of Price Stabilization may at any time disapprove or revise downward ceiling prices proposed to be used or being used under this regulation so as to bring them into line with the level of ceiling prices otherwise established by this regulation.

SEC. 13. *Definitions.*

Basic price. The "basic price" and the manufacturer's ceiling price are the same on every unit of floor covering except one which contains some wool or synthetic material and whose ceiling price at the mill is higher than $2.10 a square yard for a unit of punched felt floor covering; $5.50 a square yard for a unit of axminister floor covering; $7.50 a square yard for a unit of velvet floor covering; and $9.50 a square yard for a unit of wilton floor covering. On a unit of floor covering which contains wool or synthetic material and whose ceiling price at the mill is higher than the amounts named for the types of floor covering referred to above, the "basic price" is the manufacturer's ceiling price minus the "permitted increase."

Category. This term refers to the type of weave, if woven on a loom, such as axminster, wilton, velvet or chenille type of weave, or to the manufacturing process, such as that which produces a punched felt floor covering. A change in the face material does not change the category.

Permitted increase. On a unit of floor covering, whose face is entirely made of wool, of synthetic materials or of a blend of both, the "permitted increase" shall be an amount equal to 13 percent of the manufacturer's ceiling price at the mill. On a unit of floor covering, whose face is made partially of wool, of synthetic materials, or of a blend of both and partially of some other face materials, the "permitted increase" shall be that proportion of 13 percent of the manufacturer's ceiling price at the mill established by this regulation which the cost of wool and synthetic material is to the total cost of face materials.

Unit. This term means the specific article of floor covering sold or offered for sale.

Wholesaler. This term means a person who resells floor coverings as a distributor, jobber, agent or broker, and includes a person who resells floor coverings to both ultimate consumers and others, but does not include a person who regularly purchases floor coverings from the manufacturer at no discount from the manufacturer's price list (with the exception of cash discounts and discounts for seconds, drops, imperfects, trial-runs, remnants, mill ends, or other similar units). This term does not include a decorator supply house or carpet contractor.

Effective date. This revision of Supplementary Regulation 11 to the General Ceiling Price Regulation shall become effective July 2, 1951.

NOTE: The record keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

MICHAEL V. DISALLE,
Director of Price Stabilization.

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-4, as Amended July 1, 1951]

M-4—CONSTRUCTION

This order as amended is found necessary and appropriate to promote the national defense, and is issued pursuant to authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. In the

formulation of this amendment, however, consultation with industry representatives, including trade association representatives, was found to be impracticable due to the necessity for immediate action.

This amendment affects NPA Order M-4 as amended May 11, 1951, as follows: It adds a new paragraph (j) to section 3, a new paragraph (c) to section 4, and amends sections 5, 6, 15, 16, and 17.

As amended, NPA Order M-4 reads as follows:

AUTHORITY: Sections 1 to 17 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* In order to further the purposes of the Defense Production Act of 1950 by conserving critical materials and services needed for the defense program, this order prohibits the commencement of construction of certain types of buildings, structures, and projects unless specific exception is made, or authorization issued, by the National Production Authority. The order allows, within specified limits, small construction jobs, and necessary maintenance and repair of buildings, structures, or projects, and also permits, under specified circumstances, the restoration of buildings, structures, or projects in the event of a disaster, act of God, or an act of war.

SEC. 2. *Policy of the National Production Authority.* In the event that increasing shortages clearly indicate the necessity for such action in the national interest, the National Production Authority may further limit the commencement of construction of additional types of buildings, structures, or projects which do not support the defense effort or increase the Nation's production capacity for defense.

SEC. 3. *Definitions.* For the purpose of this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Construction" means the erection of any building, structure, or project, or addition or extension thereto, or alteration thereof, through the incorporation-in-place on the site of materials which are to be an integral and permanent part of the building, structure, or project.

(c) "Commence construction" means substantial site clearance (including demolition of buildings or structures), preliminary to the start of or incident to the work on a new building, structure, or project; or to incorporate into a building, structure, or project, substantial quantities of materials which are to be an integral and permanent part of such building, structure, or project.

(d) "Construction cost" means the total expense for demolition of existing structures in connection with a new construction, for site preparation, and for building materials, building equipment, and labor and services, used in the construction of the particular building, structure, or project, by whomever spent. It does not include the cost of personal property, or the expense for land acquisition, attorneys, architects, and financing.

(e) "Consumer goods" means articles or commodities that directly satisfy human wants or desires, and which are capable of use without further processing (for example, clothing, food, furniture, floor covering, household appliances, motor vehicles, etc.). They are distinguished from capital goods (for example, dynamos, industrial ovens, generators, etc.). They are distinguished also from production goods that satisfy wants only indirectly as factors in the production of other articles or commodities (for example, machine tools, heavy duty presses, etc.).

(f) "Damage restoration" means restoring to substantially the same size and condition on the same site, any building, structure, or project which has been damaged by storm, fire, flood, or other disaster, or by act of God, or act of war.

(g) "Maintenance and repair" means such work as is necessary to keep a building, structure, or project in sound working condition or to rehabilitate a building, structure, or project or any portion thereof, when the same has been rendered unsafe or unfit for service by wear and tear, or other similar causes. The term does not include any building operation or job where substantial structural alterations or changes in design are made.

(h) "Office building" means any building the principal use of which is to provide office space or office facilities, regardless of whether it is designed for the exclusive or partial use of its owner or is to be used commercially and rented to prospective tenants, including buildings for use by government agencies. The size of the building is not a determinative factor in deciding whether a building is an office building as the term includes both one-story and multistoried structures; but the term does not include a private residence with incidental office space located therein for the use of the occupant.

(i) "Hotel" means either or both an establishment furnishing sleeping accommodations for transient guests, or an establishment classified as a hotel under applicable State, municipal, or other local law.

(j) "Calculated floor area" means the total floor area measured to the outside surfaces of exterior walls, including finished habitable attics and basement rooms, stairhalls, and closets, but excluding foundations, unfinished and nonhabitable portions of basements, garages, unfinished attics, open porches, balconies, and terraces.

SEC. 4. *Prohibited construction.* (a) (1) Except as permitted in section 5 of this order, or pursuant to an adjustment or exception granted under section 11 of this order, after midnight October 26, 1950, no person shall commence construction of any building, structure, or project to be used for, or in connection with, any of the purposes specified, as set forth in section 15 of this order.

(2) Since October 26, 1950, the National Production Authority has issued exceptions to permit the commencement of construction of specific buildings, structures, or projects of the type prohibited by section 15 of this order. All such exceptions granted prior to January 13, 1951, will cease to be effective 120 days after the date of issuance, unless construction has been commenced within that time; and construction of any such building, structure, or project may not be commenced thereafter without a further authorization from the National Production Authority.

(b) (1) After midnight, January 13, 1951, with respect to construction specified in section 16 (List B), and after midnight, May 3, 1951, with respect to construction specified in section 17 (List C), no person shall commence construction of any building, structure, or project to be used for, or in connection with, any of the purposes specified, as set forth in section 16 (List B) or section 17 (List C), until a specific authorization therefor has been issued by the National Production Authority. The conditions which must exist before an authorization will be issued are set forth in section 6 of this order.

(2) In matters involving unreasonable hardship, or when required in the interest of the national defense, the National Production Authority may grant an exception from this order, pursuant to section 11, with respect to types of construction specified in section 16 (List B) and section 17 (List C).

(c) Commencing July 1, 1951, no person shall use in or in connection with the construction of any building, structure, or project, any copper or aluminum in the forms and shapes indicated in Schedule 1 of CMP Regulation No. 1 for solely decorative or ornamental purposes, or use any copper in the forms and shapes indicated in Schedule 1, whether prefabricated, or fabricated, adapted, or fitted on the site of the construction, for any of the following purposes:

Cement flooring and composition flooring (except that (crude arsenical) copper precipitate may be used for flooring in hospital operating and anesthesia rooms, for places where explosives are handled or stored, and for places where explosive vapors may be present).
Cornices.
Downspouts and accessories thereto.
Facias.
Gutters and accessories thereto.
I. P. S. waste nipples.
Leaders and accessories thereto.
Linoleum stripping.
Marquees.
Metal siding.
Mouldings for joining cabinet sinks.
Pipe, iron pipe sizes, and fittings (except for industrial process piping and chemical and gas equipment; solder nipples, solder bushing, and ferrules; *and special hospital plumbing fixtures*), including unions and union fittings (except seats, and except for other parts of unions and union fittings (1) where and to the extent that the physical and chemical properties of the liquid or gas passing through the union or union fittings make the use of any other material dangerous or impractical, or (2) where the valve is of a type designed for use in an air conditioning or refrigeration "system", or (3) where use of copper and tubing and or brass pipe is permitted).
Roofing.
Store fronts.
Supply pipes, iron pipe sizes.
Terrazzo strips.
Tube, tubing, and fittings for piping systems in construction (except for Type K for underground water service connections; Types B, L, and M for domestic hot and cold water supply pipes, tank to oil burner hook-ups, and oxygen lines; Types B, K, L, and M for industrial process, food, chemical, and gas equipment piping; and seamless tube for air temperature control apparatus).

SEC. 5. *Exemptions.* The following construction in connection with the buildings, structures, or projects to be used in connection with any of the purposes specified in section 15, 16, and 17 of this order is exempted from this order:

(a) Maintenance and repair on any building, structure, or project.

(b) Small jobs of new construction or in connection with any such building, structure, or project including, but not limited to, alterations, additions, improvements, and modernization, where the cost of all such work shall not exceed:

(1) In the case of interior alterations, additions, improvements, or modernization of hotels, store space of department stores, office buildings, and loft buildings, 25 cents per square foot of occupied space for any consecutive 12-month period. (In computing this cost, both construction cost and all other expenses or charges incident to the work shall be taken into consideration.)

(2) In the case of any type of construction of all other buildings, structures, or projects specified in section 15 (List A), section 16 (List B), and section 17 (List C), $5,000 for any consecutive 12-month period. (In computing this cost, only construction cost shall be considered.)

(3) In addition, alterations, additions, improvement, or modernization may be made in the case of an industrial plant, factory, or facility, without authorization from the National Production Authority: *Provided,* That, after completion, the total use of steel in such alteration, addition, improvement, or modernization, both in the forms and shapes as defined in NPA Order M-1 and also reinforcing steel, will not exceed 25 tons.

(c) Reconstruction of any such building, structure, or project following a fire, flood, storm, disaster, act of God, or act of war, which occurred on or after July 29, 1950: *Provided, however,* That the reconstruction work will not require the use of more than a total quantity of 25 tons of steel, both in the forms and shapes as defined in NPA Order M-1 and also reinforcing steel.

(d) Construction by, or for the account of, the Department of Defense, the Atomic Energy Commission, the National Advisory Committee for Aeronautics, or the Office of Rubber Reserve of the Reconstruction Finance Corporation.

(e) Installation of personal property to be physically attached to a building, structure, or project (for example, TV transmitter; theatre seat), if the total cost incurred for such installation in any consecutive 12-month period does not exceed $2,000.

(f) Construction of an industrial plant, facility, or factory for which a certificate of necessity has been issued pursuant to the provisions of the Revenue Act of 1950, or a loan made pursuant to section 302 of the Defense Production Act of 1950.

SEC. 6. *Authorization for certain construction.* (a) Any person desiring to erect a building, structure, or project to be used for, or in connection with, any of the purposes specified, as set forth in section 16 or section 17 of this order, may apply for a National Production Authority authorization to commence such construction. The application shall be made on Form NPAF-24, copies of which are available at all field offices of the Department of Commerce, and should be addressed to the field office of the Department of Commerce in the region of the site of the proposed construction.

(b) Authorization under this section will be granted if the National Production Authority is satisfied that the desired construction conforms to the following requirements:

(1) It furthers the defense effort by providing facilities of the type specified in sections 16 or 17 of this order in areas adjacent to military establishments or defense plants and projects, which construction the National Production Authority considers necessary to furnish or to supplement facilities in connection with the activities of the Defense Production Administration, the Department of Defense, or the Atomic Energy Commission; including their programs for increasing production capacity; or

(2) It is essential to maintenance of public health, safety, or welfare.

(c) Further, with respect to an application for authorization to construct a facility not directly related to the defense effort, the NPA will consider the type and quantity of materials on hand, and needed, for the facility, and the effect on the community at large if the authorization were denied.

SEC. 7. *Multiple use buildings, structures, or projects.* Where a building, structure, or project to be constructed is designed for a number of different uses and occupants, no portion thereof shall be constructed for use or occupancy in connection with any of the purposes specified in sections 15, 16, or 17 of this order where the construction cost apportionable to such use or occupancy will exceed the small job exemption provided for in section 5 (b) of this order.

SEC. 8. *Scope of this order.* This order shall apply to construction in the 48 States, the District of Columbia, and in the territories and insular possessions of the United States.

SEC. 9. *Prohibited deliveries.* No person shall accept an order for, sell, deliver, or cause to be delivered, material, equipment, or supplies which he knows, or has reason to believe, will be used in violation of the provisions of this order.

SEC. 10. *Defense against claims for damages.* No person shall be held liable for damages or penalties for any default under contract or order which shall result directly or indirectly from compliance with any regulation or order of the National Production Authority (including any direction, directive, or other instruction), notwithstanding that any such regulation or order shall thereafter be declared by a judicial or other competent authority to be invalid.

SEC. 11. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that:

(a) Such provision works an unreasonable hardship upon him not suffered generally by others in the same trade, industry, or other relative position; or that enforcement of such provision against him would not be in the interest of the national defense. In determining whether unreasonable hardship exists, the National Production Authority will consider, among other things:

(1) The extent of the work done by the applicant incident to the proposed construction.

(2) Whether the building, structure, or project requires reconstruction as a result of a fire, flood, storm, disaster, act of God, or act of war.

(3) Whether a building, structure, or project of the applicant has been seized by legal action under eminent domain, or condemned by responsible governmental authorities; and the applicant requests permission to replace such facility.

(b) Each request shall be made on Form NPAF-24, copies of which are available at all field offices of the Department of Commerce, and should be addressed to the field office of the Department of Commerce in the region of the site of the proposed construction.

SEC. 12. *Communications.* All communications concerning this order shall be addressed to the appropriate field office of the Department of Commerce, Ref: NPA, M-4.

SEC. 13. *Reports.* Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139-139F).

SEC. 14. *Violations.* Any person who wilfully violates any provisions of this order, or any other order or regulation of the National Production Authority, or who wilfully conceals a material fact, or furnishes false information in the course of operation under this order, is guilty of a crime, and upon conviction, may be

punished by fine or imprisonment or both. In addition, administrative action may be taken against such person to suspend any authority to commence or complete construction or such other assistance as may be rendered pursuant to this order.

SEC. 15. *List A—Prohibited construction.*

All buildings, structures, or projects to be used for, or in connection with, any recreational, amusement, or entertainment purpose, whether public or private (unless authorized pursuant to section 6 of this order), including, but not limited to:

Amphitheater.
Amusement arcade
Amusement device built into place on the site such as a roller coaster, merry-go-round, or similar device or kind. This shall not include demountable or portable equipment.
Amusement park.
Arena.
Assembly hall used primarily for recreation or amusement.
Athletic field house.
Band stand
Bars and buildings or structures where the predominant business carried out therein or in connection therewith shall be the sale for consumption on the premises of alcoholic liquors.
Baseball park.
Bath house.
Billiard or pool parlor.
Bleachers and similar seating arrangements when they are built in place as a permanent part of the building, structure, or project.
Boardwalk used primarily for recreation or amusement.
Boat or canoe club.
Bowling alley establishment.
Cabana.
Camp (except for public or social welfare).
Carnival.
Club building except for social welfare purposes.
Country club.
Dance hall.
Dance studio.
Dude ranch used primarily for recreation or amusement.
Exposition or exhibition building or structure for recreational, amusement, or entertainment displays or purposes.
Flood lighting (including piers, poles, towers, framework, or foundation with fixed equipment) in connection with any recreational, amusement, or entertainment purpose.
Gambling establishment.
Golf course.
Golf club.
Golf driving range.
Grandstand.
Gymnasium.
Lodge hall.
Music shell.
Night club.
Pier used primarily for recreation or amusement.
Race track, any kind.
Riding academy.
Rodeo.
Shooting gallery.
Skating rink.
Ski lodge.
Slot machine establishment.
Stadium.
Swimming pool.
Theater, any kind (including drive-in theater).
Yacht basin or marine railway primarily for the use of pleasure craft.

SEC. 16. *List B—Construction where NPA authorization is required.* Any building, structure, or project to be used for, or in connection with, any of the following specified purposes:

Bank, credit institution, or brokerage establishment.
Community or neighborhood building.
Furnishing of personal services (e. g., barber shop, beauty shop, undertaking and mortuary establishment, cemetery building, mausoleum, crematory, garage, service station, shoe repair shop, laundry, dry cleaning establishment, tailor shop).
Hotel, motel, motor court, tourist camp, trailer camp.
Loft building.
Office building.
Outdoor advertising sign.
Printing or duplicating establishment including, but not limited to, facilities for the publication of newspapers, books, and periodicals.
Restaurant.
Storage, distribution, display, or sale of consumer goods (for example, retail store, shopping center, wholesale establishment, gasoline filling station, drugstore, soda fountain, florist shop, greenhouse).
Storage warehouse for personal effects.
Tobacco auction warehouse.

SEC. 17. *List C—Additional construction where NPA authorization is required.*

Multiunit residential building in excess of three stories and basement.
Residential unit for single family occupancy with a calculated floor area in excess of 2500 square feet.
Building, structure, or project for radio broadcasting or television broadcasting.
Terminal warehouse.
Any and all other public or private buildings, structures, or projects of a type not listed above in this list C, and not listed in list A or in list B, of every kind except residential construction (including but not limited to an industrial plant, facility, or factory), which will require the use of more than a total quantity of 25 tons of steel, both in the forms and shapes as defined in NPA Order M-1 and also reinforcing steel.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order, as amended, shall take effect on July 1, 1951.

[NPA Order M-12 as Amended July 2, 1951]

M-12—USE OF COPPER AND COPPER-BASE ALLOYS

This order, as amended, is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable due to the necessity for immediate action and because the order effects a large number of different trades and industries.

Sections 1, 2, 3, 4, 5, 6, 7, and 9 (as renumbered) are amended; section 9 is renumbered 8; sections 8, 10, and 11 are deleted; sections 12, 13, 14, and 15 are renumbered as 9, 10, 11, and 12; references throughout the order to these sections are changed accordingly; and lists A & B are deleted. As so amended, NPA Order M-12 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Copper forms and products to which this order applies.
4. Application of order.
5. Production of brass mill products, copper wire mill products, and foundry products.
6. Use of copper forms and products.
7. Liability for noncompliance.
8. Exemptions.
9. Applications for adjustment or exception.
10. Records and reports.
11. Communications.
12. Violations.

AUTHORITY: Sections 1 to 12 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to describe how the copper remaining after allowing for the requirements of national defense may be distributed and used in the civilian economy, and to limit the use of copper where such limitation is not accomplished by allotments or other orders. It is the policy of the National Production Authority that copper and articles made of copper not required to fill authorized controlled material orders and rated orders, shall be distributed equitably through normal channels of distribution, and that due regard shall be given by suppliers to the needs of new and small business.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons and includes any agency of the United States or any other government.

(b) "Base period" means the 6-month period ending June 30, 1950.

(c) "Manufacture" means to put into process, machine, incorporate into products, fabricate, or otherwise alter the forms and products of copper defined in section 3 by physical or chemical means, and includes the use of copper in plating.

SEC. 3. *Copper forms and products to which this order applies.* This order applies to the following forms and products of copper: Copper, copper-base alloy, brass mill products, copper wire mill products, and foundry copper products and copper-base alloy products. For the purpose of this order, these items are defined as follows:

(a) "Copper" means unalloyed copper. (It includes electrolytic copper, fire refined copper, and all unalloyed copper in any form including scrap.)

(b) "Copper-base alloy" means any alloy in the composition of which the percentage of copper metal by weight equals or exceeds 40 percent of the total weight of the alloy. (It shall include

fired and demilitarized cartridge and artillery cases, and all copper-base alloy, as specified above, in any form including scrap.) It does not include alloyed gold produced in accordance with U. S. Commercial standard CS67-38.

(c) "Brass mill products," for the purpose of this order, means copper and copper-base alloys in the following forms: sheet, plate, and strip in flat lengths or coils; rod, bar, shapes, and wire, except copper wire mill products; and seamless tube and pipe. Straightening, threading, chamfering and cutting to width and length, and reduction in gage, do not constitute changes in form of brass mill products except as determined by NPA. The following related products which have been produced by a change in form of brass mill products are not included in the definition of brass mill products:

Circles.
Discs.
Cups.
Blanks and segments.
Forgings.
Welding rod, 3 feet or less in length.
Rotating bands.
Tube and nipples—welded, brazed, or mechanically seamed.
Formed flashings.
Engravers' copper.

Allotments for the purpose of producing such related products shall be in terms of the estimated weight of the brass mill product from which such related product is made.

(d) "Copper wire mill product" means bare wire, insulated wire and cable whatever the outer protective coverings may be, and uninsulated wire and cable, where the conductors are made from copper, copper-base alloy, or copper-clad steel containing over 20 percent copper by weight. All copper wire mill products should be measured in terms of pounds of copper content.

(e) "Foundry product" means cast copper or copper-base alloy shapes and forms suitable for ultimate use without remelting, rolling, drawing, extruding, or forging. (The process of casting includes the removal of gates, risers, and sprues, and sandblasting, tumbling, or dipping, but does not include any further machining or processing.)

SEC. 4. *Application of order.* Subject to the exemption stated in section 8, this order applies to all persons who produce brass mill products, copper wire mill products, or foundry products as listed in section 3 of this order, or who use any of the forms and products of copper defined in section 3 of this order in manufacture. This order does not apply to the use of copper which is limited or controlled by CMP allotments or other applicable NPA orders, or to the use of copper or copper-base alloy in the production of other metals or metal alloys.

SEC. 5. *Production of brass mill products, copper wire mill products, and foundry products.* Subject to the exemptions stated in section 8 of this order, or unless specifically directed by the National Production Authority:

(a) No person shall produce during July 1951 a total quantity by weight of brass mill products and copper wire mill products in excess of 80 percent of his average monthly production of such products during the base period. The production of brass mill products and copper wire mill products pursuant to an authorized toll or conversion agreement whereby title to the material to be processed remains vested in the person who delivers it is permitted in addition to the production permitted by this paragraph. In determining average monthly production during the base period, the brass mill products and copper wire mill products so produced shall not be included in the base period production of the brass mill or wire mill. Nothing contained in this paragraph shall affect the restrictions on toll or other similar agreements contained in NPA Order M-16.

(b) No person shall produce during July 1951 a total quantity by weight of foundry products in excess of 100 percent of his average monthly production of foundry products during the base period.

SEC. 6. *Use of copper forms and products.* Subject to the exemptions stated in section 8 of this order, or unless specifically directed by the National Production Authority, during July 1951 and each month thereafter, no person shall use in any process (such as plating) or in the manufacture or production of any chemical, drug, pharmaceutical, or insecticide, or any product which is not listed in NPA Order M-47A or which is not a part of a product so listed, a quantity by weight of the forms and products of copper defined in section 3 of this order in excess of 75 percent of his average monthly use of such materials for such purposes during the base period: *Provided, however,* That this limitation shall not apply to the use of such material pursuant to an authorized production schedule received in accordance with CMP Regulation No. 1.

SEC. 7. *Liability for noncompliance.* Nothing contained herein shall relieve any person from liability for violations of any provision of this order which was in effect at the time of such violation.

SEC. 8. *Exemptions.* (a) The production of brass mill, copper wire mill, and foundry products, and the use of such products is permitted to fill rated orders, or to meet any mandatory order of the National Production Authority, in addition to the production and use permitted by the provisions of sections 5 and 6 of this order.

(b) Copper forms and products defined in section 3 acquired with ratings, or to meet a National Production Authority scheduled program may be used in addition to the quantities permitted by the provisions of section 6.

(c) The provisions of section 6 do not apply to persons who use less than 1,000 lbs. of the copper forms and products defined in section 3 during any calendar quarter: *Provided, however,* That persons who, by reason of the provisions of section 6, would be permitted to use less than 1,000 lbs. during any calendar quarter, may use, during such period, a quantity up to 1,000 pounds.

SEC. 9. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, that any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Producers shall make such application on Form NPAF-11, "Copper and Copper-Base Alloys: Producer's Application for Adjustment or Exception." Copies of these forms may be obtained from the nearest Department of Commerce Field Office.

SEC. 10. *Records and reports.* (a) Persons subject to this order shall preserve the records which they have maintained of production, inventories, receipts, deliveries, and uses of copper forms and products defined in section 3 of this order commencing with January 1, 1950.

(b) Persons subject to this order shall make records and submit such reports to the National Production Authority as it shall require subject to the terms of the Federal Reports Act (Pub. Law 831, 77th Cong., 5 U. S. C. 139–139F).

SEC. 11. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C. Ref: M-12.

SEC. 12. *Violations.* Any person who wilfully violates any provisions of this order or any other order or regulation of the National Production Authority or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

This order as amended, including Lists A and B, shall take effect, except as otherwise specifically stated, on July 2, 1951.

[NPA Order M-74]

M-74—USE OF COPPER AND COPPER-BASE ALLOY IN CONSTRUCTION MATERIALS

This order is found necessary and appropriate to promote the national de-

fense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order, consultation with industry representatives has been rendered impracticable due to the necessity for immediate action.

3. Restrictions on use of copper.
4. Applications for adjustment or exception.
5. Records.
6. Audit and inspection.
7. Reports.
8. Communications.
9. Violations.

AUTHORITY: Sections 1 to 9 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101 E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to conserve copper and copper-base alloys so as best to serve the interests of national defense and essential civilian requirements. It prohibits the use by a manufacturer or assembler of copper or copper-base alloy, or component parts made therefrom, in the manufacture or assembly of certain items.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Manufacture" means to put into process, machine, incorporate into products, fabricate, or otherwise alter the forms and products of copper defined in paragraph (c) of this section by physical or chemical means, and includes the use of copper in plating.

(c) "Copper and copper-base alloy" means the following forms and products of copper:

(1) *Unalloyed copper.* (It includes electrolytic copper, fire refined copper, and all unalloyed copper in any form including scrap.)

(2) *Copper-base alloy.* Any alloy, the composition of which the percentage of copper metal by weight equals or exceeds 40 percent of the total weight of the alloy. (It includes fired or demilitarized cartridge cases and artillery cases and all copper-base alloys as specified above in any form, including scrap.)

(3) *Brass mill products.* Copper and copper-base alloys in the following forms: sheet, plate, and strip in flat lengths or coils; rod, bar, shapes, and wire, except copper wire mill products; and seamless tube and pipe. Straightening, threading, chamfering and cutting to width and length, and reduction in gage, do not constitute changes in form of brass mill products except as determined by NPA. The following related products which have been produced by a change in form of brass mill products are not included in the definition of brass mill products:

Circles.
Discs.
Cups.
Blanks and segments.
Forgings.
Welding rod, 3 feet or less in length.
Rotating bands.
Tube and nipples—welded, brazed, or mechanically seamed.
Formed flashings.
Engravers' copper.

(4) *Copper wire mill products.* Bare wire, insulated wire and cable whatever the outer protective coverings may be, and uninsulated wire and cable, where the conductors are made from copper, copper-base alloy, or copper-clad steel, containing over 20 percent copper by weight. All copper wire mill products should be measured in terms of pounds of copper content.

(5) *Foundry copper products and copper-base alloy products.* Cast copper and copper-base alloy shapes or forms suitable for ultimate use without remelting, rolling, drawing, extruding, or forging. (The process of casting includes the removal of gates, risers, and sprues, and sandblasting, tumbling, and dipping, but does not include any further machining or processing.)

SEC. 3. *Restrictions on use of copper.* Commencing on July 1, 1951, no person shall use copper or copper-base alloy, as defined in section 2 of this order, or any component or part made therefrom in the manufacture or assembly of any item included in the attached List A except as permitted therein.

SEC. 4. *Applications for adjustment or exception.* Any person affected by any provision of this order may file with NPA a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry or that its enforcement against him would not be in the interests of national defense or in the public interest. In considering requests for adjustment which claim that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each such request shall be in writing and shall set forth all pertinent facts, the nature of the relief sought, and the justification therefor.

SEC. 5. *Records.* Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

SEC. 6. *Audit and inspection.* All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of NPA.

SEC. 7. *Reports.* Persons subject to this order shall make such records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 8. *Communications.* All communications and reports concerning this order shall be addressed to National Production Authority, Washington 25, D. C., Ref: M–74.

SEC. 9. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order includes List A hereto attached and shall take effect on July 1, 1951.

NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.

AUTHORITY: §§ 12.0 to 12.162 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303.

§ 12.0 *Basis and purpose.* The rules and regulations in this part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:

(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.

(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.

(c) Encouragement and improvement of the amateur radio service through rules which provide for advancing skills in both the communication and technical phases of the art.

(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.

(e) Continuation and extension of the amateur's unique ability to enhance international good will.

DEFINITIONS

§ 12.1 *Amateur service.* The term "amateur service" means a radio service carried on by amateur stations.

§ 12.2 *Amateur operator.* The term "amateur operator" means a person interested in radio technique solely with a personal aim and without pecuniary interest, holding a valid license issued by the Federal Communications Commission authorizing him to operate licensed amateur stations.

§ 12.3 *Amateur station.* The term "amateur station" means a station used by an amateur operator, and it embraces all radio transmitting apparatus at a particular location used for amateur service and operated under a single instrument of authorization.

§ 12.4 *Amateur portable station.* The term "amateur portable station" means an amateur station that is so constructed that it may conveniently be moved about from place to place for communication, but which is not operated while in motion.

§ 12.5 *Amateur mobile station.* The term "amateur mobile station" means an amateur station that is so constructed that it may conveniently be transferred to or from a mobile unit or from one such unit to another, and is ordinarily used while such mobile unit is in motion.

§ 12.6 *Amateur radio communication.* The term "amateur radio communication" means radio communication between amateur stations solely with a personal aim and without pecuniary interest.

§ 12.7 *Remote control.* The term "remote control" as applied to the amateur radio service, means control of transmitting equipment of an amateur station from an operating position other than one at which the transmitter is in view and immediately accessible; except that, direct mechanical control or direct electrical control by wired connections of an amateur transmitter from a point located on board any aircraft, vessel or vehicle on which such transmitter is located shall not be considered remote control within the meaning of this definition.

§ 12.9 *Antenna structure defined.* The term "antenna structure" includes the radiating system and its supporting structures.

§ 12.10 *Aircraft landing area defined.* An aircraft landing area means any locality, either on land or water, including airports and intermediate landing fields, which is used, or approved for use, for landing and take-off of aircraft whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for the receiving or discharging of passengers or cargo.

Amateur Operators

Licenses, Privileges

§ 12.20 *Classes of amateur operator licenses.*

Amateur extra, class.[1]
Advanced class [2] (previously class A).
General class [2] (previously class B).
Conditional class [2] (previously class C).
Technician class.[4]
Novice class.[4]

[1] This class of operator license will become available to qualified applicants January 1, 1952.

[2] This class of license is the same as the Class A with change of name only. It (and the Class A) may be renewed as long as the holder to whom it was issued meets the renewal requirements current at the time renewal is applied for. New Advanced Class (or Class A) amateur operator licenses will not be issued after December 31, 1952.

[3] This class of operator license will become effective March 1, 1951.

§ 12.21 *Eligibility for license.*[5] Persons are eligible to apply for the various classes of amateur operator licenses as follows:

(a) *Amateur extra class.* Any citizen of the United States who at any time prior to receipt of his application by the Commission has held for a period of two years or more a valid amateur operator license issued by the Federal Communications Commission, excluding licenses of the Novice and Technician Classes.

(b) *Advanced class.* Any citizen of the United States who at any time prior to receipt of his application by the Commission, has held for a period of a year or more an amateur operator license issued by the Federal Communications Commission, excluding licenses of the Novice and Technician Classes. New Advanced Class amateur operator licenses will not be issued after December 31, 1952. However, Advanced Class (or Class A) licenses may continue to be renewed as set forth in § 12.27.

(c) *General class.* Any citizen of the United States.

(d) *Conditional class.* Any citizen of the United States whose actual residence and amateur station location are more than 125 miles air line distant from the nearest location at which examinations are held at intervals of not more than 3 months for General Class amateur operator license; or who is shown by physician's certificate to be unable to appear for examination because of protracted disability; or who is shown by certificate of the commanding officer to be in the armed forces of the United States at an Army, Navy, Air Force or Coast Guard station and, for that reason, to be unable to appear for examination at the time and place designated by the Commission.

(e) *Technician class.* Any citizen of the United States.

(f) *Novice class.* Any citizen of the United States except a former holder of an amateur license of any class issued by any agency of the United States government, military or civilian.

§ 12.22 *Application for amateur operator license.* The application for any new amateur operator license, including application for any change in operating privileges, shall be submitted in person or by mail to the district field office of the Commission at which the applicant desires his application to be considered and acted upon, which office will make the final arrangements for conducting any required examination. If the application is for a license which is obtained upon successful completion of an examination by volunteer examiners under the special provisions of § 12.44 (c), the application shall be submitted to the district field office which supplied the examination material. Applications for renewal or modification of license, or for duplicate license, when no change in operating privileges is involved, shall be filed directly with the Commission at its Washington 25, D. C. office.

[4] This class of license will become available to qualified applicants July 1, 1951.

[5] For effective dates of the various classes of operator licenses, see footnotes 1 through 4.

§ 12.23 *Classes and privileges of amateur operator licenses.*[6]—(a) *Amateur extra class.* All authorized amateur privileges including such additional privileges in both communication and technical phases of the art which the Commission may consider as appropriately limited to holders of this class of license.

(b) *Advanced class.* All amateur privileges except those which may be reserved to holders of the Amateur Extra Class license.

(c) *General and conditional classes.* All authorized amateur privileges except the use of radiotelephony on the frequency bands 3800 to 4000 kilocycles, and 14200 to 14300 kilocycles, and except those which may be reserved to holders of the Amateur Extra Class license.

(d) *Technician class.* All authorized amateur privileges in the amateur frequency bands above 220 megacycles.

(e) *Novice class.* Those amateur privileges as designated and limited as follows:

(1) The d. c. plate power input to the vacuum tube or tubes supplying power to the antenna shall not exceed 75 watts.

(2) Only the following frequency bands and types of emission may be used, and the emissions of the transmitter must be crystal-controlled:

(i) 3700 to 3750 kilocycles, radiotelegraphy using only type A1 emission in accordance with the geographical restrictions set forth in § 12.111 (a) (2) (i).

(ii) 26.960 to 27.230 Mc., radiotelegraphy using only type A1 emission.

(iii) 145 to 147 megacycles, radiotelegraphy or radiotelephony using any type of emission except pulsed emissions and type B emission.

§ 12.25 *Availability of operator license.* The original operator license of each operator shall be kept in the personal possession of the operator while operating an amateur station. When operating an amateur station at a fixed location, however, the license may be posted in a conspicuous place in the room occupied by the operator. The license shall be available for inspection by any authorized Government official whenever the operator is operating an amateur station and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated, lost or destroyed, and application has been made for a duplicate license in accordance with § 12.26. No recognition shall be accorded to any photocopy of an operator license; however, nothing in this section shall be construed to prohibit the photocopying, for other purposes, of any amateur radio operator license.

§ 12.26 *Duplicate license.* Any licensee applying for a duplicate license to replace an original which has been lost, mutilated, or destoyed, shall submit with the application the mutilated license or a statement setting forth the facts regarding the manner in which the original license was lost or destroyed. If, subsequent to receipt by the licensee of the duplicate license, the original license is found, either the duplicate or the original license shall be returned immediately to the Commission.

[6] By order dated and effective November 13, 1950, the Commission temporarily waived, to a limited extent, the requirement that all applications for renewal of an amateur operator license be accompanied by a showing that the applicant actually operated an amateur radio station or stations, in the manner and upon the occasions or for the period of time specified in section 12.27, in cases where it is shown that the applicant was unable to conduct such operation because he was on active duty in the armed forces of the United States. This order is applicable to all amateur operator licenses which expire during the period January 1 to December 31, 1951, inclusive.

§ 12.27 *Renewal of amateur operator license.*[6] (a) An amateur operator license except the Novice Class, may be renewed upon proper application in which it is stated that the applicant has lawfully accumulated, at an amateur station licensed by the Commission, a minimum total of either 2 hours operating time during the last 3 months or 5 hours operating time during the last 12 months of the license term. Such operating time, for the purpose of renewal, shall be counted as the total of all that time between the entries in the station log showing the beginning and end of transmissions as required in § 12.136 (a), both during single transmissions and during a sequence of transmissions. The application shall, in addition to the foregoing, include a statement that the applicant can send by hand key, i. e., straight key or any other type of hand operated key such as a semi-automatic or electronic key, and receive by ear, in plain language, messages in the International Morse Code at a speed of not less than that which is required in qualifying for an original license of the class being renewed.

(b) The Novice Class license will not be renewed.

(c) The applicant shall qualify for a new license by examination if the requirements of this section are not fulfilled.

(d) The renewal application shall be accompanied by the applicant's amateur operator license, and also by his amateur station license if he holds one.

(e) Application for renewal of an amateur operator license may be filed not earlier than 120 days prior to the date of expiration and not later than a period of grace of one year after such date of expiration. During this one year period of grace an expired license is not valid. A renewed license issued upon the basis of an application filed during the grace period will be dated currently and will not be back-dated to the date of expiration of the license being renewed.

(f) Renewal applications shall be governed by applicable rules in force on the date when application is filed.

§ 12.28 *Who may operate an amateur station.* An amateur radio station may be operated only by a person holding a valid amateur operator license. Such station may be operated by the licensee only in the manner and to the extent provided in his amateur operator license. Persons other than the station licensee, when operating such station, may operate it only to the extent and in the manner authorized to the licensee of the station and not exceeding the operating authority of such person's own amateur operator license. When an amateur station is used for telephony, the station licensee may permit any person to transmit by voice, provided during such transmission call signs are announced as prescribed by § 12.82 and a duly licensed amateur operator maintains actual control over the emissions, including turning the carrier on and off for each transmission and signing the station off after communication with each station has been completed.

§ 12.29 *License term.* Amateur operator licenses are normally valid for a period of 5 years from the date of issuance of a new or renewed license, except the Novice Class which is normally valid for a period of 1 year from the date of issuance. Modified and duplicate licenses shall bear the same date of expiration as the licenses for which they are modifications or duplicates.

§ 12.30 *Order of suspension.* No order of suspension of any operator's license shall take effect until 15 days' notice in writing thereof, stating the cause for the proposed suspension, has been given to the operator licensee who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application at the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be held in abeyance until the conclusion of the hearing which shall be conducted under such rules as the Commission shall deem appropriate. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of suspension.

§ 12.31 *Proceedings.* Proceedings for the suspension of an operator's license shall in all cases be initiated by the entry of an order of suspension. Respondent will be given notice thereof together with notice of his right to be heard and to contest the proceeding. The effective date of the suspension will not be specified in the original order but will be fixed by subsequent motion of the Commission in accordance with the conditions specified above. Notice of the effective date of suspension will be given respondent, who shall send his operator license to the office of the Commission in Washington, D. C., on or before the said effective date, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

Examinations

§ 12.41 *When examination is required.* Examination is required for the issuance of a new amateur operator license, and for a change in class of operating privileges. Credit may be given, however, for certain elements of examination as provided in § 12.46.

§ 12.42 *Examination elements.* Examinations for amateur operator privileges will comprise one or more of the following examination elements:

Element 1 (A): *Beginner's code test.* Code test at five (5) words per minute.

Element 1 (B): *General code test.* Code test at thirteen (13) words per minute.

Element 1 (C): *Expert's code test.* Code test at twenty (20) words per minute.

Element 2: *Basic amateur practice.* Amateur radio operation and apparatus, including radiotelephone and radiotelegraph.

Element 3 (A): *Basic law.* Rules and regulations essential to beginners' operation, including sufficient elementary radio theory for the understanding of those rules.

Element 3 (B): *General regulations.* Provisions of treaties, statutes, and rules and regulations affecting all amateur stations and operators.

Element 4 (A): *Advanced radiotelephone.* Technical, operational and other matter specifically applicable to the operation of amateur radiotelephone stations.

Element 4 (B): *Advanced amateur practice.* Advanced radio theory and operation as applicable to modern amateur techniques, including, but not limited to, radiotelephony, radiotelegraphy, and transmissions of energy for measurements and observations applied to propagation, for the radio control of remote objects and for similar experimental purposes.

§ 12.43 *Examination requirements.* Applicants for original licenses will be required to pass examinations as follows:

(a) *Amateur extra class.* Elements 1 (C), 2, 3 (B) and 4 (B).

(b) *Advanced class.* Elements 1 (B), 2, 3 (B) and 4 (A).

(c) *General class.* Elements 1 (B), 2 and 3 (B).

(d) *Conditional class.* Elements 1 (B), 2 and 3 (B).

(e) *Technician class.* Elements 1 (A), 2 and 3 (B).

(f) *Novice class.* Elements 1 (A) and 3 (A).

§ 12.44 *Manner of conducting examinations.* (a) The examinations for all classes of amateur operator licenses, except Conditional Class, will be conducted by an authorized Commission employee or representative at locations and at times specified by the Commission. The examinations for Conditional Class, as well as Technician and Novice Class licenses, may be conducted in accordance with the provisions of paragraph (c) of this section under one or more of the following conditions:

(1) If the applicant's actual residence and proposed amateur station location are more than 125 miles airline distance from the nearest location at which examinations are conducted by an authorized Commission employee or representative at intervals of not more than 3 months for amateur operator licenses; or

(2) If the applicant is shown by physician's certificate to be unable to appear for examination because of protracted disability; or

(3) If the applicant is shown by certificate of the commanding officer to be in the armed forces of the United States at an Army, Navy, Air Force, or Coast Guard station and, for that reason, to be unable to appear for examination at the time and place designated by the Commission.

(b) A holder of a technician or Novice Class license obtained on the basis of an examination under the provisions of paragraph (c) of this section is not required to be re-examined when changing residence and station location to within a regular examination area, nor when a new examination location is established within 125 miles of such licensee's residence and station location.

(c) Each examination for Conditional Class license, or for Technician, or Novice Class license under special conditions set forth in paragraph (a) of this section, shall be conducted and supervised by not more than two volunteer examiners, whom the Commission may designate or permit the applicant to select (not more than one examiner for the code test and not more than one examiner for the complete written examination). In the event the examiner for the code test is selected by the applicant, such examiner shall be the holder of an Extra Class, Advanced Class, or General Class of amateur operator license or shall have held, within the 5 years prior to the date of the examination, a commercial radiotelegraph operator license issued by the Commission or within that time shall have been employed in the service of the United States as the operator of a manually operated radiotelegraph station. The examiner for the written test shall be at least 21 years of age.

§ 12.45 *Additional examination for holders of Conditional Class operator licenses.* (a) The Commission may require a licensee holding a Conditional Class of operator license to appear for a General Class license examination at a location designated by the Commission. If the licensee fails to appear for the General Class examination when directed to do so, or fails to pass such examination, the Conditional Class operator license previously issued shall be subject to cancellation and, upon cancellation, a new license will not be issued for the Conditional Class privileges.

(b) Whenever the holder of a Conditional Class amateur operator license changes his actual residence or station location to a location where he would not have been eligible to apply for a Conditional Class license in the first instance, or whenever a new examining location is established in an area within which the holder of a Conditional Class amateur operator license would not have been eligible because of such examination location, to apply for a Conditional Class license such holder of Conditional Class license shall appear within 4 months thereafter at an examining location and time designated by the Commission and be examined for a General Class license. If, under such circumstances, the licensee fails to appear for the General Class examination, or fails to pass such examination, the Conditional Class license previously issued shall be subject to cancellation and, upon cancellation, a new license will not be issued for the Conditional Class privileges.

§ 12.46 *Examination credit.* (a) An applicant for a higher class of amateur operator license who holds a valid amateur operator license issued upon the basis of an examination by the Commission will be required to pass only those elements of the higher class examination that were not included in the examination for the amateur license held when such application was filed. However, credit will not be allowed for licenses issued on the basis of an examination given under the provisions of § 12.44 (c).

(b) An applicant for Amateur Advanced Class operator license will be given credit for examination element 4 (A) if within 2 years prior to the receipt of his application by the Commission he held Class A privileges or an Advanced Class license.

(c) An applicant for any class of amateur operator license, except the Extra Class, will be given credit for the telegraph code element if within 5 years prior to the receipt of his application by the Commission he held a commercial radiotelegraph first or second class operator license issued by the Federal Communications Commission.

(d) No examination credit, except as herein provided, shall be allowed on the basis of holding or having held any amateur or commercial operator license.

§ 12.47 *Examination procedure.* All written portions of the examinations for amateur operator privileges shall be completed by the applicant in legible handwriting or hand printing, and diagrams shall be drawn by hand, by means of either pen and ink or pencil. Whenever the applicant's signature is required, his normal signature shall be used. Applicants unable to comply with these requirements, because of physical disability, may dictate their answers to the examination questions and the receiving code test and if unable to draw required diagrams, may dictate a detailed description essentially equivalent. If the examination or any part thereof is dictated, the examiner shall certify the nature of the applicant's disability and the name and address of the person(s) taking and transcribing the applicant's dictation.

§ 12.48 *Grading.* (a) Code tests are graded as "passed" or "failed," separately for sending and receiving tests. Failure to pass the required code test for either sending or receiving will terminate the examination.

(b) Seventy-four percent is the passing grade for written examinations. For the purpose of grading, all elements, other than elements 4 (A) and 4 (B), required in qualifying for a particular license will be considered a single examination, and elements 4 (A) and 4 (B), will be considered as separate examinations.

§ 12.49 *Eligibility for re-examination.* An applicant who fails examination for amateur operator privileges may not take another examination for such privileges within 30 days, except that this limitation shall not apply to an examination for a General Class license following an examination for a Conditional Class license.

§ 12.50 *Code test procedure.* The code test required of an applicant for amateur radio operator license, in accordance with the provisions of §§ 12.42 and 12.43, shall determine the applicant's ability to transmit by hand key (straight key or if supplied by the applicant, any other type of hand operated key such as a semi-automatic or electronic key) and to receive by ear, in plain language, messages in the International Morse Code at not less than the prescribed speed, free from omission or other error for a continuous period of at least 1 minute during a test period of 5 minutes, counting five characters to the word, each numeral or punctuation mark counting as two characters.

Amateur Radio Stations

LICENSES

§ 12.60 *Limitation on antenna structures.* (a) No new antenna structure shall be erected for use by any station in the Amateur Radio Service, and no change shall be made in any existing antenna structure used or intended to be used by any station in the Amateur Radio Service so as to increase its over-all height above ground level, without prior approval by the Commission, in any case when either (1) the antenna structure proposed to be erected will exceed an over-all height of 170 feet above ground level, except in the case where the antenna is mounted on top of an existing man-made structure and does not increase the over-all height of such man-made structure by more than 20 feet, or (2) the antenna structure proposed to be erected will exceed an over-all height of one foot above the established elevation of any landing area for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area, except in the case where the antenna structure does not exceed 20 feet above the ground or is mounted on top of an existing man-made structure or natural formation and does not increase the over-all height of such man-made structure or natural formation by more than 20 feet as a result of such mounting. Application for Commission approval, when such approval is required, shall be submitted on FCC Form No. 401–A, in triplicate.

(b) In cases where FCC Form No. 401–A is required to be filed, further details as to whether an aeronautical study and or obstruction marking may be required, and specifications for obstruction marking when required, may be obtained from Part 17 of this chapter, "Rules Concerning the Construction, Marking, and Lighting of Antenna Towers and Supporting Structures." Information regarding requirements as to inspection of obstruction marking, recording of information regarding such inspection, and maintenance of antenna structures is also contained in Part 17.

§ 12.61 *Eligibility for amateur station license.* A license for an amateur station will be issued in response to proper application therefor to a licensed amateur operator who has made a satisfactory showing of control of the transmitting station for which license is desired and of control of the specific premises upon which all of the station apparatus is to be located, at a designated fixed location. An amateur station license may be issued to an individual, not a licensed amateur operator (other than an alien or a representative of an alien or of a foreign government), who is in charge of a proposed amateur station located in approved public quarters and established for training purposes in connection with the armed forces of the United States, but not operated by the United States Government.

§ 12.62 *Eligibility of corporations or organizations to hold license.* An amateur station license will not be issued to a school, company, corporation, association, or other organization, nor for its use, except that in the case of a bona fide amateur radio organization or society, a station license may be issued to a licensed amateur operator, other than the holder of a Novice Class license, as trustee for such society.

§ 12.63 *Application for amateur station license.* (a) Each application for an amateur station license shall comply with the Commission's rules and regulations and shall be made in writing, subscribed and verified on FCC Form No. 610 (application for amateur operator and/or station license). FCC Form No. 602 should be used where the applicant is in charge of a proposed amateur station located in approved public quarters and established for training purposes in connection with the armed forces of the United States, but not operated by the United States Government.

(b) One application and all papers incorporated therein and made a part thereof shall be submitted for each amateur station license. If the application is for station license only, it shall be filed directly with the Commission at its Washington 25, D. C., office. If the application also contains application for any class of amateur operator license, it shall be filed in accordance with the provisions of § 12.22.

§ 12.64 *Location of station.* (a) Every amateur station shall have a fixed transmitter location. Only one fixed transmitter location will be authorized and will be designated on the license for each amateur station, except that when remote control is authorized, the location of the remote control position as well as the location of the remotely controlled transmitter shall be considered as fixed transmitter locations and will be so designated on the station license. Unless remote control of the transmitting apparatus is authorized, such apparatus shall be operated only by a duly licensed amateur radio operator present at the location of such apparatus.

(b) Authority for operation of an amateur station with the licensed operator on duty at a specific remote control point in lieu of the remote transmitter location may be granted upon filing an application for a modified station license on FCC Form No. 610 or FCC Form No. 602, as appropriate, and provided that the following conditions are met:

(1) The remote control point as well as the remotely controlled transmitter, shall be located on premises controlled by the licensee.

(2) The remotely controlled transmitter shall be so installed and protected that it is inaccessible to other than duly authorized persons.

(3) In addition to the requirements of § 12.68 a photocopy of the amateur station license shall be posted in a conspicuous place at the location of the remotely controlled transmitter.

(4) Means shall be provided at the control point to permit the continuous monitoring of the emissions of the remotely controlled transmitter, and it shall be continuously monitored when in operation.

(5) Means shall be provided at the remote control point immediately to suspend the radiation of the transmitter when there is any deviation from the terms of the station license or from the Rules Governing Amateur Radio Service.

(6) In the event that operation of an amateur transmitter from a remote control point by radio is desired, an application for a modified station license on FCC Form No. 610 or FCC Form No. 602, as appropriate, should be submitted with a letter requesting authority to operate in such a manner stating that the controlling transmitter at the remote location will operate within amateur frequency bands 420 megacycles or higher and that there will be full compliance with § 12.64 (b), subparagraphs (1) through (5). Supplemental statements and diagrams should accompany the application and show how radio remote control will be accomplished and what means will be employed to prevent unauthorized operation of the transmitter by signals other than those from the controlling unit. There should be included complete data on control channels, relays and functions of each, directional antenna design for the transmitter and receiver in the control circuit, and means employed for turning on and off the main transmitter from the remote control location.

(c) An amateur transmitter may be operated from a remote control point in lieu of the remote transmitter location without special authorization by the Commission when there is direct mechanical control or direct electrical control by wired connections of the transmitter from a point located in the same or closely adjoining building or structure provided there is full compliance with the conditions set forth in § 12.64 (b), subparagraphs (1) through (5).

§ 12.65 *License period.* The license for an amateur station is normally valid for a period of 5 years from the date of issuance of a new or renewed license except that an amateur station license issued to the holder of a Novice Class amateur operator license is normally valid for a period of 1 year from the date of issuance. Any modified or duplicate license shall bear the same expiration date as the license for which it is a modification or duplicate.

§ 12.66 *Authorized apparatus.* An amateur station license authorizes the use under control of the licensee of all transmitting apparatus at the fixed location specified in the station license which is operated on any frequency, or frequencies allocated to the amateur service, and in addition authorizes the use, under control of the licensee, of portable and mobile transmitting apparatus operated at other locations.

§ 12.67 *Renewal of amateur station license.* (a) An amateur station license may be renewed upon proper application filed not earlier than 120 days prior to the date of expiration and not later than a period of grace of one year after such date of expiration. During this one year period of grace an expired license is not valid. A renewed license issued upon the basis of an application filed during the grace period will be dated currently and will not be back-dated to the date of expiration of the license being renewed. This one year period of grace shall apply only to licenses expiring on or after January 1, 1951.

(b) The renewal application shall be accompanied by the applicant's amateur station license, and also by his amateur operator license if he holds one.

(c) Renewal applications shall be governed by applicable rules in force on the date when application is filed.

§ 12.68 *Availability of station license.* The original license of each amateur station or a photocopy thereof shall be posted in a conspicuous place in the room occupied by the licensed operator while the station is being operated at a fixed location or shall be kept in his personal possession. When the station is operated at other than a fixed location, the original station license or a photocopy thereof shall be kept in the personal possession of the station licensee (or a licensed representative) who shall be present at the station while it is being operated as a portable or mobile station. The original station license shall be available for inspection by any authorized Government official at all times while the station is being operated and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated, lost, or destroyed, and application has been made for a duplicate license in accordance with § 12.26.

§ 12.69 *Revocation of station license.* Whenever the Commission shall institute a revocation proceeding against the holder of any radio station license under section 312 (a) of the Communications Act of 1934, as amended, it shall initiate said proceeding by serving upon said licensee an order of revocation effective not less than 15 days after written notice thereof is given the licensee. The order of revocation shall contain a statement of the grounds and reasons for such proposed revocation and a notice of the licensee's right to be heard by filing with the Commission a written request for hearing within 15 days after receipt of said order. Upon filing of such written request for hearing by said licensee the order of revocation shall stand suspended and the Commission will set a time and place for hearing and shall give the

licensee and other interested parties notice thereof. If no request for hearing on any order of revocation is made by the licensee against whom such an order is directed within the time hereinabove set forth, the order of revocation shall become final and effective, without further action of the Commission. When any order of revocation has become final, the person whose license has been revoked shall forthwith deliver the station license in question to the Engineer in Charge of the district in which the licensee resides.

§ 12.70 *Modification of station license.* (a) Whenever the Commission shall determine that public interest, convenience, and necessity would be served, or any treaty ratified by the United States will be more fully complied with, by the modification of any radio station license either for a limited time, or for the duration of the term thereof, it shall issue an order for such licensee to show cause why such license should not be modified.

(b) Such order to show cause shall contain a statement of the grounds and reasons for such proposed modification, and shall specify wherein the said license is required to be modified. It shall require the licensee against whom it is directed to be and appear at a place and time therein named, in no event to be less than 30 days from the date of receipt of the order to show cause why the proposed modification should not be made and the order of modification issued.

(c) If the licensee against whom the order to show cause is directed does not appear at the time and place provided in said order, a final order of modification shall issue forthwith.

CALL SIGNS

§ 12.81 *Assignment of call sign.* (a) The call signs of amateur stations will be assigned systematically by the Commission with the following exceptions:

(1) A specific unassigned call sign may be reassigned to the most recent holder thereof;

(2) A specific unassigned call sign may be assigned to a previous holder if not under license during the past 5 years;

(3) A specific unassigned call sign may be assigned to an amateur organization in memoriam to a deceased member and former holder thereof;

(4) A specific call sign may be temporarily assigned to a station connected with an event, or events, of general public interest;

(5) An unassigned "two-letter call sign" (a call sign having two letters following the numeral) may be assigned to a previous holder of a two-letter call sign the prefix of which consisted of not more than a single letter.

(b) An amateur call sign will consist of a sequence of one or two letters, a numeral designating the call sign area, and two or three letters. The call sign areas are as follows:

No.
1. Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut.
2. New York, New Jersey.
3. Pennsylvania, Delaware, Maryland, District of Columbia.
4. Virginia, North and South Carolina, Georgia, Florida, Alabama, Tennessee, Kentucky, Puerto Rico and Virgin Islands.
5. Mississippi, Louisiana, Arkansas, Oklahoma, Texas, New Mexico.
6. California, Hawaii and Pacific possessions except those included in area 7.
7. Oregon, Washington, Idaho, Montana, Wyoming, Arizona, Nevada, Utah, Alaska and adjacent islands.
8. Michigan, Ohio, West Virginia.
9. Wisconsin, Illinois, Indiana.
0. Colorado, Nebraska, North and South Dakota, Kansas, Minnesota, Iowa, Missouri.

§ 12.82 *Transmissions of call signs.* (a) An operator of an amateur station shall transmit the call sign of the station called or being worked and the call sign assigned the station which he is operating at the beginning and end of each transmission and at least once every 10 minutes during every transmission of more than 10 minutes' duration. In the case of stations conducting an exchange of several transmissions in sequence, with each transmission less than 3 minutes' duration, the call signs of the communicating stations need be transmitted only once every 10 minutes of operation as well as at the beginning and at the termination of the correspondence.

(b) In addition to complying with the requirements of paragraph (a) of this section, an operator of an amateur station operated as a portable or mobile station using radiotelegraphy shall transmit immediately after the call sign of such station, the fraction-bar character (DN) followed by the number of the amateur call sign area in which the portable or mobile amateur station is then being operated, as for example:

Example 1. Portable or mobile amateur station operating in the third amateur call sign area calls a fixed amateur station: W1ABC W1ABC W1ABC DE W2DEF $\overline{DN}$ 3 W2DEF $\overline{DN}$ 3 W2DEF $\overline{DN}$ 3 $\overline{AR}$.

Example 2. Fixed amateur station answers the portable or mobile amateur station: W2DEF W2DEF W2DEF DE W1ABC K.

Example 3. Portable or mobile amateur station calls a portable or mobile amateur station: W3GHI W3GHI W3GHI DE W4JKL $\overline{DN}$ 4 W4JKL $\overline{DN}$ 4 W4JKL $\overline{DN}$ 4 $\overline{AR}$.

When telephony is used, the call sign of the station shall be preceded by the words "this is" or the word "from" instead of the letters "de," followed by an announcement of the geographical location in which the portable or mobile station is being operated.

Example 4. Portable or mobile amateur radiotelephone station operating in the third call area calls a fixed amateur station: W1ABC W1ABC W1ABC "this is" or the word "from" W2DEF W2DEF W2DEF operating portable (or mobile) 3 miles north of Bethesda, Md., over.

(c) When telephony is used, the transmission of call signs prescribed by paragraphs (a) and (b) of this section may be made by the person transmitting by voice in lieu of a duly licensed operator provided the licensed operator maintains the control required by § 12.28.

(d) When using telephony, phonetic aids to identify the call sign of the station may be employed.

(e) In addition to complying with the requirements of paragraph (a) of this section, an operator of an amateur station operated as a mobile station aboard a vessel on the high seas, or aboard an aircraft en route on an international voyage, shall, when the vessel or aircraft is outside the 10 call sign areas prescribed by the Commission in § 12.81 (b), comply with the following calling procedure:

(1) Mobile operations aboard a vessel.

(i) When using telegraphy the amateur operator shall transmit immediately after the call sign of the station the fraction bar $\overline{DN}$ followed by the designator MM to indicate that the station is being operated as a mobile station aboard a vessel. In addition, the name of the vessel and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off. If the vessel does not have a name, the number of the vessel shall be transmitted in lieu of the name of the vessel.

(ii) When using telephony the call sign of the station shall be preceded by the words "this is", or the word "from" followed by the words "maritime mobile", to indicate that the station is being operated as a mobile station aboard a vessel. In addition the name of the vessel and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off. If the vessel does not have a name, the number of the vessel shall be transmitted in lieu of the name of the vessel.

(2) Mobile operations aboard aircraft.

(i) When using telegraphy the amateur operator shall transmit immediately after the call sign of the station the fraction bar $\overline{DN}$ followed by the designator AM to indicate that the station is being operated as a mobile station aboard an aircraft. In addition, the number of the aircraft and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off.

(ii) When using telephony the call sign of the station shall be preceded by the words "this is", or the word "from" followed by the words "aeronautical mobile", to indicate that the station is being operated as a mobile station aboard an aircraft. In addition, the number of the aircraft and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off.

PORTABLE AND MOBILE STATIONS

§ 12.91 *Requirements for portable and mobile operation.* (a) Within the continental limits of the United States, its territories, or possessions, an amateur station may be operated as either a portable or a mobile station on any frequency authorized and available for the amateur radio service. Whenever portable operation is, or is likely to be, for an over-all period in excess of 48 hours away from the fixed transmitter location designated in the station license, the licensee shall give prior written notice to the Engineer in Charge of the radio inspection district in which such portable operation is intended. This notice is required even though the station is, or is likely to be, operated during any part of this over-all period at the fixed transmitter location. Whenever mobile operation is, or is likely to be, for a period in excess of 48 hours without return to the fixed transmitter location designated in the station license, the licensee shall give prior written notice to the Engineer in Charge of the radio inspection district in which such mobile operation is intended. The notice required for either portable or mobile operation shall state the station call sign, the name of the licensee, the date or dates of proposed operation and the contemplated portable station locations, or mobile station itinerary, as specifically as possible. An amateur station operated under the provisions of this section shall not be operated during any period exceeding one month away from the fixed station location designated in the station license without giving additional notice to the Engineer in Charge of the radio inspection district in which the station is intended to be further operated, nor for more than four consecutive periods of 1 month each as portable at the same location. Mobile operation without return to the fixed transmitter location may be continued beyond the four consecutive periods of 1 month each provided that the above mentioned notice of mobile operation is given each month.

(b) Outside the continental limits of the United States, its territories or possessions, an amateur station may be operated as portable or mobile only in the amateur band 28.0 to 29.7 Mc. Within areas under the jurisdiction of a foreign government, operation is also limited to this band and then only with the permission of that government. Whenever such portable or mobile operation is, or is likely to be, for a period in excess of 48 hours away from the continental limits of the United States, its territories, or possessions, the licensee shall give prior written notice to the Engineer in Charge of the radio inspection district in which the fixed transmitter site designated in the station license is located. Only one such notice shall be required during any continued absence from the continental limits of the United States, its territories, or possessions.

§ 12.93 *Special provisions for nonportable stations.* The specific provisions of these rules relative to portable stations are not applicable to a nonportable station except that—

(a) An amateur station that has been moved from one permanent location to another permanent location may be operated at the latter location, in accordance with the provisions governing portable stations (including notice to the Engineer in Charge of the district in which the station is located) for a period not exceeding four consecutive months, but in no event beyond the expiration date of the license, provided a formal application for modification of license to change the permanent location has been filed with the Commission.

(b) The licensee of an amateur station who changes residence temporarily and moves his amateur station to a temporary location associated with his temporary residence, or the licensee-trustee for an amateur radio society which changes the normal location of its amateur station to a different and temporary location may use the station at the temporary location if the station is to remain there for a period of not more than 4 months and the following requirements are met:

(1) Advance notice in writing shall be given by the amateur station licensee or licensee-trustee to the Commission in Washington, D. C., and to the Engineer in Charge of the district in which the station is to be temporarily operated.

(2) Similar notice shall be given for each change in station location and for transfer of the station to the former permament location, or to a new permanent location before the transmitting apparatus is operated.

(c) When the station is operated under the provisions of this section the calling procedure specified in § 12.82 shall be used, including transmissions of the fractional bar character when telegraphy is used followed by the number of the amateur call sign area in which the station is being operated. When telephony is used, an announcement shall be made of the geographical location in which the station is being operated.

§ 12.94 *Special provisions for mobile stations aboard ships or aircraft.* In addition to complying with all other applicable rules, an amateur mobile station operated on board a ship or aircraft must comply with all of the following special conditions: (a) The installation and operation of the amateur mobile station shall be approved by the master of the ship or captain of the aircraft; (b) The amateur mobile station shall be separate from and independent of all other radio equipment, if any, installed on board the same ship or aircraft; (c) The electrical installation of the amateur mobile station shall be in accord with the rules applicable to ships or aircraft as promulgated by the appropriate government agency; (d) The operation of the amateur mobile station shall not interfere with the efficient operation of any other radio equipment installed on board the same ship or aircraft; and (e) The amateur mobile station and its associated equipment, either in itself or in its method of operation, shall not constitute a hazard to the safety of life or property.

USE OF AMATEUR STATIONS

§ 12.101 *Points of communications.* An amateur station may be used to communicate only with other amateur stations, except that in emergencies or for test purposes it may also be used temporarily for communication with other classes of stations licensed by the Commission, and with United States Government stations. Amateur stations may also be used to communicate with any radio station other than amateur which is authorized by the Commission to communicate with amateur stations. Amateur stations may be used also for transmitting signals, or communications, or energy, to receiving apparatus for the measurement of emissions, temporary observation of transmission phenomena, radio control of remote objects, and for similar experimental purposes and for the purposes set forth in § 12.106.

§ 12.102 *No remuneration for use of station.* An amateur station shall not be used to transmit or receive messages for hire, nor for communication for material compensation, direct or indirect, paid or promised.

§ 12.103 *Broadcasting prohibited.* Subject to the provisions of § 12.106, an amateur station shall not be used to engage in any form of broadcasting, that is, the dissemination of radio communications intended to be received by the public directly or by the intermediary of relay stations, nor for the retransmission by automatic means of programs or signals emanating from any class of station other than amateur. The foregoing provision shall not be construed to prohibit amateur operators from giving their consent to the rebroadcast by broadcast stations of the transmissions of their amateur stations, provided, that the transmissions of the amateur stations shall not contain any direct or indirect reference to the rebroadcast.

§ 12.104 *Radiotelephone tests.* The transmission of music by an amateur station is forbidden. However, single audiofrequency tones may be transmitted for test purposes of short duration for the development and perfection of amateur radiotelephone equipment.

§ 12.105 *Codes and ciphers prohibited.* The transmission by radio of messages in codes or ciphers in domestic and international communications to or between amateur stations is prohibited. All communications regardless of type of emission employed shall be in plain language except that generally recognized abbreviations established by regulation or custom and usage are permissible as are any other abbreviations or signals where the intent is not to obscure the meaning but only to facilitate communications.

§ 12.106 *One-way communications.* In addition to the experimental one-way transmissions permitted by § 12.101, the following kinds of one-way communications, addressed to amateur stations, are authorized and will not be construed as broadcasting: (a) Emergency communications, including bona-fide emergency drill practice transmissions; (b) Information bulletins consisting solely of subject matter having direct interest to the amateur radio service as such; (c) Round-table discussions or net-type operations where more than two amateur stations are in communication, each station taking a turn at transmitting to other station(s) of the group; and (d) Code practice transmissions intended for persons learning or improving proficiency in the International Morse Code.

ALLOCATION OF FREQUENCIES[*]

§ 12.111 *Frequencies and types of emission for use of amateur stations.* (a) Subject to the limitations and re-

[*] The assignment and use of all frequencies below 25 megacycles contained in these regulations are subject to change in accordance with the Commission's final report of allocations below 25 megacycles, in Docket Proceeding No. 6651.

strictions set forth in this section and in § 12.114, the following frequency bands and types of emissions are allocated and available for amateur station operation as follows:

(1) 1800 to 2000 kc and 2006 to 2050 kc. Use of this band by amateur radio stations is restricted as follows:

(i) 1800 to 2000 kc. Use of this band is on a shared basis with the Loran system of radio navigation. In any particular area the Loran system of radio navigation operates either on 1850 or 1950 kc, the band occupied being 1800 to 1900 or 1900 to 2000 kc. The amateur service may use in any area whichever bands, 1800 to 1825 and 1875 to 1900 kc, or 1900 to 1925 and 1975 to 2000 kc, are not required for Loran in that area, in accordance with the following limitations and conditions:

(*a*) Mississippi River to East Coast U. S. (except Florida and states bordering Gulf of Mexico): 1800 to 1825 kc and 1875 to 1900 kc, using type A–1 or A–3 emission. Power input to the plate circuit of the tube or tubes supplying power to the antenna shall not exceed 50 watts day, 200 watts night.

(*b*) Mississippi River to West Coast U. S. (except states bordering Gulf of Mexico): 1900 to 1925 kc and 1975 to 2000 kc, using type A–1 or A–3 emission. Power input to the plate circuit of the tube or tubes supplying power to the antenna shall not exceed 500 watts day, 200 watts night, except in the State of Washington where daytime power is limited to 200 watts and nighttime power to 50 watts.

(*c*) Florida and states bordering Gulf of Mexico: 1800 to 1825 kc and 1875 to 1900 kc, using type A–1 or A–3 emission. Power input to the plate circuit of the tube or tubes supplying power to the antenna shall not exceed 200 watts day, no operation at night.

(*d*) Puerto Rico and Virgin Islands: 1900 to 1925 kc and 1975 to 2000 kc, using type A–1 or A–3 emission. Power input to the plate circuit of the tube or tubes supplying power to the antenna shall not exceed 500 watts day, 50 watts night.

(*e*) Hawaiian Islands: 1900 to 1925 kc, and 1975 to 2000 kc, using type A–1 or A–3 emission. Power input to the plate circuit of the tube or tubes supplying power to the antenna shall not exceed 500 watts day, 200 watts night.

(*f*) The use of these frequencies by stations in the Amateur Service shall not cause harmful interference to the Loran system of radio navigation. If an amateur station causes such interference, the station licensee shall, as directed by the Commission, immediately cease operation on the frequencies involved.

(*g*) The use of these frequencies by the Amateur Service shall not be a bar to expansion of the radio navigation (Loran) service, and such use, and the limitations and conditions of such use as set forth in this subparagraph, shall be considered temporary in the sense that they shall remain subject to cancellation or to revision, in whole or in part, without hearing, whenever the Commission shall deem such cancellation or revision to be necessary or desirable in the light of the priority within this band of the Loran system of radio navigation.

(ii) 2006 to 2050 kc. Not available for use.

(2) 3500 to 4000 kc. Use of this band is restricted to amateur radio stations as follows:

(i) 3500 to 4000 kc, using type A–1 emission, to those stations located within the continental limits of the United States, the Territories of Alaska and Hawaii, Puerto Rico, the Virgin Islands and all United States possessions lying west of the Territory of Hawaii to 170° west longitude.

(ii) 3800 to 4000 kc, using type A3 emission and, on frequencies 3800 to 3850 kc, using narrow band frequency or phase modulation for radiotelephony, to those stations located within the continental limits of the United States, the Territories of Alaska and Hawaii, Puerto Rico, the Virgin Islands and all United States possessions lying west of the Territory of Hawaii to 170° west longitude, subject to the further restriction that type A3 emission, or narrow band frequency or phase modulation for radiotelephony, may be used only by an amateur station which is licensed to an amateur operator holding an Amateur Extra Class or Advanced Class license and then only when operated and controlled by an amateur operator holding an Amateur Extra Class or Advanced Class license.

(3) 7000 to 7300 kc, using type A1 emission.

(4) 14000 to 14400 kc, using type A1 emission and, on frequencies 14200 to 14300 kc, type A3 emission and, on frequencies 14200 to 14250 kc, using narrow band frequency or phase modulation for radiotelephony, subject to the restriction that type A3 emission, or narrow band frequency of phase modulation for radiotelephony, may be used only by an amateur station which is licensed to an amateur operator holding an Amateur Extra Class or Advanced Class license and then only when operated and controlled by an amateur operator holding an Amateur Extra Class or Advanced Class license.

(5) 26.960 to 27.230 Mc, using A0, A1, A2, A3, and A4 emission and also special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques), subject to such interference as may result from the emissions of industrial, scientific and medical devices within 160 kc of the frequency 27.120 Mc.

(6) 28.0 to 29.7 Mc, using type A1 emission and, on frequencies 28.5 to 29.7 Mc using type A3 emission and narrow band frequency or phase modulation for radiotelephony and, on frequencies 29.0 to 29.7, using special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(7) 50.0 to 54.0 Mc, using types A1, A2, A3, and A4 emission and narrow band frequency or phase modulation for radiotelephony and, on frequencies 52.5 to 54.0 Mc, special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(8) 144 to 148 Mc, using types A0 A1, A2, A3, and A4 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(9) 220 to 225 Mc,[1] using types A0, A1, A2, A3, and A4 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques), provided that until January 1, 1952, if this band is required for distance measuring equipment at certain United States gateways and Canadian border locations, amateurs within interference range of those gateways and locations shall, after publication by the Commission of an order designating the areas involved, cease to use this band, but shall be entitled in lieu thereof to use the band 235 to 240 Mc.

(10) 235 to 240 Mc, using type A0, A1, A2, A3, and A4 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques) until January 1, 1952, provided that commencing with June 9, 1948, this band may be used only as a substitute for the band 220 to 225 Mc in those cases in which the band 220 to 225 Mc may not be used, as provided in subparagraph (9) of this paragraph.

(11) 420 to 450 Mc, using types A0, A1, A2, A3, A4, and A5 emissions and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques). Peak antenna power shall not exceed 50 watts in order to minimize interference to aircraft altimeters temporarily allocated to this band.

(12) 1215 to 1300 Mc, using types A0, A1, A2, A3, A4, and A5 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(13) 2300 to 2450 Mc, 3300 to 3500 Mc, 5650 to 5925 Mc, 10,000 to 10,500 Mc, 21,000 to 22,000 Mc, and any frequency or frequencies above 30,000 Mc, using on these frequencies types A0, A1, A2, A3, A4, A5 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques), and pulse emission. Operations in the frequency bands 2300 to 2450 Mc and 5650 to 5925 Mc are subject to such interference between 2400 and 2450 Mc and between 5775 and 5925 Mc, respectively, as may result from emissions of industrial, scientific and medical devices on the frequencies 2450 and 5850 Mc, respectively.

§ 12.113 *Individual frequency not specified.* Transmissions by an amateur station may be on any frequency within any authorized amateur band. Sideband frequencies resulting from keying or modulating a carrier wave shall be confined within the authorized amateur band.

§ 12.114 *Types of emission.* (a) Type A0 emission, where not specifically designated in the bands listed in § 12.111, may be used for short periods of time when required for authorized remote control purposes or for experimental purposes. However, these limitations do not apply where type A0 emission is specifically designated.

(b) [Deleted]

(c) The use of narrow band frequency or phase modulation is subject to the conditions that the band-width of the modulated carrier shall not exceed the band-width occupied by an amplitude-modulated carrier of the same audio characteristics, and that the purity and stability of such emissions shall be maintained in accordance with the requirements of § 12.133.

EQUIPMENT AND OPERATION

§ 12.131 *Maximum authorized power.* Except on frequencies within the band 420 to 450 megacycles (where peak antenna power shall not exceed 50 watts), each amateur transmitter may be operated with a power input not exceeding 1 kilowatt to the plate circuit of the final amplifier stage of an amplifier-oscillator transmitter or to the plate circuit of an oscillator transmitter. An amateur transmitter operating with a power input exceeding 900 watts to the plate circuit shall provide means for accurately measuring the plate power input to the vacuum tube or tubes supplying power to the antenna.

§ 12.132 *Power supply to transmitter.* The licensee of an amateur station using frequencies below 144 megacycles shall use adequately filtered direct-current plate power supply for the transmitting equipment to minimize modulation from this source.

§ 12.133 *Purity and stability of emissions.* Spurious radiation from an amateur station being operated with a carrier frequency below 144 megacycles shall be reduced or eliminated in accordance with good engineering practice. This spurious radiation shall not be of sufficient intensity to cause interference in receiving equipment of good engineering design including adequate selectivity characteristics, which is tuned to a frequency or frequencies outside the frequency band of emission normally required for the type of emission being employed by the amateur station. In the case of A–3 emission, the amateur transmitter shall not be modulated to the extent that interfering spurious radiation occurs, and in no case shall the emitted carrier wave be amplitude-modulated in excess of 100 percent. Means shall be employed to insure that the transmitter is not modulated in excess of its modulation capability for proper technical operation. For the purposes of this section a spurious radiation is any radiation from a transmitter which is outside the frequency band of emission normal for the type of transmission employed, including any component whose frequency is an integral multiple or submultiple of the carrier frequency (harmonics and subharmonics), spurious modulation products, key clicks, and other transient effects, and parasitic oscillations. When using amplitude modulation on frequencies below 144 megacycles, simultaneous frequency modulation is not permitted and when using frequency modulation on frequencies below 144 megacycles simultaneous amplitude modulation is not permitted. The frequency of the emitted carrier wave shall be as constant as the state of the art permits.

§ 12.134 *Modulation of carrier wave.* Except for brief tests or adjustments and except for operation in the band 26.960 to 27.230 megacycles, an amateur radiotelephone station shall not emit a carrier wave on frequencies below 144 megacycles unless modulated for the purpose of communication.

§ 12.135 *Frequency measurement and regular check.* The licensee of an amateur station shall provide for measurement of the emitted carrier frequency or frequencies and shall establish procedure for making such measurement regularly. The measurement of the emitted carrier frequency or frequencies shall be made by means independent of the means used to control the radio frequency or frequencies generated by the transmitting apparatus and shall be of sufficient accuracy to assure operation within the amateur frequency band used.

§ 12.136 *Logs.* Each licensee of an amateur station shall keep an accurate log of station operation, including the following:

(a) The date and time of each transmission. (The date need only be entered once for each day's operation. The expression "time of each transmission" means the time of making a call and need not be repeated during the sequence of communication which immediately follows; however, an entry shall be made in the log when signing off so as to show the period during which communication was carried on.)

(b) The signature of each licensed operator who manipulates the key of a radiotelegraph transmitter or the signature of each licensed operator who operates a transmitter of any other type and the name of any person not holding an amateur operator license who transmits by voice over a radiotelephone transmitter. The signature of the operator need only be entered once in the log, in those cases when all transmissions are made by or under the supervision of the signatory operator, provided a statement to that effect also is entered. The signature of any other operator who operated the station shall be entered in the proper space for that operator's transmission.

(c) Call sign of the station called. (This entry need not be repeated for calls made to the same station during any sequence of communication, provided the time of signing off is given.)

(d) The input power to the oscillator, or to the final amplifier stage where an oscillator-amplifier transmitter is employed. (This need be entered only once, provided the input power is not changed.)

(e) The frequency band used. (This information need be entered only once in the log for all transmissions until there is a change in frequency to another amateur band.)

(f) The type of emission used. (This need be entered only once until there is a change in the type of emission.)

(g) The location of the station (or the approximate geographical location of a mobile station) at the time of each transmission. (This need be entered only once provided the location of the station is not changed. However, suitable entry shall be made in the log upon changing the location. Where operating at other than a fixed location, the type and identity of the vehicle or other mobile unit in which the station is operated shall be shown.)

(h) The message traffic handled. (If record communications are handled in regular message form, a copy of each message sent and received shall be entered in the log or retained on file at the station for at least 1 year.)

§ 12.137 *Retention of logs.* The log shall be preserved for a period of at least 1 year following the last date of entry. The copies of record communications and station log required by § 12.136 shall be available for inspection by authorized representatives of the Commission.

[1] In those portions of the States of Texas and New Mexico in the area bounded on the south by parallel 31°55′ N., on the east by longitude 105°40′ W., on the north by parallel 33°24′ N., and on the west by longitude 106°40′ W., the frequency band 220–225 Mc. is not available for use by amateur stations engaged in normal amateur operation between the hours of 0500 and 1800 local time Monday through Friday inclusive of each week. However, the entire frequency band 220–225 Mc. shall be applicable in all areas to those amateur stations authorized to operate in an organized civil defense network during all periods when civil defense emergencies exist and, in addition, special arrangements for civil defense drills between the hours and within the area set forth above may be made upon mutual agreement between the Federal Communications Commission Engineer in Charge at Dallas, Texas, and the Area Frequency Coordinator at White Sands, New Mexico, if it appears necessary to conduct such drills. Such arrangements shall specify dates and times, and will depend upon the degree of use of the frequency band at White Sands at any particular time.

SPECIAL CONDITIONS

§ 12.151 *Additional conditions to be observed by licensee.* In all respects not specifically covered by these regulations each amateur station shall be operated in accordance with good engineering and good amateur practice.

§ 12.152 *Restricted operation.* (a) If the operation of an amateur station causes general interference to the reception of transmissions from stations operating in the domestic broadcast service when receivers of good engineering design including adequate selectivity characteristics are used to receive such transmissions and this fact is made known to the amateur station licensee, the amateur station shall not be operated during the hours from 8 p. m. to 10:30 p. m., local time, and on Sunday for the additional period from 10:30 a. m. until 1 p. m., local time, upon the frequency or frequencies used when the interference is created.

(b) In general, such steps as may be necessary to minimize interference to stations operating in other services may be required after investigation by the Commission.

§ 12.153 *Second notice of same violation.* In every case where an amateur station licensee is cited within a period of 12 consecutive months for the second violation of the provisions of §§ 12.111, 12.113, 12.114, 12.132, or 12.133, the station licensee, if directed to do so by the Commission, shall not operate the station and shall not permit it to be operated from 6 p. m. to 10:30 p. m., local time, until written notice has been received authorizing the resumption of full-time operation. This notice will not be issued until the licensee has reported on the results of tests which he has conducted with at least two other amateur stations at hours other than 6 p. m. to 10:30 p. m., local time. Such tests are to be made for the specific purposes of aiding the licensee in determining whether the emissions of the station are in accordance with the Commission's rules. The licensee shall report to the Commission the observations made by the cooperating amateur licensees in relation to the reported violations. This report shall include a statement as to the corrective measures taken to insure compliance with the rules.

§ 12.154 *Third notice of same violation.* In every case where an amateur station licensee is cited within a period of 12 consecutive months for the third violation of §§ 12.111, 12.113, 12.114, 12.132 or 12.133, the station licensee if directed by the Commission, shall not operate the station and shall not permit it to be operated from 8 a. m. to 12 midnight, local time, except for the purposes of transmitting a prearranged test to be observed by a monitoring station of the Commission to be designated in each particular case. The station shall not be permitted to resume operation during these hours until the licensee is authorized by the Commission, following the test, to resume full-time operation. The results of the test and the licensee's record shall be considered in determining the advisability of suspending the operator license or revoking the station license, or both.

§ 12.155 *Answers to notices of violations.* Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act, Executive order, treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 3 days from such receipt, send a written answer direct to the office of the Commission originating the official notice: *Provided, however,* That if an answer cannot be sent nor an acknowledgment made within such 3-day period by reason of illness or other unavoidable circumstances, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, are taken to prevent future violations, and if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the notice of violation relates to some lack of attention or improper operation of the transmitter, the name of the operator in charge shall be given.

§ 12.156 *Operation in emergencies.* In the event of widespread emergency conditions affecting domestic communication facilities, the Commission may confer with representatives of the amateur service and others, and if deemed advisable, declare that a state of general communications emergency exists, designating the area or areas concerned (normally not exceeding 1,000 miles from center of the affected area), whereupon it shall be incumbent upon each amateur station in such area or areas to observe the following restrictions for the duration of such emergency:

(a) Transmissions, other than those relating to relief work or other emergency service, such as amateur station networks can provide, shall not be made within the 1750–2050-kilocycle or 3500–4000-kilocycle bands. Incidental calling, testing and working, including casual conversion or remarks not pertinent or necessary to constructive handling of the emergency situation shall be prohibited.

(b) Frequencies within the bands 2025–2050-kilocycle, 3500–3525-kilocycle and 3975–4000-kilocycle shall be reserved for emergency calling channels, for initial calls from isolated stations or first calls concerning very important emergency relief matters or arrangements. All stations having occasion to use such channels shall change, as quickly as possible, to other frequencies for carrying on their communications.

(c) A 5-minute listening period for the first 5 minutes of each hour shall be uniformly observed for initial calls of major importance, both in the designated emergency calling channels and throughout the 1750–2050-kilocycle and 3500–4000-kilocycle bands. Only stations isolated or engaged in handling official traffic of the highest priority may continue with transmissions in these listening periods. No replies to calls or resumption of routine traffic shall be made in the 5-minute listening periods.

(d) The Commission may designate certain amateur stations to assist in promulgation of its emergency announcement, to police the 1750–2050-kilocycle and 3500–4000-kilocycle bands and to warn noncomplying stations observed to be operating therein. The operators of these observing stations shall report fully to the Commission the identity of any stations failing to comply, after notice, with any of the pertinent provisions of this section. Such designated stations will act in an advisory capacity when able to provide information on emergency circuits. Their policing authority shall be limited to the transmission of information from responsible official sources, and full reports of noncompliance which may serve as a basis for investigation and action under section 502 of the Communications Act. Such policing authority shall apply only to the 1750–2050-kilocycle and 3500–4000-kilocycle bands. Individual policing transmissions shall refer to this section of the rules by number (§ 12.156) and shall specify briefly and concisely the date of the Commission's declaration and the area and nature of the emergency. Policing observer station shall not enter into discussions with other stations beyond the furnishing of essential facts relative to the emergency.

(e) The special conditions imposed under this section will cease to apply only after the Commission shall have declared such emergency to be terminated.

§ 12.157 *Obscenity, indecency, profanity.* No licensed radio operator or other person shall transmit communications containing obscene, indecent, or profane words, language, or meaning.

§ 12.158 *False signals.* No licensed radio operator shall transmit false or deceptive signals or communications by radio, or any call letter or signal which has not been assigned by proper authority to the radio station he is operating.

§ 12.159 *Unidentified communications.* No licensed radio operator shall transmit unidentified radio communications or signals.

§ 12.160 *Interference.* No licensed radio operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal.

§ 12.161 *Damage to apparatus.* No licensed radio operator shall willfully damage, or cause or permit to be damaged, any radio apparatus or installation in any licensed radio station.

§ 12.162 *Fraudulent licenses.* No licensed radio operator or other person shall obtain or attempt to obtain, or assist another to obtain or attempt to obtain, an operator license by fraudulent means.

APPENDIX

EXAMINATION POINTS

Examinations for amateur radio operator licenses are conducted at the Commission's office in Washington, D. C., Monday through Friday, except holidays (office hours are from 8:30 a. m. to 5 p. m.), and at each radio district office of the Commission on the days designated by the Engineer in Charge of the office. Specific dates should be obtained from the Engineer in Charge. For a list of such offices see the following pages.

Examinations are also given frequently, by appointment, at the Commission's offices at the following points:

Mobile, Ala.	Tampa, Fla.
Savannah, Ga.	Juneau, Alaska.
San Diego, Calif.	Anchorage, Alaska.

Examinations are also given at greater intervals at the places named below, which are visited for that purpose by Commission examiners from the district offices for such locations. For current schedules, exact time, place, and other details, inquiry should be addressed to the office conducting examinations at the chosen point.

EXTRACTS FROM GENERAL RADIO REGULATIONS

(Cairo revision)

ARTICLE 5—CLASSIFICATION OF EMISSIONS

SECTION 1. Emissions shall be classified below according to the purpose for which they are used, assuming their modulation or their possible keying to be only in amplitude.

1. Continuous waves:

Type Aø. Waves the successive oscillations of which are identical under fixed conditions.[1]

Type A1. Telegraphy on pure continuous waves. A continuous wave which is keyed according to a telegraph code.

Type A2. Modulated telegraphy. A carrier wave modulated at one or more audible frequencies, the audible frequency or frequencies or their combination with the carrier wave being keyed according to a telegraph code.

Type A3. Telephony. Waves resulting from the modulation of a carrier wave by frequencies corresponding to the voice, to music, or to other sounds.

Type A4. Facsimile. Waves resulting from the modulation of a carrier wave by frequencies produced at the time of the scanning of a fixed image with a view to its reproduction in a permanent form.

Type A5. Television. Waves resulting from the modulation of a carrier wave by frequencies produced at the time of the scanning of fixed or moving objects.[2]

NOTE. The band widths to which these emissions correspond are indicated in appendix 3.

2. Damped waves:

Type B. Waves composed of successive series of oscillations the amplitude of which, after attaining maximum, decreases gradually, the wave trains being keyed according to a telegraph code.

SEC. 2. In the above classification, the presence of a carrier wave is assumed in all cases. However, such carrier wave may or may not be transmitted.

This classification does not contemplate exclusion of the use, by the administrations concerned, under specified conditions, of types of waves not included in the foregoing definitions.

APPENDIX 3

TABLE OF FREQUENCY-BAND WIDTHS OCCUPIED BY THE EMISSIONS

The frequency bands necessary for the various types of transmissions, at the present state of technical development, are indicated below. This table is based solely upon amplitude modulation. For frequency or phase modulation, the band widths necessary for the various transmissions are many times greater.

Type of transmission	Total width of the band in cycles for transmission with 2 side bands
Aø. Continuous waves, no signaling.	
A1. Telegraphy, pure, continuous wave. Morse code. Baudot code. Stop-start printer.	Numerically equal to the telegraph speed in bauds for the fundamental frequency, 3 times this width for the 3d harmonic, etc. (For a code of 8 time elements (dots or blanks) per letter and 48 time elements per word, the speed in bauds shall be equal to 0.8 times the speed in words per minute.)
Scanning-type printer	300–1,000, for speeds of 50 words per minute, according to the conditions of operation and the number of lines scanned (for example, 7 or 12). (Harmonics are not considered in the above values.)
A2. Telegraphy modulated to musical frequency.	Figures appearing under A1, plus twice the highest modulation frequency.
A3. Commercial radiotelephony.	Twice the number indicated by the C. C. I. F. opinions (about 6,000 to 8,000).[1]
Broadcasting	15,000 to 20,000.
A4. Facsimile	Approximately the ratio between the number of picture components[2] to be transmitted and the number of seconds necessary for the transmission.
A5. Television	Approximately the product of the number of picture components[2] multiplied by the number of pictures transmitted per second.

[1] It is recognized that the band width may be wider for multiple-channel radiotelephony and secret radiotelephony.

[2] Two picture components, one black and one white, constitute a cycle; thus, the modulation frequency equals one-half the number of components transmitted per second.

EXTRACTS FROM RADIO REGULATIONS

ANNEXED TO THE INTERNATIONAL TELECOMMUNICATION CONVENTION

(Atlantic City, 1947)

ARTICLE 42 [1]—AMATEUR STATIONS

SECTION 1. Radiocommunications between amateur stations of different countries shall be forbidden if the administration of one of the countries concerned has notified that it objects to such radiocommunications.

SEC. 2. (1) When transmissions between amateur stations of different countries are permitted they must be made in plain language and must be limited to messages of a technical nature relating to tests and to remarks of a personal character for which, by reason of their unimportance, resource to the public telecommunications service is not justified. It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties.

(2) The preceding provisions may be modified by special arrangements between the countries concerned.

SEC. 3. (1) Any person operating the apparatus in an amateur station must have proved that he is able to transmit, and to receive by ear, texts in Morse code signals. Administrations concerned may, however, waive this requirement in the case of stations making use exclusively of frequencies above 1000 (one thousand) Mc/s.

(2) Administrations shall take such measures as they judge necessary to verify the qualifications, from a technical point of view, of any person operating the apparatus of an amateur station.

SEC. 4. The maximum power of amateur stations shall be fixed by the administrations concerned, having regard to the technical qualifications of the operators and to the conditions under which these stations must work.

SEC. 5. (1) All the general rules of the Convention and of the present Regulations shall apply to amateur stations. In particular, the transmitting frequency must be as constant and as free from harmonics as the state of technical development for stations of this nature permits.

(2) During the course of their transmissions amateur stations must transmit their call sign at short intervals.

[1] These waves used only in special cases, such as standard frequency emissions.

[2] "Objects" is used here in the optical sense of the word.

[1] Article 42 of the Radio Regulations annexed to the International Telecommunication Convention (Atlantic City, 1947) becomes effective on January 1, 1949 at which time it supersedes Article 8 of the General Radio Regulations, Cairo Revision, 1938).

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

[S. O. 879]

PART 95—CAR SERVICE

REDUCED RATES ON GIANT REFRIGERATOR CARS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of June A. D. 1951.

It appearing, that there is a shortage of refrigerator cars in California and Arizona and that certain Transcontinental Freight Bureau tariffs contain rate penalties on the use of giant type refrigerator cars, in the opinion of the Commission an emergency exists requiring immediate action in California and Arizona. It is ordered, that:

§ 95.879 *Reduced rates on giant refrigerator cars.*—(a) *Rates applicable.* Common carrier by railroad subject to the Interstate Commerce Act serving points in Arizona and California, shall furnish without regard to ownership for loading with commodities, in carloads, suitable for transportation in refrigerator cars, and shall accept and transport such commodities in giant type refrigerator cars as defined in paragraph (b) of this section, at the freight rates applicable on the same commodities when loaded in standard refrigerator cars (cars with inside length between bulkheads—loading space—of less than 37 feet 6 inches).

(b) *Giant refrigerator car defined.* For the purpose of this section, the term "giant refrigerator cars" is defined as refrigerator cars (1) with inside measurement between bulkheads (loading space) of not less than 37 feet 6 inches, and (2) convertible refrigerator cars with collapsible bunkers having inside length between bulkheads (loading space) of less than 37 feet 6 inches with bulkheads in place, and in excess of 37 feet 6 inches with bulkheads collapsed.

(c) *Cars exempt from section.* The provisions of this section shall not be construed to include the following cars:

Initial:	*Number, inclusive*
BREX-BHIX	300–329
WFEX-WHIX	400–500
FOBX	600–697
FOBX	700–799
WOBX	501–550
NHIX	900–999
PFE	100,051–100,500
PFE	200,001–200,587
URT	89,000–89,099

(d) *Tariff provisions suspended.* The operation of all tariff rules, regulations, or charges insofar as they conflict with this section is hereby suspended.

(e) *Announcement of suspension.* Each railroad, or its agent, shall file and post a supplement to each of its tariffs affected hereby, substantially in the form authorized in Rule 9 (k) of the Commission's Tariff Circular No. 20 (§ 141.9 (k) of this chapter) announcing the suspension of the operation of any of the provisions therein, and establishing the substituted provisions set forth in this section.

(f) *Effective date.* This section shall became effective at 12:01 a. m. June 29, 1951.

(g) *Expiration date.* This section shall expire at 11:59 p. m. July 28, 1951, unless otherwise modified, changed, suspended or annulled by order of this Commission.

It is further ordered, that a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order shall be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Intreprets or applies sec. 1, 24 Stat. 379, as amended, sec. 15, 24 Stat. 384, as amended; 49 U. S. C. 1, 15)

By the Commission, Division 3.

[SEAL] W. P. BARTEL, *Secretary.*

PROPOSED RULE MAKING

CIVIL AERONAUTICS ADMINISTRATION

[14 CFR Part 625]

NOTICE OF CONSTRUCTION OR ALTERATION

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that adoption of the following revision of Part 625 is contemplated. All interested persons who desire to submit written data, views, or arguments for consideration by the Administrator of Civil Aeronautics in connection with the proposed revision shall send them to the Civil Aeronautics Administration, Airspace Utilization Branch, Office of Federal Airways, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER.

PART 625—NOTICE OF CONSTRUCTION OR ALTERATION

Sec.
625.1 Explanation of terms.
625.2 Structures requiring notice.
625.3 Structures exempt from notice.
625.4 Form and time of notice.

AUTHORITY: §§ 625.1 to 625.4 issued under sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 1101, 52 Stat. 1026, as amended; 49 U. S. C. 671.

§ 625.1 *Explanation of terms.* As used in this part:

(a) "Administrator" shall mean Administrator of Civil Aeronautics.

(b) "Alteration" shall mean any change in a completed structure which (1) increases the height of the top or any portion of the structure to, or above, the height specified in § 625.2, or (2) increases or decreases the height of the top or any portion of the structure which is above the height specified in § 625.2.

(c) "Boundary of a landing area" shall mean (1) any one of the limits of that portion of a landing area maintained for the use of land aircraft in taking off or landing or (2) any one of the limits of that portion of a landing area used for water aircraft in taking off or landing, which limits are defined as being five thousand feet in all directions measured over open water from the principal ramp of the landing area or, if marked in accordance with standard practice, the limits of the landing area so marked.

(d) "Ground level" and "mean water level" shall mean the ground level and/or mean water level at the base of the structure.

(e) "Landing area" shall mean any locality, either of land or water, including airports and intermediate landing fields, which is listed as an airport in the current issue of the Airmen's Guide [1] and is used for the landing and take-off of aircraft, whether or not facilities are provided for sheltering, servicing, or repairing aircraft, or for receiving or discharging passengers or cargo.[2]

(f) "Structure" shall mean any form of construction of a permanent or temporary character, including any ap-

[1] "Airmen's Guide" may be examined in any office of the Civil Aeronautics Administration. It is for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C., at 25¢ per copy or $6.00 per year.

[2] See section 1 (22) of the Civil Aeronautics Act of 1938 (52 Stat. 977; 49 U. S. C. 401).

paratus used in the construction, alteration, or repair of any such structure.

§ 625.2 *Structures requiring notice.* Except as otherwise provided in § 625.3, any person engaging in the construction or alteration of any of the following structures shall give notice thereof to the Administrator.

(a) Any structure along, or within twenty miles of, a civil airway, the top or any portion of which is, or may become, by reason of such construction or alteration, greater than one hundred and fifty feet above ground level, or above mean water level (where the structure is, or will be, situated in, or over, navigable water).

(b) Any structure within fifteen thousand feet of the nearest boundary of a landing area located along, or within twenty miles of, a civil airway, the top or any portion of which is, or may become, by reason of such construction or alteration, greater than five feet above ground level, or above mean water level (where the structure is, or will be, situated in or over navigable water), for each five hundred feet or fraction thereof, of the distance that such structure is, or will be, situated from the nearest boundary of a landing area.

§ 625.3 *Structures exempt from notice.* A person engaging in the construction or alteration of the following structures is not required to give notice thereof to the Administrator:

(a) Any structure located in a city, town, or settlement, where the structure, after construction or alteration, will be shielded by existing structures of a permanent and substantial character, each of which is equal to or greater than the height of the completed structure.

(b) Any structure located in a city where it is evident beyond all reasonable doubt that the structure will not interfere with safety in air commerce, whether or not the structure is, or will become, by reason of the construction or alteration, greater in height than that of surrounding structures of a permanent and substantial character.

§ 625.4 *Form and time of notice.* (a) The notice of construction or alteration shall be submitted to a representative of the Administrator in triplicate on a Form ACA–117,[1] at least thirty days, but not more than sixty days, prior to the date on which such construction or alteration is to begin: *Provided*, That in case of an emergency requiring immediate construction or alteration, such notice may be given to a representative of the Administrator in person, by telephone, by telegraph, or by other expeditious means, and the executed Form ACA–117 shall be submitted within five days thereafter.

(b) Any change in the date upon which the construction or alteration is to begin, or any other change in the data contained in the Form ACA–117 submitted in compliance with paragraph (a) of this section, shall be communicated to a representative of the Administrator on a Form ACA–117, by letter, or by telegraph.

F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 51–7635; Filed, July 3, 1951; 8:46 a. m.]

[1] This form has been approved by the Bureau of the Budget in compliance with the Federal Reports Act. Copies of the form may be obtained from the Civil Aeronautics Administration, Washington 25, D. C., or from the nearest regional or district office of the Civil Aeronautics Administration.

INTERSTATE COMMERCE COMMISSION

[49 CFR Parts 71–78]

[Notice No. 2; Docket No. 3666]

TRANSPORTATION OF EXPLOSIVES AND OTHER DANGEROUS ARTICLES

NOTICE OF PROPOSED RULE MAKING

JUNE 27, 1951.

The Commission is in receipt of applications for early amendment of the above entitled regulations insofar as they apply to shippers in the preparation of articles for transportation, and to all carriers by rail and highway, as published in orders pursuant to section 835, of the Criminal Code, and Part II of the Interstate Commerce Act;

Application for these amendments ordinarily would be considered at our next hearing in this docket. It appears, however, that the proposed amendments have been the subject of exchanges and study by interested parties, in which substantial agreement has been reached, and it is proposed that the applications be disposed of by modified procedure. The reasons for the proposed amendments are shown in the appendix, hereof.

Any party desiring to be heard upon any of the proposed amendments shall advise the Commission in writing within 20 days from the date of this notice; otherwise, the Commission may proceed to investigate and determine the matters involved in the application, or may suspend action pending formal hearing in this docket.

[SEAL] W. P. BARTEL,
Secretary.

PART 72—COMMODITY LIST OF EXPLOSIVES AND OTHER DANGEROUS ARTICLES CONTAINING THE SHIPPING NAME OR DESCRIPTION OF ALL ARTICLES SUBJECT TO PARTS 71–78 OF THIS CHAPTER

Amend § 72.5, Commodity list (15 F. R. 8263, Dec. 2, 1950; 16 F. R. 5322, June 6, 1951; 49 CFR 72.5, Rev. 1950) as follows:

Article	Classed as—	Exemption and packing (see sec.)	Label required if not exempt	Maximum quantity in 1 outside container by rail or vess
Change				
Bromacetone, liquid	Pois. A	No exemption, 73.329 (a).	Poison Gas	Not [illegible]
Chlorpicrin, liquid	Pois. B	No exemption, 73.357	Poison	24 pounds.
Chlorpicrin, absorbed	do	do	do	75 pounds.
Chlorpicrin, mixtures (containing no compressed gas or poisonous liquid, class A)	do	do	do	Do.
Chlorpicrin and methyl chloride mixtures	Pois. A	No exemption, 73.329 (b).	Poison Gas	Not [illegible]
Add				
Ethylene imine, inhibited	F. L	No exemption, 73.139	Red	5 pints.
Sodium bromate	Oxy. M	73.153, 73.154	Yellow	100 pounds.
Titanium metal powder, dry	F. S	No exemption, 73.208	do	75 pounds.
Zirconium, metallic, solutions or mixtures thereof, liquid.	F. L	No exemption, 73.140	Red	5 pints.

PART 73—SHIPPERS

SUBPART A—PREPARATION OF ARTICLES FOR TRANSPORTATION BY CARRIERS BY RAIL FREIGHT, RAIL, EXPRESS, HIGHWAY, OR WATER

1. Amend § 73.22 paragraph (c) Table (15 F. R. 8276, Dec. 2, 1950; 49 CFR 73.22, Rev. 1950) to read as follows:

When these regulations call for specification numbers—	These specification containers may also be used—	
1A	1	Boxed carboy, glass or earthenware.
1B	1	Boxed carboy, lead.
1C	1	Carboy in keg, glass or earthenware.
3A	3, 25, 26	Cylinder
3AA	3, 25, 26	Do.
3B	26	Do.
3C	7	Do.
3D	33	Do.
3E	3	Do.
4A	26	Do.
4B	26, 38	Do.
4BA	26, 38	Do.
4C	7	Do.

2. Amend § 73.25 paragraph (a) and add paragraph (b) (15 F. R. 8277, Dec. 2, 1950; 49 CFR 73.25, Rev. 1950) to read as follows:

§ 73.25 *Specification containers in outside containers.* (a) Outside specification shipping containers containing no acids or other corrosive liquids may be shipped when tightly packed in strong outside fiberboard boxes or drums, wooden boxes, barrels or crates, or metal barrels or drums. The outside shipping container must be marked with the prescribed name of contents and labeled as required. Packages required by these regulations to be marked "This Side Up" must be packed in the outside package with their filling holes, up, and the outside package must be marked "This Side Up." The outside container must also be marked "Inside Packages Comply With Prescribed Specifications" unless the specification markings on the inside packages are visible through openings in the outside package.

(b) Outside specification shipping containers containing acids or other corrosive liquids, except nitric acid, perchloric acid, or hydrogen peroxide solution containing over 52 percent hydrogen peroxide by weight, may be shipped when tightly packed in strong outside fiberboard or wooden boxes, or in wooden crates, provided such outside container shall not contain any other article except as provided in §§ 73.258 to 73.261. The outside container shall be marked with the prescribed name of contents and labeled as required and shall be marked "This Side Up." The outside container must also be marked "Inside Packages Comply With Prescribed Specifications", unless the specification markings on the inside packages are visible through openings in the outside package.

3. Amend § 73.31 paragraphs (a) and Table, (d), (e) and (f) (15 F. R. 8278, Dec. 2, 1950; 49 CFR 73.31, Rev. 1950) to read as follows:

§ 73.31 *Qualification, maintenance, and use of tank cars.* (a) Tanks mounted on or forming part of a car and built in compliance with the American Railway Association's specifications for tank cars prior to July 1, 1927; or built in compliance with the Commission's specifications for tanks of tank cars in force prior to the effective date of Parts 71–78 of this chapter, including tanks already constructed or under construction on the effective date hereof in compliance with trial specifications for fusion-welded tanks of tank cars are authorized for service, until further order of the Commission, as follows:

Where these regulations call for specification numbers	These specification containers may also be used
103 [1]	A. R. A. II [1], III [1], IV [1].
103A [1]	A. R. A. II [1], and III [1].
103B [1]	A. R. A. II [1], and III [1], rubber lined.
104 [1]	A. R. A. IV. [1]
105A300	A. R. A. V. [1] I. C. C. 105 [2].
106A500	I. C. C. 27 cylinders mounted on or forming part of a car and classified as multi-unit tank car prior to Oct. 1, 1930. [3]
106ANSO	None.
107A	None.
108	Wooden tanks built and authorized prior to July 1, 1927.
108A	Wooden tanks built and authorized prior to July 1, 1927.

[No change in notes.]

* * * * *

(d) For repairs to ICC–106A or 110A type or tank or equipment (see §§ 78.275, 78.276, and 78.293 of this chapter) therefor requiring welding, the owner of the tank, or party authorized by the owner, must secure approval from the Association of American Railroads' committee on tank cars of such repairs, and the welding and stress-relieving must be the same as authorized for manufacture of tank. Tank must be retested as prescribed in paragraph (g) of this section, before being returned to service.

(e) A tank car other than of the ICC–106A or 110A (§§ 78.275, 78.276, and 78.293 of this chapter) and 107A (§ 78.277 of this chapter) type that bears evidence of damage to the metal by fire must be withdrawn from transportation service: *Provided, however,* That where the damage to the tank is local only or confined to a section not exceeding 25 percent of the tank surface, the damaged material may be replaced.

(1) Tanks of ICC–106A, 110A, and 107A (§§ 78.275, 78.276, 78.293, and 78.277 of this chapter) type exposed to the action of fire must not again be placed in service until they have been inspected inside and outside, to determine that no reduction in wall thickness has resulted, and properly heat-treated and retested. These operations must be carried out, supervised, and reported, as prescribed by these specifications for original heat-treatment and test.

(f) After alterations of tank cars or equipment therefor from original design, a certificate of compliance with the specifications, similar to that required in specifications 103, 103W, 104A, 104A–W, 105A300, 105A300W, 106A500, 107A, 108, and 110A500W (§§ 78.265, 78.280, 78.270, 78.285, 78.271, 78.286, 78.275, 78.277, 78.278, and 78.293 of this chapter), respectively, must be furnished to the car owner, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

4. Amend § 73.31 paragraph (1) Note 1 (15 F. R. 8279, Dec. 2, 1950; 49 CFR 73.31, Rev. 1950) to read as follows:

NOTE 1: Safety valves, now used on tank cars, A. R. A. classes II,[1] III,[1] and IV [1] and I. C. C. Specifications 103, 103W, 104 and 104W (§§ 78.265, 78.280, 78.269, and 78.284 of this chapter) are reported to permit slow leakage of vapor and it appears that material changes in the design and construction of these valves are necessary to make them tight. The Commission has notified the Association of American Railroads, representing the carriers, and the American Petroleum Institute, representing the shippers, that the necessary changes must be made with the least possible delay. To accomplish this result, new designs must be devised and tested experimentally, and in the meantime necessary shipments must be made in tank cars now available. Pending the accomplishment of these changes, tank cars with safety valves which permit only a slow leakage of vapor may be used.

5. Amend § 73.33 paragraph (o) (15 F. R. 8282, Dec. 2, 1950; 49 CFR 73.33, Rev. 1950) to read as follows:

(o) Each outlet of cargo tanks used for the transportation of liquefied compressed gases, except carbon dioxide, shall be provided with a suitable automatic excess-flow valve or in lieu thereof may be fitted with quick closing internal valves operated by an independent fluid medium, or with automatic valves opened by pressure from the discharge side of pump provided such valves will close automatically when pump is shut off or in the event of breakage of lines on either side of pump. These valves shall be located inside the tank or at a point outside the tank where the line enters or leaves the tank. The valve seat shall be located inside the tank or shall be located within a welded flange or its companion flange, or within a nozzle, or within a coupling. The installation shall be made in such a manner as reasonably as to assure that any undue strain which causes failure requiring functioning of the valve shall cause failure in such a manner that it will not impair the operation of the valve.

[Exception remains unchanged.]

6. Amend § 73.84 paragraph (f) (15 F. R. 8283, Dec. 2, 1950; 49 CFR 73.34, Rev. 1950) to read as follows:

(f) *Safety devices.* Each cylinder containing compressed gas, unless excepted in this paragraph, must be equipped with one or more safety devices capable of preventing explosion of the normally charged cylinder when it is placed in a fire, and safety devices must be approved by the Bureau of Explosives as to type, location, and number of devices on each cylinder. Cylinders shall not be shipped with leaking safety devices. Safety devices must be tested for leaks before the charged cylinder is shipped from the cylinder filling plant; it is expressly forbidden to repair leaking fuse plug devices, where leak is through the fusible metal or between the fusible metal and the opening in the plug body, except by removal of the device and replacement of the fusible metal. Safety devices are not required on the following:

(1) Cylinders, other than those made under specification ICC–9 (§ 78.63 of this chapter) or ICC–40 (§ 78.66 of this chapter), not over 12 inches long, exclusive of neck, nor over 4½ inches outside diameter, unless containing a liquefied gas for which this part prescribes a service pressure of 1800 pounds per square inch or higher or containing a nonliquefied gas having a pressure in the cylinder of 1800 pounds per square inch or higher at 70° F.

(2) Cylinders containing nonliquefied gas under pressure of 300 pounds per square inch or less at 70° F.

(3) Cylinders containing poisonous gas or liquid as defined in § 73.326 (a).

(4) Cylinders containing fluorine, methyl mercaptan, or mono, di, or trimethylamine, anhydrous. Cylinders containing not over 10 pounds of nitrosyl chloride, or cylinders containing less than 165 pounds of anhydrous ammonia.

(5) Drums containing liquefied petroleum gas as provided for in § 73.312 (a) (5) and (6).

7. Amend § 73.34 paragraph (g) (3) (15 F. R. 8283, Dec. 2, 1950; 49 CFR 73.34, Rev. 1950) to read as follows:

(3) By change of serial numbers or ownership marks or both; before remarking, report must be filed with the Bureau of Explosives, in sufficient detail and arranged consecutively according to registered ownership symbol and serial or lot numbers, so that specification marking, previous serial number, registered ownership symbol, and original test date can be determined for each cylinder.

8. Amend § 73.34 paragraph (k) and Table (15 F. R. 8284, Dec. 2, 1950; 49 CFR 73.34, Rev. 1950) to read as follows:

(k) The tests prescribed by paragraph (j) of this section, must be (for exceptions see paragraph (k) (1) to (11) of this section):

Specification under which cylinders were made	Minimum retest pressure (pounds per square inch)
ICC-3	3,000 pounds.
ICC-3A, ICC-3AA, ICC-3D, ICC-4A, ICC-26 marked for filling at over 450 pounds.	5/3 times the service pressure. (See § 73.301 (g).)
ICC-3B, ICC-3BN, ICC-4B, ICC-4BA, ICC-26 marked for filling at 450 pounds and below.	2 times the service pressure. (See § 73.301 (g).)
ICC-3C, ICC-3E, ICC-4C, ICC-8, ICC-8AL.	Quinquennial test not required.
ICC-7 when used as authorized in § 73.312 (a) (4).	300 pounds.
ICC-7 when not used under authority of § 73.312 (a) (4).	Quinquennial test not required.
ICC-4	700 pounds.
ICC-9	400 pounds.
ICC-25, ICC-38	500 pounds.
ICC-33	800 pounds.

9. Cancel Exception (6) to paragraph (k) § 73.34 (15 F. R. 8284, Dec. 2, 1950; 49 CFR 73.34, Rev. 1950).

10. Amend Exception (7) to paragraph (k) § 73.34 (15 F. R. 8284, Dec. 2, 1950; (49 CFR 73.34, Rev. 1950) to read as follows:

(7) Cylinders made after January 1, 1920, in compliance with specification I. C. C. 4 (§ 78.48 of this chapter) may be retested decennially instead of quinquennially if the test is made at a pressure of not less than 700 pounds per square inch.

11. Amend § 73.34 paragraph (l) (15 F. R. 8284, Dec. 2, 1950; 49 CFR 73.34, Rev. 1950) to read as follows:

(l) Repair of specifications ICC-3A, 3AA, 3B, or 3C (§§ 78.36, 78.37, 78.38, or 78.40 of this chapter) cylinders by welding or brazing authorized, but only for the removal and replacement of neckrings and footrings attached to cylinders originally manufactured to conform to § 78.36-9 (a) of this chapter. Removal and replacement must be done by a regular manufacturer of this type of cylinder. After removal and before replacement of such parts, cylinders must be inspected, and defective ones rejected. Cylinders, neckrings, footrings, and method of replacement must conform to § 78.36-9 (a) of this chapter. Replacement must be followed by reheat treating, testing, inspection, and supervised and reported as prescribed by the specification covering their original manufacture. Inspector's reports must conform to § 78.36-22 (a) of this chapter and substitute the word repaired in place of manufactured. Show original markings and the new additional markings added, and statement: "Cylinders were carefully inspected for defects after removal of neckrings and footrings and after replacement, which replacement was made by process of _____"
(Welding-brazing)

SUBPART B—EXPLOSIVES; DEFINITIONS AND PREPARATION

1. Amend § 73.88 paragraph (b) (15 F. R. 8293, Dec. 2, 1950; 49 CFR 73.88, Rev. 1950) to read as follows:

(b) Ammunition for cannon with empty projectiles, inert-loaded projectiles, solid projectiles or without projectiles, or shell, is fixed ammunition assembled in a unit consisting of the cartridge case containing the propelling charge and primer with empty, inert-loaded, or solid projectiles, or without projectiles, which is fired from a cannon, mortar, gun, howitzer, or recoilless rifle.

2. Amend § 73.93 paragraph (d) (4) (15 F. R. 8294, Dec. 2, 1950; 49 CFR 73.93, Rev. 1950) to read as follows:

(4) Spec. 103 or 103W (§§ 78.265 or 78.280 of this chapter). Tank cars.

3. Amend § 73.94 paragraph (g) (4) (15 F. R. 8295, Dec. 2, 1950; 49 CFR 73.94, Rev. 1950) to read as follows:

(4) Spec. 103 or 103W (§§ 78.265 or 78.280 of this chapter). Tank cars.

4. Amend § 73.100 paragraph (b) (16 F. R. 5323, June 6, 1951; 49 CFR 73.100, Rev. 1950) to read as follows:

(b) Small-arms ammunition, designed to be fired from a pistol, revolver, rifle, or shotgun held by the hand or by the hand and shoulder, or machine guns of caliber less than .75, is fixed ammunition consisting of a metallic or paper cartridge case; a primer and a propelling charge, with or without bullet, shot, tear gas material, tracer componerts, or incendiary compositions or mixtures, but not including bullets loaded with high explosives.

5. Amend § 73.108 paragraph (b) (1) (15 F. R. 8297, Dec. 2, 1950; 49 CFR 73.108, Rev. 1950) to read as follows:

(1) Spec. 15A, 15B, 15C, 16A, or 19A (§§ 78.168, 78.169, 78.170, 78.185, or 78.190 of this chapter). Wooden Boxes. Gross weight not to exceed 200 pounds. When Spec. 15C boxes are used, devices must be packed in air-tight inside metal containers.

SUBPART C—FLAMMABLE LIQUIDS; DEFINITION AND PREPARATION

1. Add Paragraphs (c) (13) and (c) (14) to § 73.118 (15 F. R. 8298, Dec. 2, 1950; 49 CFR 73.118, Rev. 1950) to read as follows:

(13) Ethylene imine, inhibited.

(14) Zirconium, metallic, solutions, or mixtures thereof, liquid.

2. Amend § 73.119 paragraph (f) (3) Note 3 (15 F. R. 8299, Dec. 2, 1950; 49 CFR 73.119, Rev. 1950) to read as follows:

NOTE 3: Spec. 104 or 104W (§§ 78.269 or 78.284 of this chapter) or ARA-IV[1] tank cars are authorized provided that they are equipped with approved fittings designed to provide for the loading, unloading, gauging, sampling, and taking temperature of the contents without removing the manhole closure; that safety valves are set to open at pressure of 35 pounds (with a tolerance of plus or minus 3 pounds), and are vapor tight at 28 pounds per square inch, gauge pressure; that bottom discharge outlets are of the same type as authorized for specification 104 or 104W tank cars; and that there is stenciled on each side of the tank above the specification mark, in letters and figures at least 1 inch high, "For vapor pressures not exceeding 40 pounds per square inch, absolute, at 100° F." Because of the present emergency and until further order of the Commission, spec. ICC 104 or 104W (§§ 78.269 or 78.284 of this chapter) tank cars, equipped with safety valves set to open at pressure of 35 pounds (with a tolerance of plus or minus 3 pounds) and which are vapor tight at 28 pounds per square inch, gauge pressure, are authorized provided that they are stenciled as required above.

3. Amend § 73.124 paragraph (a) (5) Note 1 (15 F. R. 8301, Dec. 2, 1950; 49 CFR 73.124, Rev. 1950) to read as follows:

NOTE 1: Because of the present emergency and until further order of the Commission, specification ARA-IV[1] and ICC-104 and 104W (§§ 78.269 and 78.284 of this chapter) tank cars, converted as follows, are authorized for use. Tanks must be tested to 75 pounds per square inch hydrostatic pressure and show no leakage with lagging removed. Bottom discharge outlet must be removed, the opening closed with a riveted plate, and a sump applied. Safety valves must be removed and replaced by two safety valves of the type and size used on ICC-104A or 104A-W (§§ 78.270 or 78.285 of this chapter) tank cars but set to open at 60 pounds per square inch instead of 75 pounds. The various approved dome fittings now required on ICC-104A or 104A-W (§§ 78.270 or 78.285 of this chapter) tank cars must be installed in an approved manner to provide for the loading, unloading, gauging, sampling, and taking of temperature of contents without removing the manhole closure. Tank jacket must be stenciled immediately above the mark ARA-IV,[1] ICC-104, or ICC-104W (§§ 78.269 or 78.284 of this chapter) with the words "For Ethylene Oxide Only".

4. Add § 73.139 paragraph (a) (15 F. R. 8302, Dec. 2, 1950; 49 CFR 73.139, Rev. 1950) to read as follows:

§ 73.139 *Ethylene imine, inhibited.* (a) Ethylene imine must be inhibited and must be packed in specification containers as follows:

(1) Spec. 15A or 15B (§§ 78.165 or 78.169 of this chapter). Wooden boxes, with inside containers which must be securely sealed glass ampules, contents not over 100 grams each, in tightly closed metal cans. If more than one ampule is packed in a metal can, ampules must be separated by fiberboard partitions. Ampules must be cushioned in vermiculite or equally efficient incombustible cushioning material in quantity sufficient to completely absorb contents in event of breakage. Not more than 5 pints of liquid may be packed in any outside wooden box.

5. Add § 73.140 paragraph (a) (15 F. R. 8302, Dec. 2, 1950; 49 CFR 73.140, Rev. 1950) to read as follows:

§ 73.140 *Zirconium, metallic, solutions, or mixtures thereof, liquid.* (a) Zirconium, metallic, solutions, or mixtures thereof, liquid, must be packed in specification containers as follows:

(1) Spec. 15A, 15B, or 15C (§§ 78.168, 78.169, or 78.170 of this chapter). Wooden boxes with inside metal containers. Each inside container shall not contain more than 15 individual glass jars, not exceeding 2-ounce capacity each, securely closed and completely cushioned in incombustible cushioning material in sufficient quantity to completely absorb the contents.

SUBPART D—FLAMMABLE SOLIDS AND OXIDIZING MATERIALS; DEFINITIONS AND PREPARATION

1. Amend § 73.163 paragraphs (a) (6) and (7), (15 F. R. 8305, Dec. 2, 1950; 49 CFR 73.163, Rev. 1950) to read as follows:

(6) Chlorates wet with 10 percent or more of water are authorized for shipment in tank cars, spec. 103 or 103W (§§ 78.265 or 78.280 of this chapter), when equally distributed therein.

(7) Chlorate of soda is authorized for shipment in tank cars, spec. 103 or 103W (§§ 78.265 or 78.280 of this chapter). Cars must be thoroughly cleaned before loading.

2. Amend § 73.176 paragraph (g) and cancel paragraph (g) (1), (15 F. R. 8306, Dec. 2, 1950; 49 CFR 73.176, Rev. 1950) to read as follows:

(g) Matches, strike-on-box, book and card, must be packed in outside fiberboard or wooden boxes. They may be packed in the same outside container with nonflammable articles when compactly packed in tightly closed inside containers or securely wrapped so as to prevent accidental ignition. When so packed, they are exempt from specification packaging, marking, and labeling requirements for transportation by rail freight, rail express, or highway. When for transportation by carrier by water, they are exempt from specification packaging and labeling requirements, but each outside container shall be marked "Book Matches", "Strike-On-Box Matches", or "Card Matches", as the case may be.

3. Amend § 73.206 paragraph (c) (1) (15 F. R. 8310, Dec. 2, 1950; 49 CFR 73.206, Rev. 1950) to read as follows:

(1) Spec. 105A300 or 105A300W (§§ 78.271 or 78.286 of this chapter.) Tank cars, having exterior heater coils fusion welded to tank shell and properly stress-relieved, the material to be in molten condition when loaded into the tank and allowed to solidify before car is offered to the carrier.

4. Amend § 73.208 paragraph (a) and add paragraph (b) (15 F. R. 8311, Dec. 2, 1950; 49 CFR 73.208, Rev. 1950) to read as follows:

§ 73.208 *Titanium metal powder, wet or dry*—(a) *Titanium metal powder, wet.* Titainum metal powder, wet, with not less than 20 percent water, must be packed in specification containers as follows:

(1) Spec. 15A or 15B (§§ 78.168 or 78.169 of this chapter). Wooden boxes with inside metal can of not less than 22-gauge, not to exceed 10 gallons capacity, tightly and securely closed. Not more than one such inside container may be packed in one outside container.

(b) *Titanium metal powder, dry.* Titanium metal powder, dry, must be packed in specification containers as follows:

(1) Spec. 15A or 15B (§§ 78.168 or 78.169 of this chapter.) Wooden boxes with inside metal containers, tightly and securely closed by push-in covers, held in place by soldering at least four joints, or in screw-cap metal cans. Inside containers must not exceed 10 pounds net each. Inside containers must be cushioned by incombustible material such as rock wool or asbestos wool. Gross weight of outside package must not exceed 75 pounds each.

(2) Spec. 17H or 37D (§§ 78.118 or 78.125 of this chapter). Metal barrels or drums (single-trip) with inside metal drum of not less than 20-gauge metal and with closure secured by positive means. The inside container shall be completely surrounded by not less than one inch of incombustible cushioning material.

5. Amend § 73.227 paragraph (a) (2) (16 F. R. 5325 June 6, 1951; 49 CFR 73.227, Rev. 1950) to read as follows:

(2) Spec. 21A or 21B (§§ 78.222 or 78.223 of this chapter). Fiber drums completely coated on the inside with a suitable wax, synthetic coating, or metal foil suitable to the lading; or fiber drums having a metal foil (laminated between two sheets of kraft paper with thermoplastic adhesive) moisture and water barrier wound into the sidewall of the drum and located not more than 2 plies from the interior of drum but not to be wound as the first ply; a metal foil moisture and water barrier must also be present in the fiber or wood heading; exterior of drum sidewall must be protected with a water resistant coating; in addition to the tests prescribed by §§ 78.222-4 or 78.223-4 of this chapter, a drum having been given a 4-foot diagonal bottom chime drop must, after being emptied, withstand complete immersion of the bottom in 6 inches of water for 4 hours without leakage to the interior.

SUBPART E—ACIDS AND OTHER CORROSIVE LIQUIDS; DEFINITION AND PREPARATION

1. Add paragraphs (a) (9) and (a) (10) to § 73.245 (15 F. R. 8313, Dec. 2, 1950; 49 CFR 73.245, Rev. 1950) to read as follows:

(9) Spec. 5D (§ 78.84 of this chapter). Rubber lined metal barrels or drums. Any barrel or drum that shows evidence of damage must be tested before shipment for defects in lining in the manner prescribed in § 78.84-15 (a) of this chapter.

(10) Spec. 5H (§ 78.87 of this chapter). Lead-lined metal barrels or drums.

2. Amend § 73.246 paragraph (a) (1) (15 F. R. 8313, Dec. 2, 1950; 49 CFR 73.246, Rev. 1950) to read as follows:

(1) Spec. 3A150, 3AA150, 3E1800, 3B240, 4B240, or 4BA240 (§§ 78.36, 78.37, 78.42 78.38, 78.50, or 78.51 of this chapter). Cylinders closed by means of iron or steel threaded plugs.

3. Amend § 73.247 paragraph (a) (6) (15 F. R. 8314, Dec. 2, 1950; 49 CFR 73.247, Rev. 1950) to read as follows:

(6) Spec. 103A or 103A-W (§§ 78.266 or 78.281 of this chapter). Tank cars except that for tin tetrachloride (anhydrous) Spec. 105A300 or 105A300W (§§ 78.271 or 78.286 of this chapter) tank cars must be used. Benzyl chloride must be stabilized when loaded in unlined tanks.

4. Amend § 73.248 paragraphs (a) (4) and (a) (5) (15 F. R. 8314, Dec. 2, 1950; 49 CFR 73.248, Rev. 1950) to read as follows:

(4) Spec. 103A or 103A-W (§§ 78.266 or 78.281 of this chapter). Tank cars, provided the product is sufficiently liquid to be unloaded through the dome.

(5) Spec. 103 or 103W (§§ 78.265 or 78.280 of this chapter). Tank cars, provided the product is too viscous to be unloaded through the dome.

5. Amend § 73.254 paragraph (a) (4) (15 F. R. 8315, Dec. 2, 1950; 49 CFR 73.254, Rev. 1950) to read as follows:

(4) Spec. 103A or 103A-W (§§ 78.266 or 78.281 of this chapter). Tank cars.

6. Amend § 73.255 paragraph (a) (4) (15 F. R. 8315, Dec. 2, 1950; 49 CFR 73.255, Rev. 1950) to read as follows:

(4) Spec. 103A or 103A-W (§§ 78.266 or 78.281 of this chapter). Tank cars.

7. Amend § 73.262 paragraph (a) (6) (15 F. R. 8316, Dec. 2, 1950; 49 CFR 73.262, Rev. 1950) to read as follows:

(6) Spec. 103B or 103B-W (§§ 78.267 or 78.282 of this chapter). Tank cars.

8. Amend § 73.264 paragraph (a) (11) and add paragraph (a) (15) (15 F. R. 8317, Dec. 2, 1950; 49 CFR 73.264, Rev. 1950) to read as follows:

(11) Spec. 103B or 103B-W (§§ 78.267 or 78.282 of this chapter). Tank cars, rubber-lined tanks. Authorized only for acid not over 40 percent strength.

* * * * * *

(15) Spec. 17C (§ 78.115 of this chapter). Metal drums (single-trip) with welded bung flanges. Authorized only for aqueous hydrofluoric acid containing 65 percent to 81 percent acidity, as hydrofluoric acid, or other concentrations of acid not greater than 81 percent acidity, as hydrofluoric acid, which are suitably inhibited so as to be no more corrosive to drum steel than 70 percent hydrofluoric acid at 80° F.

9. Amend § 73.264 paragraph (b) (1) (15 F. R. 8317, Dec. 2, 1950; 49 CFR 73.264, Rev. 1950) to read as follows:

(1) Spec. 3,[1] 3A, 3AA, 3B, 3C, 3E, 4, 4A, 25,[1] or 38,[1] also Spec. 4B or 4C if not brazed. (§§ 78.36, 78.37, 78.38, 78.40, 78.42, 78.48, 78.49, also 78.50 or 78.52 of this chapter.) Cylinders. Filling density must not exceed 85 percent of the pounds water weight capacity of the cylinder.

10. Amend § 73.265 paragraph (b) (3) (15 F. R. 8318, Dec. 2, 1950; 49 CFR 73.265, Rev. 1950) to read as follows:

(3) Spec. 103B or 103B-W (§§ 78.267 or 78.282 of this chapter). Tank cars, rubber-lined tanks.

11. Amend § 73.267 paragraphs (a) (2) and (a) (3) (15 F. R. 8319, Dec. 2, 1950; 49 CFR 73.267, Rev. 1950) to read as follows:

(2) Spec. 5A or 5C (§§ 78.81 or 78.83 of this chapter). Metal barrels or drums. Spec. 5C drums to be fabricated of type 347 stainless steel only. (See paragraph (b) of this section.)

(3) Spec. 103A or 103A-W (§§ 78.266 or 78.281 of this chapter). Tank cars. (See paragraph (b) of this section.)

12. Amend § 73.268 paragraphs (b) (1) (15 F. R. 8319, Dec. 2, 1950; 49 CFR 73.268, Rev. 1950) to read as follows:

(1) Spec. 103C, 103C–W, or 103AL–W (§§ 78.268, 78.283, or 78.291 of this chapter). Tank cars.

13. Amend § 73.274 paragraph (a) (3) (15 F. R. 8321, Dec. 2, 1950; 49 CFR 73.274, Rev. 1950) to read as follows:

(3) Spec. 103A or 103A–W (§§ 78.266 or 78.281 of this chapter). Tank cars.

14. Amend § 73.283 paragraph (a) (1) (15 F. R. 8322, Dec. 2, 1950; 49 CFR 73.283, Rev. 1950) to read as follows:

(1) Spec. 3A150, 3AA150, 3E1800, 3B240 or 4B240 (§§ 78.36, 78.37, 78.42, 78.38, or 78.50 of this chapter). Cylinders.

15. Amend § 78.284 paragraphs (a) and (b) (15 F. R. 8322, 8323, Dec. 2, 1950; 49 CFR 73.284, Rev. 1950) to read as follows:

§ 73.284 *Bromine pentafluoride.* (a) Bromine pentafluoride, when offered for transportation by carriers by rail freight, highway, or water, must be packed in specification containers as follows:

(1) Spec. 3A150, 3AA150, 3E1800, or 4B240 (§§ 78.36, 78.37, 78.42, or 78.50 of this chapter). Cylinders not over 120 pounds water capacity (nominal), filled to not over 210 percent of water capacity. Cylinders must be plugged and fitted with valve protection caps. Spec. 3E1800 (§ 78.42 of this chapter) cylinders must be packed in strong outside wooden boxes and contain not more than one pound of bromine pentafluoride.

(b) Bromine pentafluoride, when offered for transportation by rail express must be packed in specification containers as follows:

(1) Spec. 3A150, 3AA150, 3E1800, or 4B240 (§§ 78.36, 78.37, 78.42, or 78.50 of this chapter). Cylinders containing not more than one pound of bromine pentafluoride. Cylinders must be plugged and fitted with valve protection caps and must be packed in strong outside wooden boxes.

16. Amend § 73.285 paragraph (a) (1) (15 F. R. 8323, Dec. 2, 1950; 49 CFR 73.285, Rev. 1950) to read as follows:

(1) Spec. 3A150, 3AA150, 3E1800, 3B240, or 4B240 (§§ 78.36, 78.37, 78.42, 78.38, or 78.50 of this chapter). Cylinders.

SUBPART F—COMPRESSED GASES; DEFINITION AND PREPARATION

1. Amend § 73.306 paragraph (a) (1) (15 F. R. 8325, 8326, Dec. 2, 1950; 49 CFR 73.306, Rev. 1950) to read as follows:

(1) Spec. 3,[1] 3A, 3AA, 3B, 3E, 4, 4A, 4B, 4BA (§§ 78.36, 78.37, 78.38, 78.42, 78.48, 78.49, 78.50, and 78.51 of this chapter), 25,[1] 26,[1] or 38,[1] also Spec. 9 or 40 (§§ 78.63 or 78.66 of this chapter), except that mixtures containing carbon bisulfide (disulfide), ethyl chloride, ethylene oxide, nickel, carbonyl, spirits of nitroglycerin, zinc ethyl, or poisonous articles, class A, B, or C, as defined by this part are not permitted unless otherwise prescribed in this part. (See §§ 73.34 and 73.301 (g).)

2. Amend § 73.307 paragraph (a) (1) (15 F. R. 8326, Dec. 2, 1950; 49 CFR 73.307, Rev. 1950) to read as follows:

(1) Spec. 3,[1] 3A, 3AA, 3B, 3C, 3D, 3E, 4, 4A, 4B, 4BA, 4C (§§ 78.36, 78.37, 78.38, 78.40, 78.41, 78.42, 78.48, 78.49, 78.50, 78.51, or 78.52 of this chapter), 7,[1] 25,[1] 26,[1] 33,[1] or 38.[1] (See §§ 73.34 and 73.301 (g).)

3. Amend § 73.308 paragraph (a), Table and Note 1 (15 F. R. 8326, Dec. 2, 1950; 49 CFR 73.308, Rev. 1950) to read as follows:

Kind of gas	Maximum permitted filling density (see Note 12) (percent)	Cylinders (see Note 11) marked as shown in this column must be used except as provided in Note 1 and § 73.34 (a) to (e).
Anhydrous ammonia. (See Note 9)	54	ICC–4; ICC–3A480; ICC–3AA480; ICC–3A480X; ICC–4A480; ICC–3.

NOTE 1: Cylinders complying with spec. 3E (§ 78.42 of this chapter) are also authorized for all gases named in this table for which steel cylinders are authorized except where ICC–3A2000 and 3AA2000 (§§ 78.36, 78.37 of this chapter) cylinders are specified.

4. Amend § 73.311 paragraph (a) (15 F. R. 8327, Dec. 2, 1950; 49 CFR 73.311, Rev. 1950) to read as follows:

§ 73.311 *Fluorine.* (a) Fluorine must be shipped in metal cylinders complying with spec. 3A2000, 3AA2000, or 3BN400 (§§ 78.36, 78.37, or 78.39 of this chapter), equipped with valve protection caps and subject to § 73.34 (f) (4); cylinders must not be charged to over 400 pounds per square inch, gauge, at 70° F.; cylinders must not contain over 6 pounds of gas.

5. Amend § 73.312 paragraph (a) (1) (15 F. R. 8327, Dec. 2, 1950; 49 CFR 73.312, Rev. 1950) to read as follows:

(1) Spec. 3,[1] 3A, 3AA, 3B, 3E, 4, 4B, 4BA (§§ 78.36, 78.37, 78.38, 78.42, 78.48, 78.50, 78.51 of this chapter), 4B240X[1] (see appendix A to Subpart C of Part 78 of this chapter), 4B240FLW or 9 (§§ 78.54 or 78.63 of this chapter), 25,[1] 26,[1] or 38.[1] Cylinders authorized under § 73.34 (a) to (e) may be used.

[Notes 1 and 2 remain unchanged.]

6. Amend § 73.314 paragraph (a), Table, Notes 2, 8, 11 and 12, paragraphs (b) and (e) (15 F. R. 8328, 8329, Dec. 2, 1950; 16 F. R. 5325, 5326, June 6, 1951; 49 CFR 73.314, Rev. 1950) to read as follows:

NOTE 2: When tank cars marked ICC–105A300 or ICC–105A300W (§§ 78.271 or 78.286 of this chapter) are prescribed, tank cars marked ICC–105A400, 105A400W, 105A500, 105A500W, 105A600, and 105A600W (§§ 78.272, 78.287, 78.273, 78.288, 78.274 and 78.289 of this chapter) may also be used. When ICC–104A or ICC–104A–W (§§ 78.270 or 78.285 of this chapter) tank cars are prescribed, tank cars marked ICC–105A300, 105A300W, 105A400, 105A400W, 105A500, 105A500W, 105A600, and 105A600W (§§ 78.271, 78.286, 78.272, 78.287, 78.273, 78.288, 78.274, and 78.289 of this chapter), may also be used, and when ICC–106A500 and 106A500X (§§ 78.275 of this chapter) tank cars are prescribed, tank cars marked ICC–106A800 and 106A800X (§ 78.276 of this chapter) may also be used.

* * * * * * *

NOTE 8: For tank cars of other than ICC–106A type (§§ 78.275 or 78.276 of this chapter), used for shipping chlorine, tests prescribed in §§ 78.271–15 and 78.286–19 must be made at intervals of 2 years or less and interior pipes of liquid discharge valves must be equipped with check valves of approved design.

* * * * * * *

NOTE 11: Before an ICC–105A500, 105A500W, 105A600, or 105A600W (§§ 78.273, 78.288, 78.274, or 78.289 of this chapter) tank car may be used for the transportation of liquefied carbon dioxide, the following requirements must be met: Tank must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.03 B. t. u. per square foot, per degree F. differential in temperature per hour. Tank must be equipped with one safety valve of approved design set to open at a pressure not exceeding three-fourths of the test pressure of the tank and one frangible disc device of approved design set to function at a pressure less than the test pressure of the tank. The discharge capacity of each of these safety devices must be sufficient to prevent building up of pressure in tank in excess of three-fourths of the test pressure of the tank. Tank must be equipped with two pressure-regulating valves of approved design, one set to open at three-fifths of the test pressure of the tank and one set to open at two-thirds of the test pressure of the tank. Each regulating valve and safety device must have its final discharge piped to the outside of the tank.

NOTE 12: Tanks complying with specification 106A500 or 106A500X (§ 78.275 of this chapter), containing chlorine, anhydrous ammonia, sulfur dioxide, methyl chloride, dichlorodifluoromethane, monochlorodifluoromethane, monochlorotetrafluoroethane, vinyl chloride, inhibited, difluoroethane, difluoromonochloroethane, dispersant gas, n. o. s., or dichlorodifluoromethane and difluoroethane mixture (constant boiling mixture), tanks complying with specification 110A500W (§ 78.293 of this chapter), containing dichlorodifluoromethane or monochlorodifluoromethane, or tanks complying with specification 106A800 or 106A800X (§ 78.276 of this chapter), containing hydrogen sulfide, may be transported on trucks or semi-trailers only, when securely chocked or clamped thereon to prevent shifting, and provided adequate facilities are present for handling tanks where transfer in transit is necessary. See § 74.560 of this chapter, for rail freight-motor vehicle shipments.

(b) The gas pressure at 105° F. in any lagged tank of tank cars of specs. 104A, 104A–W, 105A300, 105A300W, 105A400, 105A400W, 105A500, 105A500W, 105A600, and 105A600W (§§ 78.270, 78.285, 78.271, 78.286, 78.272, 78.287, 78.273, 78.288, 78.274, and 78.289 of this chapter), and at 130° F. in any unlagged tank of tank cars of specs. 106A500, 106A500X, 106A800, 106A800X, and 110A500W (§§ 78.275, 78.276, and 78.293 of this chapter) must not exceed three-fourths times the prescribed retest pressure of the tank. The gas pressure at 130° F. in any unlagged tank of tank cars of the 107A (§78.277 of this chapter) series must not exceed seven-tenths of the marked test pressure of the tank.

[Note 1 remains unchanged.]

* * * * * * *

(e) Tank cars containing compressed gasses must not be shipped unless they were loaded by or with the consent of the owner thereof; and must not be loaded with any gas which combines chemically with the gas previously loaded therein, until all residue has been removed and interior of tank thoroughly cleaned. For cars of the ICC–106A and 110A500W (§§ 78.275, 78.276, and 78.293 of this chapter) type, the tanks must be placed in position and attached to car structure by the shipper.

SUBPART G—POISONOUS ARTICLES; DEFINITIONS AND PREPARATION

1. Amend § 73.326 paragraph (a) (1) (15 F. R. 8332, Dec. 2, 1950, 49 CFR 73.326, Rev. 1950) to read as follows:

(1) Bromacetone.

2. Amend § 73.329 paragraphs (a) and (b), cancel paragraphs (c) and (d) (15 F. R. 8332, Dec. 2, 1950; 16 F. R. 5326, June 6, 1951; 49 CFR 73.329, Rev. 1950) to read as follows:

§ 73.329 *Bromacetone; chlorpicrin and methyl chloride mixtures.* (a) *Bromacetone.* Bromacetone, when offered for transportation by carriers by rail freight, highway, or water, must be packed in specification containers as follows:

(1) As prescribed in § 73.328.

(2) Spec. 15A, 15B, 15C, or 16A (§§ 78.168, 78.169, 78.170, or 78.185 of this chapter). Wooden boxes with inside glass bottles or tubes in hermetically sealed metal cans in corrugated fiberboard cartons, spec. 2C (§ 78.22 of this chapter). Bottles must contain not over 1 pound of liquid each, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard. Total amount of liquid in outside box must not exceed 24 pounds.

(b) *Chlorpicrin and methyl chloride mixtures.* Chlorpicrin and methyl chloride mixtures, in addition to containers prescribed in § 73.328, when offered for transportation by carriers by rail freight, highway, or water, may be shipped in specification containers as follows:

(1) Spec. 3A, 3AA, 3B, 3C, 3E, 4A, 4B, or 4C (§§ 78.36, 78.37, 78.38, 78.40, 78.42, 78.49, 78.50, or 78.52 of this chapter) not over 250 pounds water capacity (nominal). Valves or other closing devices must be protected, to prevent injury in transit, by screw-on metal caps or by packing the cylinders in strong boxes or crates. Cylinders having a wall thickness of less than 0.10 inch must be packed in boxes or crates (see § 73.25).

3. Amend § 73.332 paragraph (a) (3) (15 F. R. 8333, Dec. 2, 1950; 49 CFR 73.332, Rev. 1950) to read as follows:

(3) Spec. 3A480, or 3AA480 (§§ 78.36, 78.37 of this chapter). Metal cylinders of not over 125 pounds water capacity (nominal), minimum wall thickness 0.147 inch, and in no case shall the wall stress exceed 24,000 pounds per square inch when calculated by the formula in § 78.36–10 (b) of this chapter; valve protection cap must be used and be at least $\frac{3}{16}$ inch thick, gas-tight, with $\frac{3}{16}$ inch faced seat for gasket and with United States standard form thread; the cap must be capable of preventing injury or distortion of the valve when it is subjected to an impact caused by allowing cylinder, prepared as for shipment, to fall from an upright position with side of cap striking a solid steel object projecting not more than 6 inches above floor level.

4. Amend § 73.334 paragraph (a) (1) (15 F. R. 8333, Dec. 2, 1950; 49 CFR 73.334, Rev. 1950) to read as follows:

(1) Spec. 3A300, 3AA300, 3B300, 4A300, 4B240, or 4BA240 (§§ 78.36, 78.37, 78.38, 78.49, 78.50, or 78.51 of this chapter). Metal cylinders, charged with not more than 5 pounds of the mixture and to a maximum filling density of 80 percent of the water capacity. Cylinders must not be equipped with eduction tubes or fusible plugs. Valves must be of a type acceptable to the Bureau of Explosives.

5. Amend § 73.336 paragraphs (a) (2) and (a) (3) (15 F. R. 8334, Dec. 2, 1950; 49 CFR 73.336, Rev. 1950) to read as follows:

(2) Spec. 3A480 or 3AA480 (§§ 78.36, 78.37 of this chapter) or 25.[1] Metal cylinders with valve removed; valve opening to be closed by means of a solid metal plug with tapered thread properly luted to prevent leakage; valve protection cap must be used and be at least $\frac{3}{16}$ inch thick, gastight, with $\frac{3}{16}$ inch faced seat for gasket and with United States standard form thread. Use of this container will be permitted because of the present emergency and until further order of the Commission.

(3) Spec. 106A500 or 106A500X (§ 78.275 of this chapter). Tank cars. Each container must be equipped with valve protection caps, gastight, which must be approved by the Bureau of Explosives; containers must not be equipped with safety devices of any type; containers must be filled so that they will not be liquid full at 130° F.

6. Add paragraph (b) (8) to § 73.345 (15 F. R. 8334, Dec. 2, 1950; 49 CFR 73.345, Rev. 1950) to read as follows:

(8) Chlorpicrin and chlorpicrin mixtures containing no compressed gas or poisonous liquid, class A

7. Amend § 73.346 paragraph (a) (10) (15 F. R. 8334, Dec. 2, 1950; 49 CFR 73.346 Rev. 1950) to read as follows:

(10) Spec. 103, 103W, 103A, or 103A–W (§§ 78.265, 78.280, 78.266, or 78.281 of this chapter).

8. Amend § 73.347 paragraph (a) (2) (15 F. R. 8335, Dec. 2, 1950; 49 CFR 73.347, Rev. 1950) to read as follows:

(2) Spec. 103, 103W, 103A, or 103A–W (§§ 78.265, 78.280, 78.266, or 78.281 of this chapter).

9. Amend § 73.352 paragraphs (a) (4) (15 F. R. 8335, Dec. 2, 1950; 49 CFR 73.352, Rev. 1950) to read as follows:

(4) Spec. 103, 103W, 103A, or 103A–W (§§ 78.265, 78.280, 78.266, or 78.281 of this chapter).

10. Amend § 73.353 paragraphs (a) (3), (5) and (b) (15 F. R. 8335, Dec. 2, 1950; 49 CFR 73.353, Rev. 1950) to read as follows:

(3) Spec. 3A300, 3AA300, 3B300, 3E1800, or 4B300 (§§ 78.36, 78.37, 78.38, 78.42, or 78.50 of this chapter). Metal cylinders of not over 125 pounds water capacity (nominal). Valves or other closing devices must be protected, to prevent injury in transit, by screw-on metal caps or by packing the cylinders in strong boxes or crates. Cylinders having a wall thickness of less than 0.10 inch must be packed in boxes or crates. (See § 73.25)

[No change in Note 1.]

* * * * *

(5) Spec. 104A, 104A–W, 106A500, or 106A500X (§§ 78.270, 78.285, or 78.275 of this chapter). Tank cars.

(b) Outage must be sufficient to prevent tank car from becoming entirely filled with liquid at the following temperature: Spec. 104A or 104A–W (§§ 78.270 or 78.285 of this chapter), at 105° F., Spec. 106A500 or 106A500X (§ 78.275 of this chapter), at 130° F.

11. Amend § 73.354 paragraph (a) (4) (15 F. R. 8335, 8336, Dec. 2, 1950; 49 CFR 73.354, Rev. 1950) to read as follows:

(4) Spec. 105A300 or 105A300W (§§ 78.271 or 78.286 of this chapter). Tank cars. Stenciled on both sides of the tanks, "For Motor Fuel Antiknock Compound Only".

12. Add § 73.357 paragraphs (a), (b), and (c) (15 F. R. 8336, Dec. 2, 1950; 49 CFR 73.357, Rev. 1950) to read as follows:

§ 73.357 *Chlorpicrin and chlorpicrin mixtures containing no compressed gas or poisonous liquid, class A*—(a) *Chlorpicrin.* Chlorpicrin, when offered for transportation by carriers by rail freight, highway, or water, must be packed in specification containers as follows:

(1) Spec. 15A, 15B, 15C, or 16A (§§ 78.168, 78.169, 78.170, or 78.185 of this chapter). Wooden boxes with inside glass bottles or tubes in hermetically sealed metal cans in corrugated fiberboard cartons, spec. 2C (§ 78.22 of this chapter). Bottles must contain not over 1 pound of liquid each, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard. Total amount of liquid in outside box must not exceed 24 pounds.

(2) Spec. 12B (§ 78.205 of this chapter). One-piece corrugated fiberboard boxes at least 200-pound test with inside glass bottles or tubes in hermetically sealed metal cans in individual unsealed one-piece corrugated fiberboard boxes, spec. 12B (§ 78.205 of this chapter) at lease 200-pound test. Bottles must contain not over 1 pound of liquid each, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard. Total amount of liquid in outside box must not exceed 12 pounds.

(3) Spec. 12B, (§ 78.205 of this chapter). One-piece corrugated fiberboard boxes at least 200-pound test with not more than one inside glass bottle or tube in a hermetically sealed metal can. Bottles must contain not over 1 pound of liquid, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard.

(b) *Chlorpicrin and mixtures of chlorpicrin containing no compressed gas or poisonous liquid, class A.* Chlorpicrin and mixtures of chlorpicrin containing no compressed gas or poisonous liquid, class A, in addition to containers prescribed in paragraph (a) of this section, when offered for transportation by carriers by rail freight, highway, or water, may be shipped in specification containers as follows:

(1) Spec. 3A, 3AA, 3B, 3C, 3D, 3E, 4A, 4B, or 4C (§§ 78.36, 78.37, 78.38, 78.40, 78.41, 78.42, 78.49, 78.50, 78.52 of this chapter) not over 250 pounds water capacity (nominal). Valves or other closing devices must be protected, to prevent injury in transit, by screw-on metal caps or by packing the cylinders in strong boxes or crates. Cylinders having a wall thickness of less than 0.10 inch must be packed in boxes or crates (see § 73.25).

(2) Spec. 5A (§ 78.81 of this chapter). Metal drums of not exceeding 33 gallons capacity with welded seams.

NOTE 1: Because of the present emergency and until further order of the Commission, drums not exceeding 55 gallons capacity with welded seams are authorized for mixtures containing not over 15 percent by volume of chlorpicrin.

(c) Chlorpicrin and mixtures of chlorpicrin containing no compressed gas or poisonous liquid, class A, when offered for transportation by rail express must

be packed in specification containers as follows (also authorized for transportation by carriers by rail freight, highway, or water):

(1) Spec. 15A, 15B, 15C, or 16A (§§ 78.168, 78.169, 78.170, or 78.185 of this chapter). Wooden boxes with inside glass bottles or tubes in hermetically sealed metal cans in corrugated fiberboard cartons, spec. 2C (§ 78.22 of this chapter). Bottles must contain not over 1 pound of liquid each, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard. Total amount of liquid in outside box must not exceed 24 pounds.

(2) Spec. 15A (§ 78.168 of this chapter). Wooden boxes, metal strapped, with chlorpicrin absorbed in an efficient absorbing material packed in hermetically sealed metal cans not exceeding 1 quart capacity each.

(3) Spec. 12B (§ 78.205 of this chapter). One-piece corrugated fiberboard boxes at least 200-pound test with inside glass bottles or tubes in hermetically sealed metal cans in individual unsealed one-piece corrugated fiberboard boxes, Spec. 12B (§ 78.205 of this chapter) at least 200-pound test. Bottles must contain not over 1 pound of liquid each, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard. Total amount of liquid in outside box must not exceed 12 pounds.

(4) Spec. 12B (§ 78.205 of this chapter). One-piece corrugated fiberboard boxes at least 200-pound test with not more than one inside glass bottle or tube in a hermetically sealed metal can. Bottles must contain not over 1 pound of liquid, must be filled to not over 95 percent capacity, must be tightly and securely closed, and must be cushioned in cans with at least ½ inch of absorbent material. Cans must be made of metal at least 32 gauge United States standard. Total amount of liquid in outside box must not exceed 24 pounds.

13. Amend § 73.365 paragraph (a) (13) (15 F. R. 8336, Dec. 2, 1950; 49 CFR 73.365, Rev. 1950) to read as follows:

(13) Spec. 103, 103W, 103A, or 103A–W (§§ 78.265, 78.280, 78.266, or 78.281 of this chapter). Tank cars.

14. Amend § 73.367 paragraph (b) (15 F. R. 8337, Dec. 2, 1950; 49 CFR 73.367, Rev. 1950) to read as follows:

(b) Arsenical compounds n. o. s. containing not more than 6 percent arsenic of which not more than 0.5 percent is water soluble must be packed in specification containers as follows:

15. Amend § 73.369 paragraphs (a) (1) and (13) (15 F. R. 8337, Dec. 2, 1950; 49 CFR 73.369, Rev. 1950) to read as follows:

(1) Spec. 5, 5A, 5B, 5C, 6A, 6B, or 6C (§§ 78.80, 78.81, 78.82, 78.83, 78.97, 78.98, or 78.99 of this chapter). Metal barrels or drums.

* * * * *

(13) Spec. 103, 103W, 103AL–W, 103A, 103A–W, or 103A–AL–W §§ 78.265, 78.280, 78.291, 78.266, 78.281, or 78.292 of this chapter). Tank cars.

16. Amend § 73.370 paragraph (a) (1) (15 F. R. 8337, Dec. 2, 1950; 49 CFR 73.370, Rev. 1950) to read as follows:

(1) Spec. 15A, 15B, or 15C (§§ 78.168, 78.169, or 78.170 of this chapter). Wooden boxes with metal inside containers, spec. 2F (§ 78.25 of this chapter), not over 25 pounds capacity each; or hermetically sealed (soldered) metal lining, spec. 2F (§ 78.25 of this chapter).

17. Amend § 73.370 paragraphs (b) (1) and (2) (15 F. R. 8337, Dec. 2, 1950; 49 CFR 73.370, Rev. 1950) to read as follows:

(1) Cyanides, or cyanide mixtures, in tightly closed metal inside containers, not over 1 pound each, securely cushioned and packed in outside wooden or fiberboard boxes or in wooden barrels. Net weight of cyanides or cyanide mixtures in any outside container, not over 25 pounds.

(2) Cyanide mixtures in tightly closed metal inside containers, securely cushioned and packed in outside wooden or fiberboard boxes or in wooden barrels. Net weight of cyanide mixtures in any outside container, not over 5 pounds.

18. Amend § 73.373 paragraph (a) (3) (16 F. R. 5326, June 6, 1951; 49 CFR 73.373, Rev. 1950) to read as follows:

(3) Spec. 21A or 21B (§§ 78.222 or 78.223 of this chapter). Fiber drums, gross weight 400 pounds; side walls must be of at least 10-ply construction having strength not less than 1,200 pounds Mullen or Cady test; drums must withstand prescribed tests when filled to authorized gross weight of 400 pounds.

19. Amend § 73.374 paragraph (a) (2) (16 F. R. 5326, June 6, 1951; 49 CFR 73.374, Rev. 1950) to read as follows:

(2) Spec. 21A or 21B (§§ 78.222 or 78.223 of this chapter). Fiber drums, authorized only for nitrochlorbenzene, para, flaked, gross weight 400 pounds; side walls must be of at least 10-ply construction having strength not less than 1,200 pounds Mullen or Cady test; drums must withstand prescribed tests when filled to authorized gross weight of 400 pounds.

20. Amend § 73.392 paragraph (a) (3) (15 F. R. 8339, Dec. 2, 1950; 49 CFR 73.392, Rev. 1950) to read as follows:

(3) The package must be such that no significant alpha, beta, or neutron radiation is emitted from the exterior of the package and the gamma radiation at any surface of the package must be less than 10 milliroentgens for 24 hours.

21. Add § 73.395 paragraph (a) (15 F. R. 8340, Dec. 2, 1950; 49 CFR 73.395, Rev. 1950) to read as follows:

§ 73.395 *Cleaning cars and vehicles.* (a) Any railroad car or motor vehicle which has been contaminated by radioactive material must be thoroughly cleaned by the consignee, or by a qualified authorized agent of the consignee receiving the radioactive material, in such a manner as to remove all radioactive material from the car or vehicle, and a certificate to that effect must be furnished to the local agent of the carrier or to the driver of the motor vehicle.

22. Add § 73.396 paragraph (a) (15 F. R. 8340, Dec. 2, 1950; 49 CFR 73.396, Rev. 1950) to read as follows:

§ 73.396 *Radioactive materials handling.* (a) When radioactive materials are loaded in cars by the shipper, the shipper shall observe all applicable requirements of § 75.655 (j) of this chapter.

SUBPART H—MARKING AND LABELING EXPLOSIVES AND OTHER DANGEROUS ARTICLES

1. Amend § 73.402 paragraphs (a) and (a) (1) to (10) inclusive (15 F. R. 8340, Dec. 2, 1950; 49 CFR 73.402, Rev. 1950) to read as follows:

§ 73.402 *Labeling dangerous articles.* (a) Each package containing any dangerous article or combination or mixture of dangerous articles as defined by Part 73 of this chapter must be conspicuously labeled by the shipper as follows, except as otherwise provided:

(1) "Red label" as described in § 73.405 on containers of flammable liquids as defined in § 73.115, except when exempted from the regulations by § 73.118 or when "red" label is required by paragraph (a) (4) of this section.

(2) "Yellow label" as described in § 73.406 on containers of flammable solids and oxidizing materials as defined in § 73.150 and § 73.151, except when exempted from the regulations by § 73.153 and § 73.183.

(3) "White label" as described in § 73.407 (a) (1), (2) and (3) on containers of acids, alkaline caustic liquids or corrosive liquids as defined in § 73.240, except when exempted from the regulations by § 73.244.

(4) "Red label" as described in § 73.408 (a) (1) on containers of flammable compressed gases as defined in § 73.300, except when exempted from the regulations by § 73.302.

(5) "Green label" as described in § 73.408 (a) (2) on containers of nonflammable compressed gases as defined in § 73.300, except when exempted from the regulations by § 73.302 or when "red" label or "poison gas" label is required by paragraphs (a) (4) or (a) (6) of this section.

(6) "Poison gas" label as described in § 73.409 (a) (1) on containers of Class A poisons as defined in § 73.326.

(7) "Poison" label as described in § 73.409 (a) (2) on containers of class B poison liquids or solid as defined in § 73.343, except when exempted from the regulations by § 73.345 and § 73.364 or when "poison gas" label is required by paragraph (a) (6) of this section.

(8) "Radioactive materials" label as described in § 73.414 (a) on containers of Class D poisons, Group I and II as defined in § 73.391, except when exempted by § 73.392.

(9) "Radioactive materials" label as described in § 73.414 (b) on containers of Class C poisons, Group III as defined in § 73.391, except when exempted by § 73.392 or when red "radioactive mate-

rials" label is required by paragraph (a) (8) of this section.

(10) "Tear gas" label as described in § 73.409 (a) (3) on containers of poisons, Class C as defined in § 73.381, except when "poison gas" label is required by paragraph (a) (6) of this section.

2. Cancel § 73.403, paragraphs (a), (b) and (c) (15 F. R. 8341, Dec. 2, 1950; 49 CFR 73.403, Rev. 1950).

PART 74—CARRIERS BY RAIL FREIGHT

SUBPART C—PLACARDS ON CARS

Amend § 74.541, paragraph (a) (1) (15 F. R. 8350, Dec. 2, 1950; 49 CFR 74.541, Rev. 1950) to read as follows:

(1) Cars containing one or more packages bearing red, yellow, white acid, or corrosive liquid caution labels, or white "poison" labels, as prescribed by §§ 73.405 to 73.408 and 73.409 (a) (2) of this chapter, or without labels as authorized in § 73.402 (c) of this chapter.

PART 78—SHIPPING CONTAINER SPECIFICATIONS

SUBPART C—SPECIFICATIONS FOR CYLINDERS

1. Amend § 78.43-9 paragraph (a) (15 F. R. 8397, Dec. 2, 1950; 49 CFR 78.43-9, Rev. 1950) to read as follows:

§ 78.43-9 *Neckrings and footrings.* (a) Welding for any purpose whatsoever is prohibited except as follows:

(1) Welding is authorized for the attachment of neckrings and footrings which are nonpressure parts, and only to the tops and bottoms. Cylinders, neckrings, and footrings must be made of weldable steel, carbon content of which must not exceed 0.25 percent.

(2) As permitted in § 78.43-8.

[No change in Note 1.]

2. Amend § 78.51-20 paragraph (a) Table I (16 F. R. 5328, June 6, 1951; 49 CFR 78.51-20, Rev. 1950) to read as follows:

SUBPART D — SPECIFICATIONS FOR METAL BARRELS, DRUMS, KEGS, CASES, TRUNKS AND BOXES

1. Amend § 78.80-8 paragraph (a) (15 F. R. 8432, Dec. 2, 1950; 49 CFR 78.80-8, Rev. 1950) to read as follows:

§ 78.80-8 *Rolling hoops.* (a) Separate hoops to have tight fit on shell and be firmly secured in place. Beading under rolling hoops not permitted. Attachment to drum body by spot welding, except for continuous resistance method, not permitted. Welding of I bar type directly to body of drum in any manner not permitted.

2. Amend § 78.83-11 paragraph (a) (16 F. R. 5329, June 6, 1951; 49 CFR 78.83-11, Rev. 1950) to read as follows:

§ 78.83-11 *Marking.* (a) Marking on each container by embossing on head with raised marks, or by embossing or die stamping on footring on drums equipped with footrings, or on metal plates securely attached to drum by welding not less than 20 percent of the perimeter.

3. Amend § 78.86-8 paragraph (a) (15 F. R. 8437, Dec. 2, 1950; 49 CFR 78.86-8, Rev. 1950) to read as follows:

§ 78.86-8 *Rolling hoops.* (a) Separate hoops to have tight fit on shell and be firmly secured in place. Beading under rolling hoops not permitted. Attachment to drum body by spot welding, except for continuous resistance method, not permitted. Welding of I bar type directly to body of drum in any manner not permitted.

4. Amend § 78.98-6 paragraph (a) (15 F. R. 8443, Dec. 2, 1950; 49 CFR 78.98-6, Rev. 1950) to read as follows:

§ 78.98-6 *Rolling hoops.* (a) Separate hoops to have tight fit on shell and be firmly secured in place. Beading under rolling hoops not permitted. Attachment to drum body by spot welding, except for continuous resistance method, not permitted. Welding of I bar type directly to body of drum in any manner not permitted.

5. Amend § 78.99-6 paragraph (a) (15 F. R. 8444, Dec. 2, 1950; 49 CFR 78.99-6, Rev. 1950) to read as follows:

§ 78.99-6 *Rolling hoops.* (a) Separate hoops to have tight fit on shell and be firmly secured in place. Beading under rolling hoops not permitted. Attachment to drum body by spot welding, except for continuous resistance method, not permitted. Welding of I bar type directly to body of drum in any manner not permitted.

6. Amend § 78.100-6 paragraph (a) (15 F. R. 8445, Dec. 2, 1950; 49 CFR 78.100-6, Rev. 1950) to read as follows:

§ 78.100-6 *Rolling hoops.* (a) Separate hoops to have tight fit on shell and be firmly secured in place. Beading under rolling hoops not permitted. Attachment to drum body by spot welding, except for continuous resistance method, not permitted. Welding of I bar type directly to body of drum in any manner not permitted.

SUBPART F—SPECIFICATIONS FOR FIBERBOARD BOXES, DRUMS, AND MILLING TUBES

Amend § 78.214-15 paragraph (a) (15 F. R. 8430, Dec. 2, 1950; 49 CFR 78.214-15, Rev. 1950) to read as follows:

§ 78.214-15 *Authorized gross weight (when packed) and parts required.* (a) Box to be of solid fiberboard, special waterproofed, a least 300-pound test, and weighing at least 250 pounds per thousand square feet. Tubes to be of solid or corrugated fiberboard at least 200-pound test and of 1 piece with adjoining edges stitched, taped, or glued. Glued lap not less than 1¼ inch; others 1½ inch. (c) (14)	To provide for the shipment of zirconium, metallic, solutions, or mixtures thereof, liquid.
73.119 (f) (3) Note 3	To provide for the use of ICC 104W tank cars for the transportation of flammable liquids.
73.124 (a) (5) Note 1	To provide for the use of ICC 104W tank cars for the transportation of ethylene oxide.
73.139 (a)	To provide for the safe transportation and packing of ethylene imine, inhibited.
73.140 (a)	To provide for the safe transportation and packing of zirconium, metallic, solutions, or mixtures thereof, liquid.
73.163:	
(a) (6)	To provide for the use of welded tank cars for the transportation of chlorates wet with 10 percent or more of water.
(a) (7)	To provide for the use of welded tank cars for the transportation of chlorate of soda.
73.176:	
(g)	Clarification of exemptions of matches, strike-on-box, book and card.
(g) (1)	Canceled, requirement now included in paragraph (g).
73.206 (c) (1)	To provide for the use of tank cars of welded construction for the transportation of sodium or potassium, metallic, sodium amide, lithium metal, lithium silicon, and lithium hydride.
73.208:	
(a)	To provide for the safe transportation and packing of titanium metal powder, wet.
(b)	To provide for the safe transportation and packing of titanium metal powder, dry.
73.227 (a) (2)	To provide for the use of synthetic coating, or metal foil as lining material of fiber drums used for the transportation of urea peroxide.
73.245:	
(a) (9)	To provide for the use of additional container, rubber lined, for the transportation of acids and other corrosive liquids.
(a) (10)	To provide for the use of additional container, lead lined, for the transportation of acids and other corrosive liquids.
73.246 (a) (1)	To provide for the use of ICC 3A cylinders having lower service pressure and also 3AA cylinders for the transportation of antimony pentafluoride.
73.247 (a) (6)	To provide for the use of tank cars of welded construction for the transportation of certain chlorides.
73.248:	
(a) (4)	To provide for the use of tank cars of welded construction for the transportation of acid sludge, sludge acid, spent sulfuric acid, or spent mixed acid.
(a) (5)	To provide for the use of tank cars of welded construction for the transportation of acid sludge or spent acid which is too viscous to be unloaded through the dome.
73.254 (a) (4)	To provide for the use of tank cars of welded construction for the transportation of chlorosulfonic acid and mixtures of chlorosulfonic acid-sulfur trioxide.

Section and paragraph	Reason for amendment
73.329:	
(a)	To provide for the safe transportation and packing of chlorbromacetone.
(b)	To provide for the safe transportation and packing of chloropicrin and methyl chloride mixtures.
73.332 (a) (3)	To provide an additional container for the transportation of hydrocyanic acid, liquid and hydrocyanic acid liquefied.
73.334 (a) (1)	To provide an additional container for the transportation of hexaethyl tetraphosphate, parathion, and tetraethyl pyrophosphate mixtures.
73.336:	
(a) (2)	To provide an additional container for the transportation of nitrogen dioxide, liquid.
(a) (3)	To provide for the use of ton containers of ICC spec. 106A500X for the transportation of nitrogen dioxide, liquid.
73.345 (b) (8)	To provide for the shipment of chloropicrin and chloropicrin mixtures as class B poisons but to permit no exemptions.
73.346 (a) (10)	To provide for the use of tank cars of welded construction for the transportation of poisonous liquids, class B.
73.347 (a) (2)	To provide for the use of tank cars of welded construction for the transportation of aniline oil.
73.352 (a) (4)	To provide for the use of tank cars of welded construction for the transportation of liquid sodium or potassium cyanide.
73.353:	
(a) (3)	To provide for the use of an additional container and crating for the transportation of methyl bromide.
(a) (5)	To provide for the use of tank cars of welded construction and ton containers of ICC 106A500X type for the transportation of methyl bromide.
(b)	To provide outage requirements for tank cars of welded construction and ton containers of the 106A500X type transporting methyl bromide.
73.354 (a) (4)	To provide for the use of tank cars of welded construction for the transportation of motor fuel antiknock compound or tetraethyl lead.
73.357:	
(a)	To provide for the safe transportation and packing of chloropicrin.
(b)	To provide for the safe transportation of chloropicrin and mixtures of chloropicrin containing no compressed gas or poisonous liquid, class A.
(c)	To provide for the safe transportation and packing of chloropicrin and mixtures when shipments are offered for transportation by rail express.
73.365 (a) (13)	To provide for the use of tank cars of welded construction for the transportation of poisonous solids, class B.
73.367 (b)	To permit an increase in the water solubility of arsenical compounds.
73.369:	
(a) (1)	To provide for the use of an additional drum for the shipment of carbolic acid (not liquid).
(a) (13)	To provide for the use of tank cars of aluminum welded construction for the transportation of carbolic acid (not liquid).
73.370:	
(a) (1)	Glass bottles not over 5 pounds capacity have been eliminated as inside containers for the reason they are not considered suitable for the transportation of cyanides or cyanide mixtures.
(b) (1) and (b) (2)	Glass or earthenware inside containers have been eliminated for the reason they are not considered suitable for the transportation of cyanides.
73.373 (a) (3)	To provide additional container for the transportation of paranitraniline, and to eliminate special test of containers which experience has proved unnecessary.

78.100-6 (a)	Do.
78.214-15 (a)	To permit glued lap joint on inside tubes.
73.255 (a) (1)	To provide for the use of tank cars of welded construction for the transportation of dimethyl sulfate.
73.262 (a) (6)	To provide for the use of tank cars of welded construction for the transportation of hydrobromic acid.
73.264:	
(a) (11)	To provide for the use of tank cars of welded construction for the transportation of hydrofluoric acid.
(a) (15)	To provide additional container for the transportation of aqueous hydrofluoric acid.
(b) (1)	To provide for the use of additional container for the transportation of hydrofluoric acid, anhydrous.
73.265 (b) (3)	To provide for the use of tank cars of welded construction for the transportation of hydrofluosilicic acid.
73.267:	
(a) (2)	To provide additional container for the transportation of mixed acid.
(a) (3)	To provide for the use of tank cars of fusion welded construction for the transportation of mixed acid.
73.268 (b) (1)	To provide for the use of tank cars of welded construction and also additional container for the transportation of nitric acid.
73.274 (a) (3)	To provide for the use of tank cars of welded construction for the transportation of fluosulfonic acid.
73.283 (a) (1)	To provide for the use of ICC 3A cylinders having lower service pressure and also 3AA cylinders for the transportation of bromine trifluoride.
73.284 (a) and (b)	To provide for the safe transportation and packing of bromine pentafluoride.
73.285 (a) (1)	To provide for the use of ICC 3A cylinders having lower service pressure and also 3AA cylinders for the transportation of chlorine trifluoride.
73.306 (a) (1)	To include container not previously specified for the transportation of liquefied gases, except gas in solution or poisonous gas.
73.307 (a) (1)	To provide for an additional container for the transportation of nonliquefied gases, except gas in solution or poisonous gas.
73.326:	
(a) Table	To include the use of specification ICC 3AA cylinders and to provide proper maximum filling density for mixtures of dichlorodifluoromethane and difluoroethane of varying proportions.
Note 1	To limit the use of ICC 3E cylinders to commodities under 2000 pounds service pressure.
73.311 (a)	To provide for the use of additional container for the transportation of fluorine.
73.312 (a) (1)	To provide for additional container for the transportation of liquefied petroleum gas.
73.314:	
(a) and Table	To provide for the use of ICC 106A500X ton containers and tank cars of welded construction for the transportation of compressed gases.
Note 2	To provide for the use of tank cars of welded construction.
Note 8	To correct specification reference and omit provision which was canceled November 27, 1950.
Note 11	To provide for the use of tank cars of welded construction.
Note 12	To provide for the use of ICC 100A500X and 106A500X tanks for the transportation of certain compressed gases.
(b)	To provide for gas pressures for tank cars of welded construction and ICC 106A500X, 106A800X, and 110A500W tanks.
(c)	To provide for the transportation, loading and cleaning of 110A500W tanks.
73.326 (a) (1)	Clarification. Chloroplerin reclassified from class A poison to class B poison and bromacetone it now included in § 73.329.

[21 CFR Part 53]

[Docket No. FDC-59]

CANNED TOMATOES

NOTICE OF HEARING TO AMEND DEFINITION AND STANDARD OF IDENTITY

In the matter of amending the definition and standard of identity for canned tomatoes:

Notice is hereby given that the Federal Security Administrator, upon application of a substantial portion of the interested industry stating reasonable grounds, and in accordance with sections 401 and 701 of the Federal Food, Drug, and Cosmetic Act (52 Stat. 1046, 1055; 21 U. S. C. 341, 371), will hold a public hearing commencing at 10:00 o'clock in the morning of August 7, 1951, in room 5439, Federal Security Building, Independence Avenue and Fourth Street SW., Washington, D. C., for the purpose of receiving evidence upon proposals to amend the regulations fixing and establishing a definition and standard of identity for canned tomatoes (21 CFR 53.40). At the hearing, evidence will be restricted to testimony and exhibits relevant and material to such proposals. The hearing will be conducted in accordance with the rules of practice provided therefor.

Mr. Bernard D. Levinson is hereby designated as presiding officer to conduct the hearing in place of the Administrator, with full authority to administer oaths and affirmations and to do all other things appropriate to the conduct of the hearing. The presiding officer is hereby required to certify the entire record of the proceeding to the Administrator for initial decision.

The proposed amendment set forth below for consideration at the hearing is subject to adoption, rejection, or modification by the Federal Security Administrator, in whole or in part, as the evidence adduced at the hearing may require.

It is proposed that § 53.40 *Canned tomatoes; identity; label statement of optional ingredients* be amended by deleting from paragraph (b) the requirement that the label bear a statement showing the presence of the optional ingredient described in paragraph (a) (3) of that section.

Dated: June 28, 1951.

[SEAL] JOHN L. THURSTON,
Acting Administrator.

DEFENSE PRODUCTION ADMINISTRATION

[D. P. A. Request No. 10]

REQUEST TO COORDINATED MANUFACTURERS OF SANTA CLARA COUNTY, INC., TO OPERATE AS A SMALL BUSINESS ENTERPRISE PRODUCTION POOL AND REQUESTS TO CERTAIN COMPANIES TO PARTICIPATE IN THE OPERATIONS OF SUCH POOL

JUNE 22, 1951.

Pursuant to section 708 of the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.) the request to Coordinated Manufacturers of Santa Clara County, Inc. to operate as a small business enterprise production pool and the requests to the companies hereinafter listed to participate in the operations of such pool, set forth below, were approved by the Attorney General, after consultations between representatives of the Director of the Office of Defense Mobilization, representatives of the Attorney General, and representatives of the Chairman of the Federal Trade Commission. The voluntary program, in accordance with which the pool shall operate, has been approved by the Director of the Office of Defense Mobilization and found to be in the public interest as contributing to the national defense.

REQUEST TO COORDINATED MANUFACTURERS OF SANTA CLARA COUNTY, INC.

You are requested to operate as a small business enterprise production pool in accordance with a voluntary program as set forth in the papers attached to your letter addressed to the Department of Commerce, Pooling Section, Office of Small Business, Washington, D. C., dated April 4, 1951. Such operations shall be conducted within the limits as set forth therein.

In my opinion, the operations of your corporation, as a small business enterprise production pool, will greatly assist in the accomplishment of our national defense objectives.

The Attorney General has approved this request after consultations with respect to this matter between his representatives, representatives of the Chairman of the Federal Trade Commission, and my representatives, pursuant to section 708 of the Defense Production Act of 1950 (Public Law 774—81st Cong.).

I approve the voluntary program and find it to be in the public interest as contributing to the national defense.

Your cooperation in this matter will be appreciated.

Sincerely,

CHARLES E. WILSON.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 998.

Commodities involved: Moulding sand, carloads.

From: Lexington, Tenn.

To: Richmond (McHenry County), Ill.

Grounds for relief: Competition with rail carriers and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 998, Supp. 174.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2639]

APPALACHIAN ELECTRIC POWER CO. AND AMERICAN GAS AND ELECTRIC CO.

SUPPLEMENTAL ORDER AUTHORIZING THE ISSUANCE AND SALE OF BONDS AND RELEASING JURISDICTION OVER FEES AND EXPENSES

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 27th day of June A. D. 1951.

American Gas and Electric Company ("American Gas"), a registered holding company, and its subsidiary, Appalachian Electric Power Company ("Appalachian"), an electric utility company, having filed an application-declaration, and amendments thereto, pursuant to sections 6, 10 and 12 of the Public Utility Holding Company Act of 1935 and Rule U-50 promulgated thereunder, regarding the issuance and sale, at competitive bidding, of $17,000,000 principal amount of First Mortgage Bonds 3¾ percent series, due 1981 and 1,600,000 shares of additional common stock to be acquired by American Gas for $10,500,000 cash; and

The Commission having, by order dated June 13, 1951, approved said application-declaration, as amended, subject to the condition that the proposed issuance and sale of the said bonds shall not be consummated until the results of competitive bidding, pursuant to Rule U-50, shall have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed; and subject further to the reservation of jurisdiction with respect to the payment of all fees and expenses incurred or to be incurred in connection with the consummation of the proposed transactions; and

Appalachian having, on June 26, 1951, filed a further amendment to its application-declaration setting forth the action taken by it to comply with the requirements of Rule U-50 and stating that, pursuant to the invitations for competitive bidding with respect to the bonds the following bids were received:

Bidder	Annual interest rate (percent)	Price to company [1] (percent of principal)	Annual cost to company (percent)
Halsey, Stuart & Co., Inc.	3¾	101.36999	3.674
The First Boston Corp., United Securities Corp. and Kuhn, Loeb & Co.	3¾	100.91	3.699
	3¾	100.31	3.733
Harriman Ripley & Co., Inc.	3¾	100.1799	3.739

[1] Exclusive of accrued interest from June 1, 1951.

The amendment further stating that Appalachian has accepted the bid of Halsey, Stuart & Co., Inc., for the bonds, as set forth above, and that the bonds will be offered for sale to the public at a price of 102.25 percent of their principal amount, plus accrued interest from June 1, 1951, resulting in an underwriters' spread of 0.88001 percent of the principal amount of the bonds; and

Appalachian having completed the record with respect to the fees and expenses of the proposed transactions estimated in the amount of $104,355 including legal fees to company counsel as follows: Simpson, Thacher & Bartlett, $10,000; Hunton, Williams, Anderson, Gay & Moore, $5,000; Campbell, McClintic & James, $2,000; Penn, Hunter, Smith & Davis, $2,000; and legal fees of Winthrop, Stimson, Putnam & Roberts, counsel for underwriters in the amount of $6,000; and

The Commission having examined said amendment and having considered the record herein and finding no basis for imposing terms and conditions with respect to the price to be received for said bonds, the interest rate thereon, the redemption prices thereof, or the underwriters' spread; and also finding that the

estimated fees and expenses of the proposed transactions, including the fees of counsel for Appalachian and independent counsel for the underwriters are not unreasonable and that jurisdiction with respect thereto should be released; and

It appearing that the proposed issuance and sale of the bonds has been expressly authorized by the State Corporation Commission of Virginia, the State in which Appalachian is organized and doing business, and by the Tennessee Railroad and Public Utilities Commission and the Public Service Commission of West Virginia, being the regulatory commissions in the only other States in which the company operates:

It is ordered, That, jurisdiction heretofore reserved with respect to the matters to be determined as a result of competitive bidding for said bonds under Rule U-50, be, and the same hereby is, released, and that said application-declaration, as further amended, be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

It is further ordered, That, jurisdiction heretofore reserved over the payment of all fees and expenses incurred by Appalachian in connection with the proposed transactions be, and the same hereby is released.

By the Commission.

4. That to the extent that the persons identified in subparagraph 1 hereof and the domiciliary personal representatives, heirs, next-of-kin, legatees and distributees, names unknown, of Hedwig Seidel, deceased, and of Lina Hoerig, deceased, are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on June 20, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

VOLUME 16 NUMBER 130

Washington, Friday, July 6, 1951

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10267

INCLUDING CERTAIN LANDS IN THE NANTAHALA NATIONAL FOREST

WHEREAS on March 22, 1951, the Tennessee Valley Authority and the United States Department of Agriculture entered into an agreement (designated as a supplemental agreement of transfer) providing for the transfer by the said Authority to the said Department of the right of possession and all other right, title, and interest which the Authority might have in or to certain lands therein designated and described in Swain County, North Carolina, so that such lands might be included in and reserved as a part of the Nantahala National Forest, in accordance with the terms and conditions of the agreement and subject to the approval thereof by the President of the United States; and

WHEREAS I have this day approved the said agreement between the Tennessee Valley Authority and the United States Department of Agriculture; and

WHEREAS it appears that such lands are suitable for national-forest purposes and that the inclusion of such lands in the Nantahala National Forest would be in the public interest:

Now, THEREFORE, by virtue of the authority vested in me by section 24 of the act of March 3, 1891, 26 Stat. 1103, and the act of June 4, 1897, 30 Stat. 34, 36 (16 U. S. C. 471, 473), and as President of the United States, and upon the recommendation of the Secretary of Agriculture, I hereby include in and reserve as part of the Nantahala National Forest the following-described lands, such inclusion and reservation to be in accordance with and subject to the terms and conditions of the said agreement of March 22, 1951, between the Tennessee Valley Authority and the United States Department of Agriculture.

N 15° 22' E, 825 feet to a stake;

N 39° 53' E, 128 feet to a stake on the left bank of the Tuckasegee River;

N 19° E, 220 feet to a point in the center line of the Tuckasegee River;

Leaving the US-TVA Purchase Boundary,

With the center line of the Tuckasegee River as it meanders upstream approximately 3,850 feet to a point in the US-TVA Purchase Boundary;

With the US-TVA Purchase Boundary and continuing with the center line of the Tuckasegee River as it meanders upstream approximately 1,705 feet;

Leaving the center line of the Tuckasegee River,

S 40° 14' W, 85 feet;

S 42° 47' W, 184 feet to a point on the left bank of the Tuckasegee River;

S 53° 08' W, 30 feet to Corner 24, a 6-inch ironwood tree;

S 74° 51' W, 524 feet to Corner 25;

S 64° 06' W, 421 feet to Corner 26, a double maple tree;

S 45° W, 51 feet to a point in the center line of Buckner Branch witnessed by a maple stump;

With the center line of Buckner Branch as it meanders upstream approximately along a bearing and distance of S 40° 44' W, 95 feet to a rock;

Leaving the branch

N 59° 56' W, 44 feet to a point in the center line of an old road;

With the center line of the old road as it meanders in a southerly direction approximately along a bearing and distance of S 12° 18' W, 399 feet;

Leaving the old road,

N 63° 26' W, 11 feet to a 5-inch black gum tree;

N 9° 28' E, 213 feet to a 4-inch dogwood tree;

N 12° 06' W, 72 feet to an iron pipe;

RULES AND REGULATIONS

TITLE 6—AGRICULTURAL CREDIT

Chapter I—Farm Credit Administration, Department of Agriculture

Subchapter B—Federal Farm Loan System

PART 10—FEDERAL LAND BANKS GENERALLY

FUTURE PAYMENT FUNDS REGULATIONS; RETIREMENT OF STOCK

Section 10.74 (c) of Title 6 of the Code of Federal Regulations is hereby amended by adding a second sentence so that such paragraph shall read as follows:

(c) If at any time the balance of unapplied future payment funds held for a borrower's credit together with the interest allowance thereon equals or exceeds the total amount of the indebtedness, the whole indebtedness shall become due and payable at once and shall be retired out of such balance and stock proceeds. With the agreement or consent of the borrower, a bank may also provide that if at any time the balance of unapplied future payment funds held for a borrower's credit together with the interest allowance thereon and the amount of stock owned by the borrower in connection with a loan equals or exceeds the total amount of the indebtedness, the whole indebtedness shall become due and payable at once and shall be retired out of such balance and stock proceeds. [241 (3)]

(Sec. 17, Eighteenth, 50 Stat. 708, 12 U. S. C. 781, Eighteenth)

A new § 10.91 is hereby added to Title 6 of the Code of Federal Regulations as follows:

§ 10.91 *Retirement of stock to complete payment of loan with future pay-*

ment funds. If a bank has provided in the terms and conditions under which it has accepted future payment funds that when the amount of stock and the future payment funds held in connection with the loan are sufficient to pay off the loan in full, they may be so applied, and if the board of directors of the bank has adopted a resolution providing for the retirement of the stock in such circumstances, the Administration approves, under section 7 of the Federal Farm Loan Act (12 U. S. C. 721), such retirement of stock. [279.51]

Chapter I—Home Loan Bank Board, Housing and Home Finance Agency

Subchapter D—Federal Savings and Loan Insurance Corporation

[No. 4395]

PART 163—OPERATIONS

SETTING UP, DESIGNATION, AND PURPOSE OF FEDERAL INSURANCE RESERVE

JUNE 27, 1951.

Resolved that, pursuant to Part 108 of the general regulations of the Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), notice and public procedure having been duly afforded (16 F. R. 4666), § 163.11 of the rules and regulations for Insurance of Accounts (24 CFR 163.11) is hereby amended, effective July 6, 1951, to read as follows:

§ 163.11 *Setting up, designation, and purpose of Federal insurance reserve.* Each insured institution shall set up a Federal insurance reserve account which shall be used solely for the purpose of absorbing losses. No insured institution may pay dividends from its Federal insurance reserve account. Any insured state-chartered institution may by resolution of its board of directors or by other appropriate corporate action designate as its Federal insurance reserve account any reserve account which under the provisions of state law is established for the sole purpose of absorbing losses. Evidence of such action shall be filed with the Corporation. With the prior written approval of the Corporation, any other reserve account which by specific and adequate corporate action of an insured institution is made subject to charges for losses only, may be designated as its Federal insurance reserve account. The general reserves of Federal savings and loan associations operating under Charter K or Charter N are deemed to meet the requirements of this section.

Resolved further that the effect of this amendment being to remove a restriction upon insured institutions, deferment of the effective date of such amendment is not required, and it shall become effective upon July 6, 1951.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Overriding Regulation 2, Amendment 1]

GOR 2—SALES TO THE UNITED STATES GENERAL SERVICES ADMINISTRATION

Pursuant to the Defense Production Act of 1950 (Public Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this General Overriding Regulation 2, Amendment 1, is hereby issued.

STATEMENT OF CONSIDERATIONS

This Amendment 1 to General Overriding Regulation 2 exempts certain sales to the General Services Administration, or its agents, of strategic and critical materials under the Defense Production Act of 1950 or the Strategic and Critical Materials Stock Piling Act. The natural resources of the United States being deficient or insufficiently developed to supply the industrial and military needs of the country, Congress has authorized and directed the acquisition and retention of stocks of these materials in order to decrease and prevent wherever possible a costly and dangerous dependence of the United States upon foreign nations for supplies of these materials. Under these Acts, the General Services Administration, which acts as purchasing agent, enters into contracts for the production and procurement of vital metals and minerals for the national stockpile and for resale. Material constituting a part of the stockpile can be disposed of only with the express approval of Congress or upon order of the President when in his judgment such disposition is required for the common defense.

In connection with its procurement of strategic and critical materials from domestic sources, the General Services Administration has found it necessary in some instances to enter into contracts for the production or purchase of such materials at higher than ceiling prices where the marginal or submarginal character of the source or the necessity of constructing or installing substantial additional facilities or equipment makes it uneconomical to produce them at the ceiling price. Where the General Services Administration finds it necessary to purchase from foreign sources, it must, in many instances, pay the current world market price, which frequently is higher than the ceiling price.

Under the existing procedure, the General Services Administration is required to apply to the Office of Price Stabilization for an exemption or approval of each such transaction. This procedure is unduly cumbersome and imposes restrictions which may seriously interfere with the objectives of the stockpile program. It is to eliminate these difficulties that this amendment is being issued. This exemption applies only to sales to the General Services Administration and its agents and does not exempt the resale of any such materials.

In the judgment of the Director of Price Stabilization, this action is necessary to achieve the objectives of the Defense Production Act of 1950 and will not have any material effect upon the cost of living or upon the general level of prices.

AMENDATORY PROVISIONS

1. Section 2 of General Overriding Regulation 2, entitled "Definitions" is hereby renumbered section 3 and is amended by adding the following definition at the end thereof:

(d) "Strategic and critical materials" means the materials set forth on the official list prepared by the General Services Administration and approved by the Director of Price Stabilization, or any amendment or supplement thereto. The term includes ores, concentrates, mattes, speiss, bullion, blister and the various forms of refined metal in standard commercial shapes, including ferro-alloys, powders, and chemical compounds of such metal; but it does not include such materials as alloy ingot, wire bar or billet, or alloyed or unalloyed rod, sheet, tube or extruded shapes or any other form which customarily commands a premium.

2. A new section 2 is inserted reading as follows:

SEC. 2. *Sales of strategic and critical materials to the General Services Administration.* No price regulation shall apply to the sale to the General Services Administration or its agents, pursuant to Public Law 520, 79th Congress, or Public Law 774, 81st Congress, of

(a) Strategic and critical materials mined or produced outside the United States, its territories or possessions, or

(b) Strategic and critical materials mined or produced inside the United States, its territories, or possessions

(1) Under any contract executed prior to January 25, 1951, or

(2) Under any contract executed after January 25, 1951, with respect to which the General Services Administration has filed with the Office of Price Stabilization, Washington, D. C., a certification that the marginal or submarginal character of the source or the necessity of constructing or installing substantial additional facilities or equipment renders it uneconomical to produce such material at the ceiling price otherwise applicable.

Effective date. This Amendment 1 to General Overriding Regulation 2 shall become effective July 3, 1951.

[General Overriding Regulation 8, Amendment 3]

GOR 8—PAPER, PAPERBOARD, CONVERTED PAPER AND PAPEBOARD PRODUCTS, ALLIED PRODUCTS AND SERVICES

EXEMPTION OF SALES OF SPECIAL REPRODUCTION BOOK MATCHES

Pursuant to the Defense Production Act of 1950 (Public Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization General Order No. 2 (16 F. R. 738), this Amendment 3 to General Overriding Regulation 8 is hereby issued.

STATEMENT OF CONSIDERATIONS

General Overriding Regulation 8 created a clearing house for future exemptions for specific paper, paperboard, converted paper and paperboard products, allied products and services. Amendment 1 to General Overriding Regulation 8, among other things, exempted from price control all sales of advertising matter printed on paper except such articles as containers, labels and book matches, the form of which serves a purpose other than that of advertising. This amendment merely broadens this exemption to cover all sales of "special reproduction" book matches and packages thereof. This exemption is not applicable to "resale" book matches or "monograms".

Special reproduction book matches are designed for use as advertising and are given away in connection with the business which they advertise. Such book matches are commonly purchased by hotels, restaurants and railroads for distribution to their patrons. This category of book matches does not include "resale matches", which are for resale or free distribution usually in connection with the sale of tobacco products. The advertising on such matches is sold for a separate revenue and is usually unrelated to the business of the person who distributes them. Resale book matches are also available for sale by retailers in caddies of 50 books.

The exemption of special reproduction book matches cannot affect the cost of living nor add to the cost of the defense effort. Moreover, since this type of match is especially tailored for each individual customer and because its value may be based on its unusual design, uniform and equitable pricing would be extremely difficult. Administration and surveillance of control over prices of this commodity would be burdensome and impracticable.

In view of the unusual economic nature of this commodity, the numerous types and thousands of individual designs for each type, and the administrative difficulties in instituting controls, it has been determined that the sale of special reproduction book matches should be exempted from price control.

In consideration of the above facts, the Director of Price Stabilization finds that Amendment 3 to General Overriding Regulation 8 is generally fair and equitable and in his opinion is necessary and proper to effectuate the purpose of the Defense Production Act of 1950.

AMENDATORY PROVISIONS

1. Subparagraph (2) of section 1 (a) of General Overriding Regulation 8 is amended to read as follows:

(2) Sales of commodities whose primary value depends upon editorial content, expression of ideas or dissemination of information and the rates, fees, charges, or compensation for the services of printing, publishing, typesetting, platemaking, binding, or related services in connection with such commodities, including, but not limited to, books, magazines, periodicals, newspapers, material furnished for publication by any press association or feature service, pamphlets, leaflets, sheet music, music rolls, stamp albums, globes, maps, charts, catalogs, directories, programs, house organs, menus, advertising matter printed on paper (except such articles as containers, labels and book matches, not including special reproduction book matches and the packaging thereof, the form of which serves a purpose other than that of advertising) time tables, tariffs and price lists.

2. Section 2 (a) is amended by the addition of subparagraph (5) which reads as follows:

(5) "Special reproduction book matches" are paper matches in books which are specially designed through sketches, artwork, engraving and color prints as an advertising medium and are specially printed and manufactured to serve the advertising purposes of the purchaser. It does not cover "resale book matches" which include the following types of book matches:

(i) All paper book matches sold at the retail level including those specially initialed or monogrammed at the order of the purchaser.

(ii) Paper book matches bearing general advertising matter from which revenue is obtained independently of the price of the book matches.

(iii) Paper book matches bearing a patriotic slogan, emblem, design or pattern in place of or in connection with general advertising matter, which are for general distribution to or through a distributor or retailer.

(iv) Paper book matches commonly described as the "thank you" or "noprint" type, ordinarily free from printing and for general distribution to and through a distributor or retailer. Included in this group are paper book matches bearing a stock cut or design, trade-mark, slogan, color, monogram or pattern from which an advertising revenue is not obtained by the manufacturer and which are for general distribution.

Effective date. This amendment shall become effective July 9, 1951.

[General Overriding Regulation 9, Amendment 3]

GOR 9—EXEMPTIONS OF CERTAIN INDUSTRIAL MATERIALS AND MANUFACTURED GOODS

SALES OF CERTAIN DIMENSION AND BUILDING STONES, MONUMENTS, AND MEMORIALS, AND ARCHITECTURAL TERRA COTTA

Pursuant to the Defense Production Act of 1950 (Public Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 3 to General Overriding Regulation 9, is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment is designed to provide for the exemption from price control of certain dimension and building stones, monuments and memorials, and architectural terra cotta. Production and sales of these commodities by producers and resellers are exempted by this regulation. Makers of monuments and memorials and installers of architectural terra cotta whose installed sales have hitherto been covered under CPR 34—Services, are also exempted by this amendment.

These exemptions are of insignificant importance to the cost of living or to the cost of the defense program. There is no likelihood that removal of control of these commodities will affect sales or prices of other commodities through diversion of materials, labor, or facilities. In addition, their control involves administrative and enforcement difficulties disproportionate to their economic significance. The commodities exempted by this regulation were also exempt for similar reasons by the Office of Price Administration during the last war.

AMENDATORY PROVISIONS

General Overriding Regulation 9 is amended in the following respects:

1. Section 2 (a) (6) is added to read as follows:

(6) *Sales by producers and resellers of dimension and building stones.* "Producers" means persons engaged in quarrying, cutting, shaping, sizing, polishing, inscribing, designing, coloring, glazing or burning. "Dimension and building stones" includes the following: Basalt and related stones; granite, building, ornamental and monumental; greenstone, interior or exterior, building, structural, ornamental, and monumental; limestone, building, ornamental, and monumental; marble, slabs, building, structural, and decorative, and ornamental and monumental, and grave vaults; sandstone, building, structural, floor and flagging, including bluestone and brownstone; slate, structural, electrical, grave vaults, mausoleum, roofing, floor, and flagging.

2. Section 2 (a) (7) is added to read as follows:

(7) *Sales and installation services by producers and resellers of monuments and memorials.* "Monuments and memorials" means markers, epitaphs, cenotaphs, statues, tablets, pillars, tombs, sarcophagi, and burial vaults intended to preserve the memory of a person or event, when made of granite, greenstone, limestone, marble or sandstone.

3. Section 2 (a) (8) is added to read as follows:

(8) *Sales and installation services by producers and resellers of architectural terra cotta.* "Architectural terra cotta" means a ceramic facing building material made from a mixture of clays and fusible materials fired in kilns and colored by the use of ceramic glazes. It is custom made and conforms to architects' designs and specifications as to size, shape, color and tolerances. The term does not include unglazed, salt or ceramic glazed structural facing units made from clays and other fusible materials which are not custom made and are usually sold on a unit basis.

Effective date. This amendment shall become effective July 3, 1951.

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-9]

M-9—DISTRIBUTION OF ZINC

This order is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this order there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable by the fact that the order affects a large number of different trades and industries.

NPA Order M-9, Zinc, as originally set forth at 15 F. R. 7878, Nov. 18, 1950, and as amended at 16 F. R. 5015, May 29, 1951, is hereby revoked, an a new Order M-9 under the title, Distribution of Zinc, is hereby substituted therefor, to read as follows:

Sec.
1. What this order does.
2. Application of this order.
3. Definitions.
4. Allocation of slab zinc.
5. Exemptions.
6. Delivery of slab zinc.
7. Specific directives.
8. Assistance in placing orders.
9. Records and reports.
10. Applications for adjustment or exception.
11. Communications.
12. Violations.

AUTHORITY: Sections 1 to 12 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to provide for the distribution of the supply of slab zinc so as best to serve the interest of national defense and essential civilian production. It brings slab zinc under allocation by prohibiting, subject to limited exceptions, any deliveries not covered by allocation authorizations to be issued monthly by the National Production Authority. Provision is thus made whereby the supply remaining after defense requirements are met may be equitably distributed through normal channels for essential civilian uses and with due regard for the needs of new and small business. It also explains the conditions under which reports are required from producers, importers, and consumers of and dealers in slab zinc.

SEC. 2. *Application of this order.* This order applies to all persons who produce, consume, trade in, import, or hold in inventory, slab zinc as defined in section 3 (d) of this order. The provisions of this order supersede other National Production Authority regulations and orders to the extent that they are inconsistent with this order, but in all other respects such regulations and orders remain applicable to slab zinc. In particular, NPA Reg. 2 continues to apply to slab zinc, but deliveries on DO rated orders may be made only in accordance with allocation authorizations issued by the National Production Authority, except as otherwise provided in this order. The National Production Authority may from time to time issue special directives as to deliveries of slab zinc and, unless otherwise provided therein, such directives will prevail over the other provisions of this order.

SEC. 3. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Producer" means any person producing slab zinc and any person who has slab zinc produced for him under toll agreement.

(c) "Dealer" means any person who receives physical deliveries of slab zinc and sells or holds such slab zinc for resale without change in form. A person who produces any slab zinc or who has slab zinc produced for him under toll agreement is a producer as to such zinc and not a dealer.

(d) "Slab zinc" means all grades of metallic slab zinc (spelter) which have been produced by electrolytic, electrothermic, or fire refining process, including zinc produced from scrap, dross, or other secondary material.

SEC. 4. *Allocation of slab zinc.* (a) Commencing on August 1, 1951, and subject to the exemptions stated in section 5 of this order, no person shall accept delivery of slab zinc for any purpose in any month except in accordance with the terms of an allocation authorization issued to him for such month by the National Production Authority on Form NPAF-110. An allocation authorization will authorize the holder to accept delivery of slab zinc in a specified quantity and grade if shipped not later than the last day of the month for which the authorization is issued. Any order placed pursuant to an allocation authorization shall specify the date and serial number of the applicable authorization. This section shall apply with like effect to the acceptance of deliveries of slab zinc by any branch, division, or department of any business enterprise from any producing branch, division, or department of the same business enterprise.

(b) An application for an allocation authorization must be filed with the National Production Authority by the proposed purchaser on Form NPAF-110 not later than the fifteenth day of the month preceding the month in which delivery is sought. Such application must contain all information required by the form.

SEC. 5. *Exemptions.* The provisions of section 4 of this order shall not apply to any:

(a) acceptance of slab zinc by the General Services Administration for its stockpile of strategic materials;

(b) acceptance of slab zinc directly from a foreign source for the sole purpose of resale without change in form; or

(c) acceptance of slab zinc by any person (1) whose total receipts during the month in which such acceptance occurs are, or by such acceptance would become, not in excess of 20 short tons, (2) who has not applied to the National Production Authority for an allocation authorization for such month, and (3) who furnishes a signed certification to the supplier in substantially the following form:

The undersigned certifies, subject to statutory penalties, that receipt of this shipment in the month requested will be in compliance with NPA Order M-9, that such receipt will not bring the undersigned's total receipt of slab zinc during that month above 20 short tons, and that no application has been made to the National Production Authority for an allocation authorization for that month.

Such certification constitutes a representation to the supplier and to the National Production Authority that the purchaser is authorized to accept delivery of slab zinc pursuant to this paragraph.

SEC. 6. *Delivery of slab zinc.* No person shall deliver any slab zinc if he knows, or has reason to believe, that the person requesting delivery is not permitted to receive it under this order.

SEC. 7. *Specific directives.* The National Production Authority may issue directives as to the source, destination, specific grades, and quantities of slab zinc to be delivered or acquired. NPA may also direct any producer to set aside a specific portion of his production of slab zinc for distribution according to directives issued by the National Production Authority.

SEC. 8. *Assistance in placing orders.* Any person who has received an allocation authorization for slab zinc and who is unable to place an order for the material covered by the authorization, should apply to the National Production Authority, Ref: M-9, specifying the efforts made to obtain such material. The National Production Authority will arrange to assist him in locating sources of supply.

SEC. 9. *Records and reports.* (a) All producers of slab zinc shall fill out and return Bureau of Mines Form 6-1150-M to the address specified on the form, in the number of copies specified on the form, on or before the twentieth day of July 1951 with respect to their operations during the month of June and their anticipated production during the month of August, and on or before the twentieth day of each month thereafter with respect to their operations during the preceding month and their anticipated production during the next succeeding month.

(b) Any person who uses, ships, or receives 5 short tons or more of slab zinc in any calendar month, or who has 5 short tons or more of slab zinc in his possession or under his control on any day of any month shall fill out and return Bureau of Mines Form 6-1151-M, in the number of copies specified on the form, to the address specified on the form, on or before the fifteenth day of July 1951 with respect of such use, shipment, receipt, or possession during the month of June, and on or before the fifteenth day of each succeeding month with respect to such use, shipment, receipt, or possession during the next succeeding month.

(c) Commencing on July 20, 1951, any person who imports slab zinc for the sole purpose of resale without change in form shall advise the National Production Authority by letter in duplicate not less than 10 days before its expected arrival in the continental United States, of the quantity, grade, and country of origin of such slab zinc.

(d) Any person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit and for filling out the reports required in paragraphs (a), (b), (c), and (d) of this section. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(e) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

SEC. 10. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of national defense or in the public interest. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 11. *Communications.* Except as otherwise specified, all communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M-9.

SEC. 12. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of the National Production Authority, or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942 (5 U. S. C. 139-139F).

NPA Order M-9, as so revised and retitled, shall take effect on July 5, 1951.

MANLY FLEISCHMANN,
Administrator.

M-18—PIGS' AND HOGS' BRISTLES AND BRISTLE PRODUCTS

This order as amended is found necessary and appropriate to promote the

national defense, and is issued pursuant to authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

This amendment affects NPA Order M–18 as amended March 30, 1951, as follows: It amends section 2, paragraphs (f) and (g); adds new paragraphs (h) and (i); and redesignates old paragraph (h) as paragraph (j). It amends section 3 by deleting the phrase "after March 30, 1951." It amends sections 4, 5, and 6, making material changes, and redesignates these sections as sections 6, 4, and 5, respectively. It amends section 7; deletes section 8, and renumbers the subsequent sections accordingly. It amends sections 8, 9, and 10 as renumbered. It changes the title and introductory paragraph of the attached brush schedule, and changes certain ferrule specifications contained in that schedule. As so amended NPA Order M–18 reads as follows:

AUTHORITY: Sections 1 to 15 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order sets forth limitations on inventories of bristles. It imposes limitations on the processing, mixing, or preparation for manufacture, of bristles and on the manufacture and distribution of brushes and other products containing bristles. It makes provisions for requiring the simplification and standardization of brushes manufactured from bristles. It imposes restrictions upon the export of brushes containing bristles. It calls for reports and explains the conditions under which reports are required in connection with the distribution, use, and inventories of bristles.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Bristles" means pigs' or hogs' bristles, including riflings, whether new, reclaimed, raw, dressed, imported, or domestic, but does not include engined shoemakers' bristles.

(c) "Dealer" means a person who regularly purchases and sells bristles without processing or changing their condition.

(d) "Dresser" means a person who grades, sorts, prepares, reclaims, or in any way processes bristles.

(e) "Process" means to boil, sterilize, comb, wash, drag, or mix bristles.

(f) "Import" means to transport in any manner into the continental United States from areas outside the continental United States, including its territories and possessions. It includes shipments into foreign-trade zones, customs bonded warehouses, and customs custody, except when such shipments are merely in transit through the continental United States to destinations outside the continental United States, as shown by the bills of lading or other shipping documents. However, if any such material in transit is halted or diverted to a destination in the continental United States or subjected to processing or manufacture in the continental United States, it becomes an "import" for the purposes of this order, and requires the reports specified in section 11 of this order.

(g) "Painters' brush" means the type of brushes specified in the brush schedule annexed to this order.

(h) "Industrial brushes" means all types of brushes or brush-strips used as integral or fixed parts of production equipment in production operations of any industry.

(i) "Bristle products" means products, other than brushes and brush strips, which use bristles in the form of knots, tufts, or individual strands, and which are integral or fixed parts of production equipment in the production operations of any industry.

(j) "Ferrule" means the band by which the stock or filling material of a painters' brush is attached to the handle.

SEC. 3. *Inventories.* (a) Notwithstanding the provisions of NPA Reg. 1, no manufacturer utilizing bristles in the manufacture of brushes or other products containing bristles may order, purchase, arrange or contract to purchase for delivery, import, or receive bristles, if his inventory is, or by receipt of such bristle would become, more than a practicable minimum working inventory of bristles, or in excess of such bristles required for his scheduled production of brushes and other products containing bristles for a period of 120 days, whichever is less.

(b) No manufacturer utilizing bristles in the manufacture of brushes, or other products containing bristles, may place an order for delivery of such bristles on earlier dates or in larger amounts than he would be permitted to receive under this order.

(c) A "practicable minimum working inventory," as defined in NPA Reg. 1, may be computed for purposes of this order on the basis of the total quantity of bristles reported in section 1, parts A and B, of Form NPAF–14, as compared with the monthly consumption of such bristles as reported in section 2 of that form.

SEC. 4. *Restrictions on the use of bristles.* No person shall use any bristles longer than 2⅞ inches for any purpose, except:

(a) To manufacture painters' brushes of the types identified in the brush schedule appearing at the end of this order, excluding the following: No. 12, mucilage and paste; No. 13, painters' duster flat; No. 14, painters' duster round; No. 15, plasterers', and No. 35, whitewash.

(b) To manufacture industrial brushes or other products from bristles not longer than 4 inches, where such brushes or other products are required and used as integral or fixed parts of production equipment in the production operations of any industry.

(c) To manufacture billboard poster paste brushes from India bristles.

SEC. 5. *Required mixture of other materials with bristles.* No person shall manufacture brushes or products referred to in section 4 (a) and (c) of this order from bristles longer than 2⅝ inches, unless such brushes or products contain at least 30 percent by weight of filling material other than bristles as defined in this order: *Provided, however,* That this restriction shall not apply to painters' brushes required in the production of self-sealing fuel cells for military aircraft.

SEC. 6. *Limitations on the manufacture of painters' brushes.* No person shall manufacture any painters' brushes of types other than those specified in the brush schedule appearing at the end of this order. Ferrules for the brushes so specified shall be of the dimensions set forth for each type of brush in the schedule, except that such limitations shall not apply:

(a) To finished ferrules on hand as of March 30, 1951, regardless of who had possession thereof.

(b) To semifinished ferrules on hand as of March 30, 1951, where such ferrules had entered the cutting or slitting process of manufacture.

SEC. 7. *Restriction on the sale and delivery of painters' brushes.* No manufacturer of brushes shall sell or deliver painters' brushes containing bristles longer than 2⅞ inches, except in pursuance of DO rated orders or for export following authorization by the Office of International Trade, Department of Commerce, on Form IT–419.

SEC. 8. *Restriction on the sale of bristles.* No person may sell bristles except to a dealer, dresser, or manufacturer of brushes or products containing bristles, or to an agency purchasing for the account of the United States Government.

SEC. 9. *Prohibited deliveries of bristles, ferrules, and painters' brushes.* No person shall accept an order for, sell, deliver, or cause to be delivered, bristles, ferrules, or painters' brushes which he knows or has reason to believe will be accepted, held, or used, in violation of the provisions of this order.

SEC. 10. *Reports.* (a) Any person who imports, distributes, or has in his possession, bristles for the purpose of manufacture of brushes or other products containing bristles, or who otherwise may have bristles in his possession, must report each month his entries, receipts, deliveries, inventories, balance of entries, and all other transactions in bristles, by completing and filing in duplicate, with the Bureau of the Census, Form NPAF–14 with respect to all such operations and transactions, such report to be received by the Bureau not later than the tenth day of the month following the month for which the report is made.

(b) Any other person, except a common carrier, having any interest in or taking any action with respect to the importation of bristles or having control over bristles while they are physically in the continental United States, even though in bond or in transit, whether as owner, agent, consignee, or in any other capacity having bristles in his possession or under his control, shall file the report called for in paragraph (a) of this section and such other reports as may be required from time to time by the National Production Authority, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 11. *Records.* Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

SEC. 12. *Communications.* All communications concerning this order shall be addressed to National Production Authority, Washington, 25, D. C., Ref: M–18.

SEC. 13. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing, shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 14. *Audit and inspection.* All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

SEC. 15. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of the National Production Authority or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect on July 3, 1951.

[CMP Regulation 3, Direction 2]

CMP REG. 3—PREFERENCE STATUS OF DELIVERY ORDERS UNDER THE CONTROLLED MATERIALS PLAN

DIR. 2—AUTOMATIC CONVERSION OF DELIVERY ORDERS BEARING CERTAIN RATINGS

This direction under CMP Regulation No. 3 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

SECTION 1. Notwithstanding the provisions of section 4 (c) of CMP Regulation No. 3, any delivery order for controlled materials bearing a DO rating listed in Schedule I of this direction, calling for delivery in the third calendar quarter of 1951, which has been accepted by a supplier and scheduled for delivery in the third quarter of 1951, prior to the effective date of this direction, shall have equal preferential status with authorized controlled material orders calling for delivery in that quarter.

SEC. 2. Notwithstanding the provisions of section 5 (c) of CMP Regulation No. 3, any delivery order for products or materials other than controlled materials bearing a DO rating listed in Schedule I of this direction and calling for delivery in the third calendar quarter of 1951, which has been accepted by a supplier and scheduled for delivery in the third quarter of 1951, prior to the effective date of this direction, shall have equal preferential status with delivery orders bearing a DO rating with an allotment number or symbol calling for delivery in that quarter.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 4—DEPENDENTS AND BENEFICIARIES CLAIMS

SERVICEMEN'S INDEMNITY FOR DEATH

1. In Federal Register Document 51-5860 appearing on page 4716 of the issue for Saturday, May 19, 1951, make the following correction: The figure (1) in the first line of the last paragraph in column 3 should read (l).

2. In § 4.453, paragraphs (m), (n), and (o) are added to read as follows:

§ 4.453 *Servicemen's indemnity for death.* • • •

(m) *Designations of beneficiaries.* (1) It will be the responsibility of the Veterans' Administration to determine in all applicable cases the person or persons to whom the servicemen's indemnity is payable. The Veterans' Administration is assured that the service department concerned will maintain a record of all beneficiary designations and changes of beneficiary designations for this purpose. These designations and changes will be made on an appropriate service department form or forms. There will be obtained from each person in service a written and dated statement signed by him respecting the designation of beneficiary(ies). If no beneficiary is designated the statement will show that fact, and if a beneficiary(ies) is designated the statement will show the name and relationship of each beneficiary with the amount or share payable to each. Each time the serviceman desires to make a change in designation of beneficiary, an appropriate signed statement showing the new designation(s) will be obtained from him. It will not be necessary that these statements appear on any particular form or, in fact, on any form. They will be made usually, however, on the form or forms devised by the service departments.

(2) After the procedure outlined in subparagraph (1) of this paragraph goes into effect, in each case in which the serviceman dies in service, there will be furnished the Veterans' Administration routinely and automatically with the regular report of death, or shortly thereafter, photostatic copies of all the signed statements concerning the designation or change in designation of beneficiary (ies) for the serviceman's indemnity. These copies will be used in routine cases as outlined in the adjudication of claims for the indemnity. Where necessary in questionable or contested claims the service department concerned will, upon request, furnish on a loan basis, or permits the inspection of, the originals of the statements of designations of beneficiary(ies) signed by the serviceman.

(n) *Reference to beneficiary designation on death report.* Within the near future the service departments will cause to be inserted on each report of death in service which is forwarded to the Veterans' Administration one of the following notations, whichever is appropriate:

(1) No record designation of indemnity beneficiary under Public Law 23, 82d Congress.

(2) Deceased declined to designate indemnity beneficiary under Public Law 23, 82d Congress.

(3) Deceased designated indemnity beneficiary under Public Law 23, 82d Congress.

Where notation (1) appears on the death report no further information may be expected from the service department, and adjudication of a claim may proceed on the basis that no beneficiary was designated. Where, however, either notation (2) or (3) appears on the death report, photostatic copies of all statements made by the serviceman respecting beneficiary designation, if not received with the report of death, may be expected to be received soon thereafter. Such cases will be diaried for 30 days. Adjudication of claims is, of course, to be accomplished after the receipt of the photostatic copies.

(o) *Reference to beneficiary designation not on death report.* This paragraph concerns those instances in which reports of death in service on or after April 25, 1951, have been or will be received which do not include a notation concerning designation of indemnity beneficiary. In each of such cases where indenmity is payable, a request will be made upon the service department through the medium of VA Form 3101 or 3102 asking whether there is any record of designation or specific declination to designate an indemnity beneficiary by the serviceman under Public Law 23, 82d Congress, and, if so, that photostatic copies of all such designations or changes in designation be furnished. Upon receipt of the appropriate information the claim will be adjudicated. (Instruction No. 1-B, Part I, Pub. Law 23, 82d Cong.)

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9; 38 U. S. C. 11a, 426, 707)

This regulation is effective July 6, 1951.

Deputy Administrator.

MISCELLANEOUS AMENDMENTS

Correction

In Federal Register Document 51-6550, published at page 5342 of the issue for Wednesday, June 6, 1951, the first line of subparagraph (1) (v) of § 21.104 (b) should read: "(v) Related institutional training on".

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Internal Revenue

[26 CFR Part 29]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DEC. 31, 1941

SELF-EMPLOYMENT INCOME

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 62 and 3791 of the Internal Revenue Code (53 Stat. 32, 467; 26 U. S. C. 62, 3791).

[SEAL] GEO. J. SCHOENEMAN,
Commissioner of Internal Revenue.

In order to conform Regulations 111 (26 CFR Part 29) to section 208 of the Social Security Act Amendments of 1950 (Public Law 734, 81st Congress), approved August 28, 1950, and to sections 221 (i) and (j) (1) of the Revenue Act of 1950 (Public Law 814, 81st Congress), approved September 23, 1950, regulations are amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 29.3-1 the following:

SEC. 208. SELF-EMPLOYMENT INCOME (SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPROVED AUGUST, 28, 1950).

(d) (1) Section 3 of the Internal Revenue Code is amended by inserting at the end thereof the following:

Subchapter E—Tax on Self-Employment Income (the Self-Employment Contributions Act), divided into sections.

• • • • • •

PAR. 2. Section 29.3-1, as amended by Treasury Decision 5391, approved July 14, 1944, is further amended by changing the fifth sentence thereof to read as follows: "Subpart D relates to Victory Tax on Individuals for taxable years beginning prior to January 1, 1944, and to Tax on Self-Employment Income for taxable years beginning after December 31, 1950."

PAR. 3. There is inserted immediately preceding § 29.12-1 the following:

SEC. 208. SELF-EMPLOYMENT INCOME (SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPROVED AUGUST 28, 1950).

• • • • • •

(d) • • •

(2) Section 12 (g) of the Internal Revenue Code is amended by inserting at the end thereof the following:

(6) *Tax on self-employment income.* For tax on self-employment income, see subchapter E.

• • • • • •

PAR. 4. There is inserted immediately after section 31 of the Internal Revenue Code, as set forth preceding § 29.35-1, as added by Treasury Decision 5325, approved January 8, 1944, the following:

SEC. 208. SELF-EMPLOYMENT INCOME (SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPREVED AUGUST 28, 1950).

• • • • • •

(d) • • •

(3) Section 31 of the Internal Revenue Code is amended by inserting immediately after the words "the tax" the following: "(other than the tax imposed by subchapter E, relating to tax on self-employment income)" • • •.

SUBCHAPTER E—TAX ON SELF-EMPLOYMENT INCOME

SEC. 480. RATE OF TAX.

In addition to other taxes, there shall be levied, collected, and paid for each taxable year beginning after December 31, 1950, upon the self-employment income of every individual, a tax as follows:

(1) In the case of any taxable year beginning after December 31, 1950, and before January 1, 1954, the tax shall be equal to 2¼ per centum of the amount of the self-employment income for such taxable year.

(2) In the case of any taxable year beginning after December 31, 1953, and before January 1, 1960, the tax shall be equal to 3 per centum of the amount of the self-employment income for such taxable year.

(3) In the case of any taxable year beginning after December 31, 1959, and before January 1, 1965, the tax shall be equal to 3¾ per centum of the amount of the self-employment income for such taxable year.

(4) In the case of any taxable year beginning after December 31, 1964, and before January 1, 1970, the tax shall be equal to 4½ per centum of the amount of the self-employment income for such taxable year.

(5) In the case of any taxable year beginning after December 31, 1969, the tax shall be equal to 4¾ per centum of the amount of the self-employment income for such taxable year.

* * * * * *

§ 29.480–1 *Tax on self-employment income.* For taxable years beginning after December 31, 1950, there is imposed, in addition to other taxes, a tax upon the self-employment income of every individual at the rates prescribed in section 480. This tax shall be levied, assessed, and collected as part of the income tax imposed by Chapter 1 of the Internal Revenue Code and, except as otherwise expressly provided, will be included with the taxes imposed by sections 11 and 12 in computing any deficiency or overpayment and in computing the interest and additions to any deficiency, overpayment, or tax. Since the tax on self-employment income is part of the income tax, it is subject to the jurisdiction of The Tax Court of the United States to the same extent and in the same manner as the other taxes under Chapter 1 of the Code. However, this tax is not required to be taken into account in computing any estimate of the taxes required to be declared under section 58.

In general, self-employment income consists of the net earnings derived by an individual (other than a nonresident alien) from a trade or business carried on by him as sole proprietor or by a partnership of which he is a member, subject to certain exclusions, exceptions, and limitations.

SEC. 481. DEFINITIONS (ADDED BY SECTION 208 (A), SOCIAL SECURITY ACT AMENDMENT OF 1950, APPROVED AUGUST 28, 1950, AND AMENDED BY SECTION 221 (J), REVENUE ACT OF 1950, APPROVED SEPTEMBER 23, 1950).

For the purposes of this subchapter—

(a) *Net earnings from self-employment.* The term "net earnings from self-employment" means the gross income derived by an individual from any trade or business carried on by such individual, less the deductions allowed by this chapter which are attributable to such trade or business, plus his distributive share (whether or not distributed) of the ordinary net income or loss, as computed under section 183, from any trade or business carried on by a partnership of which he is a member; except that in computing such gross income and deductions and such distributive share of partnership ordinary net income or loss—

(1) There shall be excluded rentals from real estate (including personal property leased with the real estate) and deductions attributable thereto, unless such rentals are received in the course of a trade or business as a real estate dealer;

(2) There shall be excluded income derived from any trade or business in which, if the trade or business were carried on exclusively by employees, the major portion of the services would constitute agricultural labor as defined in section 1426 (h); and there shall be excluded all deductions attributable to such income;

(3) There shall be excluded dividends on any share of stock, and interest on any bond, debenture, note, or certificate, or other evidence of indebtedness, issued with interest coupons or in registered form by any corporation (including one issued by a government or political subdivision thereof), unless such dividends and interest (other than interest described in section 25 (a)) are received in the course of a trade or business as a dealer in stocks or securities;

(4) There shall be excluded any gain or loss (A) which is considered as gain or loss from the sale or exchange of a capital asset, (B) from the cutting or disposal of timber if section 117 (j) is applicable to such gain or loss, or (C) from the sale, exchange, involuntary conversion, or other disposition of property if such property is neither (i) stock in trade or other property of a kind which would properly be includible in inventory if on hand at the close of the taxable year, nor (ii) property held primarily for sale to customers in the ordinary course of the trade or business;

(5) The deduction for net operating losses provided in section 23 (s) shall not be allowed;

(6) (A) If any of the income derived from a trade or business (other than a trade or business carried on by a partnership) is community income under community property laws applicable to such income, all of the gross income and deductions attributable to such trade or business shall be treated as the gross income and deductions of the husband unless the wife exercises substantially all of the management and control of such trade or business, in which case all of such gross income and deductions shall be treated as the gross income and deductions of the wife;

(B) If any portion of a partner's distributive share of the ordinary net income or loss from a trade or business carried on by a partnership is community income or loss under the community property laws applicable to such share, all of such distributive share shall be included in computing the net earnings from self-employment of such partner, and no part of such share shall be taken into account in computing the net earnings from self-employment of the spouse of such partner;

(7) (A) In the case of any taxable year beginning before the effective date specified in section 3810, the term "possession of the United States" when used in section 251 with respect to citizens of the United States shall include Puerto Rico;

(B) In the case of any taxable year beginning on or after the effective date specified in section 3810, a resident of Puerto Rico shall compute his net earnings from self-employment in the same manner as a citizen of the United States but without regard to the provisions of section 116 (1).

If the taxable year of a partner is different from that of the partnership, the distributive share which he is required to include in computing his net earnings from self-employment shall be based upon the ordinary net income or loss of the partnership for any taxable year of the partnership (even though beginning prior to January 1, 1951) ending within or with his taxable year.

(b) *Self-employment income.* The term "self-employment income" means the net earnings from self-employment derived by an individual (other than a nonresident alien individual) during any taxable year beginning after December 31, 1950; except that such term shall not include—

(1) That part of the net earnings from self-employment which is in excess of: (A) $3,600, minus (B) the amount of the wages paid to such individual during the taxable year; or

(2) The net earnings from self-employment, if such net earnings for the taxable year are less than $400.

For the purposes of clause (1) the term "wages" includes such remuneration paid to an employee for services included under an agreement entered into pursuant to the provisions of section 218 of the Social Security Act (relating to coverage of State employees) as would be wages under section 1426 (a) if such services constituted employment under section 1426 (b). In the case of any taxable year beginning prior to the effective date specified in section 3810, an individual who is a citizen of Puerto Rico (but not otherwise a citizen of the United States) and who is not a resident of the United States or of the Virgin Islands during such taxable year shall be considered, for the purposes of this subchapter, as a nonresident alien individual. An individual who is not a citizen of the United States but who is a resident of the Virgin Islands or (after the effective date specified in section 3810) a resident of Puerto Rico shall not, for the purposes of this subchapter, be considered to be a nonresident alien individual.

(c) *Trade or business.* The term "trade or business", when used with reference to self-employment income or net earnings from self-employment, shall have the same meaning as when used in section 23, except that such term shall not include—

(1) The performance of the functions of a public office;

(2) The performance of service by an individual as an employee (other than service described in section 1426 (b) (16) (B) performed by an individual who has attained the age of eighteen);

(3) The performance of service by an individual as an employee or employee representative as defined in section 1532;

(4) The performance of service by a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry or by a member of a religious order in the exercise of duties required by such order; or

(5) The performance of service by an individual in the exercise of his profession as a physician, lawyer, dentist, osteopath, veterinarian, chiropractor, naturopath, optometrist, Christian Science practitioner, architect, certified public accountant, accountant registered or licensed as an accountant under State or municipal law, full-time practicing public accountant, funeral director, or professional engineer; or the performance of such service by a partnership.

(d) *Employee and wages.* The term "employee" and the term "wages" shall have the same meaning as when used in subchapter A of chapter 9.

§ 29.481–1 *Net earnings from self-employment*—(a) *Definition.* Subject to the special rules discussed in paragraph (c) of this section and to the exclusions discussed in § 29.481–3, the term "net earnings from self-employment" means:

(1) The gross income derived by an individual from any trade or business carried on by such individual, less the deductions allowed by Chapter 1 of the Internal Revenue Code which are attributable to such trade or business, plus

(2) His distributive share (whether or not distributed) of the ordinary net income (or minus the ordinary net loss) from any trade or business, as computed under section 183, carried on by any partnership of which he is a member.

(b) *Included in net earnings.* (The gross income and deductions of an individual attributable to a trade or business, for the purpose of ascertaining his net earnings from self-employment, are to be determined by reference to the provisions of law and regulations applicable with respect to the taxes imposed by sections 11 and 12. Thus, if an individual uses the accrual method of accounting in computing net income from a trade or business for the purpose of the taxes imposed by sections 11 and 12, he must use the same method in determining net earnings from self-employment. Likewise, if a taxpayer engaged in a trade or business of selling property on the installment plan elects, under the provisions of section 44, to use the installment basis in computing income for the purpose of the taxes under sections 11 and 12, he must use the same basis in determining net earnings from self-employment.

The trade or business must be carried on by the individual, either personally or through agents or employees. Accordingly, income derived from a trade or business carried on by an estate or trust is not included in determining the net earnings from self-employment of the individual beneficiaries of such estate or trust.

Where an individual is engaged in more than one trade or business within the meaning of section 481 (c) and § 29.481–3, his net earnings from self-employment consist of the aggregate of the net income and losses (computed subject to the special rules provided in this section) of all such trades or businesses carried on by him. Thus, a loss sustained in one trade or business carried on by an individual will operate to offset the income derived by him from another trade or business.

The net earnings from self-employment of an individual include, in addition to the earnings from a trade or business carried on by him, his distributive share of the ordinary net income or ordinary net loss from any trade or business carried on by each partnership of which he is a member. An individual's distributive share of the ordinary net income or ordinary net loss of a partnership shall be computed under section 183, subject to the special rules set forth in section 481 (a) and in this section and to the exclusions provided in section 481 (c) and in § 29.481–3.

If the taxable year of a partner differs from that of the partnership, the partner shall include, in computing net earnings from self-employment, his distributive share of the ordinary net income or ordinary net loss of the partnership for its taxable year (even though beginning prior to January 1, 1951) ending with or within the taxable year of the partner.

For the purpose of determining net earnings from self-employment, a partnership is one which is recognized as such for income tax purposes. For income tax purposes, the term "partnership" includes not only a partnership as known at common law, but, also, a syndicate, group, pool, joint venture, or other unincorporated organization which carries on any trade or business, financial operation, or venture, which is not, within the meaning of the Internal Revenue Code, a trust, estate, or a corporation.

The net earnings from self-employment of a partner include his distributive share of the ordinary net income or ordinary net loss of the partnership of which he is a member, irrespective of the nature of his membership. Thus, in determining his net earnings from self-employment, a limited or inactive partner includes his distributive share of the ordinary net income or ordinary net loss of the partnership.

(c) *Excluded from net earnings.* For the purpose of computing net earnings from self-employment, the gross income derived by an individual from a trade or business carried on by him, the allowable deductions attributable to such trade or business, and the individual's distributive share of the ordinary net income or ordinary net loss from any trade or business carried on by a partnership of which he is a member shall be computed in accordance with the following special rules:

(1) *Rentals from real estate.* Rentals from real estate (including personal property leased with the real estate), and the deductions attributable thereto, unless such rentals are received by an individual in the course of a trade or business as a real-estate dealer, are excluded. Whether or not an individual is engaged in the trade or business of a real-estate dealer is determined by the application of the principles followed in respect of the taxes imposed by sections 11 and 12. In general, an individual who is engaged in the business of selling real estate to customers with a view to the gains and profits that may be derived from such sales is a real-estate dealer. On the other hand, an individual who merely holds real estate for investment or speculation and receives rentals therefrom is not considered a real-estate dealer. Where a real-estate dealer holds real estate for investment or speculation in addition to real estate held for sale to customers in the ordinary course of his trade or business as a real-estate dealer, only the rentals from the real estate held for sale to customers in the ordinary course of his trade or business as a real-estate dealer, and the deductions attributable thereto, are included in determining net earnings from self-employment; the rentals from the real estate held for investment or speculation, and the deductions attributable thereto, are excluded.

Payments for the use or occupancy of entire private residence or living quarters in duplex or multiple-housing units are generally rentals from real estate. Except in the case of real-estate dealers, such payments are excluded in determining net earnings from self-employment even though such payments are in part attributable to personal property furnished under the lease.

Payments for the use or occupancy of rooms or other space where services are also rendered to the occupant, such as for the use or occupancy of rooms or other quarters in hotels, boarding houses, or apartment houses furnishing hotel services, or in tourist camps or tourist homes, or for the use or occupancy of space in parking lots, warehouses, or storage garages, do not constitute rentals from real estate; consequently, such payments are included in determining net earnings from self-employment. Generally, services are considered rendered to the occupant if they are primarily for his convenience and are other than those usually or customarily rendered in connection with the rental of rooms or other space for occupancy only. The supplying of maid service, for example, constitutes such service; whereas, the furnishing of heat and light, the cleaning of public entrances, exits, stairways and lobbies, the collection of trash, and so forth, are not considered as services rendered to the occupant.

Except in the case of a real-estate dealer, where an individual or a partnership is engaged in a trade or business the income of which is classifiable in part as rentals from real estate, only that portion of such income which is not classifiable as rentals from real estate,

and the expenses attributable to such portion, will be included in determining net earnings from self-employment.

Example. A, an individual, owns a building containing four apartments. During the taxable year, he receives $1,400 from apartments numbered 1 and 2, which are rented without services rendered to the occupants, and $3,600 from apartments numbered 3 and 4, which are rented with services rendered to the occupants. His fixed expenses for the four apartments aggregate $1,200 during the taxable year. In addition, he has $500 of expenses attributable to the services rendered to the occupants of apartments 3 and 4. In determining his net earnings from self-employment, A includes the $3,600 received from apartments 3 and 4, and the expenses of $1,100 attributable thereto. The rentals and expenses attributable to apartments 1 and 2 are excluded. Therefore, A has $2,500 of net earnings from self-employment for the taxable year.

(2) *Income from agricultural activity.* Income derived from any trade or business in which, if the trade or business were carried on exclusively by employees, the major portion of the services would constitute agricultural labor as defined in section 1426 (h), and all deductions attributable to such income, are excluded. In case the services are in part agricultural and in part nonagricultural, the time devoted to the performance of each type of service is the test to be used to determine whether the major portion of the services would constitute agricultural labor. If more than half of the time spent in performing all the services is spent in performing services which would constitute agricultural labor under section 1426 (h), all income, and the deductions attributable to the income, shall be excluded. If only half, or less, of the time spent in performing all the services is spent in performing services which would constitute agricultural labor under section 1426 (h), all income, and the deductions attributable to the income, shall be included. In every case the time spent in performing the services will be computed by adding the time spent in the trade or business during the taxable year by every individual (including the individual carrying on such trade or business and the members of his family) in performing such services. The operation of this special rule is not affected by section 1426 (c), relating to the included-excluded rule for determining employment.

This rule has no application where the nonagricultural services are performed in connection with an enterprise which constitutes a trade or business separate and distinct from the trade or business conducted as an agricultural enterprise. Thus, the operation of a roadside automobile service station on farm premises constitutes a trade or business separate and distinct from the agricultural enterprise, and the gross income derived from such service station, together with the deductions attributable thereto, are included in determining net earnings from self-employment.

(3) *Dividends and interest.* All dividends on shares of stock are excluded unless they are received by an individual in the course of his trade or business as a dealer in stocks or securities.

Interest on any bond, debenture, note, or certificate, or other evidence of indebtedness, issued with interest coupons or in registered form by any corporation (including one issued by a government or political subdivision thereof), is excluded unless such interest is received in the course of a trade or business as a dealer in stocks or securities. However, interest which is exempt under section 25 (a) from the normal tax imposed by section 11, that is, interest on certain obligations of the United States and its instrumentalities, is not included in net earnings from self-employment even though received in the course of a trade or business as a dealer in stocks or securities. Only interest on bonds, debentures, notes, or certificates, or other evidence of indebtedness, issued with interest coupons or in registered form by a corporation, is excluded in the case of all persons other than dealers in stocks or securities; other interest received in the course of any trade or business (such as interest received by a pawnbroker on his loans or interest received by a merchant on his accounts or notes receivable) is not excluded.

Dividends and interest of the character excludible under the preceding paragraphs received by an individual on stocks or securities held for speculation or investment are excluded whether or not the individual is a dealer in stocks or securities.

A dealer in stocks or securities is a merchant of stocks or securities with an established place of business, regularly engaged in the business of purchasing stocks or securities and reselling them to customers; that is, he is one who as a merchant buys stocks or securities and sells them to customers with a view to the gains and profits that may be derived therefrom. Persons who buy and sell or hold stocks or securities for investment or speculation, irrespective of whether such buying or selling constitutes the carrying on of a trade or business, are not dealers in stocks or securities.

(4) *Gain or loss from disposition of property.* There is excluded any gain or loss: (i) Which is considered as gain or loss from the sale or exchange of a capital asset; (ii) from the cutting or disposal of timber, even though held primarily for sale to customers, if section 117 (j) is applicable to such gain or loss; and (iii) from the sale, exchange, involuntary conversion, or other disposition of property if such property is neither (*a*) stock in trade or other property of a kind which would properly be includible in inventory if on hand at the close of the taxable year, nor (*b*) property held primarily for sale to customers in the ordinary course of a trade or business. For the purpose of the special rule in subdivision (iii) of this subparagraph, it is immaterial whether a gain or loss is treated as a capital gain or loss or as an ordinary gain or loss for purposes other than determining net earnings from self-employment. For instance, where the character of a loss is governed by the provisions of section 117 (j), such loss is excluded in determining net earnings from self-employment even though such loss is treated under section 117 (j) as an ordinary loss. For the purposes of this special rule, the term "involuntary conversion" means a compulsory or involuntary conversion of property into other property or money as a result of its destruction in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof; and, the term "other disposition" includes the destruction or loss, in whole or in part, of property by fire, storm, shipwreck, or other casualty, or by theft, even though there is no conversion of such property into other property or money.

Example. During the taxable year 1951, A, who owns a grocery store, realized a net profit of $1,500 from the sale of groceries and a gain of $350 from the sale of a refrigerator case. During the same year, he sustained a loss of $2,000 as a result of damage by fire to the store building. In computing net income, all of these items are taken into account. In determining net earnings from self-employment, however, only the $1,500 of profit derived from the sale of groceries is included. The $350 gain and the $2,000 loss are excluded.

(5) *Net operating loss deduction.* The deduction provided by section 23 (s), relating to net operating losses sustained in years other than the taxable year, is excluded.

(6) *Community income*—(i) *In case of an individual.* If any of the income derived by an individual from a trade or business (other than a trade or business carried on by a partnership) is community income under community property laws applicable to such income, all of the gross income, and the deductions attributable to such income, shall be treated as the gross income and deductions of the husband unless the wife exercises substantially all of the management and control of such trade or business, in which case all of such gross income and deductions shall be treated as the gross income and deductions of the wife. For the purpose of this special rule, the term "management and control" means management and control in fact, not the management and control imputed to the husband under the community property laws. For example, a wife who operates a beauty parlor without any appreciable collaboration on the part of her husband will be considered as having substantially all of the management and control of such business despite the provision of any community property law vesting in the husband the right of management and control of community property; and the income and deductions attributable to the operation of such beauty parlor will be considered the income and deductions of the wife.

(ii) *In case of a partnership.* Even though a portion of a partner's distributive share of the ordinary net income or ordinary net loss from a trade or business carried on by a partnership is community income or loss under the community property laws applicable to such share, all of such distributive share shall be included in computing the net earnings from self-employment of such partner; no part of such share shall be taken into account in computing the net earnings from self-employment of the spouse of such partner. In any case in which both spouses are members of the same partnership, the distributive share of the ordinary net income or ordinary net loss of each spouse is included in computing the net earnings from self-employment of that spouse.

(7) *Puerto Rico*—(i) *Residents.* In the case of any taxable year beginning on or after January 1, 1951, a resident of Puerto Rico, whether or not a bona fide resident thereof during the entire taxable year, and whether or not an alien, a citizen of the United States, or a citizen of Puerto Rico, shall compute his net earnings from self-employment in the same manner as would a citizen of the United States residing in the United States. For the purpose of the tax on self-employment income, the gross income of such a resident of Puerto Rico also includes income from Puerto Rican sources. Thus, under this special rule, income from Puerto Rican sources will be included in determining net earnings from self-employment of a resident of Puerto Rico engaged in the active conduct of a trade or business in Puerto Rico despite the fact that, under section 116 (1), such income may not be taken into account for the purpose of the taxes under sections 11 and 12.

(ii) *Nonresidents.* A citizen of Puerto Rico who is also a citizen of the United States and who is not a resident of Puerto Rico will compute his net earnings from self-employment in the same manner and subject to the same provisions of law and regulations as other citizens of the United States.

§ 29.481–2 *Self-employment income*—(a) *In general.* Except for the exclusions in paragraphs (b) and (c) and the exception in paragraph (d) of this section, the term "self-employment income" means the net earnings from self-employment derived by an individual during any taxable year beginning after December 31, 1950.

(b) *Maximum self-employment income.* The maximum self-employed income of an individual for any taxable year (whether a period of 12 months or less) is $3,600. If an individual is paid wage as defined in section 1426 (a), the maximum is the excess of $3,600 over the amount of such wages. For example, if during the taxable year no such wages are paid and the individual has $5,000 of net earnings from self-employment, he has $3,600 of self-employment income for such taxable year. If, in addition to having $5,000 of net earnings from self-employment, such individual is paid $1,600 of such wages, he has only $2,600 of self-employment income for the taxable year. For the purpose of this limitation, the term "wages" includes remuneration paid to an employee for services covered by an agreement entered into pursuant to section 218 of the Social Security Act, which section provides for extension of the Federal old-age and survivors insurance system to State and local government employees under voluntary agreements between the States and the Federal Security Administrator.

(c) *Minimum net earnings from self-employment.* Self-employment income does not include the net earnings from self-employment of an individual when the amount of such earnings for the taxable year is less than $400. Thus, an individual having only $300 of net earnings from self-employment for the taxable year would not have any self-employment income. However, an individual having net earnings from self-employment of $400 or more for the taxable year may have less than $400 of self-employment income. This would occur in a case in which the amount of the individual's net earnings from self-employment is $400 or more for a taxable year and the individual also receives more than $3,200 but less than $3,600 of wages during that taxable year. For example, if an individual has net earnings from self-employment of $1,000 for a taxable year and also receives wages of $3,400 during that taxable year, his self-employment income for that taxable year is $600.

(d) *Nonresident aliens.* A nonresident alien individual never has self-employment income. For the purpose of the tax on self-employment income, an individual who is not a citizen of the United States but who is a resident of the Virgin Islands or of Puerto Rico is not considered to be a nonresident alien individual. While a nonresident alien individual who derives income from a trade or business carried on within the United States, Puerto Rico, or the Virgin Islands (whether by agents or employees, or by a partnership of which he is a member) may be subject to the applicable income tax provisions on such income, such nonresident alien individual will not be subject to the tax on self-employment income, since any net earnings which he may have from self-employment do not constitute self-employment income.

§ 29.481–3 *Trade or business*—(a) *In general.* It is necessary for an individual to carry on a trade or business, either as an individual or as a member of a partnership, in order for him to have net earnings from self-employment. Except for the exclusions discussed in paragraphs (b), (c), (d), (e), and (f) of this section, the term "trade or business", for the purpose of the tax on self-employment income, shall have the same meaning as when used in section 23. An individual engaged in one of the excluded activities specified in this section may also be engaged in carrying on a nonexcluded trade or business. Whether or not he is also engaged in an included trade or business will be dependent upon all of the facts and circumstances in the particular case.

(b) *Public office.* The performance of the functions of a public office does not constitute a trade or business. The term "public office" includes any elective or appointive office of the United States or any possession thereof, or of a State or its political subdivision, or of a wholly owned instrumentality of any one or more of the foregoing. For example, the President, the Vice President, a governor, a mayor, the Secretary of State, a Member of Congress, a State representative, a county commissioner, a judge, a county or city attorney, a marshal, a sheriff, a register of deeds, or a notary public performs the functions of a public office.

(c) *Employees.* The performance of service by an individual as an employee, as defined in the Federal Insurance Contributions Act, with one exception, does not constitute a trade or business. The exception is as follows: Service performed by an individual, who has attained the age of 18, in, and at the time of, the sale of newspapers or magazines to ultimate consumers, under an arrangement under which the newspapers or magazines are to be sold by him at a fixed price, his compensation being based on the retention of the excess of such price over the amount at which the newspapers or magazines are charged to him, whether or not he is guaranteed a minimum amount of compensation for such service, or is entitled to be credited with the unsold newspapers or magazines turned back, does constitute a trade or business. As to when an individual is an employee see the applicable regulations under the Federal Insurance Contributions Act.

(d) *Individuals under Railroad Retirement System.* The performance of service by an individual as an employee or employee representative as defined in section 1532, that is, an individual covered under the railroad retirement system, does not constitute a trade or business. As to when an individual is an employee or employee representative under section 1532, see the applicable regulations under the Railroad Retirement Tax Act.

(e) *Ministers or members of religious orders.* The performance of service by a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry or by a member of a religious order in the exercise of duties required by such order does not constitute a trade or business. The duties of ministers include the ministration of sacerdotal functions and the conduct of religious worship, and the control, conduct, and maintenance of religious organizations (including the religious boards, societies, and other integral agencies of such organizations), under the authority of a religious body constituting a church or church denomination.

(f) *Members of certain professions.* The performance of service by an individual in the exercise of his profession as a physician, lawyer, dentist, osteopath, veterinarian, chiropractor, naturopath, optometrist, Christian Science practitioner, architect, certified public account, accountant registered or licensed as an accountant under State or municipal law, full-time practicing public accountant, funeral director, or professional engineer does not constitute a trade or business. This exclusion applies only if the individual meets the legal requirements, if any, for practicing his profession in the place where he performs the service.

These designations are to be given their commonly accepted meaning. Thus, the term "physician" means an individual who is legally qualified to practice medicine; the term "lawyer" means an individual who is legally quali-

fied to practice law; and the term "professional engineer" means an engineer legally qualified to practice before the public in a consulting capacity.

In the case of a partnership engaged in the practice of any of the designated professions, the partnership shall not be considered as carrying on a trade or business for the purpose of the tax on self-employment income, and none of the distributive shares of the ordinary net income or the ordinary net loss of such partnership shall be included in computing net earnings from self-employment of any member of the partnership. On the other hand, where a partnership is engaged in a trade or business not within any of the designated professions, each partner must include his distributive share of the ordinary net income or the ordinary net loss of such partnership in computing his net earnings from self-employment, irrespective of whether such partner is also engaged in the practice of one or more of such professions and contributes his professional services to the partnership.

§ 29.481–4 *Employee and wages.* For the purpose of the tax on self-employment income, the term "employee" and the term "wages" shall have the same meaning as when used in the Federal Insurance Contributions Act. For an explanation of these terms, see the applicable regulations under that act.

SEC. 482. MISCELLANEOUS PROVISIONS (AS ADDED BY SECTION 208 (A), SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPROVED AUGUST 28, 1950).

(a) *Returns.* Every individual (other than a nonresident alien individual) having net earnings from self-employment of $400 or more for the taxable year shall make a return containing such information for the purpose of carrying out the provisions of this subchapter as the Commissioner, with the approval of the Secretary, may by regulations prescribe. Such return shall be considered a return required under section 51 (a). In the case of a husband and wife filing a joint return under section 51 (b), the tax imposed by this subchapter shall not be computed on the aggregate income but shall be the sum of the taxes computed under this subchapter on the separate self-employment income of each spouse.

(b) *Title of subchapter.* This subchapter may be cited as the "Self-Employment Contributions Act".

(c) *Effective date in case of Puerto Rico.* For effective date in case of Puerto Rico, see section 3810.

(d) *Collection of taxes in Virgin Islands and Puerto Rico.* For provisions relating to collection of taxes in Virgin Islands and Puerto Rico, see section 3811.

§ 29.482–1 *Returns*—(a) *In general.* For each taxable year beginning after December 31, 1950, every individual, other than a nonresident alien, having net earnings from self-employment of $400 or more for the taxable year shall make a return on Form 1040 in accordance with the instructions thereon, or issued therewith, and the provisions of the regulations applicable thereto. Such return shall be considered a return required under section 51 (a), and the provisions applicable to returns under section 51 (a) shall be applicable to this return. This return will be required if there is self-employment income even though the individual may not be required to make a return for the purpose of the taxes imposed by sections 11 and 12.

(b) *Joint returns.* In the case of a husband and wife filing a joint return under section 51 (b), the tax on self-employment income is computed on the separate self-employment income of each spouse, and not on the aggregate of the two amounts. The requirement of section 51 (b) that in the case of a joint return the tax is computed on the aggregate income of the spouses is not applicable with respect to the tax on self-employment income. Where the husband and wife each has net earnings from self-employment of $400 or more, it will be necessary for each to complete a separate schedule of Form 1040 with respect to such net earnings, despite the fact that a joint return is filed. If the net earnings from self-employment of either the husband or the wife are less than $400, such net earnings are not subject to the tax on self-employment income, even though they must be shown on the joint return for the purpose of the taxes imposed by sections 11 and 12.

Except as otherwise expressly provided, section 51 (b) is applicable to the return of the tax on self-employment income; therefore, the liability with respect to such tax in the case of a joint return is joint and several.

(c) *Social security account numbers.* Every individual making a return of net earnings from self-employment is required to show thereon his social security account number, or, if he has no such account number, to make application therefor on Form SS–5 prior to the filing of such return. However, the failure to apply for a social security account number will not excuse the individual from the requirement that he file such return on or before the due date thereof. Form SS–5 may be obtained from any field office of the Social Security Administration or from any collector. The application on Form SS–5 shall be filed with the field office of the Social Security Administration nearest the legal residence or principal place of business of such individual, or if he has no legal residence or principal place of business within the United States, Puerto Rico, or the Virgin Islands, with the office of the Social Security Administration at Baltimore, Maryland. An individual who has previously secured a social security account number as an employee shall use that account number on his return of net earnings from self-employment.

PAR. 21. Section 29.3801 (a) (1)–1 is amended by adding at the end thereof the following new sentence: "The provisions of section 3801 and of the regulations promulgated under such section shall not apply to any tax imposed by chapter 9, relating to employment taxes."

PAR. 22. There is inserted immediately after § 29.3808–4, as added by Treasury Decision 5508, approved April 15, 1946, the following:

SEC. 3810. EFFECTIVE DATE IN CASE OF PUERTO RICO (AS ADDED BY SECTION 208 (B), SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPROVED AUGUST 28, 1950).

If the Governor of Puerto Rico certifies to the President of the United States that the legislature of Puerto Rico has, by concurrent resolution, resolved that it desires the extension to Puerto Rico of the provisions of title II of the Social Security Act, the effective date referred to in sections 1426 (e), 481 (a) (7), and 481 (b) shall be January 1 of the first calendar year which begins more than ninety days after the date on which the President receives such certification.

§ 29.3810–1 *Effective date of self-employment tax in Puerto Rico.* Since the Governor of Puerto Rico has certified to the President of the United States that the Legislature of Puerto Rico has, by concurrent resolution, resolved that it desires the extension to Puerto Rico of the provisions of Title II of the Social Security Act, the certificate having been received by the President on September 28, 1950, the effective date specified in section 3810 is January 1, 1951. (See § 29.481–1 (c) (7).)

SEC. 3811. COLLECTION OF TAXES IN PUERTO RICO AND VIRGIN ISLANDS (AS ADDED BY SECTION 208 (B), SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPROVED AUGUST 28, 1950, AND AMENDED BY SECTION 121 (I), REVENUE ACT OF 1950, APPROVED SEPTEMBER 23, 1950).

(a) *Puerto Rico.* Notwithstanding any other provision of law respecting taxation in Puerto Rico, all taxes imposed by chapter 1, and by subchapters A and D of chapter 9, shall be collected under the direction of the Secretary and shall be paid into the Treasury of the United States as internal revenue collections. All provisions of the laws of the United States applicable to the administration, collection, and enforcement of any tax imposed upon the incomes of individuals, estates, and trusts by chapter 1 (including the provisions relating to The Tax Court of the United States), and of any tax imposed by subchapter A or by subchapter D of chapter 9, shall, in respect to such tax, extend to and be applicable in Puerto Rico in the same manner and to the same extent as if Puerto Rico were a State, and as if the term "United States" when used in a geographical sense included Puerto Rico.

(b) *Virgin Islands.* Notwithstanding any other provision of law respecting taxation in the Virgin Islands, all taxes imposed by subchapter E of chapter 1, and by subchapter A of chapter 9, shall be collected under the direction of the Secretary and shall be paid into the Treasury of the United States as internal revenue collections. All provisions of the laws of the United States applicable to the administration, collection, and enforcement of the tax imposed by subchapter E of chapter 1 (including the provisions relating to The Tax Court of the United States), and of any tax imposed by subchapter A of chapter 9, shall, in respect to such tax, extend to and be applicable in the Virgin Islands in the same manner and to the same extent as if the Virgin Islands were a State, and as if the term "United State" when used in a geographical sense included the Virgin Islands.

(c) *Definition.* As used in this section, the term "tax" includes any penalty with respect to the tax, any addition to the tax, and any additional amount with respect to the tax, provided for by any law of the United States.

SEC. 3812. MITIGATION OF EFFECT OF STATUTE OF LIMITATIONS AND OTHER PROVISIONS IN CASE OF RELATED TAXES UNDER DIFFERENT CHAPTERS (AS ADDED BY SECTION 208 (B), SOCIAL SECURITY ACT AMENDMENTS OF 1950, APPROVED AUGUST 28, 1950).

(a) *Self-employment tax and tax on wages.* In the case of the tax imposed by subchapter E of chapter 1 (relating to tax on self-employment income) and the tax imposed by section 1400 of subchapter A of chapter 9 (relating to tax on employees under the Federal Insurance Contributions Act)—

(1) (i) If an amount is erroneously treated as self-employment income, or

(ii) If an amount is erroneously treated as wages, and

(2) If the correction of the error would require an assessment of one such tax and the refund or credit of the other tax, and

(3) If at any time the correction of the error is authorized as to one such tax but is prevented as to the other tax by any law or rule of law (other than section 3761, relating to compromises),

then, if the correction authorized is made, the amount of the assessment, or the amount of the credit or refund, as the case may be, authorized as to the one tax shall be reduced by the amount of the credit or refund, or the amount of the assessment, as the case may be, which would be required with respect to such other tax for the correction of the error if such credit or refund, or such assessment, of such other tax were not prevented by any law or rule of law (other than section 3761, relating to compromises):

(b) *Definitions.* For the purposes of subsection (a) of this section, the terms "self-employment income" and "wages" shall have the same meaning as when used in section 481 (b).

§ 29.3812–1 *Application of section.* Section 3812 may be applied in the correction of a certain type of error involving both the tax on self-employment income and the employee tax under section 1400 if the correction of the error as to one tax is, on the date the correction is authorized, prevented in whole or in part by the operation of any law or rule of law other than section 3761, relating to compromises. Examples of such law are sections 275, 311 (b) and (c), 322 (b) and (d), 1117 (e), 1635, 1636, 3746, and 3772; sections 272 (f) and 322 (c); section 3760; and sections 3770 (a) (2), 3774, and 3775.

If the liability for either tax with respect to which the error was made has been compromised under section 3761, the provisions of section 3812 limiting the correction with respect to the other tax do not apply.

Section 3812 is not applicable if, on the date of the authorization, correction of the effect of the error is permissible as to both taxes without recourse to such section.

If, because an amount of wages (as defined in section 1426 (a)) is erroneously treated as self-employment income (as defined in section 481 (b)), or an amount of self-employment income is erroneously treated as wages, it is necessary in correcting the error to assess the correct tax and give a credit or refund for the amount of the tax erroneously paid, and either, but not both, of such adjustments is prevented by any law or rule of law (other than section 3761), the amount of the assessment or of the credit or refund authorized shall reflect the adjustment which would be made in respect of the other tax (either the tax on self-employment income under section 480 or the employee tax under section 1400) but for the operation of such law or rule of law. For example, assume that during 1951 A paid $10 as tax on an amount erroneously treated as "wages", when such amount was actually self-employment income, and that credit or refund of the $10 is not barred. A should have paid a self-employment tax of $15 on the amount. If the assessment of the correct tax, that is, $15, is barred by the statute of limitations, no credit or refund of the $10 shall be made without offsetting against such $10 the $15, assessment of which is barred. Thus, no credit or refund in respect of the $10 can be made.

As another example, assume that during 1951 a taxpayer reports wages of $3,600 and net earnings from self-employment of $900. By reason of the limitations of section 481 (b) he shows no self-employment income. Assume further that by reason of a final decision by The Tax Court of the United States, further adjustments to his income tax liability are barred. The question of the amount of his wages, as defined in section 1426, was not in issue in the Tax Court litigation, but it is subsequently determined (within the period of limitations applicable under the Federal Insurance Contributions Act) that $700 of the $3,600 reported as wages were not for employment as defined in section 1426 (b), and he is entitled to the allowance of a refund of the $10.50 tax paid on such remuneration under section 1400. The reduction of his wages from $3,600 to $2,900 would result in the determination of $700 self-employment income, the tax on which is $15.75 for the year. The overpayment of $10.50 would be offset under section 3812 by the barred deficiency of $15.75, thus eliminating the refund otherwise allowable. If the facts were changed so that the taxpayer erroneously paid tax on self-employment income of $700, having been taxed on only $2,900 as wages, and within the period of limitations applicable under the Federal Insurance Contributions Act, it is determined that his wages were $3,600, the tax of $10.50 under section 1400, otherwise collectible, would be eliminated by offsetting under section 3812 the barred overpayment of $15.75. The balance of the barred overpayment, $5.25, cannot be credited or refunded.

Another illustration of the operation of this section is the case of a taxpayer who is erroneously taxed on $2,500 as wages, the tax on which is $37.50, and who reports no self-employment income. After the statute of limitations has run on the refund of the tax under the Federal Insurance Contributions Act, it is determined that the amount treated as wages should have been reported as net earnings from self-employment. The taxpayer's self - employment income would then be $2,500 and the tax thereon would be $56.25. Assume that the period of limitations under chapter 1 has not expired, and that a notice of deficiency may properly be issued. Under section 3812, the amount of the deficiency of $56.25 must be reduced by the barred overpayment of $37.50.

§ 29.3812–2 *Law applicable in determination of error.* The question of whether there was an erroneous treatment of self-employment income or of wages is determined under the provisions of law and regulations applicable with respect to the year or other taxable period as to which the error was made. The fact that the error was in pursuance of an interpretation, either judicial or administrative, accorded such provisions of law and regulations at the time of such action is not necessarily determinative of this question. For example, if a later judicial decision authoritatively alters such interpretation so that such action was contrary to such provisions of the law and regulations as later interpreted, the error is within the meaning of section 3812.

[7 CFR Part 52]

FROZEN FIELD PEAS AND FROZEN BLACK-EYE PEAS

U. S. STANDARDS FOR GRADES[1]

Notice is hereby given that the United States Department of Agriculture is considering the issuance, as herein proposed, of United States Standards for Grades of Frozen Field Peas and Frozen Black-Eye Peas, pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1951 (Pub. Law 759, 81st Cong., approved Sept. 6, 1950). These standards, if made effective, will be the first issue by the Department of grade standards for these products.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed standards should file same, in duplicate, with the Chief, Processed Products Standardization and Inspection Division, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 30 days after publication hereof in the FEDERAL REGISTER.

The proposed standards are as follows:

§ 52.541 *Frozen field peas and frozen black-eye peas*—(a) *Style.* (1) "Frozen field peas" is the product prepared from

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

the immature seed of the field pea plant (Vigna sinensis) by shelling, sorting, washing, and blanching, and is then frozen and maintained at temperatures necessary for the preservation of the product. "Frozen black-eye peas" is the product prepared from the immature seed of the black-eye pea plant (Vigna sinensis) by shelling, sorting, washing, and blanching, and is then frozen and maintained at temperatures necessary for the preservation of the product.

(2) "Frozen peas" means frozen field peas or frozen black-eye peas.

(3) "Unit" means an individual field pea or black-eye pea in frozen peas.

(b) *Grades of frozen peas.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen peas that possess similar varietal characteristics; that possess a good flavor and odor; that possess a good character; that possess a good typical color; that are practically free from defects; and that score not less than 85 points when scored in accordance with the scoring system outlined in this section.

(2) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen peas that possess similar varietal characteristics; that possess a reasonably good flavor and odor; that possess a reasonably good character; that possess a reasonably good typical color; that are reasonably free from defects; and that score not less than 70 points when scored in accordance with the scoring system outlined in this section.

(3) "Substandard" is the quality of frozen peas that fail to meet the requirements of U. S. Grade B or U. S. Extra Standard.

(c) *Ascertaining the grade.* (1) The grade of frozen peas may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

Factors:	Points
(i) Color	20
(ii) Absence of defects	40
(iii) Character	40
Total score	100

(3) The score for the factors of color and absence of defects in frozen peas is determined after thawing so that the product is substantially free from ice crystals and can be handled as individual units. A representative sample of the product is cooked for examination with respect to character and for flavor and odor.

(4) "Good flavor and odor" means that the product after cooking has a good characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(5) "Reasonably good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(d) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "15 to 20 points" means 15, 16, 17, 18, 19, or 20 points).

(1) *Color.* (i) Frozen peas that possess a good typical color may be given a score of 15 to 20 points. "Good typical color" means that the frozen peas possess a color that is typical of reasonably young field peas or black-eye peas of similar varietal characteristics, that possess not less than 40 percent, by count, of peas which show at least a tinge of green color, and that there may be present not more than 5 percent, by weight, of field peas or black-eye peas which are of markedly different varietal colors.

(ii) Frozen peas that possess a reasonably good typical color may be given a score of 10 to 14 points. Frozen peas that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good typical color" means that the frozen peas possess a color that is typical of fairly young field peas or black-eye peas of similar varietal characteristics and that there may be present not more than 5 percent, by weight, of field peas or black-eye peas which are of markedly different varietal colors.

(iii) Frozen peas that are definitely off color for any reason or that fail to meet the requirements of subdivision (ii) of this subparagraph may be given a score of 0 to 9 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

(2) *Absence of defects.* (i) The factor of absence of defects refers to the degree of freedom from extraneous vegetable matter, from loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, broken units, and units blemished by pathological injury, insect injury, or other means.

(a) "Extraneous vegetable matter" means hulls or pieces of hulls, unshelled pods or pieces of unshelled pods, leaves, stems, and other similar vegetable matter.

(b) "Blemished" means discolored or spotted by pathological injury, insect injury, or other means to such an extent that the appearance or eating quality of the unit is materially affected.

(ii) Frozen peas that are practically free from defects may be given a score of 35 to 40 points. "Practically free from defects" means that for each 16 ounces of units, or per package if less than 16 ounces, there may be present not more than 2 pieces of extraneous vegetable matter and the combined weight of all loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, and broken units does not exceed 2 percent, and the weight of blemished units does not exceed 1 percent of the weight of the frozen peas.

(iii) If the frozen peas are reasonably free from defects, a score of 30 to 34 points may be given. Frozen peas that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that for each 16 ounces of units, or per package if less than 16 ounces, there may be present not more than 4 pieces of extraneous vegetable matter and the combined weight of all loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, and broken units does not exceed 3 percent of the weight of the frozen peas.

(iv) Frozen peas that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 29 points and shall not be graded above. Substandard regardless of the total score for the product (this is a limiting rule).

(3) *Character.* (i) This factor refers to the maturity of the field peas or black-eye peas and the tenderness of the units.

(ii) Frozen peas that possess a good character may be given a score of 35 to 40 points. "Good character" means that the units are tender and in a reasonably young stage of maturity.

(iii) If the field peas or black-eye peas possess a reasonably good character, a score of 30 to 34 points may be given. Frozen peas that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the units are reasonably tender and in a fairly young stage of maturity.

(iv) Frozen peas that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 27 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

(e) *Tolerance for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of frozen peas, the grade for such lot will be determined by averaging the total scores of all containers if:

(i) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total score, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(ii) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(iii) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(f) *Score sheet for frozen field peas and frozen black-eye peas.*

[Docket No. AO-230]

HANDLING OF MILK IN WESTERN MICHIGAN MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order regulating the handling of milk in the Western Michigan marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United Sates Department of Agriculture, Washington 25, D. C., not later than the close of business the 20th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing, on the record of which the proposed marketing agreement and the proposed order were formulated was called by the Production and Marketing Administration, United States Department of Agriculture, following receipt of a petition filed by the Michigan Milk Producers Association on behalf of the Grand Rapids Milk Producers Association and the Muskegon Milk Producers Association and was held at Coopersville, Michigan, December 4–6, 1950, and at Grand Rapids, Michigan, December 7–12, 1950, pursuant to notice thereof which was issued on November 15, 1950 (15 F. R. 7886).

The material issues of record related to:

(a) Whether the handling of milk in the Western Michigan marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce;

(b) Whether the issuance of a marketing order for the Western Michigan marketing area will tend to effectuate the the declared policy of the act;

(c) The provisions to be included in an order if one is issued. The evidence on this issue involved:

(1) The extent of the marketing area;

(2) The definition of "handler", "pool plant", "producer", "other source milk", and other terms;

(3) The classification of milk and milk products;

(4) The determination and level of class prices;

(5) The method of distributing payments to producers;

(6) Administrative provisions.

Findings and conclusions. Upon the basis of evidence adduced at the hearing and on the record thereof, it is hereby found and concluded that:

(a) The handling of milk produced for the Western Michigan marketing area is in the current of interstate commerce and directly burdens, obstructs, or affects interstate commerce in milk and its products. Substantial interstate movement occurs with respect to milk and the milk products produced therefrom in the supply area for the Western Michigan fluid milk market. The milk supplies for these cities and towns in Western Michigan are procured in an area in which milk distributors operating in larger interstate markets, particularly Detroit, Michigan, and Chicago, Illinois, draw fluid milk and cream for those cities. Producers supplying milk to distributors in this Western Michigan area have their farms intermingled with those of dairy farmers who ship to milk plants which regularly supply Detroit and Chicago.

Also intermingled with the producers who supply this Western Michigan fluid milk market are a large number of producers who are shipping milk to milk plants at which evaporated milk, butter, cheese, sweet cream, and dried milk and skim milk products are manufactured for sale throughout the United States. In fact it is common practice during the season of flush milk production for farmers to deliver directly to manufacturing plants a part or all of their milk approved for fluid consumption.

The flow of milk into the Western Michigan fluid market is affected by the relationship of that market's prices to the prices paid by competing fluid markets and by the manufacturing milk plants. Price relationships which interrupt or interfere with the distribution of milk in this region to the fluid and manufacturing markets in accordance with the relative value of milk for such outlets tend to burden, obstruct, and affect interstate commerce in milk and its products.

The excess milk over and above fluid requirements for the Western Michigan market is normally transferred to plants which manufacture butter, evaporated milk, and nonfat dry milk solids for sale in interstate markets. More than 20 million pounds of milk produced for the Western Michigan fluid market was transferred in 1949 to milk manufacturing plants by the Grand Rapids Milk Producers Association and the Muskegon Milk Producers Association. These two producers associations handled a substantial part of the milk in excess of fluid requirements for the Western Michigan market. The transfers by these associations to milk manufacturing plants for the first nine months of 1950 amounted to 18½ million pounds of milk.

Prices paid for milk by the fluid market, if out of line with prices paid by manufacturing plants, tend to increase or reduce this quantity of milk which is produced under the sanitary requirements of the fluid market but must be utilized in manufactured products. Therefore, the prices paid producers supplying the fluid market must be maintained in reasonable alignment with prices paid to manufacturing producers. It is also necessary to prevent unfair competitive pricing of the fluid milk market's surplus which is transferred to manufacturing plants at a price lower than the price offered by manufacturing plants to their regular producers.

Although the direct sale of milk in interestate commerce for fluid consumption by milk distributors in the Western Michigan market is limited at the present time to supplying the usual interstate passenger carriers, the location of the area is such that milk could be transported readily into Ohio and Indiana if prices in the Western Michigan market drop to unreasonably low levels. On the other hand, producers in Ohio and Indiana are in a position to make their milk available for sale in the Western Michigan market if prices in that area are attractive in comparison to the opportunities for sale in Ohio and Indiana.

(b) Marketing conditions in the Western Michigan area indicate that the issuance of a marketing order, such as that set forth herein, will tend to effectuate the declared policy of the Act with respect to milk produced for the Western Michigan fluid milk market.

Stability of marketing conditions and reasonable certainty of an adequate supply of pure and wholesome milk can be achieved in the Western Michigan marketing area only when all milk handlers in the area have reasonably equal costs of milk according to use and only when farmers supplying the market receive substantially the same prices per hundredweight for milk of equal quality. A condition of unequal costs among handlers causes them to attempt to obtain such equality either by reducing prices to producers which will tend to set up successive price reductions by competitors or it will cause some handlers to reduce the quantity of their purchases of milk in order to obtain proportions of higher valued uses of milk as

nearly equal to competitors' utilization as possible. The latter reaction, however, may result in intermittent shortages of supply for the market and is, for that reason, unsatisfactory. The former method is oppressive to producers and over a longer period may jeopardize an adequate supply of milk. If producers receive widely varying prices for their milk they tend to shift around among milk dealers and to shift in and out of the market. These shifts engender unstable marketing conditions and militate against a dependable supply of pure and wholesome milk.

The record shows that conditions exist in the Western Michigan area which have resulted in the payment of widely varying prices to producers for milk of the same quality, and varying costs to milk distributors for milk for fluid consumption. These conditions must be remedied in order to establish and maintain such orderly marketing conditions as will establish prices to producers for milk delivered to the Western Michigan market that reflect the price of feeds, the available supplies of feeds, and other economic conditions which affect market supply and demand for milk and milk products in the marketing area and will insure a sufficient quantity of pure and wholesome milk and be in the public interest.

The unsettled conditions which are disturbing the Western Michigan market result from the opportunity on the part of milk distributors to purchase milk from producers for fluid milk and cream sales within the area at widely varying prices. The price plans under which milk is presently purchased by distributors in the Western Michigan market include:

(1) A plan of payments according to class prices for determining the distributor's cost of milk, accompanied by a base and excess method of distributing payments to producers;

(2) A plan of one price for all milk which the distributor accepts for his fluid business with the understanding that producers will market their own excess milk through their own producer's association, combined with or without the base and excess plan of distributing returns to individual producers; and

(3) Various plans which price the base and excess milk delivered by each producer without regard to the utilization of the milk by the distributor.

The variety of buying plans employed in the market have resulted in purchasing advantages for certain distributors. To the extent that any distributor purchasing milk from producers without regard to its utilization uses more milk for fluid sales than the average used by other distributors, particularly those buying through cooperative associations which blend returns to their producers, that distributor can purchase milk for his fluid sales at about the average of prices paid by other distributors for their combined fluid and manufacturing milk. This results in a lower cost to this distributor of milk for fluid sales. Milk distributors in the area of course are aware of this opportunity. Some have laid off producers who were selling to them on the basis of a fluid price for milk used as fluid, and then have negotiated with other producers for an equivalent or larger quantity of milk at lower prices. The producers who are left without a market, particularly those delivering to the producers associations which guarantee a market for their members, have been forced to market their milk through manufacturing milk outlets thus depressing the average blend paid to members of the producers associations. Since these producers associations represent a large segment of the supply for the entire Western Michigan market, the influence of such lower prices tends to depress the prices received by all other producers in the area.

The plans under which distributors purchase milk from producers at prices based upon utilization are in many cases merely a vehicle for price bargaining since there is no obligation on the part of distributors to provide producers with an accounting for the use made of the milk purchased from them. In many instances producers do not know whether the distributor who paid them for milk at an excess price was utilizing that milk for bottled milk sales. It is evident, however, that payment for milk used for bottled milk sales at the excess or manufacturing milk price is not uncommon. It is possible also for a distributor to buy milk at the excess price and transfer it to another distributor who may use it for bottled milk sales. The distributor who received the transfer of excess milk would then reduce his purchases from producers by an equivalent amount.

(c) The provisions to be included in an order if one is issued should be those contained in the attached recommended order.

(1) *Marketing area.* The marketing area should be defined to include all of the territory within the outer boundaries of the cities of Grand Rapids, Muskegon and Grand Haven and the densely populated areas surrounding these cities. This may be accomplished by defining the marketing area to include all of the territory within the boundaries of 17 townships in Kent County, 12 townships in Muskegon County, 6 townships in Oceana County and 10 townships in Ottawa County.

This area covers one natural milk market in which the distributors whose plants are located in one part of the area deliver fluid milk and cream to consumers in competition with distributors whose plants are located in other parts of the area. The producers supplying the milk distributors in this marketing area are intermingled to such an extent that the supply of milk for any part of this market would be seriously affected by any disparity in prices paid to producers supplying other parts of the market.

The requirements imposed by the health authorities of the principal urban areas within the Western Michigan milk market, Grand Rapids, Muskegon, and Grand Haven are very similar. The health inspection required of producers supplying distributors whose plants are located in the smaller towns and villages are patterned after the Michigan Model Milk Ordinance which is substantially the same as the ordinances now in effect in the three principal cities.

A group of producers requested that the marketing area be limited to Kent County only. The milk produced by these producers would be subject to a marketing order even if it applied to Kent County areas only. However, representatives of producers supplying distributors doing business outside of Kent County requested the inclusion of the larger area so that their milk would be made subject to any order which might be issued. The producers who requested that the marketing area be confined to Kent County claimed that higher sanitation standards prevail with respect to milk produced for consumption in Grand Rapids, the principal urban area in Kent County, than prevailed with respect to milk for other parts of the marketing area. The record fails to support this contention.

No representatives of distributors who would be affected by the proposed regulation offered testimony in opposition to the boundaries of the marketing area as herein provided.

One group of producers testified to the effect that certain parts of the area as it was set forth in the hearing notice should be excluded. These areas represented largely rural territories and the Holland, Michigan market. Distributors doing business in the West Michigan market apparently do not compete to any large extent with the distributors who operate in the Holland area. Producers supplying milk to the Holland area did not request that Holland be included in the marketing area. There appears to be no necessity for including the Holland area or rural areas in the marketing area in order to maintain orderly marketing in the Western Michigan milk market.

(2) *Definition of terms.* A handler should be defined as any person who operates a plant from which fluid milk products are disposed of for fluid consumption directly to consumers in the marketing area, or a plant which supplies an appreciable amount of milk to such a plant. Such a definition is designed to include all persons whom it is necessary to regulate under the order to accomplish the purposes of the act. The definition should include also any cooperative association with respect to that milk for which the cooperative assumes the responsibility for obligations under the order, as in the case of surplus milk diverted for the account of the cooperative.

The term "producer" should be defined in order to identify those dairy farmers who are the producers of the regular supply of fluid milk and cream for the market, and to whom the minimum prices specified in the order should be paid. Determination of producer status should be made on the basis of delivery of milk from the producer's farm to a pool plant. The proposed method of determining which plants are pool plants is discussed later in this decision.

The producer definition should allow a handler occasionally to divert the milk of some producers to nonpool plants if the handler reports the milk as producer receipts at his pool plant. This provision will facilitate interplant movements of milk for the purpose of adjusting to short-time variations in supply and requirements without depriving the farmers producing the milk of their status as producers.

Dairy farmers who distribute their own production but do not receive any milk from other dairy farmers would not be included in the definition of producer.

The determination of pool plant status is the essential part of the determination of which dairy farmers are to be included in the market-wide pool. Therefore, specific requirements for pool plants are needed to define the supply which is generally regarded as a part of the fluid market.

Since the supply area for the Western Michigan market overlaps the supply areas of other fluid markets and the manufacturing milk production area, the pool plant definition should include a requirement that a substantial portion of the milk received at the plant be disposed of as fluid products in the marketing area. This requirement is intended to provide for including in the pool all of the plants which have significant fluid milk and cream sales in the marketing area. Fluid milk plants which primarily serve markets outside the marketing area but make a few sales inside the area, and plants which are primarily manufacturing milk plants would be excluded. Such plants cannot be regarded as a part of the Western Michigan fluid milk and cream market.

The order proponents suggested a requirement that 10 percent of the receipts from dairy farmers be disposed of in the marketing area directly to consumers. This figure appears to be reasonable and no opposition to it was expressed at the hearing. Therefore, the 10 percent requirement standard should be adopted.

The producer proponents of the order proposed also that a plant operated by a cooperative association be a pool plant without meeting the delivery requirements to pool plants distributing milk in the marketing areas in certain months provided the cooperative association plant had transferred a substantial quantity of milk to the fluid market in previous months. This proposal was designed to maintain the producer status of those dairy farmers whose deliveries are made to a plant auxiliary to the fluid market but which does not distribute milk directly to consumers. The only plant of this type mentioned in the record is operated by a cooperative association. However, the auxiliary type of plant need not be confined to cooperative operation. Therefore, it appears that some provision should be made for the inclusion of any plant which regularly supplies milk for fluid sales to any handler.

Participation in the fluid market can be demonstrated by the shipment of a certain percentage of the plant's receipts of milk to those plants which distribute milk and cream directly to consumers in the marketing area. During some months of the year, that is when the market is already amply supplied, it would not be practical to require the shipment of milk to the marketing area in order to maintain pool plant status. Therefore, such plants should be permitted to maintain pool plant status if they have previously shipped at least 10 percent of their milk receipts to the market as milk in eight of the 12 preceding months. For such auxiliary plants, it should also be required that the producers delivering milk to the plant hold permits issued by one of the health authorities of the principal cities in the marketing area. If such auxiliary plants are required to serve the Western Michigan fluid milk market, it is only logical to assume that they would be needed to serve the larger centers of population. No such plants are contemplated, according to the record, to serve the smaller communities in the marketing area.

Definitions of "producer milk" and "other source milk" are included to distinguish between the regular milk supply for the fluid market which is priced under the order and occasional receipts from other sources. Other source milk may be surplus from another fluid milk market or milk from a plant which is primarily a manufacturing plant. If such other source milk is disposed of as Class I milk in the marketing area, a payment on that quantity at the difference between the manufacturing milk price and the Class I price should be required in order to curb any incentive for handlers to drop regular producer supplies of milk to purchase surplus or manufacturing milk at a price advantage.

The provisions of a base and excess plan of payment requires a definition of "base", "base milk", and "excess milk." Other standard terms are defined for the purpose of facilitating the drafting of subsequent provisions of the order.

(3) *Classification of milk.* Milk should be classified in two classes reflecting the principal differences in the value and in the quality of milk required for different uses. Class I should include all skim and butterfat disposed of for consumption as milk, skim milk or cream for fluid consumption, flavored milk, plant loss of producer milk in excess of 2 percent, and skim milk and butterfat not accounted for in Class II utilization. Class II should include skim milk and butterfat used to produce ice cream or ice cream mix, dried whole milk, nonfat dry milk solids, whole or skimmed, evaporated or condensed milk, sweetened or unsweetened, in bulk or in hermetically sealed cans, butter, cheese (including cottage cheese) or contained in buttermilk, livestock feed, or in milk dumped or in plant loss of producer milk not in excess of 2 percent and all plant loss of other source milk.

It was proposed that skim milk and butterfat in milk, flavored milk, skim milk and buttermilk for fluid consumption and milk not accounted for in other classes be included in Class I. That disposed of as sweet or sour cream for fluid consumption or used in cottage cheese was proposed as Class II and used in manufactured products except butter and nonfat dry milk solids, as Class III. Skim milk and butterfat used in butter, nonfat dry milk solids and livestock feed and in dumped milk and plant loss, limited to 2 percent in the case of producer milk, would make up Class IV.

Representatives of health departments in the major cities of the marketing area testified that milk sold for fluid consumption and that used to produce skim milk, flavored milk, or cream sold for fluid consumption must be produced and handled in compliance with the same sanitation standards. These standards are substantially uniform in all of the cities. The proposal for a separate classification for cream was based on the possibility that some handlers who operate only in portions of the marketing area not subject to city health regulations may sell cream not made from inspected milk. The volume of such sales would be relatively small and would not justify a lower price classification for all cream sold by handlers. The record does not indicate that there are any such sales.

It is concluded that milk disposed of for fluid consumption, or as any product which must be made from milk which meets all sanitary requirements of milk for fluid consumption, should be in Class I. This would include milk used for cream, flavored milk, and skim milk for fluid consumption.

It was proposed to classify milk for manufacturing uses into two classes with milk used to make butter or nonfat dry milk solids priced lower than that used in other products. The reason given for this classification was that it may be necessary to dispose of some milk as butter and skim powder at a lower return than that realized for milk for other manufacturing uses. Testimony indicated, however, that milk not needed for milk or cream for fluid consumption is normally diverted to plants for manufacture into products other than butter or powder.

Almost all of the more than 19.5 million pounds of milk moved to manufacturing plants by one cooperative in the first 10 months of 1950 went to plants manufacturing evaporated milk. No data were submitted to show how much inspected milk is used in the manufacture of butter and powder. There was no indication that an outlet for surplus milk in butter and powder manufacture is available to many handlers. In any event the amount so used appears to be too small to justify a separate classification at a lower price. Most of the excess milk in the market may be disposed of in the manufacture of products proposed to be included in Class II. It is concluded therefore that all skim milk and butterfat used in manufactured dairy products should be classified as Class II. This class also should include skim milk and butterfat in animal feed, dumped milk and plant loss, limited to 2 percent of receipts in the case of producer milk.

Since some handlers combine operations which utilize other source milk in the same plants as those which handle producer milk for the fluid market, it is necessary to provide a method for allocating such other source milk to the classes of utilization. Since producer milk is the milk which is regularly available for fluid consumption in the marketing area, the method of allocation provides that producer milk shall be allocated to Class I to the extent that such use is available.

Producers proposed that plant loss up to 2 percent of producer milk received be

allowed in the lowest price class, any in excess of this amount to be in Class I. With plant operation of average efficiency, losses normally should not exceed 2 percent. Unlimited allocation of plant loss to Class II would place a premium on unaccounted-for milk and encourage incomplete records of Class I utilization. Plant losses of producer milk in excess of 2 percent should, therefore, be included in Class I. It was proposed that the 2 percent allowance be computed on milk deliveries received directly from dairy farms. Such a provision, as well as the standard provisions for prorating loss between producer and other source milk, and allowing for loss on diverted producer milk at the plant where actually received, should be included in the order.

Provision is made for classification of milk transferred between handlers and between handlers and persons not handlers. In the case of transfers between handlers, transfer is permitted in any agreed class in which the transferee plant has utilization in an amount equal to or greater than the amount so transferred, after allocating any other source milk, since under a market-wide pool the classification of milk transferred between handlers may represent any agreed producer milk use without affecting the payment to producers. Both handlers are required to report the transferred milk in the agreed classification, otherwise milk and cream transfers are classified as Class I.

In the case of transfers from a handler plant to a plant not operated by a handler, a requirement that producer milk be allocated to the higher value uses in the transferee plant might make it difficult for handlers to dispose of surplus milk. It is concluded that transfers from a handler plant to a plant not operated by a handler in the form of milk, skim milk or cream should be in Class I, but that such transfers may be classified as Class II, if so shown on the transferor's report, such use is certified by the transferee not later than the last day of the following month, the transferee or another plant to which the product may be moved by the transferee has an equivalent use in Class II and keeps books and records which make it possible for the market administrator to verify such use. An exception is provided in the case of transfers to a plant disposing of Class I milk, in which case transfers are allocated to any excess Class I disposition over milk receipts at the plant from dairy farmers.

(4) *Class prices.* Since the Western Michigan fluid milk market supply is obtained from a region in which large quantities of milk are delivered to plants which manufacture various milk products, it is necessary that the price for the fluid market be closely related to the level of prices being paid at competing manufacturing plants. There are some differences from time to time between the prices paid at plants manufacturing different products. Therefore, the Class I price should be related to that particular manufacturing milk price which represents the best outlet for manufacturing milk at any particular time. The method of accomplishing this has been to relate the Class I price to a series of basic formula prices which represent different kinds of manufacturing milk prices. A differential should be added to the highest of the prices determined by 4 separate alternate price formulas to determine the Class I price for each month.

(i) *Basic formula prices.* Producers proposed 4 alternate basic formulas for use in determining the Class I price. These formulas are based on market prices of butter and powder, butter and cheese, prices paid dairy farmers by 18 midwest dairy manufacturing plants, and prices paid by 3 Michigan dairy manufacturing plants. Three of the four price formulas included in the producer proposal are widely used for determining Class I prices in milk markets under Federal regulation. The use in this order of these price formulas with appropriate differentials added would correlate the Western Michigan Class I price with Class I prices in other markets such a Toledo, Detroit and Chicago. No objection was made to the use of the average of prices paid by certain Michigan manufacturing plants as an alternate basic formula. The plants proposed handle a large amount of the excess milk of the Western Michigan area. It is concluded that the 4 alternate basic formulas proposed are appropriate as measures of the value of milk for manufacturing uses in the Western Michigan area and should be used for this purpose in the order.

Use of the highest formula prices as the basic formula price would base the Class I price on the most favorable manufacturing use for milk in each month. In an area where all important dairy products are manufactured, fluid milk markets must compete for milk with plants making the highest value products. The class I price should therefore be based on the formula representing the highest value of milk for manufacturing.

(ii) *Class I price.* The Class I price should be determined by adding $1.15 to the basic formula price. This added differential should be increased 15 cents when a shortage of producer milk for Class I utilization is indicated by the ratio of receipts of producer milk to Class I utilization in the second preceding two months and decreased by 15 cents when an excess supply of milk is so indicated. An additional 15 cents should be added or subtracted for each additional full five percentage points decrease or increase in the ratio of producer milk receipts to Class I utilization.

Producers proposed a Class I price differential of $1.20 to be added to the basic formula price each month. Although records of milk prices, production and sales for the Western Michigan marketing area as a whole are not complete, satisfactory records are available for the Muskegon portion of the area and experience in this segment of the area is typical of the area as a whole. During the 12-month period ending with September 1949 the "plant requirements" price (which applied to a volume of milk slightly in excess of the amount which would fall in Class I (as defined herein) averaged $1.50 above the manufacturing milk price as represented by the highest of 3 of the 4 proposed basic formulas. During and following this period, the supply of milk in relation to plant requirements increased steadily, indicating that the price reflected to producers by pricing "plant requirements" milk at $1.50 over the manufacturing milk price was at a level which would eventually attract an oversupply of milk. In the following 12-month period, October 1949–September 1950, the "plant requirements" price averaged $1.13 above the manufacturing milk price. During the first few months of this period, milk deliveries remained relatively high in relation to Class I utilization, but later declined to slightly above the level of corresponding months of the previous year and appear to have stabilized at that level. These market records indicate that a "plant requirements" price averaging $1.13 above the price of milk for manufacturing has maintained about the proper supply of milk to meet market needs. A slightly higher price applying to Class I milk would be needed to maintain the blend price to producers at the level resulting from a $1.13 "plant requirements" price.

The milksheds for the Detroit and Western Michigan markets overlap. A location adjustment of 21 cents is deducted from payments to Detroit producers within the Grand Rapids milkshed. This would make the Class I price differential recommended for the Detroit market equivalent to $1.14 at a Detroit receiving plant in the Grand Rapids milkshed. Considering the price level necessary to attract a sufficient supply of approved milk as shown by Muskegon market records, and the desirability of correlating Western Michigan area producer prices with prices paid by competing markets, it is concluded that $1.15 should be added to the basic formula price each month to determine the Class I price.

To aid in insuring an adequate supply of milk and to correlate producer prices with those in the Detroit market, a supply-demand price adjustment is desirable to bring about an automatic price increase when the supply of producer milk is at such a level in relation to Class I utilization that a shortage in the months of seasonally low production is indicated, and a price decrease when the supply may be expected to be substantially above Class I needs in the low production months. These price changes should be made as soon as possible after an oversupply or shortage is indicated, as a lag of a few months may result in increased prices in the spring months of high production as a result of a shortage the previous winter. A minimum lag of 2 months appears necessary, allowing computation in the current month of the market supply-demand relationship in the preceding two months to be applied to the Class I price in the next following month. While no specific proposal for such a price adjustment was made, the desirability of such a provision was brought out in testimony.

A minimum milk supply for the market of 115 percent of Class I utilization is usually considered necessary in any one month to provide adequate milk for Class I uses because of unequal distribution among handlers and daily and weekly variations in receipts and sales. A supply of more than 130 percent of

Class I utilization in the shortest supply month would indicate a supply larger than needed. An upward price adjustment would be indicated if the market supply of producer milk in the shortest supply month might be expected to fall below 115 percent of Class I utilization and a downward adjustment indicated if the supply might be expected to exceed 130 percent of Class I utilization. Monthly data on daily average deliveries per farm indicate a fairly uniform seasonal variation in production each year. The supply-demand ratio for other months which would correspond to the 115 percent-130 percent range in the shortest supply month may therefore be computed by adjusting the midpoint of these ratios by a standard seasonal variation in producer milk deliveries computed as an average of the seasonal variation of the most recent 5 years. A Class I price increase is then indicated at 7.5 percentage points below the ratio and a decrease at 7.5 percentage points above the ratio, as computed for each month, and an additional increase or decrease for each additional full 5 percentage points decrease or increase in the receipts—Class I utilization ratio. This price adjustment may require revision after complete data on the market supply and sales are available.

Records of producer milk receipts in relation to sales and to producer prices indicate that 15 cents for each 5 percentage points is a desirable rate of supply-demand adjustment of the Class I price differential. A differential of $1.50 seems to have been effective in stimulating an increased supply of milk. A ratio of producer milk receipts to Class I utilization indicating a 105–110 percent ratio in the shortest supply month would increase the differential to $1.45 at the recommended rate of adjustment and this price, on the basis of market records, may be expected to stimulate increased milk receipts and relieve the threatened shortage.

To avoid a succession of increases and decreases if the ratio should fluctuate slightly above and below the level at which a price change is affected, it is provided that after a price change occurs a change in the ratio of an additional ½ percentage point is required to bring about a succeeding change in the opposite direction.

(iii) *Class II price.* The Class II price should reflect the value of milk for general manufacturing uses in the Western Michigan milkshed. An appropriate price for this use is the higher of the average of the prices paid by 3 local dairy manufacturing plants and a price determined by a formula based on the market prices of butter and skim powder. The average of the prices paid by 3 Michigan dairy manufacturing plants, as recommended for use as an alternate basic formula price, will normally reflect the value of milk in the Western Michigan area which is not used for fluid consumption as milk or cream. The three plants selected are so located that their production areas include most of the Grand Rapids-Muskegon milkshed. They manufacture evaporated milk, dry milk and skim milk, cottage cheese and sweet cream. They are not operated or controlled by persons who will be handlers under the order. Two of these three plants handled over 19 million pounds of surplus milk from the Grand Rapids and Muskegon markets in the first 10 months of 1950, and represent the principal outlet for surplus milk for these markets. Two of these plants also are included in the 18 midwest plants used in determining the basic formula price in most Federal milk marketing orders and recommend for such use herein. Prices paid by the three plants over the last 4 years indicate the average of these prices will provide an appropriate alternate price for Class II milk.

It is possible, however, that due to the limited number of plants which it is practical to use, and the limited area represented, that prices paid by these plants may be lower at times than the market prices of manufactured dairy products would justify. As a safeguard against temporary depressed prices in the local area, an alternate Class II price based on the market prices of butter and nonfat dry milk solids should be provided. A formula used in many milk markets under Federal regulation for pricing milk for manufacturing uses was proposed. This formula determines butterfat values at the average price of 92-score butter at Chicago plus 20 percent, and skim milk values at the average price of spray and roller process nonfat dry milk solids at Chicago area plants less a manufacturing cost allowance of 5.5 cents per pound and converted to skim milk equivalent by use of a yield factor of 8.5 pounds of powder per hundredweight of whole milk. Use of this formula price as an alternate Class II price would insure a price related to values of manufactured dairy products during any periods when the price paid by the particular local plants selected might be abnormally low for any reason.

Comparing the class prices here recommended with those proposed by producers, using October 1950 prices, the proposed Class I at $4.217 and Class II at $3.717, would be combined in Class I at $4.167, and the proposed Class III at $3.124 and Class IV at $2.864 would be combined in Class II at $3.124.

(iv) *Method of pricing.* The classification and allocation of producer milk should be on a skim milk and butterfat basis. Because of the wide variation in the butterfat test of the various products, it is probable that the skim milk from producer milk will frequently be utilized in a different class than the butterfat from the same milk. Classification of skim milk and butterfat separately is necessary to accomplish complete classification according to use. It is also necessary to allocate producer skim milk and butterfat separately in order to give both skim milk and butterfat in producer milk preference over other source milk in the higher value uses. A continuation of the whole milk system of pricing is desirable. Class prices should be expressed as hundredweight prices, and the price for each class should be adjusted to the actual butterfat test of the class by use of the butterfat differentials set forth below.

(v) *Handler butterfat differentials.* The Class I butterfat differential under the pricing method proposed by producers would be equivalent to the lower of 80 percent of the Class I hundredweight price or the percentage represented by the butter portion of the butter-powder formula, in either case divided by 35. Under present conditions, the 80 percent computation would be effective. Milk has not customarily been sold on a utilization basis in the market and the butterfat differential used in paying producers has been the only differential in use. At current price levels the Class I hundredweight price would be about 24 percent above the Class II price. The addition of 2 cents to the producer butterfat differential herein provided would provide a Class I butterfat differential 21 to 25 percent above the Class II butterfat value. This would bring about approximately the same relative differences between the Class I and II butterfat values and the Class I and II skim milk values. A differential so determined would give approximately the same result as the 80 percent computation proposed. It is concluded that the addition of 2 cents to the one-tenth percent producer butterfat differential, which is based on the price of 92-score butter at Chicago, will provide an appropriate Class I butterfat differential.

When the butter-powder formula is effective in setting the Class II price, the butterfat differential for that class should be based on the butterfat value determined by the formula. In the event the 3-plant average pay price is the effective Class II formula, an approximately equivalent butterfat differential may be determined by dividing 80 percent of such price by 35.

(5) *Payments to producers*—(i) *Type of pool.* Market-wide pooling of all proceeds of producer milk was proposed by the producer representatives. Marketing conditions require the payment of a uniform price to all producers representing the value of all market utilization to compensate all producers fairly for their contribution to the market supply. Some distributors buy as closely as possible to their needs and carry little or no surplus in the high production months. A cooperative handles the spring surplus production of its members and supplies several distributors with milk as needed. Some country plants may supply milk for fluid distribution only in the months of low production but maintain an available supply at all times. Producers supplying these various handler plants contribute equally to making available a year-around supply of milk but would receive widely varying returns under an individual handler pool method of payment.

Handlers are required to make payments for all producer milk received at the uniform base price for base milk and the excess price for excess milk, as explained below, either to producers directly or to a cooperative association for milk delivered by member producers. In the case of producers for whom a cooperative acts as marketing agent, payment may be made to the producer or to the cooperative, as agreed between the cooperative and the handler.

(ii) *Base-excess plan.* A "base plan" for returning the proceeds of milk sales to producers in a way which will encourage more uniform seasonal production is provided. Milk is to be paid for on the basis of deliveries during the August–December period.

Base plans have been in use in the Grand Rapids and Muskegon markets for several years, and a proposal was made to incorporate a base plan in the order in substantially the form now in use by the proponents. The effect of the base plan in encouraging more even production is shown by records of daily average deliveries per farm. In the Grand Rapids area deliveries in the highest month of 1942, the earliest year for which data were submitted, were 152 percent of the lowest month and in 1949 deliveries in the month of highest deliveries were only 135 percent of deliveries in the lowest month. Corresponding ratios for the Muskegon market were 172 percent for 1943 and 136 percent for 1949.

Fundamentally, the plan provides that each producer will receive the manufacturing milk price for milk delivered each month in excess of a daily average amount, the producer's "base", which base is the daily average of shipments of the producer for the period of August through December of the previous year, the "base period." For milk deliveries not in excess of base, a "base price" is paid which is computed by dividing total market base milk deliveries into the remaining returns for all producer milk marketed during the month after deducting the value of the milk in excess of base. Each producer's base for the 12 months starting each February 1 is his average daily deliveries during the August 1–December 1 period of the preceding year.

The proponent cooperatives proposed that a new producer entering the market or a producer electing to give up his base, be paid for a certain percentage of his milk during each of the first three full months of delivery at the base price and the remainder at the excess price. These percentages would be fixed for each month at a somewhat lower percentage of base and higher percentage of excess than the normal market average of all producers for the month. The average daily amount of milk paid for as base milk over the three-month period would determine the producer's daily base until a new base is established. The percentages proposed reflect the seasonal production pattern of new producers as determined from market experience. The low spring percentages are necessary if producers are to be given the option of establishing a new base in order to prevent producers having a wide seasonal variation from receiving higher payments than justified by establishing two bases each year. Also producers are not encouraged to enter the market in the months when there is an oversupply of milk. The recommended percentages of milk deliveries to be paid for at the base price, 75 percent for February, 70 percent for March, 60 percent for April and July and 40 percent for May and June, are appropriate for making payments in these months to new producers and to producers who elect to establish new bases. Payments during the base period, however, should be at the market blend price as discussed below. Base should be established on deliveries during the base period at 80 percent of deliveries. This would give old shippers the option of establishing a new base on 100 percent of daily average deliveries in the 5 months of August through December or 80 percent of deliveries in the 3 months of October, November and December.

In the Western Michigan market the months of lowest production in relation to fluid milk sales are normally October, November, December and January. The base period proposed includes August and September which are usually months of more plentiful supply than are January and February, and does not include January. These months appear to have been selected to offset the lag in production responses which require the stimulas to fall and winter production to become effective some months in advance of the period of shortest production in relation to market needs. A base period extending through January and February would tend to result in higher production in the spring months of oversupply. Deliveries of milk in the 5 months of the base period averaged over 89 percent of "plant requirements" in the Grand Rapids area in the last 5 years which indicates the desirability of shifting production to those months. It is concluded that the proposed base forming period should be adopted except that deliveries for only 122 days during the period be required. This would allow a producer starting delivery not later than September 1 to establish a base on 100 percent of deliveries for 4 months, and for limited lapses in delivery during the period by those who ship for 5 months.

Continuation of producer payments on the base and excess plan during the base forming months was proposed. The base-excess plan was proposed as an incentive for more even seasonal production, the objective being to encourage each producer to produce more of his total year supply of milk in the late summer and fall months and less in the spring months. The plan, therefore, should not discourage increased fall production by requiring payment for all or part of higher production at the excess price. It was proposed that a new producer, or an old producer desiring to establish a new base, be paid during the base forming months at the base price for 80 percent of his milk deliveries and at the excess price for 20 percent. However, no penalty should be imposed during these months when the supply of milk is shortest in relation to demand, either on new shippers entering the market or on old shippers who desire to increase the level of their milk deliveries. It is concluded, therefore, that during the base forming months a new shipper, or an old shipper, who relinquishes his base, should be paid the market blend price for all milk delivered during up to 3 of these months, and a base then be established at 80 percent of the average daily deliveries during 3 months. If deliveries are made for 4 or 5 of the base forming months, a new base of 100 percent of such average deliveries would become effective February 1. Only 80 percent of a producer's deliveries are allowed as base when the base is established on three months deliveries. Such deliveries are made at the uniform price. Deliveries of milk for two of the base forming months in the case of old shippers and one or two months in the case of new shippers are made under the previous base or the newly established 80 percent base in establishing a base on 100 percent of his deliveries. These provisions will require reexamination after data are available on the results of their operation to determine the possible restrictive tendencies.

A proposal that bases be reduced by the difference between the average base period deliveries and 90 percent of the previous base was the result of long experience in the market which has shown that such an adjustment eliminates most cases of inequity and dissatisfaction because of reductions in base due to accident, disease, weather, feed quality and other conditions more or less beyond the control of the producer.

A producer may desire to change his level of production and should not be required to receive payment for the higher production at the excess price until the next February 1st. It was proposed that producers be permitted to reestablish a base in line with their normal production level by allowing any producer to relinquish his base and to establish a base as a new producer once during each year. This would make the plan more flexible and would take care of cases of abnormally low production during the base period due to unusual circumstances.

A period of one month is allowed following the end of the base period to computate new bases. Every producer (except those who have been on the market less than 3 months) receives a new base on February 1 computed as the average of daily deliveries during the base forming months, or 80 percent of average daily deliveries in 3 months.

It was proposed that bases in use on the effective date of the order be applicable, subject to the approval of the market Administrator, until the next February 1. However, the record indicates that there are a large number of producers who would have no base. It was proposed that the market administrator collect data on deliveries of these producers for the previous base forming months, or the first 3 months of delivery, and compute bases as if the order had been in effect during the base forming months of the previous year. Aside from the difficulties of collecting the data and making the computations in the brief period allowed, and the probable lack of some necessary records, which make the proposal impractical if not impossible to carry out, the proposal, in effect, would make certain provisions of the order retroactive to periods several months before the order would become effective. The last objection also applies to requiring payments on bases already established previous to the effective date of the order.

It is provided that all milk be paid for at a uniform price until bases have been established by deliveries during the first base period after the order becomes effective. This, of course, would not prevent a cooperative from repooling the returns for milk of its members and making payments on such base and excess plan as it may elect.

Rules have been provided for the handling of bases under certain circumstances. It is provided that any producer who fails to deliver milk to a handler for 45 consecutive days shall lose his base.

(iii) *Producer butterfat differential.* Payments to producers must be adjusted for butterfat content. The proposed butterfat differential, based on the market price of 92-score butter at Chicago is now widely used in the market. This differential (7 cents for 90–95 cent butter, and changing ½ cent with each full 5-cent change in the market price of butter) appears to have resulted in a supply of producer milk of satisfactory butterfat test for the needs of the market. Approximately the same rate of differential is used by manufacturing plants in the area, and its use will maintain the same relative price relationship to manufacturing milk at the various tests. It is therefore recommended as a provision of the order. Order prices are set for 3.5 percent milk as prices have always been announced for milk of this test in the market, and the basic test of 3.5 percent apparently requires a minimum of adjustment to arrive at prices for actual tests of producer milk.

(6) *Administrative provisions* — (i) *Administrative assessments.* The act provides that the costs of administering a milk marketing order shall be financed by assessments on handlers subject to the order. An assessment of 4 cents per hundredweight of milk received from producers was proposed for this purpose. Testimony indicates that a fair apportionment of the administrative costs among handlers may be arrived at by basing the assessment on receipts of producer milk only. Normally, little or no other source milk is received as milk at handler plants. Should the rate of 4 cents per hundredweight prove more than adequate to cover costs of administering the order, it is provided that the Secretary may prescribe a lower rate.

(ii) *Market services.* To verify payments to producers at required rates, it is necessary to determine that butterfat tests and weights are accurate. To promote orderly marketing and encourage the production of an adequate supply of milk of satisfactory quality, it is necessary to furnish information regarding the market to individual producers. The cost of these market services should be paid by the producers who receive the benefits. Cooperative associations may be performing these services for members. It is provided, therefore, that in making payments to producers who are members of cooperatives determined by the Secretary to be performing such services, handlers shall be required to deduct from payments to producers and pay to the cooperative such amounts as are authorized by the members of the cooperative. In the case of producers who are not receiving such services from their cooperative, the service should be performed by the market administrator with funds provided by a deduction from payments to such producers. It is provided, therefore, that a deduction of 5 cents per hundredweight be made from payments to producers not receiving market services from a cooperative of which they are members and paid to the market administrator to be used for performing such services, and that this rate of 5 cents may be lowered by the Secretary if experience proves a lesser amount to be sufficient.

(iii) *Other administrative provisions.* The other provisions cover administrative procedures necessary to carry out the pricing and payment requirements of the order, and for the liquidation of accounts in the event of suspension or termination of the order. Appointment of a market administrator is provided for and his powers and duties are prescribed. The computations to be made by the market administrator in determining class prices, the uniform price and the base price are set forth. A producer-equalization account is provided and the method of determining payments due to and from this account outlined so that each handler's payments to or receipts from this account, together with his payments to producers or cooperatives for milk will equal the value of his producer milk at the class prices. Handlers are required to permit verification by audit of all utilization of milk and milk products. Handlers are required to preserve all necessary records to show receipts, utilization and payments for a period of three years. This is considered long enough to allow for all necessary verification and at the same time not burden handlers with an unreasonable volume of old records. Records involved in any litigation, however, must be retained until released by the market administrator.

The termination of any obligation of a handler regarding any payment required by the order or of the market administrator to pay any handler is provided at the end of the two years. Exceptions in the case of handler obligations are made in cases of notification of the obligation by the market administrator, failure or refusal of a handler to submit records, or transactions involving fraud or willful concealment of facts. A definite date for terminating obligations prevents the filing of claims which might extend back many years and involve substantial amounts. The resulting uncertainty could cause serious inequities and endanger the stability of the market. Handlers cannot always be forewarned as to contingent liabilities and it is extremely difficult and burdensome for them to make adequate provision therefor by setting up reserves or by taking other precautionary measures. It is concluded that in general a period of two years is a reasonable time in which the market administrator should complete his audits and render billings for money due under the order.

Payments to producers have customarily been made on the 15th of the month following that in which the milk was received. It is considered desirable to continue this practice, as a shorter time is impractical considering the necessary reports and computations to be made. On the other hand, producers should not be required to wait longer than 15 days when payment can be made within that time. Dates specified for announcement of class prices, submission of handler reports, announcement of uniform prices and equalization fund obligations are so set as to permit payments to producers by the 15th of the following month.

(7) *Other provisions.* Other source milk is not subject to the pricing provisions of the order. To discourage the diversion of Class I sales from producer milk to other source milk, which may be obtained at a lower cost to the handler, it is provided that a handler shall pay to the equalization account an amount computed by multiplying any quantity of other source milk allocated to Class I by the difference between the Class I and Class II prices for the month.

Producers are deprived of the use of money rightfully belonging to them if a handler refuses to pay an obligation when due. It is provided therefore that an added charge of one-half percent per month be added to overdue accounts which will compensate producers for being deprived of money due them and also remove the advantage which would accrue to a handler if he could delay payments and have the use of money due to producers at no cost.

To avoid the application of two or more Federal orders to the handling of the same milk, it is provided that if the Secretary determines the handling of any milk to be subject to the pricing and payment provisions of any other Federal milk marketing order, it shall be exempt from all except the reporting and auditing provisions of this order.

General findings. (a) The proposed marketing agreement and the order and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, the available supplies of feeds, and other economic conditions which affect market supply and demand, for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producer cooperatives and milk distributors in the area. The briefs contained statements of facts, proposed findings and conclusions, and arguments with respect to the provisions of the proposed order. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent

that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

RECOMMENDED MARKETING AGREEMENT AND ORDER

The following order is recommended as the appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order:

DEFINITIONS

§ 937.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C., 601 et seq.).

§ 937.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the United States, authorized to exercise the powers or to perform the duties of the Secretary of Agriculture.

§ 937.3 *U. S. D. A.* "U. S. D. A." means the United States Department of Agriculture.

§ 937.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 937.5 *Western Michigan Marketing Area.* "Western Michigan Marketing Area," referred to in this subpart as the "marketing area," means all territory, including incorporated municipalities, within the outer boundaries of the following townships in the State of Michigan:

Kent County:
Ada.
Alpine.
Algoma.
Byron.
Caledonia.
Cannon.
Cascade.
Courtland.
Gaines.
Grand Rapids.
Lowell.
Paris.
Plainfield.
Sparta.
Vergennes.
Walker.
Wyoming.

Muskegon County:
Blue Lake.
Dalton.
Fruitland.
Fruitport.
Laketon.
Montague.
Muskegon.

Muskegon County—Continued
Norton.
Ravenna.
Sullivan.
White River.
Whitehall.

Oceana County:
Claybanks.
Benona.
Golden.
Grant.
Hart.
Shelby.

Ottawa County:
Allendale.
Chester.
Crockery.
Georgetown.
Grand Haven.
Polkton.
Robinson.
Spring Lake.
Talemadge.
Wright.

§ 937.6 *Pool plant.* "Pool plant" means a plant (except a plant receiving milk from dairy farmers whose payments for milk are subject to the provisions of another Federal milk marketing agreement or order) at which milk is received directly from dairy farmers and from which during the month:

(a) An amount of milk equal to 10 percent or more of the total milk received from dairy farmers at such plant is disposed of in the marketing area as Class I products other than to another pool plant; or

(b) An amount of milk equal to 10 percent or more of the total milk received from dairy farmers at such plant was transferred to a plant(s) described in paragraph (a) of this section during 8 of the 12 months immediately preceding the current month: *Provided*, That such milk is approved by the authorized health agencies of Grand Rapids, Grand Haven or Muskegon, Michigan, for sale for fluid consumption in the marketing area.

§ 937.7 *Handler.* "Handler" means any person who operates a pool plant or a plant from which, during the month, products defined as Class I milk are disposed of directly for fluid consumption in the marketing area, and a cooperative association with respect to milk customarily received at a pool plant which is diverted to a nonpool plant for the account of the association.

§ 937.8 *Producer.* "Producer" means any dairy farmer whose milk is delivered from his farm to a pool plant, or to any other plant by diversion from a pool plant for the account of a handler.

§ 937.9 *Producer-handler.* "Producer-handler" means a person who is a handler and who produces milk, but receives no milk from other producers or from a cooperative association.

§ 937.10 *Other source milk.* "Other source milk" means all skim milk and butterfat in any form received at a handler's plant other than from producers or other handlers.

§ 937.11 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers, duly organized as such under the laws of any state, which the Secretary determines:

(a) Is qualified under the standards set forth in the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act;"

(b) Has full authority in the sale of milk of its members; and

(c) Is engaged in making collective sales or marketing milk or its products for its members.

§ 937.12 *Base.* "Base" means a quantity of milk, expressed in pounds per day, determined for each producer as provided in § 937.70.

§ 937.13 *Base milk.* "Base milk" means milk delivered by a producer each month which is not in excess of his base multiplied by the number of days on which milk is delivered during the month, and all milk delivered by a producer prior to February 1, 1952.

§ 937.14 *Excess milk.* "Excess milk" means milk delivered by a producer each month in excess of his base milk.

MARKET ADMINISTRATOR

§ 937.20 *Designation.* The agency for the administration of this subpart shall be a market administrator, selected by the Secretary who shall be entitled to such compensation as may be determined by, and shall be subject to removal by, the Secretary.

§ 937.21 *Powers.* The market administrator shall have the following powers with respect to this subpart:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violation;

(c) To make rules and regulations to effectuate its terms and provisions;

(d) To recommend amendments to the Secretary.

§ 937.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including, but not limited to, the following:

(a) Within 30 days following the date on which he enters upon his duties, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay, out of the funds provided by § 937.85:

(1) The cost of his bond and of the bonds of his employees.

(2) His own compensation, and

(3) All other expenses, except those incurred under § 937.86, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided in this subpart, and, upon request by the Secretary, surrender, the same to such other person as the Secretary may designate;

(f) Publicly announce, unless otherwise directed by the Secretary, the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not made (1) reports pursuant to §§ 937.30 and 937.31, or (2) payments pursuant to §§ 937.80 and 937.83.

(g) Calculate a base for each producer in accordance with § 937.70 and advise the producer and the handler receiving the milk of such base;

(h) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(i) Audit records of all handlers to verify the reports and payments required pursuant to the provisions of this subpart; and

(j) Publicly announce the prices determined for each month as follows:

(1) On or before the 5th day of each month, the minimum class prices for the preceding month computed pursuant to §§ 937.51 and 937.52, and the handler butterfat differential computed pursuant to § 937.53, and

(2) On or before the 10th day of each month the uniform price, the price for base milk and the price for excess milk for the preceding month, computed pursuant to §§ 937.62, 937.63 and 937.64, and the producer butterfat differential computed pursuant to § 937.81.

REPORTS, RECORDS AND FACILITIES

§ 937.30 *Monthly reports of receipts and utilization.* On or before the 5th day of each month, each handler who operates a pool plant shall report to the market administrator, for the preceding month, in the detail and on forms prescribed by the market administrator, the receipts at his pool plant from each of the following sources and the quantities of butterfat and skim milk contained in such receipts; the utilization of such receipts; and such other information with respect to such receipts and utilization as the market administrator may prescribe:

(a) All producer milk received, including diverted producer milk;

(b) All skim milk and butterfat in any form received from each other handler; and

(c) All other source milk received except any non-fluid milk product which is disposed of in the same form as received.

§ 937.31 *Other reports.* (a) Each producer-handler and each handler who does not operate a pool plant shall make reports at such time and in such manner as the market administrator may request.

(b) On or before the 20th day of each month each handler who received milk from producers shall report his producer payroll for the preceding month which shall show:

(1) The pounds of base milk and pounds of excess milk received from each producer, and the percentage of butterfat contained therein;

(2) The amount and date of payment to each producer, or to a cooperative association; and

(3) The nature and amount of each deduction or charge involved in the payments referred to in subparagraph (2) of this paragraph.

§ 937.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator during the usual hours of business, such accounts and records of all of his operations and such facilities as are necessary to verify reports, or to ascertain the correct information with respect to (a) the receipts and utilization or disposition of all skim milk and butterfat received, including all milk products received and disposed of in the same form; (b) the weights and tests for butterfat, skim milk and other contents of all milk and milk products handled; and (c) payments to producers and cooperative associations.

§ 937.33 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That, if within such three-year period, the market administrator notifies a handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records until further written notification from the market administrator. The market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 937.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received at a pool plant (a) in milk from producers or from a cooperative association, (b) in any form from other handlers and (c) in other source milk required to be reported pursuant to § 937.30, shall be classified (separately as skim milk and butterfat) in the classes set forth in § 937.41.

§ 937.41 *Classes of utilization.* Subject to the conditions set forth in §§ 937.42 and 937.43 the classes of utilization shall be;

(a) Class I utilization shall be all skim milk and butterfat

(1) Disposed of for consumption in fluid form as milk, skim milk or flavored milk, or sweet cream or sour cream for consumption as cream; and

(2) Not accounted for as Class II utilization.

(b) Class II utilization shall be all skim milk and butterfat accounted for—

(1) As used to produce ice cream, ice cream mix, or cottage cheese, or disposed of as whole or skimmed condensed or evaporated milk (sweetened or unsweetened) in bulk or in hermetically sealed cans, cheese, buttermilk, dried whole milk, nonfat dry milk solids, or butter;

(2) Dumped or disposed of as livestock feed;

(3) As actual shrinkage of skim milk and butterfat in producer milk, but not to exceed 2 percent of such receipts; and

(4) As actual shrinkage in other source milk.

§ 937.42 *Shrinkage.* (a) If producer milk is utilized in conjunction with other source milk, the shrinkage shall be allocated pro rata between the receipts of skim milk and butterfat in producer milk and in other source milk.

(b) Shrinkage on producer milk shall be computed on that quantity of milk received directly from producers. Shrinkage shall be computed on diverted producer milk at the plant receiving such milk.

§ 937.43 *Transfers.* (a) Skim milk and butterfat disposed of from a pool plant to another pool plant in the form of milk, skim milk or cream shall be Class I utilization unless Class II utilization is indicated by the operators of both plants in their reports submitted pursuant to § 937.30: *Provided*, That in no event shall the amount so classified as Class II be greater than the amount of producer milk used in such class in the pool plant of the transferee handler after allocating other source milk in such plant in series beginning with the lowest priced utilization.

(b) Milk moved in the form of whole milk from a pool plant to a plant not a pool plant but disposing of milk for Class I uses shall be allocated to Class I in an amount equal to any disposition of milk for Class I uses from such plant in excess of the amount of milk received at such plant from dairy farmers.

(c) Skim milk and butterfat moved in the form of milk, skim milk or cream from a pool to a plant not a pool plant shall be Class I utilization unless all of the following conditions are met:

(1) Class II utilization is indicated by the operator of the pool plant in his report submitted pursuant to § 937.30 and a statement certifying to such Class II utilization is received by the market administrator from the operator of the nonpool plant to which skim milk and butterfat was moved not later than the last day of the month following the month of such movement.

(2) The operator of such nonpool plant in the month of such movement had actually used an equivalent amount of skim milk and butterfat in Class II, or moved such amount to another nonpool plant which meets the requirements of subparagraph (3) of this paragraph and utilized in the month an equivalent amount of skim milk and butterfat in Class II.

(3) The operator of the nonpool plant maintains books and records which are made available for examination upon request by the market administrator and which are adequate for the verification of such Class II utilization.

§ 937.44 *Responsibility of handlers.* All skim milk and butterfat shall be classified as Class I utilization unless the handler who first receives such skim milk or butterfat proves to the market administrator that such skim milk or butterfat should be classified otherwise.

§ 937.45 *Computation of skim milk and butterfat in each class.* For each month the market administrator shall correct for mathematical and obvious errors the monthly report submitted by each handler and compute the total pounds of skim milk and butterfat, respectively, in Class I and Class II utilization for each handler.

§ 937.46 *Allocation of butterfat classified.* The pounds of butterfat remaining after making the following computations shall be the pounds in each class allocated to milk received from producers:

(a) Subtract from the total pounds of butterfat in Class II utilization, the pounds of butterfat shrinkage allowed pursuant to § 937.41 (b) (3);

(b) Subtract from the pounds of butterfat remaining in each class, in series beginning with the lowest-priced utilization, the pounds of butterfat in other source milk;

(c) Subtract from the pounds of butterfat remaining in each class, the pounds of butterfat received from other

handlers in such classes pursuant to § 937.43 (a); and

(d) Add to the remaining pounds of butterfat in Class II utilization the pounds subtracted pursuant to paragraph (a) of this section;

(e) If the remaining pounds of butterfat in both classes exceed the pounds of butterfat in milk received from producers, subtract such excess from the remaining pounds of butterfat in each class in series, beginning with the lowest-priced utilization.

§ 937.47 *Allocation of skim milk classified.* Allocate the pounds of skim milk in each class to milk received from producers in a manner similar to that prescribed for butterfat in § 937.46.

MINIMUM PRICES

§ 937.50 *Basic formula price.* The basic formula price to be used in determining the price per hundredweight of Class I utilization shall be the highest of the prices computed pursuant to paragraphs (a), (b), (c) and (d) of this section.

(a) The average of the basic or field prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the U. S. D. A.:

Present Operator and Location

White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus values computed pursuant to subparagraphs (1) and (2) of this paragraph;

(1) From the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the U. S. D. A. during the month; subtract 3 cents, add 20 percent thereof and multiply by 3.5.

(2) From the simple average, as computed by the market administrator, of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the U. S. D. A, deduct 5.5 cents and then multiply by 8.2.

(c) The price per hundredweight resulting from the following formula:

(1) Multiply by 6 the simple average as computed by the market administrator of the daily wholesale selling prices per pound of Grade A (92-score) bulk creamery butter (using the midpoint of any price range as one price) at Chicago as reported by the U. S. D. A. for the month;

(2) Add an amount equal to 2.4 times the simple average as published by the U. S. D. A. of prices per pound of "Cheddars" on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, on the trading days that fall within the month.

(3) Divide by 7, add 30 percent thereof, and then multiply by 3.5.

(d) The average of the prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants for which prices have been reported to the market administrator:

Present Operator and Location

Saranac Milk Products Co., Saranac, Mich.
Pet Milk Co., Wayland, Mich.

§ 937.51 *Class I milk price.* (a) Subject to the provisions of paragraph (b) of this section, the minimum price per hundredweight to be paid by each handler, f. o. b. his pool plant as described in § 937.6 for milk of 3.5 percent butterfat content received from producers or from cooperative associations during the month, which is classified as Class I utilization shall be the basic formula price plus $1.15.

(b) The market administrator shall compute each month a "utilization ratio" which shall be the percentage that total receipts by all handlers of producer milk during the first and second months next preceding the current month, is of total Class I utilization of all handlers during such two-month period. For each month the Class I price shall be decreased 15 cents if the "utilization ratio" as computed in the next preceding month is 7.5 percentage points or more above the average of the percentages for the corresponding months in the following schedule and the Class I price shall be increased 15 cents if such "utilization ratio" is 7.5 percentage points or more below the average of the percentages for the corresponding months in such schedule. The Class I price shall be decreased or increased an additional 15 cents for each additional full 5 percentage points which such "utilization ratio" is above or below the percentage for the corresponding month in such schedule: *Provided*, That when the price has been so decreased or increased it shall not next be increased or decreased, respectively, until such percentage is ½ percentage point higher or lower, as the case may be, than the percentage at which such price change would otherwise be made.

November	122.5
December	125.8

(c) The provisions of paragraph (b) of this section shall not apply until the fourth month after this subpart becomes effective.

§ 937.52 *Class II milk price.* The minimum price per hundredweight to be paid by each handler, f. o. b. his pool plant as described in § 937.6 for milk of 3.5 percent butterfat content received from producers or from a cooperative association, during the month, which is classified as Class II utilization, shall be the higher of the prices as computed by the market administrator pursuant to paragraphs (a) and (b) of this section:

(a) The price per hundredweight computed by multiplying the average price per pound of butter as described in paragraph (b) (1) of § 937.50 by 1.2 and then by 3.5 and adding the plus value computed pursuant to § 937.50 (b) (2).

(b) The price per hundredweight pursuant to § 937.50 (d).

§ 937.53 *Handler butterfat differential.* There shall be added to or subtracted from, as the case may be, the prices of milk for each class as computed pursuant to §§ 937.51 and 937.52 for each one-tenth of one percent variation in the average butterfat test of the milk in each class above or below 3.5 percent the amounts determined as follows:

(a) *Class I milk.* Add 2 cents to the producer butterfat differential determined pursuant to § 937.81.

(b) *Class II milk.* Multiply the average price of butter as described in § 937.50 (b) (1) by 0.12. *Provided*, That when the Class II price is determined pursuant to § 937.52 (b), the butterfat differential shall be determined by multiplying such price by 0.8, dividing by 35, and rounding off to the nearest one-tenth cent.

§ 937.60 *Computation of value of milk for each handler.* (a) The value of producer milk received during the month by each handler who operates a pool plant shall be a sum of money computed by the market administrator by multiplying by the applicable class price adjusted pursuant to § 937.53 the total combined hundredweight of skim milk and butterfat received from producers allocated to each class pursuant to §§ 937.46 and 937.47, adding together the resulting amounts, and if such handler has a utilization greater than has been accounted for as received from all sources, add an amount computed by multiplying any such excess utilization classified pursuant to § 937.46 (e) and § 937.47 by the applicable class prices.

(b) Each handler who has other source milk allocated to Class I pursuant to § 937.46 and § 937.47 shall pay to the producer equalization fund each month an amount computed by multiplying the hundredweight of milk so allocated by the difference between the Class I and Class II prices for the month adjusted by the butterfat differentials provided in § 937.53 to the butterfat test of such other source milk.

§ 937.61 *Computation of the 3.5 percent value of all producer milk.* For each month, the market administrator shall compute the 3.5 percent value of producer milk by:

(a) Combining into one total the individual values of milk of all handlers, computed pursuant to § 937.60 (a) adjusted by any charges or credits pursuant to § 937.90 (a) and (b).

(b) Adding, if the weighted average butterfat test of all producer milk represented in paragraph (a) of this section is less than 3.5 percent, or subtracting if the weighted average butterfat test of such milk is more than 3.5 percent, an amount computed by multiplying the total pounds of butterfat represented by the difference of such average butterfat test from 3.5 percent by the butterfat differential provided in § 937.81 multiplied by 10.

(c) Adding not less than one-half of the unobligated balance in the producer-equalization fund.

§ 937.62 *Uniform price.* For each month the uniform price shall be computed by: (a) Dividing the amount computed pursuant to § 937.61 by the hundredweight of milk received from producers represented by the values included in § 937.61 (a); and (b) subtracting not less than 4 cents or more than 5 cents.

§ 937.63 *Excess milk price.* For each month the excess milk price shall be the price of Class II utilization determined pursuant to § 937.52.

§ 937.64 *Computation of the base milk price.* (a) Multiply the total pounds of excess milk and milk to be paid for at the excess milk price pursuant to § 937.70 (b) by the excess milk price for the month.

(b) Multiply the total amount of milk to be paid for at the uniform price by the uniform price for the month.

(c) Subtract the total values arrived at in paragraphs (a) and (b) of this section from the total 3.5 percent value of all producer milk arrived at in § 937.61;

(d) Divide the resultant value by the total hundredweight of base milk and milk to be paid for at the base price pursuant to § 937.70 (b); and

(e) Subtract not less than four cents nor more than five cents. The resultant hundredweight price shall be the price of base milk of 3.5 percent butterfat content received at pool plants described in § 937.6.

§ 937.65 *Notification.* On or before the 10th day after the end of each month the market administrator shall notify each handler of:

(a) The amounts and values of his milk in each class and the total of such amounts and values;

(b) The base of any producer delivering milk to the handler which was not used in making payments for the previous month.

(c) The amount due such handler from the producer-equalization fund or the amount to be paid by such handler to the producer-equalization fund, as the case may be; and

(d) The totals of the minimum amounts to be paid by such handler pursuant to §§ 937.80, 937.83, 937.85, 937.86 and 937.90.

BASE RULES

§ 937.70 *Determination of base.* (a) A producer who delivered milk on at least 122 days during the period August 1 through December 31, inclusive, of any year after 1950 shall have a base computed by the market administrator to be applicable, subject to paragraph (c) of this section, for the 12 months' period beginning the following February 1, equal to his daily average milk deliveries from the date on which milk was first delivered in the period to the end of such August 1–December 31 period.

(b) After January 31, 1952, a producer who has no base shall be paid during the first three full months he is a producer the uniform price in each of the months of August through December and in other months the price applicable to base milk for the following percentages of his milk deliveries and the price applicable to excess milk for the remainder of his deliveries: 75 percent for January and February, 70 percent for March, 60 percent for April and July and 40 percent for May and June. At the conclusion of the first three full months' delivery, a base shall be established by dividing the amount of milk paid for at the base price during such three months by the number of days in the three months.

(c) A producer with a base, by notifying the market administrator that he relinquishes such base, may establish a new base pursuant to paragraph (b) of this paragraph once during the 12-month period ending December 31, the period for establishing a new base to begin the first day of the month in which such notification is received by the market administrator.

(d) From the effective date of the subpart until bases are established pursuant to this section, all milk delivered by producers shall be considered to be base milk.

§ 937.71 *Application of bases.* (a) A base shall apply to deliveries of milk by the producer for whose account milk was delivered during the base period and upon death may be transferred to a member or members of the deceased producer's immediate family;

(b) Bases may be transferred under the following conditions upon written notice by the holder of the base to the market administrator on or before the last day of the month that such base is to be transferred:

(1) Upon retirement or entry into military service of a producer, the entire base may be transferred to a member or members of his immediate family.

(2) Bases may be held jointly and if such joint holding is terminated the bases may be transferred as specified in writing to the market administrator by the joint holders to a person or persons who maintain a dairy herd or herds on the same farm.

(c) A producer who does not deliver milk to a handler for 45 consecutive days shall forfeit his base.

PAYMENT FOR MILK

§ 937.80 *Time and method of payment.* On or before the 15th day after the end of each month each handler who received milk from producers or from a cooperative association shall pay for milk received during such month to each producer, or to a cooperative association for milk received from producers for the account of such association, the uniform price as provided in § 937.70 (b) or (c), or the base price for base milk and for milk to be paid for at the base price pursuant to § 937.70 (b) and the excess price for excess milk and milk to be paid for at the excess price pursuant to § 937.70 (b), adjusted by the butterfat differential pursuant to § 937.81: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 937.84, he shall not be deemed to be in violation of this section if he reduces uniformly to all producers and cooperative associations his payments per hundredweight by a total amount not in excess of the reduction in payments due from the market administrator; however, the handler shall make such balance of payment uniformly to those producers to whom it is due on or before the date for making payments pursuant to this section next following that on which such balance of payment is received from the market administrator.

§ 937.81 *Producer butterfat differential.* In making payments pursuant to § 937.80, the uniform price, base price and excess price shall be increased or decreased for each one-tenth of one percent of butterfat content in the milk received from each producer or a cooperative association above or below 3.5 percent, as the case may be, by a butterfat differential of 7 cents when the average price of butter as described in § 937.50 (b) (1) is 60 cents, which differential shall be increased one-half cent for each full 5 cents variance in such price of butter above 60 cents and decreased one-half cent for each full 5-cent variance in such price of butter below 64.99 cents.

§ 937.82 *Producer-equalization fund.* The market administrator shall establish and maintain a separate fund, known as the "producer-equalization fund" into which he shall deposit all payments received pursuant to § 937.83 and out of which he shall make all payments pursuant to § 937.84.

§ 937.83 *Payments to the producer-equalization fund.* On or before the 13th day after the end of each month, each handler

(a) Whose value of milk is required to be computed pursuant to § 937.60 (a) shall pay to the market administrator any amount by which such value for such month is greater than the minimum amount required to be paid by him pursuant to § 937.80, and

(b) Who is required to make payment pursuant to § 937.60 (b) shall pay such amount to the market administrator.

§ 937.84 *Payment out of the producer-equalization fund.* On or before the 14th day after the end of each month, the market administrator shall

pay to each handler any amount by which the value of milk for such handler for the month pursuant to § 937.60 (a) is less than the total minimum amount required to be paid by him pursuant to § 937.80, less any unpaid obligations of such handler to the market administrator pursuant to § 937.83: *Provided*, That if the balance in the producer-equalization fund is insufficient to make all payments to all such handlers pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds become available.

§ 937.85 *Expense of administration.* As his pro rata share of the expense of administration of this subpart, each handler shall pay to the market administrator on or before the 13th day after the end of each month four cents per hundredweight, or such amount not exceeding four cents per hundredweight as the Secretary may prescribe, with respect to all receipts within the month of milk from producers.

§ 937.86 *Marketing services.* (a) except as set forth in paragraph (b) of this section, each handler, in making payments pursuant to § 937.80 for milk received from each producer at a plant not operated by a cooperative association of which such producer is a member, shall deduct five cents per hundredweight, or such amount not exceeding five cents per hundredweight as the Secretary may prescribe, with respect to all such milk received during the month, and, on or before the 13th day after the end of each month, shall pay such deductions to the market administrator. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received from producers and to provide producers with market information, such services to be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers whose milk is received at a plant not operated by a cooperative association of which such producers are members, and for whom a cooperative association is actually performing the services described in paragraph (a) of this section, as determined by the Secretary, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from payments required pursuant to § 937.80 as may be authorized by such producers, and pay such deductions on or before the 13th day after the end of the month to the cooperative association rendering such services of which such producers are members.

ADJUSTMENT OF ACCOUNTS

§ 937.90 *Payments.* Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses adjustments to be made, for any reason, which result in moneys due:

(a) To the market administrator from such handler,

(b) To such handler from the market administrator, or

(c) To any producer or cooperative association from such handler,

the market administrator shall notify such handler promptly of any such amount due; and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred, following the 5th day after such notice.

§ 937.91 *Overdue accounts.* Any unpaid obligation of a handler or of the market administrator pursuant to §§ 937.83, 937.85, 937.86, and 937.90 shall be increased one-half of one percent on the first day of the month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

APPLICATION OF PROVISIONS

§ 937.100 *Milk caused to be delivered by cooperative association.* Milk referred to in this subpart as received from producers by a handler shall include milk of producers caused to be delivered to such handlers by a cooperative association.

§ 937.101 *Handler exemption.* A producer-handler and a handler who does not operate a pool plant shall be exempt from all provisions of this subpart except §§ 937.31, 937.32, and 937.33.

§ 937.102 *Exempt milk.* Milk received at the plant of a handler the handling of which the Secretary determines to be subject to the pricing and payment provisions of any other Federal milk marketing order issued pursuant to the act for any fluid milk marketing area shall be exempt from all provisions of this subpart except §§ 937.30, 937.31, 937.32, and 937.33.

TERMINATION OF OBLIGATIONS

§ 937.110 *Termination of obligations.* (a) The obligation of any handler to pay money required to be paid under the terms of this subpart shall, except as provided in paragraph (b) and (c) of this section, terminate two years after the last day of the month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producers or associations, or, if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representatives all books or records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the month following the month during which such books and records pertaining to such obligation are made available to the market administrator or his representative.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or wilful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 937.120 *Effective time.* The provisions of this subpart, or of any amendment to this subpart, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 937.121 *When suspended or terminated.* The Secretary shall, whenever he finds that this subpart, or any provision of this subpart, obstructs or does not tend to effectuate the declared policy of the act, terminate or suspend the operation of this subpart or any such provision of this subpart.

§ 937.122 *Continuing obligation.* If, upon the suspension or termination of any or all provisions of this subpart, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 937.123 *Liquidation.* Under the suspension or termination of the provisions of this subpart, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed, by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated all assets, books, and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers, in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 937.130 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 937.131 *Separability of provisions.* If any provision of this subpart, or the application to any person or circumstances, is held invalid the application of such provision, and of the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

Filed at Washington, D. C., this 2d day of July 1951.

NORTH ADDITIONS TO ANCHORAGE TOWNSITE (GOVERNMENT HILL)

NOTICE OF PREEMPTION SALE

JUNE 26, 1951.

Notice is hereby given that persons who occupied any of the lots listed below at the time of the survey thereof in the field, or their assigns thereafter, and who own and have valuable improvements thereon will be given a preference right to purchase the lots occupied at prices listed below until December 29, 1951.

Claimants must file their applications to purchase lots at the Land Office, Room 39, Federal Building, Anchorage, Alaska. Each application must set forth the basis of the preference right claim. (18 U. S. C. 1001 makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious or fraudulent statements or representations as to any matter within its jurisdiction.) Applications must be accompanied by money order or check payable to the Treasurer of the United States for the full purchase price of the lot. Any lot not applied for on or before December 29, 1951, will be subject to disposal at public sale. Patents for lots when issued will contain a reservation of fissionable materials.

Following are the lots subject to preference right filing and the purchase prices for each lot:

FEDERAL POWER COMMISSION

[Docket No. G-1633]

MANUFACTURERS LIGHT AND HEAT CO.

NOTICE OF AMENDMENT TO APPLICATION

JUNE 29, 1951.

Take notice that on May 8, 1951, the Manufacturers Light and Heat Company (Applicant), a Pennsylvania corporation, address, Pittsburgh, Pennsylvania, filed an amendment to its application of March 9, 1951, whereby Applicant seeks authorization, pursuant to section 7 of the Natural Gas Act, to acquire and operate certain pipeline facilities hereinafter described.

Applicant seeks to acquire from Transcontinental Gas Pipe Line Corporation certain pipeline facilities located in East Brandywine Township, Chester County, Pennsylvania, which include 170 feet of 8-inch pipeline, together with a metering station and appurtenant facilities. The cost of such facilities, including land and land rights, approximates $14,038.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) before the 18th day of July 1951. The application is on file with the Commission for public inspection.

TRANSCONTINENTAL GAS PIPE LINE CORP.

NOTICE OF APPLICATION

JUNE 29, 1951.

Take notice that Transcontinental Gas Pipe Line Corporation (Applicant) a Delaware Corporation with its principal place of business in Houston, Texas, filed on June 15, 1951, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the sale and delivery of natural gas as hereinafter set forth.

Applicant proposes to sell and deliver natural gas to Atlantic Seaboard Corporation and to Manufacturers Light and Heat Company through facilities presently interconnecting the pipeline system of Applicant with that of Atlantic Seaboard at Rockville, Maryland, and at Ellicott City, Maryland, and with that of Manufacturers Light and Heat at a point south of Manufacturers' Eagle Compressor Station in Chester County, Pennsylvania, all of which facilities are more fully described in Docket Nos. G-1621, G-1633, and G-1650. Said sales and deliveries of natural gas will be made under Applicant's rate schedule S-2, now on file with the Federal Power Commission, in presently underterminable quantities.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of July 1951. The application is on file with the Commission for public inspection.

AMERE GAS UTILITIES CO.

NOTICE OF APPLICATION

JUNE 28, 1951.

Take notice that Amere Gas Utilities Company (Applicant), a West Virginia corporation with its principal place of business at No. 1033 Quarrier Street, Charleston, West Virginia, filed on June 15, 1951, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural-gas pipeline facilities described as follows:

(1) Approximately 2.0 miles of 3½-inch pipeline, together with the necessary regulating, measuring, and appurtenant equipment, from Applicant's 6-inch line in Slab Fork District, Wyoming County, West Virginia, east to Applicant's present 3-inch main line in the north section of the city of Mullens, West Virginia.

(2) Approximately 16.5 miles of 8⅝-inch loop line extending from the 20-inch line of Atlantic Seaboard Corporation in Pipe Stem District, Mercer County, West Virginia, to the City of Princeton, East River District, West Virginia.

(3) Approximately 15.1 miles of 8⅝-inch pipeline extending from a point near Dameron, Raleigh County, West Virginia, to the 20-inch line of Atlantic Seaboard Corporation at Flat Top, Mercer County, West Virginia.

The proposed construction is to provide additional capacity to meet peak-day requirements during the winter 1951-52, estimated at 16,300 Mcf for the cities of Beckley and Mullens, West Virginia, and estimated at 6,000 Mcf for the cities of Princeton and Athens, West Virginia, and Bluefield Gas Company. In addition, the proposed pipeline from Dameron to Flat Top will permit Applicant during off-peak periods to transport for Atlantic Seaboard Corporation gas produced by Columbian Carbon Company, purchased from Columbian by Atlantic Seaboard, and presently transported for Atlantic from Dameron to Atlantic's 20-inch line in Wyoming County, West Virginia by Godfrey L. Cobot, Inc., under an exchange arrangement.

The estimated cost of the proposed facilities is $802,340. Applicant proposes to finance the construction by the issuance and sale of its securities to its parent corporation, Atlantic Seaboard Corporation.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of July 1951. The application is on file with the Commission for public inspection.

SOUTHERN CALIFORNIA GAS CO. AND SOUTHERN COUNTIES GAS CO. OF CALIFORNIA

NOTICE OF APPLICATION

JUNE 29, 1951.

Take notice that on June 18, 1951 Southern California Gas Company, (Southern California) and Southern Counties Gas Company of California (Southern Counties), California corporations each having its principal place of business in Los Angeles, California, filed a joint application for a certificate of public convenience and necessity pursuant to section 7, of the Natural Gas Act, authorizing the construction and operation of certain transmission pipeline facilities hereinafter described.

Applicants propose to increase the capacity of their existing transmission system by 150,000 Mcf. per day in order to transport increased volumes of natural gas to be purchased from the El Paso Natural Gas Company, to and for distribution in southern California, and for such purpose to construct and operate approximately 6.3 miles of 30 inch loop line extending eastward from the Blythe compressor station to the California-Arizona boundary, approximately 81.3 miles of 30 inch loop line between Whitewater and Desert Center, California, and two additional 1760 hp. compressors at the Blythe compressor station.

The cost of the proposed facilities is estimated to be $7,767,525.

Applicants propose to finance this construction initially from funds on hand, and later to cover this investment in part by the sale of bonds and common stock.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of July 1951. The application is on file with the Commission for public inspection.

GAFFNEY PIPELINE CO.

NOTICE OF APPLICATION

JUNE 29, 1951.

Take notice that on June 18, 1951, the Gaffney Pipeline Company (Applicant), a South Carolina Corporation having its principal place of business in the City of Gaffney, South Carolina, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural-gas transmission pipe-line facilities hereinafter described.

Applicant seeks authorization to construct and operate a 4½-inch O. D. natural-gas pipeline approximately 1.33 miles in length from Transcontinental Gas Pipe Line Corporation's existing transmission pipeline at a point southeast of Gaffney, extending to a proposed town-border station which Applicant proposes to contruct east of Gaffney where its proposed pipeline will connect with the existing distribution system of South Carolina Gas Company, now serving the City of Gaffney, South Carolina.

The estimated cost of the proposed construction approximates $27,215, which will be financed out of funds on hand, or by an advance from Applicant's parent company, United Cities Utilities Company.

The application is on file with the Commission for public inspection. Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) before the 18th day of July 1951.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 59-14, 54-159, 54-160, 54-162, 54-164]

INTERNATIONAL HYDRO-ELECTRIC SYSTEM

SUPPLEMENTAL ORDER AUTHORIZING DISTRIBUTION OF ESCROWED SUM

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of June A. D., 1951.

The Commission on June 13, 1950, having issued its supplemental findings, opinion and order approving, pursuant to section 11 (d) and other applicable provisions of the Public Utility Holding Company Act of 1935, certain proposals submitted by Bartholomew A. Brickley, Trustee of International Hydro-Electric System ("IHES"), for the retirement of the outstanding debentures of IHES under Part II of his Second Plan for the liquidation and dissolution of IHES, and the Commission having reserved for later determination the demand of Chemical Bank and Trust Company, successor trustee under the trust indenture securing the said debentures of IHES, for the payment of 6% interest on certain deferred partial instalments of interest which became due after the debentures matured; and

The IHES trustee having on June 27, 1950, deposited in escrow with the indenture trustee the sum of $85,017.60, covering the interest, if any, which this Commission and the United States District Court for the District of Massachusetts shall determine to be payable on the deferred partial instalments of interest; and

A public hearing having been held, after appropriate notice, at which further evidence was received relating to the liability of IHES for the payment of interest on overdue interest on the debentures, and briefs having been filed; and

The Berkman Debenture Holders Group having requested the Commission to approve the payment of interest at the rate of 6 percent on the aforesaid amount of $85,017.60; and

The Commission having considered the record and having this day issued its second supplemental findings and opinion, concluding therein that payment to the debenture holders of the sum of $85,017.60 is fair and equitable to the security holders of IHES, and necessary and appropriate for the consummation of Part II of the trustee's plan, and that payment of interest on the said sum of $85,017.60 would not be fair and equitable:

It is ordered, Pursuant to section 11 (d), subject to the approval of the United States District Court for the District of Massachusetts, that the indenture trustee be, and it hereby is, authorized to distribute the escrowed sum of $85,017.60 pro rata to the holders of the debentures as of the time the debentures were retired or exchanged pursuant to the proposals of the IHES trustee; and

It is further ordered, That the request of the Berkman Group of Debenture Holders for an order approving the payment of interest on said sum of $85,017.60 be, and it hereby is, denied.

By the Commission.

PENN FUEL GAS, INC. AND JOHN H. WARE, 3D

ORDER AUTHORIZING CERTAIN ACQUISITIONS AND GRANTING EXEMPTION APPLICATION SUBJECT TO CONDITIONS

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of June A. D. 1951.

In the matter of Penn Fuel Gas, Inc. and John H. Ware, 3d. File No. 70-2507; Penn Fuel Gas, Inc., File No. 69-71.

Penn Fuel Gas, Inc. ("Penn Fuel") and John H. Ware, 3d ("Ware"), the owner of all the outstanding common stock of Penn Fuel, having filed a joint application pursuant to section 9 (a) (2) of the Public Utility Holding Company Act of 1935 ("act") in which the applicants request approval of the acquisition by Penn Fuel, from Ware, of all the outstanding securities, consisting of common stock and certain notes and open accounts, of Clearfield Gas & Fuel Company, Hamburg Gas & Fuel Company, Huntington Gas Company, Lock Haven Gas Company, Pen Argyl Gas Company, Renovo Gas & Fuel Company and Shippensburg Gas Company, said joint application also involving various related transactions as herein set forth; and

Penn Fuel having also filed an application pursuant to section 3 (a) (1) of the act for exemption of itself, as a holding company, and its subsidiaries, as such, from the provisions of the act otherwise applicable to them; and

A public hearing having been held upon the joint application of Penn Fuel and Ware to acquire the securities, as aforesaid, at which hearing evidence was taken concerning the proposed and related transactions, including evidence bearing upon the application for exemption, and Penn Fuel having requested that the Commission dispose of its application for exemption at this time, having waived a further hearing thereon and having consented to the entry of an order with respect to such exemption containing certain conditions, as hereinafter set forth; and

The Commission having considered the application of Penn Fuel and Ware to acquire the securities, and the application for exemption of Penn Fuel and its subsidiaries, and having issued its findings and opinion, which are filed herein, setting forth the findings of the Commission with respect to such matters, and having found therein that, subject to the conditions hereinafter set forth, no adverse findings need be made and that the applications should be granted:

It is ordered, That the application of Penn Fuel and Ware, under which Penn Fuel will acquire from Ware the securities of the companies hereinbefore mentioned, and under which certain other transactions will be carried out, be and the same hereby is granted, subject to the following terms and conditions:

(a) No sale or public offering will be made by Penn Fuel, or by any of its subsidiaries, or by Ware, or by Willard M. Ware of the Subordinated Note proposed to be issued to said Willard M. Ware as part of the proposed transactions, or of any other securities of Penn Fuel now outstanding or to be outstanding following such transactions, without a further application to and approval by this Commission;

(b) Penn Fuel will not make any payments, either of principal or interest, on said Subordinated Note, so long as there are outstanding any of the Collateral Trust Bonds of Penn Fuel or Bank Loan Notes to be issued by Penn Fuel, except upon application to and approval by this Commission.

(c) Penn Fuel and its subsidiary companies will not make any payments of salary to Ware, or to Willard M. Ware, except after 30 days' notice to this Commission.

It is further ordered, That the application of Penn Fuel for exemption of itself as a holding company, and its subsidiaries as such, pursuant to section 3 (a) (1) of the act, be and the same hereby is granted, subject to the following terms and conditions:

(1) Penn Fuel and its subsidiaries will not issue any securities, acquire any securities or assets, or engage in any other transactions which would, if Penn Fuel were a registered holding company, require the filing of a declaration or application with this Commission, unless Penn Fuel shall have given 30 days advance notice to this Commission of any such proposed transaction, subject, however, to the right of the Commission to grant a request for acceleration of such notice period in any particular case.

(2) Penn Fuel will, within 60 days of the end of each quarter, except the last quarter of each year, file with the Commission a copy of its quarterly operating statement of income and surplus and its current balance sheet, and will also file, as soon as practicable after the end of each calendar year, a copy of its complete audited financial statements, on a consolidating basis covering income and surplus and its year end balance sheet.

(3) If upon the receipt of any notice of a proposed transaction under condition (1) above, or upon the examination of information submitted under (2) above, or upon action by the Commission on its own motion, the Commission determines at any time that a substantial question exists as to whether the continued exemption of Penn Fuel is in the public interest or the interests of investors or consumers, the Commission may give notice thereof to the Company, whereupon, within five days of receipt of any such notice, Penn Fuel will register as a holding company, and in the event that Penn Fuel proposes to undertake any transaction which has been the subject of a notice under condition (1) above, Penn Fuel will file an appropriate application or declaration for that purpose, and Penn Fuel will not contest the entry of any order terminating such exemption.

By the Commission.

COLUMBIA GAS SYSTEM, INC., ET AL.

ORDER REGARDING THE ISSUANCE OF SECURITIES BY SUBSIDIARIES AND ACQUISITION THEREOF BY PARENT HOLDING COMPANIES

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 29th day of June A. D. 1951.

In the matter of the Columbia Gas System, Inc., Atlantic Seaboard Corporation, Amere Gas Utilities Company, Virginia Gas Distribution Corporation, Virginia Gas Transmission Corporation; File No. 70-2619.

Columbia Gas System, Inc. ("Columbia"), a registered holding company, its subsidiary, Atlantic Seaboard Corporation ("Seaboard"), also a registered holding company, and Amere Gas Utilities Company ("Amere"), Virginia Gas Distribution Corporation ("Distribution"), and Virginia Gas Transmission Corporation ("Transmission"), subsidiaries of Seaboard, having filed a joint application-declaration and an amendment thereto pursuant to sections 6 (b), 7, 9, 10, and 12 of the Public Utility Holding Company Act of 1935, with respect to the following proposed transactions:

Seaboard proposes to issue and sell and Columbia proposes to purchase, at par, 122,000 shares of Seaboard's $25 par value common stock. Of the $3,050,000 of proceeds to be realized therefrom, Seaboard will use $1,525,000 to complete its 1951 construction program and will use the balance of $1,525,000 to purchase at par 13,200 shares of Amere's $25 par value common stock and $795,000 principal amount of Amere's 3¼ percent installment promissory notes; $125,000 principal amount of Distribution's 3¼ percent notes; and 11,000 shares of Transmission's $25 par value common stock. The notes to be issued by Amere and Distribution are to be paid in equal annual installments on February 15th of each of the years 1953 to 1977, inclusive. The proceeds of $1,125,000 to be realized by Amere, of $125,000 by Distribution and of $275,000 by Transmission from the sales of said securities to Seaboard will be used to finance their 1951 construction program.

The proposed issue and sale of the common stock and notes of Amere have been approved by the Public Service Commission of West Virginia, and the proposed issue and sale of notes by Distribution and of common stock by Transmission have been approved by the State Corporation Commission of Virginia.

Notice of the filing of the application-declaration, as amended, having been duly given in the form and manner prescribed by Rule U-23 promulgated pursuant to the act and the Commission not having received a request for a hearing and not having ordered a hearing thereon; and

The Commission finding with respect to the application-declaration, as amended, that the applicable statutory standards are satisfied and that there is no basis for adverse findings, and deeming it appropriate in the public interest and in the interest of investors and consumers that said application-declaration, as amended, be granted and permitted to become effective, and deeming it further appropriate to grant the request of applicants-declarants that the Commission's order herein become effective forthwith:

It is ordered, Pursuant to said Rule U-23 and the applicable provisions of the act that this application-declaration, as amended, be and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

ORDER GRANTING APPLICATION AND PERMITTING DECLARATION TO BECOME EFFECTIVE WITH RESPECT TO ACQUISITION OF STOCK OF UNITED GAS CORP. PURSUANT TO RIGHTS OFFERING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of June A. D. 1951.

Electric Bond and Share Company ("Bond and Share"), a registered holding company, having filed an application-declaration and an amendment thereto, pursuant to the Public Utility Holding Company Act of 1935, with respect to the transactions summarized below, which application, while not admitting the necessity for the filing, requested approval of the transactions proposed under section 12 (f) of the act or such other sections as the Commission may deem applicable.

Bond and Share presently has 2,870,653 (26.95 percent) of the common stock of United Gas Corporation ("United"), held by Bond and Share pursuant to its application to acquire such shares in connection with the reorganization of United's former parent, Electric Power and Light Corporation ("Electric"). In that application, Bond and Share stated that it would "sell, distribute or otherwise dispose of, in such manner as the Commission may permit, all of the common stock of * * * United received by it under the Electric Plan not later than one year (unless such period is extended by the Commission) after the receipt of same by Bond and Share; *Provided, however*, That Bond and Share may, not later than 60 days after entry of an order of the Commission approving the Electric Plan, institute appropriate proceedings before the Commission for relief from its commitment to dispose of such common stock of United and for determination of its rights under the act to hold such common stock of United".

Subsequently, Bond and Share filed an application with the Commission for relief from that commitment and proposing that it be an exempt holding company holding the stock of United, the securities of American & Foreign Power Company, Inc., Ebasco Services, Incorporated, and cash available for investment. Proceedings embracing these proposals are pending before the Commission.

United has filed a separate application setting forth an overall program for financing its construction program (file Card No. 70-2637) which includes the issuance and sale, pursuant to a rights offering, of 1,065,330 shares of its $10 par value common stock. Bond and Share proposes to acquire for cash, from funds on hand, its proportionate interest pursuant to the rights offering, namely, 287,065 shares, and states that it may exercise the over-subscription privilege, if available, to the extent of an additional 287,065 shares of the United common stock.

The application-declaration states that in the event Bond and Share may not retain its present holdings of United (after exhaustion of all available appellate processes) it will dispose of any stock of United acquired under the application herein within the period within which it must dispose of the United stock presently held.

Said application-declaration having been filed on May 25, 1951, an amendment thereto having been filed on June 19, 1951, notice of said filing having been given in the form and manner prescribed by Rule U-23 promulgated pursuant to said act, the Commission not having received a request for a hearing with respect to said application-declaration within the period specified in said notice or otherwise, and the Commission not having ordered a hearing thereon; and

The Commission being of the view that the proposed acquisition is subject to the standards of sections 9 and 10 of the act, and that no adverse findings need be made under the standards of section 10 with respect to the proposed acquisition of shares of United common stock by Bond and Share in the light of the commitment to dispose of such shares as contained in the application, and the Commission observing that the order herein shall not be deemed in any wise to affect determination of the question of whether Bond and Share may obtain relief from its commitment to dispose of the shares of United presently held. (File No. 54–127)

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act, that the application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions contained in Rule U-24.

By the Commission.

[SEAL] NELLYE A. THORSEN,
Assistant Secretary.

NARRAGANSETT ELECTRIC CO.

NOTICE OF PROPOSED NOTE ISSUES

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of June A. D. 1951.

Notice is hereby given that a declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by The Narragansett Electric Company ("Narragansett"), a subsidiary of New England Electric System ("NEES"), a registered holding company. Narragansett has designated section 7 of the act and Rule U-42 (b) (2) promulgated thereunder as applicable to the proposed transactions.

Notice is further given that any interested person may, not later than July 9, 1951, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law raised by said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after July 9, 1951, said declaration, as filed or as amended, may become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

All interested persons are referred to said declaration which is on file in the offices of this Commission for a statement of the transactions therein proposed, which may be summarized as follows:

Narragansett proposes to issue, from time to time but not later than September 30, 1951, additional unsecured short-term promissory notes in an aggregate principal amount not in excess of $3,400,000 and further proposes that the total maximum principal amount of its unsecured short-term promissory notes outstanding at any one time prior to September 30, 1951 be not in excess of $5,800,000. The proposed notes will mature not later than six months after the respective dates thereof and will bear interest at the prevailing rates for such notes. Narragansett states in its declaration that it believes that such interest rate will not exceed 2½ percent. In the event that the interest rate of any of said notes should exceed 2¾ percent per annum, Narragansett proposes to file an amendment to this declaration setting forth therein the name of the bank or banks to which said notes are proposed to be issued and the terms of said note or notes, including the interest rate, at least five days prior to the execution and delivery thereof and, in this connection, Narragansett requests that, unless the Commission shall not notify it to the contrary within said five-day period, said amendment shall become effective at the end of such period. Narragansett further proposes to issue said unsecured promissory notes to one or more of the following named banks or trust companies:

Industrial Trust Co., Providence, R. I.
The Phenix National Bank of Providence, Providence, R. I.
Providence Union National Bank & Trust Co., Providence, R. I.
Rhode Island Hospital National Bank, Providence, R. I.
Rhode Island Hospital Trust Co., Providence, R. I.
The First National Bank of Boston, Boston, Mass.

Narragansett presently has outstanding $3,850,000 principal amount of unsecured short-term promissory notes. The proceeds to be derived from the proposed issuance of $3,400,000 principal amount of notes will be used by Narragansett to pay $1,450,000 principal amount of the presently outstanding notes due prior to September 30, 1951 and the balance of $1,950,000 will be used to finance construction requirements through September 30, 1951, or to reimburse the treasury because of prior construction expenditures.

The declaration states that Narragansett expects that the proposed note indebtedness will be financed permanently through the issuance of common stock to NEES in the latter part of 1951 and has been advised that NEES expects to have the necessary funds to invest in such common stock from the proceeds of the sale of its system gas properties located in Massachusetts.

Incidental services in connection with the proposed note issues will be performed by New England Power Service Company, an affiliated service company, at the actual cost thereof. Such cost is estimated in the declaration at not more than $750.

By the Commission.

Assistant Secretary.

MISSISSIPPI POWER CO.

NOTICE OF FILING REGARDING ISSUANCE AND SALE OF BONDS AT COMPETITIVE BIDDING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of June 1951.

Notice is hereby given that a declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 (the "act"), by Mississippi Power Company ("Mississippi Power"), a public utility subsidiary of The Southern Company, a registered holding company. The filing designates sections 6 (a) and 7 of the act and Rule U-50 promulgated thereunder as applicable to the proposed transactions.

Notice is further given that any interested person may, not later than July 9, 1951, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest, and the issues of fact or law raised by said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after July 9, 1951, said declaration, as filed, or as amended, may be granted as provided in Rule U-23 of the Rules and Regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

All interested persons are referred to this declaration, which is on file in the offices of this Commission, for a statement of the transactions therein proposed, which are summarized as follows:

Mississippi Power proposes to issue and sell pursuant to the competitive bidding requirements of Rule U-50 under the act, $4,000,000 principal amount of its First Mortgage Bonds, __ percent series, due 1981 to be issued under and secured by Mississippi Power's present indenture dated as of September 1, 1941, as heretofore supplemented, and to be supplemented by an indenture to be dated as of August 1, 1951.

The invitations for bids will provide that each bid shall specify the coupon rate for the new bonds, which shall be a multiple of ⅛ percent and the price to be paid the Company, exclusive of accrued interest, which price shall be not less than 100 percent nor more than 102.75 percent of the principal amount of said bonds, plus accrued interest from August 1, 1951.

The proceeds from the sale of the bonds will be utilized in connection with Mississippi Power's construction program which the Company estimates will require expenditures aggregating $16,500,000 during the three year period 1951 through 1953. The Company also estimates that, in order to finance its construction program, it will be necessary to raise about $5,000,000 of additional cash before the end of 1953 through the sale of additional securities of a type not yet determined.

By the Commission.

In re: Accounts maintained in the name of De Twentsche Bank N. V., The Hague, Holland, and owned by persons whose names are unknown. F-49-836.

Under the authority of the Trading With the Enemy Act, as amended, Executive Orders 9193, as amended, 9788 and 9989, and pursuant to law, after investigation, it is hereby found:

1. That the property described as follows: All property, rights and interests in the accounts identified in Exhibit A set forth below and by reference made a part hereof, together with

(a) Any other property, rights and interests which represent accumulations or accruals to, changes in form of, or substitutions for, any of the property, rights and interests in said identified accounts on October 2, 1950, and which are now held in other accounts being maintained as blocked or otherwise subject to the restrictions of Executive Order 8389, as amended, or regulations, rulings, orders or instructions issued thereunder, and

(b) Any and all rights in, to and under any securities (including, without limitation, bonds, coupons, mortgage participation certificates, shares of stock, scrip and warrants) and any and all declared and unpaid dividends on any shares of stock in any of said accounts,

excepting from the foregoing, however, all lawful liens and setoffs of the respective institutions in the United States with whom the aforesaid accounts are maintained,

is property within the United States;

2. That the property described in subparagraph 1 hereof is owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or is evidence of ownership or control by persons, names unknown, who, if individuals, there is reasonable cause to believe are residents of a designated enemy country and which, if partnerships, associations, corporations, or other organizations, there is reasonable cause to believe are organized under the laws of a designated enemy country or on or since the effective date of Executive Order 8389, as amended, have had their principal places of business in a designated enemy country;

3. That the persons referred to in subparagraph 2 hereof are nationals of a designated enemy country;

and it is hereby determined:

4. That to the extent that the persons referred to in subparagraph 2 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country.

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended, and the term "designated enemy country" has reference to Germany or Japan.

Executed at Washington, D. C., on June 5, 1951.

In re: Rights of Fred Bredehoft under insurance contract. File No. F-28-29085-H-2.

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Fred Bredehoft, whose last known address is Germany, is a resident of Germany and a national of a designated enemy country (Germany);

2. That the net proceeds due or to become due under a contract of insurance evidenced by policy No. M 743 876 issued by The Prudential Insurance Company of America, Newark, New Jersey, to Fred Bredehoft, together with the right to demand, receive and collect said net proceeds,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the person named in subparagraph 1 hereof is not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on June 20, 1951.

For the Attorney General.

VOLUME 16 NUMBER 131

Washington, Saturday, July 7, 1951

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10268

RESTORING CERTAIN LANDS COMPRISING PORTIONS OF THE FORT RUGER MILITARY RESERVATION TO THE JURISDICTION OF THE TERRITORY OF HAWAII

WHEREAS certain lands on the Island of Oahu, Territory of Hawaii, were reserved for military purposes by Executive Order No. 395–A of January 18, 1906, as modified by Executive Orders No. 1106 of July 1, 1909, No. 1377 of June 26, 1911, No. 1767 of April 28, 1913, and No. 6408 of November 7, 1933; and

WHEREAS the hereinafter-described parcels of such lands are no longer needed for military purposes, and it is deemed advisable and in the public interest that they be restored to the use of the Territory of Hawaii:

NOW, THEREFORE, by virtue of the authority vested in me by section 91 of the act of April 30, 1900, 31 Stat. 159, as amended by section 7 of the act of May 27, 1910, 36 Stat. 447, it is ordered as follows:

The following-described parcels of land comprising portions of the Fort Ruger Military Reservation, located on the Island of Oahu, Territory of Hawaii, are hereby restored to the jurisdiction of the Territory of Hawaii:

TRACT NO. 1

Beginning at concrete monument No. 19 at the west corner of this piece of land, on the southeasterly side of Lot 10 of Diamond Head Terrace, the coordinates of said point of beginning referred to Government Survey triangulation station "Diamond Head" being 349.65 feet south and 1,673.06 feet west, thence running by azimuths measured clockwise from true south:

1. 241° 30′ 00″ 330.69 feet along Diamond Head Terrace to concrete monument No. 18;
2. 310° 14′ 00″ 81.46 feet along the remainder of Tract I of Presidential Executive Order No. 6408 dated November 7, 1933;
3. 40 14′ 00″ 279.83 feet along the City and County of Honolulu's reservoir site to concrete monument 20;
4. 124° 32′ 50″ 218.43 feet to the point of beginning.

This tract is a portion of Tract No. 1 described in Executive Order No. 6408 of November 7, 1933.

The tract as described contains an area of 0.98 acre, more or less.

TRACTS NOS. 2, 3, AND 4

Tracts Nos. 2, 3, and 4 described in Executive Order No. 6408 of November 7, 1933.

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

PART 20—RETENTION PREFERENCE REGULATIONS FOR USE IN REDUCTIONS IN FORCE

MISCELLANEOUS AMENDMENTS

1. Effective upon publication in the FEDERAL REGISTER, a new paragraph (d) is added to § 6.155 as follows:

§ 6.155 *Economic Stabilization Agency.* * * *

(d) *Salary Stabilization Board*—(1) Chairman of the Board.

(2) Members of the Board.

(R. S. 1753, sec. 2, 22 Stat. 403; 5 U. S. C. 631, 633; E. O. 9830, Feb. 24, 1947, 12 F. R. 1259; 3 CFR, 1947 Supp. E. O. 9973, June 28, 1948, 13 F. R. 3600; 3 CFR, 1948 Supp.)

2. Effective upon publication in the FEDERAL REGISTER, paragraph (b) of § 20.9 is amended to read as set out below. This amendment consists in the deletion of the word "fully" which occurs in two places in the present regulation. It is made because of complaints that some agencies, in the field service in particular, are applying the term "fully qualified" in such a manner that reassignments to continuing positions are unreasonably restricted.

§ 20.9 *Actions.* * * *

(b) *Reassignments to continuing positions in local commuting area.* Reassignment is required in lieu of separation or furlough, within the local commuting area, without interruption to pay status whenever possible, to an available position for which the employee is qualified, unless a reasonable offer of reassignment is refused. No displacement will be required to permit the reassignment of an employee unless such employee is qualified to perform the duties of the position in question without undue interruption to the work program. Subject to these conditions, reassignment is required in each of the following cases; * * *

[Fresh Pea Order 1—1951]

PART 910—FRESH PEAS AND CAULIFLOWER GROWN IN ALAMOSA, RIO GRANDE, CONEJOS, COSTILLA, AND SAGUACHE COUNTIES IN COLORADO

REGULATION BY GRADES AND SIZES

§ 910.314 *Fresh Pea Order 1—1951*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 10, as amended (7 CPR Part 910), regulating the handling of fresh peas and cauliflower grown in the Counties of Alamosa, Rio Grande, Conejos, Costilla, and Saguache in the State of Colorado, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Administrative Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the grade and size limitations, as hereinafter provided, with respect to the handling of fresh peas, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237), in that, as hereinafter set forth, the time intervening between the date when information upon which

this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as soon as possible. A reasonable determination as to the supply of, and the demand for such peas must await the development of the crop; adequate information with respect to acreage was not available to the Administrative Committee until June 11, 1951; the supply and quality of fresh peas is subject to change by weather conditions and adequate information thereon as a basis for recommendation as to the need for, and the extent of, regulation of shipments of such peas was therefore not available until a short time before the beginning of harvest; such recommendation was made by the Administrative Committee at a meeting on June 22, 1951, after consideration of all available information relative to the supply and demand conditions for such peas, and submitted to the Department; and the committee gave prompt and adequate notice to handlers and producers of the recommended regulation and effective time thereof; shipments of the current crop of such peas are expected to begin on or about July 10, 1951, and this section should be applicable to all shipments of such peas in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., m. s. t., July 10, 1951, and ending at 12:01 a. m., m. s. t., September 11, 1951, no handler shall handle any fresh peas unless such peas grade at least U. S. No. 1 and are of a minimum pod length of three (3) inches.

(2) As used in this section, the terms "peas," "handler," and "handle" shall have the same meaning as when used in the amended marketing agreement and order; and the term "U. S. No. 1" shall have the same meaning as set forth in the United States Standards for Fresh Peas (14 F. R. 564) (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 7 CFR Part 910).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

EDITORIAL NOTE: Federal Register Document 51-7642, appearing at page 6347 of the issue for Saturday, June 30, 1951, designated § 936.383, should be designated § 936.409.

[Lemon Reg. 390]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.497 *Lemon regulation 390*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 14 F. R. 3612), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on July 3, 1951, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., July 8, 1951, and ending at 12:01 a. m., P. s. t., July 15, 1951, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 400 carloads;

(iii) District 3: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached to Lemon Regulation No. 389 (16 F. R. 6357), and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2" and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

[Orange Reg. 379]

PART 966—ORANGES GROWN IN CALIFORNIA OR IN ARIZONA

LIMITATION OF SHIPMENTS

§ 966.525 *Orange regulation 379.*—(a) *Findings.* (1) Pursuant to the provisions of Order No. 66, as amended (7 CFR Part 966; 14 F. R. 3614), regulating the handling of oranges grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Orange Administrative Committee, established under the said amended order, and upon other available information, it is hereby found that the limitation of the quantity of such oranges which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of oranges, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Orange Administrative Committee on July 5, 1951, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) Subject to the size requirements in Orange Regulation 372, as amended (7 CFR 966.518; 16 F. R. 4678, 5652), the quantity of oranges grown in the State of California or in the State of Arizona which may be handled during the period beginning 12:01 a. m., P. s. t., July 8, 1951, and ending at 12:01 a. m. P. s. t., July 15, 1951, is hereby fixed as follows:

(i) *Valencia Oranges.* (*a*) Prorate District No. 1: Unlimited movement;

(*b*) Prorate District No. 2: 1000 carloads;

(*c*) Prorate District No. 3: Unlimited movement;

(*d*) Prorate District No. 4: Unlimited movement.

(ii) *Oranges other than Valencia Oranges.* (*a*) Prorate District No. 1: No movement;

(*b*) Prorate District No. 2: Unlimited movement;

(*c*) Prorate District No. 3: No movement;

(*d*) Prorate District No. 4: No movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended order, is hereby fixed in accordance with the prorate base schedule which is set forth below and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "varieties," "carloads," and "prorate base" shall have the same meaning as when used in the said amended order; and the terms "Prorate District No. 1," "Prorate District No. 2," "Prorate District No. 3," and "Prorate District No. 4" shall each have the same meaning as given to the respective terms in § 966.107, as amended (15 F. R. 8712), of the current rules and regulations (7 CFR 966.103 et seq.), as amended (15 F. R. 8712).

TITLE 12—BANKS AND BANKING

Chapter II—Federal Reserve System

Subchapter A—Board of Governors of the Federal Reserve System

PART 263—RULES OF PRACTICE FOR FORMAL HEARINGS

HEARINGS FOR THE PURPOSE OF TAKING EVIDENCE

1. Effective June 28, 1951, Part 263 is amended in the following respects:

a. Paragraph (j) of § 263.3 is amended to read as follows:

§263.3. *Hearings for the purpose of taking evidence.* • • •

(j) Subpoenas requiring the attendance of witnesses from any place in the United States at any designated place of hearing, or requiring the production of documentary evidence, will be issued only by the Board, or such person as the Board may designate for this purpose, and as authorized by law. Application may be made either to the Secretary of the Board or to the person so designated by the Board. Such application must be in writing and must state, as definitely as practicable, the reasonable scope of the evidence sought (reasonably identifying any document desired) and the facts to be proved thereby, in sufficient detail to indicate the materiality and relevance thereof.

b. Paragraph (k) of § 263.3 is amended to read as follows:

(k) Witnesses summoned by the Board at the request of the respondent or of counsel for the Board will be paid the same fees and mileage that are paid to witnesses in the courts of the United States. Such payments as witnesses may be entitled to receive under this section shall be made by the party at whose instance the witnesses appear.

2. a. The purpose of these amendments is to clarify the provisions relating to the issuance of subpoenas and the payments of fees to witnesses.

b. Notice, public participation, and deferred effective date are not required by section 4 of the Administrative Procedure Act for rules of agency procedure or practice, and therefore were not provided in connection with the adoption of these amendments.

(Sec. 11, 38 Stat. 262; 12 U. S. C. 248)

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] S. R. CARPENTER,
Secretary.

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Office of International Trade

[5th Gen. Rev. of Export Regs., Amdt. 63 [1]]

PART 370—SCOPE OF EXPORT CONTROL BY DEPARTMENT OF COMMERCE

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 398—PRIORITY RATINGS AND SUPPLY ASSISTANCE ASSIGNED BY OIT

MISCELLANEOUS AMENDMENTS

1. Section 370.9 *In-transit shipments without unloading*, is amended by adding thereto a note reading as follows:

NOTE: Any commodity which is excepted from the provisions of General In-Transit License GIT (§ 371.9 (c)) and which is manifested to the United States requires a validated license for on-forwarding to all destinations, regardless of whether unladen from a vessel in waters subject to the jurisdiction of the United States.

Commodities which are not so excepted unless originating in Japan or Canada pursuant to § 371.9 (b)) may be on-forwarded under the provisions of § 371.9 to all destinations except Subgroup A countries, Hong Kong, and Macao, as provided in §§ 384.6 and 384.9.

This part of the amendment shall become effective as of June 28, 1951.

2. Section 373.5 *Special provisions for chemicals and medicinals*, is amended to read as follows:

§ 373.5 *Special provisions for chemicals and medicinals*—(a) *General.* All applications for dicense to export chemicals, medicinals, and pharmaceuticals shall state such facts relating to grade, form, concentration, mixtures, or ingredients as may be necessary to identify the commodity accurately.

(b) *Bismuth salts and compounds.* All applications for licenses to export bismuth salts and compounds (bulk), Schedule B No. 813583, shall include (in addition to the total net weight of the commodity) the weight in pounds of bismuth contained in the commodity. This information shall be entered under item 9 (b) of Form IT-419.

This part of the amendment shall become effective as of June 28, 1951.

3. Section 373.16 *Special provisions for certain commodities: evidence of availability* is amended in the following particulars:

Paragraph (b) *Commodities* is amended to read as follows:

(b) *Commodities.* The requirements of this section are applicable to the following Positive List commodities:

Sulfur, crude, crushed, ground, refined, sublimed, and flowers: Schedule B Nos. 571400 and 571500.

All iron, steel, and nonferrous products with the processing codes STEE and NONF, except copper, steel, and aluminum in the shapes and forms described in Schedule I of CMP Regulation 1.[1] (A copy of Schedule I of CMP Regulation 1 is printed as Supplement 2 to Part 398.)

Rayon and special chemical grades of bleached sulfite wood pulp; sulfite wood pulp, bleached, other than rayon and special chemical grades; sulfite wood pulp, unbleached; soda wood pulp; sulfate wood pulp, unbleached; sulfate wood pulp, semi-bleached; ground-wood pulp; other wood pulp and screenings: Schedule B Nos. 460100 through 461900.[2]

Waste-waste tinplate: Schedule B No. 604000.

Construction, excavating and conveying machinery: Schedule B Nos. 720110 through 721500, 722200 through 723510, and 729100.[3]

Tractors, tracklaying type, and parts: Schedule B Nos. 787310 through 787560, and 788901.[3]

This part of the amendment shall become effective as of June 28, 1951.

4. Section 398.4 *Priority assistance for essential export requirements*, is amended by adding thereto a new paragraph (d) to read as follows:

(d) *Steel drums for shipment of petroleum products.* Requests for supply assistance for steel drums to contain petroleum products for export should be submitted pursuant to the provisions of paragraph (b) of this section. The request shall give the information required under paragraph (b) of this section. Information as to end use, effect upon the production or activity abroad, relationship of the production or activity abroad with any of the three categories of export requirements, and validated export license information (paragraphs (b) (5), (8), (11), and (12) of this section) shall relate to the petroleum products to be contained and exported in the drums. The information required by all other subparagraphs of paragraph (b) of this section shall relate to the steel drums.

In addition, the request for supply assistance for such steel drums shall state the name and address of the supplier from whom the applicant normally obtains his requirements for steel drums, the city or town in the United States where the drums will be filled, and a complete description of the petroleum products (including Schedule B number, quantity, and value) to be exported in the drums.

NOTE: Pursuant to a Directive by the National Production Authority, supply assistance will be granted for approximately 125,000 steel drums per month for use as export containers of petroleum products, during the months of June, July, August, and September 1951. Such drums will be 55 gallon capacity and of 18 gauge and lighter. It is estimated that 125,000 drums per month represent approximately 12.5% of the total number of drums necessary each month for the export of licensed quantities of petroleum products normally exported in drums.

The OIT will recommend action to be taken on individual requests (submitted to it) to the National Production Authority. Upon approval of the request, NPA will issue instructions to individual suppliers of steel drums to deliver a stated quantity of steel drums to a named exporter.

This part of the amendment shall become effective as of June 28, 1951.

5. Section 398.5 *Assignment of DO ratings by OIT for Controlled Materials Plan materials*, is amended, in the following particulars:

The following commodities are added to the materials listed in paragraph (c) *Transitional provisions*, subparagraph (2):

Dept. of Commerce Schedule B No.	Commodity
661000	Nickel silver, or German silver, in the following forms (if copper content is 40 percent and over): bars, rods and sheets (copper content) (specify by name).
664905	Beryllium metals, alloys, and scrap in the following forms: beryllium copper rods, beryllium copper strips, beryllium copper wire, and beryllium powder (copper content) (specify by name).
664998	Copper alloys, except brass, bronze, nickel, or gold, in the following forms (if copper content is 40 percent and over): bars, rods, bare wire, shapes, sheet, strip plate, rolls, pipe, tubing castings, and powder (copper content) (specify by name).
669198	Metal and metal composition manufactures, n. e. s. in the following forms: beryllium alloy castings, beryllium alloy tubes, beryllium metal castings, beryllium metal tubes, phosphor copper powder, cupro-nickel strips, cupro-nickel wire, copper nickel wire, nickel silver wire, and dumet wire (copper content) (specify by name).

709810	Building wire and cable.
709830	Weatherproof and slow burning wire.
709850	Insulated copper wire, n. e. s. (copper content) (specify by name).

[1] This amendment was published in Current Export Bulletin No. 626, dated June 28, 1951. The note added to § 370.9 was published in the reprint pages (dated June 28, 1951) for the Comprehensive Export Schedule. These pages were issued with Current Export Bulletin No. 626.

[1] The provisions of this section shall become effective July 16, 1951, with respect to commodities coded NONF made subject to such provisions by CEB 626.

[2] Effective July 2, 1951.

[3] Effective July 16, 1951.

This part of the amendment shall become effective as of June 28, 1951.

(Sec. 3, 63 Stat. 7; 50 U. S. C. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR, 1945 Supp. E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR, 1948 Supp.)

This part of the amendment shall become effective as of 12:01 a. m., July 3, 1951.

2. Certain commodities are changed from R to RO commodities as follows:

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required
206000	Pneumatic tires and casings, new and used: Other truck and bus casings	No.	RUBR 9	250	RO
206030	Other off-the-road casings (except farm tractor and implement)	No.	RUBR 9	250	RO
206450	Farm tractor and implement casings	No.	RUBR 9	250	RO
206490	Other industrial casings	No.	RUBR 9	250	RO
206905	Tire sundries and repair materials: Camelback	Lb.	RUBR 9	100	RO
209800	Compounds of rubber or latex for use in further manufacture: Masterbatch	Lb.	RUBR 13	100	RO
608200	Wire and manufactures: Galvanized wire: Tie wires for reinforcing bars	Lb.	STEE 38	100	RO
609109	Coated wire, iron and steel, n. e. s., except alloy	Lb.	STEE 38	1,000	RO
609198	Other wire and manufactures: Other iron and steel wire manufactures, n. e. s.	Lb.	STEE 38	100	RO
620663	Carbonyl iron powder, for use in the manufacture of magnetic cores for radio and other electrical equipment, and also in pyrotechnics	Lb.	STEE 38	10	RO
663900	Tungsten carbide tool blanks, tips, and inserts (report tungsten carbide metal-cutting tools for machine operation in 744351).	Lb.	TOOL	25	RO
706200	Other electrical apparatus: Starting, lighting and ignition equipment, except spark plugs	.....	TRAN	100	RO
731150	Mining and quarrying machinery: Rock drill bits, detachable, tungsten carbide type	No.	MINE	None	RO
830980	Acids and anhydrides: Inorganic acids and anhydrides, n. e. s.: Tungstic acid and anhydride	Lb.	ACID	25	RO

This part of the amendment shall become effective as of 12:01 a. m., July 1, 1951.

3. The following revisions are made in commodity descriptions. These revisions include changes in validated license control.

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing Code and related commodity Group	GLV dollar value limits	Validated license required
209901	Synthetic rubbers (dry rubber content): Buna S (copolymers of butadiene and styrene) [1]	Lb.	RUBR 14	100	RO
733990	Parts for mining and quarrying machinery: Other parts for mining and quarrying machinery included on the Positive List under Schedule B Nos. 730500 through 733910 for which validated license is required to K and O country destinations.[2]	.....	CONS	100	RO
733990	Other parts for mining and quarrying machinery included on the Positive List under Schedule B Nos. 730500 through 733910 for which validated license is required to R country destinations.[2]	.....	CONS	100	R

[1] The effect of this amendment is to extend the coverage to include Buna-S synthetic rubbers other than GR-S type, which type is already on the Positive List.

[2] The above revised entries are substituted for the third entry presently on the Positive List under Schedule B No. 733990 (Other parts for mining and quarrying machinery, etc.). The effect of this amendment is to change from R to RO control the parts presently included in the third entry for the specific mining and quarrying machinery subject to RO control, under Schedule B Nos. 730500 through 733910.

[1] This amendment was published in Current Export Bulletin No. 626, dated June 28, 1951.

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required
761250	Cannery machinery and parts: Tanks, vats, kettles, piping and allied fixtures made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A" (report steel storage tanks in 604300 if unlined; 620915 if lined).[2]	----------	GIEQ	25	RO
761600	Vegetable-oil mill machinery, and parts: Tanks, vats, kettles, piping, and allied fixtures made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A" (report steel storage tanks in 604300 if unlined; 620915 if lined).[2]	----------	GIEQ	25	RO
761950	Food-processing machinery and parts, n. e. s.: Tanks, vats, kettles, piping, and allied fixtures made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A" (report steel storage tanks in 604300 if unlined, 620915 if lined).[2]	----------	GIEQ	25	RO
839600	Other industrial chemicals: Tungsten chlorides, oxides, salts, and all compounds [4]	----------	SALT 65	25	RO

[1] The above revised entries are substituted for the present three entries on the Positive List for acid-resistant tanks, kettles, piping and fixtures made of alloy steel under Schedule B Nos. 761250, 761600, and 761950, respectively. The effect of these amendments is to extend the coverage of the present entries; to include all tanks, vats, kettles, piping and allied fixtures made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A"; to change from R to RO control all commodities included in the present entries; to add vats to the Positive List as RO commodities by including them in these revised entries; and to reduce the GLV dollar-value limits for the present entries for these commodities under Schedule B Nos. 761600 and 761950, respectively, from $100 to $25.

[4] The above revised entry is substituted for the entry on the Positive List under Schedule B No. 839600 for tungsten compounds, all. This changes the commodity description without making any substantive change in commodity coverage. The substantive effect of this amendment is to change from R to RO control the commodities included in the entry.

This part of the amendment shall become effective as of 12:01 a. m., July 3, 1951.

4. The dollar value limit in the column headed "GLV dollar-value limit" set forth opposite the commodity listed below is amended to read as follows:

Dept. of Commerce Schedule B No.	Commodity	GLV dollar-value limits
830300	Acids and anhydrides: Sebacic acid	None

This part of the amendment shall become effective as of 12:01 a. m., July 3, 1951.

5. The following commodities are removed from the Positive List and placed on general license for exportation to all Group O destinations and to all Group R destinations except those in Subgroup A, Hong Kong, and Macao. Exporters are advised that only those items listed below opposite the specific Schedule B numbers are removed from the Positive List.

Dept. of Commerce Schedule B No.	Commodity
839200 839900	Other industrial chemicals: Nitrates, industrial:[1] Persulfates, n. e. s.:[2]

[1] Attention is directed to the fact that the following nitrates remain on the Positive List: cellulose nitrate, Schedule B Nos. 825200, 825300, and 825400; potassium nitrate, Schedule B No. 833600; ammonium nitrate, Schedule B No. 838100; guanidine nitrate, Schedule B No. 838500; and barium nitrate, Schedule B No. 839000.

[2] Attention is directed to the fact that the following persulfates remain on the Positive List: potassium persulfate, Schedule B No. 833900; sodium persulfate, Schedule B No. 837990; and ammonium persulfate, Schedule B No. 838600.

This part of the amendment shall become effective as of June 28, 1951.

6. Certain commodities are changed from RO to R commodities as follows:

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing Code and related commodity group	GLV dollar value limits	Validated license required
825950	Plastic and resin materials: Synthetic gums and resins in all unfinished forms, except laminated (report laminated sheets, plates, strips, rods, and tubes in 826000): Synthetic gums and resins, including film, bristles, and bristle filament, n.e.s.: All other unfinished forms: Polyacrilic	Lb.	RESN 66	100	R

This part of the amendment shall become effective as of June 28, 1951.

Shipments of any commodities removed from general license to Country Group R or Country Group O destinations, or whose GLV dollar-value limits were reduced, as a result of changes set forth in Parts 1, 2, 3 and 4 of this amendment, which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., July 3, 1951, in the case of the changes set forth in Parts 1, 3 and 4 of this amendment, and prior to 12:01 a. m., July 1, 1951, in the case of the changes set forth in Part 2 of this amendment, may be exported under the previous general license provisions up to and including July 28, 1951. Any such shipment not laden aboard the exporting carrier on or before July 28, 1951, requires a validated license for export.

Section 399.2 *Appendix B—Interpretations: Positive List of Commodities,* is amended to read as follows:

APPENDIX B

COMMODITY INTERPRETATIONS

The commodity interpretations set forth herein are for use in determining (1) the appropriate Schedule B number under which certain commodities are classified, or (2) the validated license requirements for these commodities. They are intended to clarify the question of control where it has been demonstrated that such clarification may prove helpful to the export community, and where such control is not apparent from the Positive List and the regulations.

INTERPRETATION 1: PIPE: CASING AND OIL-LINE

(1) Casing and oil-line pipe, Schedule B Nos. 606250, 606290, 606350, and 606390, have in the past been exported in considerable quantities under general license as pump installation parts. Such shipments were permissible, since pump installation parts do not require validated licenses for export. However, it is necessary to set forth a limitation on the quantity of these commodities that may be exported under general license as pump installation parts.

(2) It has been decided, therefore, that a maximum of 250 feet of the above-described pipe or casing may be exported under general license provided such pipe accompanies the pump requiring its use for installation purposes and also provided such pipe is of appropriate size and type for use with that pump. A validated license is required for any quantity in excess of 250 feet. If, however, the pipe is being shipped separately from the pump, a validated license is required for the full amount of the shipment if it exceeds the GLV value of the commodity.

INTERPRETATION 2: EXPORT OF MACHINES CONTAINING A TOOL OR DEVICE INCORPORATING DIAMONDS

(1) Machines containing as an integral part thereof a tool or device incorporating diamonds are included on the Positive List, and a validated license is required for export of such a machine to any foreign destination.

(2) This interpretation in no way changes the special provisions for diamonds set forth in § 373.9.

INTERPRETATION 3: BALL AND ROLLER BEARINGS AND PARTS

(1) A ball or roller bearing physically incorporated in a segment of a machine or in a complete machine prior to shipment loses its identity as a bearing and the machine or segment of machinery containing the bearing is the item subject to export license requirements.

(2) A ball or roller bearing not incorporated in a segment of a machine prior to shipment but shipped as a component of a complete unassembled (knocked-down) machine is considered a component of the machine, and the complete machine is the item subject to export license requirements.

(3) Ball and roller bearings shipped as spares or replacements are classified in Schedule B Nos. 769100–769315 (Ball and roller bearings and parts). This applies to separate shipments of ball and roller bearings and ball and roller bearings shipped with machinery or equipment for which they are intended to be used as spares or replacement parts.

INTERPRETATION 4: THERMOMETERS

Commodity	Schedule B No.
Thermometers, etched glass stem type	910098
Thermometers, clinical	915750
Thermometers, household type	984098
Other thermometers not falling within the above-named categories	774098

INTERPRETATION 5: PORTABLE SOIL IRRIGATION SYSTEMS

Commodity	Schedule B No.
Portable soil irrigation systems, consisting of specially fabricated pipe and fittings, regardless of length and diameter of such pipe.	787150
Pipe as spares or replacements: Specially fabricated [1] Not specially fabricated	787190 Report in tubular products, according to material.
Fittings as spares or replacements: Specially fabricated for soil irrigation systems Not specially fabricated for soil irrigation systems: If identifiable as pipe fittings If not identifiable as pipe fittings	787150 Report as "pipe fittings," according to type and material. Report as "manufactures," according to material (e. g., aluminum; 626538; iron and steel, 629950).
Pumps, whether or not shipped with the irrigation system	Report in appropriate pump classification.

[1] At least one of the following descriptions shall be applicable in describing portable soil irrigation pipe in order to consider it "specially fabricated":
1. Permanently attached handles for easy handling.
2. Attached quick-action couplings.
3. Beaded and/or cupped pipe ends for special adapters.
4. 10 percent or more of pipe area perforated.

This part of the amendment shall become effective as of June 28, 1951.

Section 399.3 *Appendix C—Commodity Processing Codes,* is amended in the following particulars:

The processing codes for certain commodities are amended to read as set forth below. By this part of the amendment changes are also made in processing codes for Positive List entries (§ 399.1, Appendix A).

Dept. of Commerce Schedule B No.	Commodity	Processing code
724600	Conveyors, bucket, chain, or belt, for coal-mining operations [1]	MINE
729100	Other conveying equipment and parts: Conveyors and parts for coal-mining operations; all-electric vibrating conveyors, and parts;[2]	MINE
729190	Magnetic pulleys and drums 30 inches in diameter and over, either induced or primary; and parts,[1]	MINE
730300–733600	Mining and quarrying machinery [1]	MINE
784010–787367	Tractors, track-laying [4]	CONS
787010–787860	Tractors, wheel type and garden [4]	AGMT
788601	Parts and accessories for track-laying tractors	CONS
788605	Parts, and accessories for wheel type tractors	AGMT

[1] In the Commodity Processing Code list the construction, excavating and conveying machinery classified under Schedule B Nos. 723410–724610 and 724300 except those specifically listed above retain the processing code of CONS.

[2] In the Commodity Processing Code list all the conveying equipment and parts classified under Schedule B No. 729100 except those specifically listed in the above two entries retain the processing code of CONS.

[3] In the Commodity Processing Code list all petroleum field and refining equipment, and parts; pumping equipment, and parts classified under Schedule B Nos. 734210–736260 retain the processing code of CONS. This includes both Positive List and non-Positive List commodities.

[4] The processing codes for the present entries on the Positive List under Schedule B Nos. 787310–787597 and 788601 are changed from FARM to CONS 1. This permits the filing of single applications for Positive List commodities having the same processing code symbol and number.

[4] The processing codes for the present entries on the Positive List under Schedule B Nos. 787610–787850 and 788605 are changed from FARM to AGMT.

This part of the amendment shall become effective as of July 1, 1951.

The processing codes for certain commodities are amended as follows:

Dept. of Commerce Schedule B No.	Commodity	Processing code
706590	Electric incandescent and fluorescent lamps (bulb and tube) parts, except glass bulb and tube blanks: Tungsten contacts and filaments [1]	NONF
707550	X-ray apparatus: Tungsten X-ray targets [2]	NONF
709905	Electrical apparatus and parts, n. e. s.: Tungsten wire coils [2]	NONF

[1] The electrical machinery and apparatus classified under Schedule B Nos. 706710–706555 retain the processing code of CDGS.

[2] The X-ray apparatus classified under Schedule B Nos. 707510, 707550 (except those specifically listed above); and the electric therapeutic apparatus and parts, n. e. s. except X-ray, retain the processing code of SATE.

[3] The electrical machinery and apparatus classified under Schedule B Nos. 709890, 709905, and 709998 (except those specifically listed above), retain the processing code of ELME.

TITLE 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

Subchapter I—Irrigation Projects: Operation and Maintenance

PART 130—OPERATION AND MAINTENANCE CHARGES

CROW INDIAN IRRIGATION PROJECT, MONTANA

JUNE 29, 1951.

On May 24, 1951, there was published in the daily issue of the FEDERAL REGISTER notice of intention to modify § 130.13a *Big Horn Irrigation District, Crow Indian Reservation, Montana; charges;* § 130.13b *Lower Little Horn and Lodge Grass Irrigation District, Crow Indian Reservation, Montana; charges;* § 130.13c *Upper Little Horn Irrigation District, Crow Indian Reservation, Montana; charges* of Title 25, Code of Federal Regulations, dealing with the irrigable lands of the Crow Indian Irrigation Project that are subject to the jurisdiction of the three irrigation districts. Interested persons were thereby given the opportunity to participate in preparing the proposed amendments by submitting their views and data, in writing, within 30 days from the date of publication of the notice. No written comments, data, or arguments having been received within the prescribed period, the said sections are hereby amended as follows and are effective for the season of 1952 and thereafter until further notice:

Charges applicable to all irrigable lands in the Crow Indian Irrigation Project that are included within the boundaries and subject to the jurisdiction of the three irrigation districts.

§ 130.13a *Big Horn Irrigation District, Crow Indian Reservation, Montana; charges.* Pursuant to a contract executed by the Big Horn Irrigation District, Crow Indian Irrigation Project, Montana, and approved by the Secretary of the Interior on June 28, 1948, notice is hereby given that an assessment of $16,900 is hereby fixed for the season of 1952 for the operation and maintenance of the irrigation systems which serve that portion of the project within the confines and under the jurisdiction of the Big Horn Irrigation District. This assessment involves an area of approximately 7,500 acres; does not include any land held in trust for Indians and covers all proper general charges and project overhead.

§ 130.13b *Lower Little Horn and Lodge Grass Irrigation District, Crow Indian Reservation, Montana; charges.* Pursuant to a contract executed by the Lower Little Horn and Lodge Grass Irrigation District, Crow Indian Irrigation Project, Montana, and approved by the Secretary of the Interior on June 28, 1948, notice is hereby given that an assessment of $5,500 is hereby fixed for the season of 1952 for the operation and maintenance of the irrigation systems which serve that portion of the project within the confines and under the jurisdiction of the Lower Little Horn and Lodge Grass Irrigation District. This assessment involves an area of approximately 2,430 acres; does not include any land held in trust for Indians, and covers all proper general charges and project overhead.

§ 130.13c *Upper Little Horn Irrigation District, Crow Indian Reservation, Montana; charges.* Pursuant to a contract executed by the Upper Little Horn Irrigation District, Crow Indian Irrigation Project, Montana, and approved by the Secretary of the Interior on June 28, 1948, notice is hereby given that an assessment of $3,300 is hereby fixed for the season of 1952 for the operation and maintenance of the irrigation systems which serve that portion of the project within the confines and under the jurisdiction of the Upper Little Horn Irrigation District. This assessment involves an area of approximately 1,460 acres; does not include any land held in trust for Indians, and covers all proper general charges and project overhead.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter II—Economic Stabilization Agency

[General Salary Stabilization Regulation 1]

GSSR 1—STABILIZATION OF SALARIES AND OTHER COMPENSATION OF PERSONS EMPLOYED IN BONA FIDE EXECUTIVE, ADMINISTRATIVE, PROFESSIONAL, OR OUTSIDE SALESMEN CAPACITIES, NOT REPRESENTED BY LABOR ORGANIZATIONS

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 8 (16 F. R. 4356), as amended (16 F. R. 5956), this General Salary Stabilization Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This General Salary Stabilization Regulation is issued by the Economic Stabilization Administrator in discharge of his responsibilities under the provisions of the Defense Production Act of 1950 and Executive Order 10161, and pursuant to Economic Stabilization Agency General Order No. 8, as amended. It is designed to stabilize salaries and other compensation of persons who are employed in bona fide executive, administrative, professional or outside salesmen capacities, as each of such terms is defined in section 6.02 of Economic Stabilization Agency General Order No. 8, as amended, and to effectuate the purposes and intent of said Statute and Executive Order and of said General Order No. 8, as amended. Due consideration has been given to the standards established by section 402 of the act.

The purpose of this regulation is to incorporate in a single regulation pertaining solely to employees under the jurisdiction of the Salary Stabilization Board the provisions of General Wage Stabilization Regulation 1 and of the General Wage Regulations applicable with respect to such employees.

Prior to the issuance of General Wage Stabilization Regulation 1 and of the General Wage Regulations, the Wage Stabilization Board distributed to representative labor and industry groups a series of questions, the answers to which would provide such Board with essential information for the development of wage stabilization policies. Thereafter, the Wage Stabilization Board conducted conferences which were attended by representatives of labor and industry, which presented their views respecting the development of wage stabilization policies. In the formulation of General Wage Stabilization Regulation 1 and the Wage Stabilization Regulations there was thus consultation with industry and labor representatives, including trade association and labor union representatives, and consideration was given to their recommendations.

It is contemplated that this regulation will from time to time be supplemented and modified or amended by the Salary Stabilization Board as the Board develops its salary stabilization policy. The issuance of this regulation is not intended in any way to preclude the development of such policy by the Salary Stabilization Board.

AUTHORITY: Sections 1 to 14 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply title IV, Pub. Law 774, 81st Cong.; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105.

SECTION 1. *Definitions.* As used in this regulation:

(a) The word "employees" shall mean persons employed in bona fide executive, administrative, professional or outside salesmen capacities. The terms "outside salesmen" and "bona fide executive, administrative, or professional capacity" shall have the same meaning as provided by regulations under section 13 (a) (1) of the Fair Labor Standards Act, as amended, except insofar as the Salary Stabilization Board, with the concurrence of the Chairman of the Wage Stabilization Board, may determine that certain categories of such employees properly should be under the jurisdiction of the Wage Stabilization Board.

(b) The words "salaries and other compensation" shall include all forms of remuneration to employees by their employers for personal services, including, but not limited to, vacation and holiday payments, night shift and other bonuses, incentive payments, year-end bonuses, employer contributions to or payments of insurance or welfare benefits, employer contributions to a pension fund or annuity, payments in kind, and premium overtime practices and rates.

(c) The word "Administrator" shall mean the Economic Stabilization Administrator.

(d) The word "Board" shall mean the Salary Stabilization Board.

(e) The words "Office of Salary Stabilization" shall mean the Office of Salary Stabilization, formerly designated the Salary Stabilization Division, created by General Order No. 8, as amended.

(f) The words "General Wage Regulations" shall mean the General Wage Regulations heretofore issued by the Administrator and the Wage Stabilization Board.

SEC. 2. *Scope of this regulation.* This regulation relates to all employees as defined in section 1 (a), but relates only to such employees.

SEC. 3. *General stabilization of salaries and other compensation.*[1] (a) Except as authorized by this regulation, no employer shall pay any employee and no employee shall receive "salaries and other compensation" at a rate in excess of the rate at which such employee was compensated on January 25, 1951, without the prior approval or authorization of the Office of Salary Stabilization. New employees shall not be compensated at rates higher than those in effect on January 25, 1951, for the jobs for which they are hired.

(b) Nothing in this regulation shall be construed to require the stabilization of salaries and other compensation for any job at a rate less than that paid during the period from May 24, 1950, to June 24, 1950, inclusive.

(c) Petitions for the approval of any increase in salaries and other compensation not otherwise permitted by this regulation shall be filed with the Office of Salary Stabilization.

SEC. 4. *Increases agreed to or determined and communicated on or before*

[1] Based on General Wage Stabilization Regulation 1 issued by the Administrator on January 26, 1951, and General Wage Regulation No. 1 issued by the Wage Stabilization Board on January 30, 1951.

January 25, 1951.[2] (a) Increases in salaries and other compensation agreed to in writing or determined and communicated to the employees on or before January 25, 1951, but which, by the terms of such agreement or determination, were to become applicable only to work performed later than fifteen (15) calendar days after January 25, 1951, require the prior approval or authorization of the Office of Salary Stabilization.

(b) Authorization is hereby granted for the payment of increases in salaries and other compensation provided for by written agreement executed on or before January 25, 1951, or formally determined and communicated to the employees on or before said date, which increases, by the terms of said agreement or communications, were to take effect and to be applicable to work performed after January 25, 1951, but not later than fifteen (15) calendar days after said date.

(c) Authorization is hereby granted for the increases in salaries and other compensation resulting from the award or decision of an arbitrator or referee issued on or before January 25, 1951, which increases, by the terms of said award or decision, were to take effect and to be applicable to work performed after January 25, 1951, but not later than fifteen (15) calendar days after said date.

(d) Authorization is hereby granted also of payments pursuant to salary increase agreements entered into and effective prior to January 25, 1951, calling for application of a fixed amount of payroll increase to accomplish intra-plant adjustments, but which adjustments were not actually reflected in salary payments prior to that date because of the necessity for determining the allocation and method of applications of such increases among different job classifications.

(e) In all instances in which increases in salaries and other compensation were or are placed in effect under the terms of paragraphs (b) or (c) of this section 4, copies of the agreement, award, or decision providing for such increases, or, if no agreement, award, or decision exists, a statement of the amounts and manner in which the determination was formally made and communicated to the employees, and the date or dates, and place or places, shall, unless heretofore filed with the Wage Stabilization Board or the Office of Salary Stabilization, be filed with the Office of Salary Stabilization within thirty (30) days after the effective date of this regulation.

SEC. 5. *Compliance with statutes and orders establishing minimum rates of compensation.*[3] Increases are hereby authorized in salaries and other compensation of employees to bring such salaries and other compensation into compliance with any applicable statute or order of the duly constituted authorities acting under any law of the United States, or of any State, the District of Columbia, or any Territory or possession of the United States establishing minimum rates of compensation.

SEC. 6. *Increases in salaries and other compensation of State, county, municipal and other non-Federal government employees.*[4] (a) Increases in the salaries and other compensation of State, county, municipal and other non-Federal governmental employees, whose salaries and other compensation are fixed by statute, ordinance, or regulation of duly constituted authorities of such governmental bodies, may be made without the prior authorization of the Office of Salary Stabilization, subject to the provisions of paragraphs (b) and (c) of this section 6.

(b) State, county, municipal, and other non-Federal governments and agencies thereof, in making increases in salaries and other compensation of their employees, are expected to conform to the national wage stabilization policy as expressed in the Defense Production Act of 1950, Executive Order 10161, this regulation, and regulations and statements of policy issued by the Board pursuant thereto, and such orders or regulations as may from time to time be issued thereunder or in connection therewith.

(c) The Office of Salary Stabilization shall have the right to review increases made under the terms of paragraph (a) of this section 6, and to revoke or modify such increases when required in order to effectuate the policies of the Defense Production Act and the applicable orders or regulations issued thereunder or in connection therewith.

SEC. 7. *Adjustments for individual employees.*[5] Pending the issuance of further general regulations on the subjects covered in this Section 7, individual salary adjustments are authorized for employees, without prior approval of the Office of Salary Stabilization, subject to this Section 7.

(a) *Merit and/or length of service increases where plan exists.* Merit and/or length of service increases may be granted in accordance with a plan in effect on January 25, 1951, *Provided:*

(1) That such a plan existed—

(i) In the form of (*a*) a written statement of policy or procedure in effect on January 25, 1951, or (*b*) a written notice that had been furnished to or posted for the employees on or before January 25, 1951, and that

(ii) Such written statement, or notice, shall be kept available at all times for inspection by the Office of Salary Stabilization, and

(2) That such a plan contains job classification rate ranges with clearly designated maximum rates; and

(3) That in accordance with the normal operation of such a plan the employee would normally be reviewed for a merit increase or entitled to a length of service increase at the time the increase is granted, and

(4) That if the plan provides for increases in specific amounts or percentage increases shall not be granted in excess of such amounts or percentages; and

(5) That if the plan does not provide for increases in specific amounts or percentages, the amount of increase granted to any individual employee shall not exceed the figure reached by dividing the total amount of the merit and/or length of service increases granted to individual employees in that classification during the calendar year 1950 by the number of employees in that classification who received such increases. Where job classifications are grouped into labor grades or levels and salary rate administration has been in terms of such grades or levels, the average referred to may be computed for each such grade or level.

(6) That no employee's rate shall be raised above the maximum rate of his job classification.

(b) *Merit and/or length of service increases in absence of plan.* In the absence of an established plan meeting the requirements of paragraph (a) of this section, merit and/or length of service increases may be granted subject to the following conditions:

(1) That the employee shall not have received a merit and/or length of service increase during the 12 calendar months preceding the effective date of such increase, and

(2) That the number of employees whose rates may be increased in any one calendar month shall not exceed the proportionate number of increases granted per month during the calendar year 1950 in each appropriate group of employees, and

(3) That the increase granted any employee shall not exceed in amount the figure reached by dividing the total amount of merit and/or length of service increases granted to employees in the same job classification during the calendar year 1950, by the number of employees in that classification who received such increases; *Provided*, That in an establishment that has no system of job classifications, the increase shall not exceed in amount a figure similarly computed which averages the increases granted to employees doing similar work during the calendar year 1950. Where job classifications are grouped into labor grades or levels and salary rate administration has been in terms of such grades or levels the average referred to may be computed for each such grade or level, and

(4) That no employee shall be raised to a rate higher than the maximum rate of the job classification, or in the absence of a formal system of rate ranges, then the highest rate paid to any employee doing similar work on January 25, 1951, except as such highest rate may have been raised pursuant to the terms of section 4 of this regulation or other actions of the Board or Office of Salary Stabilization authorizing increases in salary rates.

(c) *Promotions and transfers.* When a bona fide promotion or transfer of an employee to a higher paid job is made, the payment to such employee of the rate for such job is permissible provided:

(1) That the employee is required to perform the normal duties of the job to which he is promoted or transferred, and

(2) That if the job to which the employee is promoted or transferred has a rate range, the rate within the range which he may be paid shall be governed by the practice followed under a written statement of policy or procedure existing and in actual operation on January 25, 1951. If such written statement does not exist, the employer shall follow the same practice in determining such rate as he followed in the calendar year 1950. In no event shall the employee receive a rate in excess of the maximum of the rate range to which he is promoted or transferred.

(d) *New or changed jobs.* Rates for new or changed jobs may be established in accordance with plans or procedures in effect on January 25, 1951, or, if no plan or procedure was in effect on such date, the rates established must be in balance with the existing rate structure. Slight or inconsequential changes in job content shall not provide the basis for establishing new job classifications, rates or rate ranges nor justify changes in existing job classifications, rates or rate ranges.

(e) *Hiring of new employees.* A new employee may not be hired at a rate exceeding:

(1) The minimum of the rate range of the job classification into which he is hired, provided that an employee who has special ability and experience may be hired at a rate corresponding to such ability and experience within the rate range, or

(2) The rate of the job, or

(3) The minimum rate paid to any employee doing similar work during the pay period immediately preceding January 25, 1951, if the establishment has no system of job classification.

(f) *Permissible variations in earnings.* Variations in earnings of individual employees subsequent to January 25, 1951, resulting from the following are permissible; *Provided*, Such variations result from the operation of plans or practices in effect on or before January 25, 1951, and further provided that the method of application of such plans or practices is consistent with the method of application over a reasonable period of time prior to January 25, 1951:

(1) The normal operation or application of incentive rates or plans; or

(2) Change from one shift to another; or

(3) The normal operation of a system for payment of commission on sales or business transactions; or

(4) The payment of overtime, premium, or penalty rate; or

(5) Other similar auxiliary pay practices.

(g) *Rates subject to revision.* The rate or rate ranges within which this section 7 is to be operative may be revised pursuant to the other applicable sections of this regulation.

(h) *Record keeping required.* The employer shall keep records of each salary adjustment made pursuant to the terms of paragraphs (a) through (e) of this section 7 in readily accessible form for inspection by the Office of Salary Stabilization.

(i) *Increases shall not justify price increases.* Increases in the salary rates of employees granted under the terms of this section 7 shall not furnish a basis either to increase price ceilings or resist otherwise justifiable reductions in price ceilings.

SEC. 8. *Increases in salaries and other compensation to correct certain inequities*—(a) *Policy.* If general increases in salary levels in an appropriate employee unit have been less than ten (10) percent since the base pay period, future increases in salaries and other compensation may be permitted in amounts up to but not in excess of the difference between such past increases, if any, and the permissible ten (10) percent.[6]

(b) *Definitions under section 8 of this regulation*—(1) *Base pay period.* The base pay period shall be the first regular payroll period for each appropriate employee unit ending on or after January 15, 1950.

(2) *Appropriate employee unit.* An appropriate employee unit for the measurement of changes in salary levels is a group composed of all employees in a plant or other establishment, or in a department thereof, or in a major business division of an employer, or in a company, or in an industry, as best adapted to preserve historical or usual relationships: *Provided, however,* That each such unit shall consist only of employees as defined in paragraph (a) of section 1 of this regulation.

(3) *Salary levels.* Salary levels include time and incentive earnings, commission rates, and actual or prorated sums of any regularly paid bonuses and night shift differentials, but exclude overtime premium payments, employer contributions to or payments of insurance or welfare benefits, employer contributions to pension funds or annuities, and other like allowances. Salary levels may be computed on the basis of regularly scheduled weekly, bi-weekly, semi-monthly, or monthly pay periods.

(4) *General increases in salaries.* For the purpose of calculating prior increases in salary levels, general increases are defined as those increases in salary rates which raised straight-time earnings by one (1) percent or more in the appropriate employee unit. General increases do not include merit increases, promotions, reclassifications, length of service increases or other salary adjustments of the types covered by section 7 of this regulation.

(5) *Other compensation.* Increases in other compensation to be considered for the purpose of applying the policy herein set forth are prorated changes in compensation benefits such as night shift bonuses, overtime premium rates, vacation, holiday and like allowances, pension, insurance, and health and welfare benefits paid by employers, or contributions of employers on account thereof.

(6) *Proration.* Proration of bonuses, commissions, incentive earnings, etc., and of other compensation, to a payroll period shall be done by allocating to said payroll period a proportionate share of the total of such payments within the appropriate employee unit over the calendar year or such shorter period of time as is representative in the case of each class of payments.

(c) *Administration.* Subject to subsequent administrative arrangement increases in salaries and other compensation permissible under the terms of the policy set forth in paragraph (a) of this section 8 do not require the specific prior authorization of the Office of Salary Stabilization: *Provided, however,* That

[2] Based on General Wage Regulation No. 2. The Statement of Considerations in such regulation includes the following statement:

"Collective bargaining conferences, arbitration proceedings and other proceedings directed to the resolution of wage questions were in progress prior to January 25, 1951, the effective date of General Wage Stabilization Regulation 1. In some instances collective bargaining agreements were reached, wage determinations made and awards issued prior to the effective date of that regulation. In the interest of furthering and maintaining sound working relations including collective bargaining and avoiding the imposition of inequities and hardships it is necessary and desirable to recognize and give effect to such agreements, determinations and awards applicable to work performed within a relatively short period of time after January 25, 1951, without prior approval of the Wage Stabilization Board."

[3] Based on General Wage Regulation No. 3.

[4] Based on General Wage Regulation No. 4.

[5] Based upon General Wage Regulation No. 5, as amended by Amendment 1. The Statement of Considerations in such regulation includes the following statement:

"The effective administration of wage stabilization program rests largely on the degree of success achieved in ensuring that individual wage and salary adjustments be not misused for the purposes of evading or avoiding the requirements of law. Efficient industrial management, harmonious labor-management relations and high level production cannot be attained unless a large measure of flexibility and discretion is reserved to management, or to management and labor, as the case may be, in the operation of sound systems for merit and/or length of service increases, promotions or transfers, establishing rates for new or changed jobs, new hirings, etc. It is the intention of the Board in the accompanying general regulation to permit the operation and administration of such systems subject to the standards and controls set forth therein."

[6] This section is based on General Wage Regulation No. 6. The Statement of Considerations in such Regulation includes the following statements:

"There were broad changes in wages, salaries, and other compensation paid employees during 1950 and in January 1951 until the issuance of General Wage Regulation No. 1 by the Economic Stabilization Administrator. These changes followed the period of late 1949 and early 1950, when wage and salary rates had remained relatively unchanged. The consumer price index was also relatively stable in that same period. In the spring of 1950 business conditions improved, and both wages and the cost of living commenced to rise. The outbreak of the Korean war accentuated these developments. Disparities arose as between different groups of employees as a consequence of such factors as different expiration or wage reopening dates in collective bargaining agreements or other special circumstances. Disparities also developed in various industries between increases in wage and salary rates and increases in the cost of living. These disparities were frozen as a result of the issuance of General Wage Stabilization Regulation No. 1 of the Economic Stabilization Administrator. In order to deal with, and attempt to solve this time inequity, or 'catching up' problem, and to facilitate the effective prosecution of the national defense effort, the Wage Stabilization Board has determined and adopted the policies set forth below. These policies are designed to correct such inequities as have arisen because of disparities between increases in wages and salaries and the increase in the cost of living since January 15, 1950, or which may subsequently arise during the period covered by this policy."

no such increase shall be deemed permissible unless appropriate written reports are filed with the Office of Salary Stabilization within 10 days after such increases are made effective showing the essential facts and the method of calculation. These reports are subject to review and the increases on which they report are subject to revocation if they are found to exceed permissible amounts.

(d) *Base pay period abnormalities.* Companies, including appropriate employee units thereof, having no payroll period ending on or about January 15, 1950, because they were not in operation at that time, or having plainly abnormal pay levels during that period because of seasonal peculiarities, broad changes in product mix, wide swings in employment, and the like, may apply to the Office of Salary Stabilization for appropriate and supportable adjustments of the base period pay level figures against which employee compensation changes are to be measured. The Office of Salary Stabilization may give consideration on application to the special problems of seasonal industries; and to unusual cases involving firms or industries in which the rates on or about January 15, 1950, were grossly out of line with their normal relationships, provided the parties had no adequate opportunity to correct such misalignment by January 25, 1951.

(e) *Rare and unusual cases.* In rare and unusual cases where the critical needs of essential civilian or defense production require it, the Office of Salary Stabilization will consider the approval or authorization of increases in salaries and other compensation greater in amount than those specified in paragraph (a) of this section 8. Such cases will be limited to those situations where there are serious manpower shortages and in which other governmental agencies concerned with production and manpower problems certify to the Office of Salary Stabilization that a concerted program has been undertaken to remedy the shortages and that an increase in salaries or other compensation is indispensable to attract required labor to or retain it in essential civilian or defense industries or plants.

SEC. 9. *Adjustments for employees of religious, charitable and educational organizations.*[7] (a) Religious, charitable, scientific, literary, educational organizations, and cemetery companies which are exempt from Federal income taxes under section 101 (5) and (6) of the Internal Revenue Code may adjust the salaries or other compensation of their employees without prior approval of the Office of Salary Stabilization except as provided in paragraphs (b) and (c) of this section 9.

(b) The general authorization contained in paragraph (a) of this section 9 shall not apply to the salaries or other compensation of employees of a business enterprise owned or operated by an organization defined in paragraph (a), if the income of the business enterprise is not exempt from Federal income taxes.

(c) In adjusting salaries and other compensation authorized by paragraph (a), the specified employers are expected to conform to the national wage stabilization policies, as expressed in the Defense Production Act of 1950, Executive Order 10161, this Regulation and regulations and statements of policy issued by the Board pursuant thereto, and such orders or regulations as may from time to time be issued thereunder or in connection therewith.

(d) The Office of Salary Stabilization shall have the right (1) to review all salary adjustments made in pursuance of paragraph (a) of this section 9, and (2) to revoke the authorization granted by this section 9 with respect to any organization defined in paragraph (a) of this section. Without in any way limiting its right to modify or revoke any other section or any other provision of this regulation, the Board shall have the right to modify or revoke section 9 of this regulation at any time without prior notice.

SEC. 10. *Cost-of-living increases provided by salary plans*[8]—(a) *Definitions.* As used in section 10 of this regulation the term "cost-of-living provision" shall mean a provision in a written salary plan which establishes a defined relationship between the rates of salaries and other compensation covered by the plan and the cost-of-living index figure published by the Bureau of Labor Statistics, or such other cost-of-living indices as may be determined by the Administrator or the Board to be acceptable for the purposes of section 10 of this regulation.

(b) *Certain cost-of-living increases permissible without prior approval.* No prior approval is required for the putting into effect of increases which are required by the terms of a cost-of-living provision contained in a written salary plan which was formally determined and communicated to the employees on or before January 25, 1951.

(c) General increases agreed upon or formally determined and communicated to the employees after January 25, 1951, together with cost-of-living increases made pursuant to this section, shall not exceed the ten per cent formula provided in paragraph (a) of section 8 of this regulation.

(d) *Reports of increases made under section 10 of this regulation required.* Reports of increases made under section 10 of this regulation shall be filed with the Office of Salary Stabilization not more than twenty days after any general increase made hereunder is effective. Such reports shall include:

(1) Copies of the written salary plans containing the cost-of-living provisions, unless copies thereof have been filed under section 4 of this regulation.

(2) An identification of the cost-of-living provision in the salary plan, and a statement of the manner in which it was communicated.

(3) A statement of the amount of the increase and the unit of employees to which it is applicable.

(4) A statement of any general increases applicable to the same salaries and other compensation that have been put into effect after January 25, 1951.

(e) No increase herein authorized shall be made effective subsequent to July 31, 1951. This section shall be effective through July 31, 1951.

SEC. 11. *Salary schedules for new plants*[9]—(a) *Definitions.* The term "new plant" means a plant, enterprise, or other employment unit, which on January 25, 1951, had not commenced the production of the materials or services for which it is established or converted.

(b) *Criteria for establishing rates of salaries in new plants.* The following criteria shall be applied in determining and evaluating a schedule of rates of salaries in new plants:

(1) In a new plant of an existing enterprise, established at the same location, the rates of salaries for the jobs in the new plant shall be the same as the lawful rates for the same or comparable jobs in the existing enterprise.

(2) In all other cases the schedule of rates for the new plant shall not exceed:

(i) Rates for the same or comparable jobs in the same industry in the same local labor market area, or, if none

(ii) Rates for the same or comparable jobs in a comparable industry in the same local labor market area, or, if none

(iii) Rates for the same or comparable jobs in the same industry located in the most nearly comparable labor market area.

(3) For the purposes of subparagraph (2) of this paragraph, where only the comparable rates for key jobs are available in a given labor market, such rates may be selected, and the schedule may be constructed by interpolation with proper relationships between the rates of other jobs and the rates of the key jobs.

(c) *Procedures for establishing rates of salaries in new plants.* (1) A new plant shall file with the Office of Salary Stabilization a report containing the following:

[7] Based on General Wage Regulation No. 7.

[8] Based on General Wage Regulation 8. The Statement of Considerations in such regulation includes the following:

"Some collective bargaining contracts and some wage and salary plans in existence on January 25—the effective date of the first general price and wage control regulations—contain provisions for subsequent changes in wages and salaries. Such changes depend on the changes—up or down—in the cost of living. Those adjustments called for within the next few months will be upward because the cost of living has been rising since the Korean conflict.

"For the most part such increases will be covered by the ten per cent allowable rise in General Regulation No. 6. However, a few of the existing contracts and plans will provide in the near future for increases somewhat exceeding the allowable figure. General Regulation No. 6 makes no provision for such cases."

[9] Based on General Wage Regulation No. 9, including Amendment adding section 4 thereto. The Statement of Considerations included in such regulation includes the following statement:

"The purpose of this regulation is to provide procedures for obtaining approval of rates of wages, salaries, and other compensation for employees of new plants, enterprises, and other employment units. Insofar as practicable, these procedures preserve existing practices.

"In the formulation of the provisions hereof it has been impracticable to consult formally with industry and labor representatives."

(i) A statement of the facts relied upon to support the conclusion that it is a new plant; and

(ii) A schedule of the rates of salaries which are in effect for each job classification; and

(iii) A statement explaining how the criteria specified in paragraph (b) of this section 11 have been applied in determining the rates of salaries.

(2) The report required by subparagraph (1) of paragraph (c) of this section must be filed at least three weeks prior to the proposed date for hiring employees. If, after submitting the report, the employer receives no communications pertinent thereto from the Office of Salary Stabilization, the rates may be put into effect, subject to the condition, which shall be communicated by the employer to all employees affected by the schedule, that the rates are interim rates payable pending receipt of a ruling as to their approvability and subject to adjustment with respect to payroll periods beginning after the date of receipt by the employer of any ruling of partial disapproval.

(d) *Requests for modification.* The Office of Salary Stabilization, in accordance with regulations or statements of policy issued by the Board, will consider requests for modification of the criteria specified in paragraph (b) of this section 11 where the application of such criteria with respect to the internal structure of a salary schedule or with respect to supplemental compensation practices would be unworkable or would cause undue hardships in the circumstances of the particular case. Such requests should be accompanied by a full and clear statement of the circumstances on which the request is based. Terms of compensation not in accordance with paragraph (b) of this section 11 may not be put into effect without prior authorization by the Office of Salary Stabilization.

SEC. 12 *Tandem salary increases*[10]—(a) *Definitions.* As used in this section 12 the term:

(1) "Appropriate unit" means a group comprised of all employees in a plant or other establishment or in a department thereof; or in a company; or in an industry; or in a similar appropriate group; as best adapted to preserve the historical or usual relationships.

(2) "Tandem relationship" means a well established and maintained practice whereby the timing, amount and nature of general adjustments in the salaries and other compensation of employees in a given appropriate unit have been directly related to the salaries and other compensation of another unit of employees of the same employer or of other employers, including a unit of employees under the jurisdiction of the Wage Stabilization Board.

(b) *Approval of adjustments to restore tandem relationships.* The Office of Salary Stabilization will entertain petitions for approval of adjustments required to restore tandem relationships which have been disrupted. Such petitions shall contain (1) proof of a tandem relationship, including a statement of how adjustments in the appropriate unit involved have been related, in the past five years, to the adjustments in the unit with which the tandem relationship is claimed; (2) an explanation of the circumstances which have disrupted the tandem relationship; and (3) such other supporting data as the petitioner may deem pertinent. If the tandem relationship has existed for less than five years, a petition for approval may be filed, setting forth the circumstances in full.

SEC. 13. *Modifications and amendments.*[11] This regulation may be modified, amended or superseded by orders or regulations hereafter issued by the Board.

SEC. 14. *General Wage Regulations superseded.* (a) General Wage Stabilization Regulation 1 and the General Wage Regulations are hereby superseded insofar as they apply to employees under the jurisdiction of the Salary Stabilization Board; *Provided, however,* That nothing in this regulation shall affect the validity of the orders or rulings heretofore issued in writing by the Office of Salary Stabilization (formerly the Salary Stabilization Division) or of the orders or rulings issued in writing prior to May 10, 1951, by the Wage Stabilization Board or by the Wage and Hour and Public Contracts Division of the United States Department of Labor.

(b) All pending petitions and applications for rulings heretofore filed with the Wage Stabilization Board, the Wage and Hour and Public Contracts Division of the United States Department of Labor or the Office of Salary Stabilization (formerly Salary Stabilization Division) relating to employees as defined in section 1 (a) of this regulation shall be deemed to have been filed under this regulation.

NOTE: The record keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued: July 5, 1951.

Administrator.

[10] Based on General Wage Regulation No. 10 as amended by Amendment 1. The Statement of Considerations in such regulation includes the following statements:

"The purpose of this general wage regulation is to permit the continuation of tandem wage relationships to the extent consistent with stabilization requirements. As defined in the regulation, 'tandem relationships' refers to an historical practice whereby adjustments of wages, salaries and other compensation for one group of employees have been directly related to those of another group. The other group may be employees of the same employer, or of other employers. Many of these relationships were disrupted because of the issuance of General Wage Stabilization Regulation 1 on January 26, 1951.

"General Wage Regulation 10, issued on March 8, 1951, by the Economic Stabilization Administrator, was designed to permit a limited continuation of these tandem relationships. Under that regulation, the 'follow-the-leader' adjustment, to be covered, would have taken effect and been applicable to work performed on or before February 9, 1951. This limitation as to date is no longer necessary or desirable. The amended regulation deletes this limitation. Experience shows that other modifications of the definition 'tandem relationship' are desirable at this time."

[11] Based on section 6 of the General Wage Stabilization Regulation 1 issued by the Administrator on January 26, 1951.

Chapter XVI—Production and Marketing Administration, Department of Agriculture

[Defense Food Order 1, Amdt. 1]

DFO 1—CASTOR OIL; RESTRICTIONS

It is hereby found and determined that the provisions of this amendatory order are necessary and appropriate to promote the national defense; and it is, therefore, made effective pursuant to the Defense Production Act of 1950 (Public Law 774, 81st Congress, approved September 8, 1950) and delegations of authority thereunder.[1] In the formulation of this order there has been consultation with industry representatives, and consideration has been given to their recommendations. Consultation with representatives of trade associations in the formulation of this order has been rendered impracticable inasmuch as there is no trade association, as such, with respect to the castor oil industry, and this order applies to numerous trades.

The amendments made by this order are designed to facilitate the administration of controls on the inventory and use of castor oil. The definition of the term "castor oil" is made more explicit and certain use liberalizations are made, such being intended to benefit, primarily, the so-called "small users" of castor oil.

The definition of castor oil is revised by the inclusion of the products which result from blending, hydrogenating, esterifying and fractionating castor oil. The small user exemption is raised to a maximum use of 4,200 pounds of castor oil, thereby permitting a person in this category to use, during a calendar quarter, the smaller of (a) 4,200 pounds, or (b) the quantity actually used by him during the base period. The permitted use of castor oil is increased for the "all others" class of products, and for use in the production of leather, rubber factice, lubricating grease, pigment, dye, paint, varnish, lacquer, and petroleum demulsifying agents. No restriction is imposed upon the production of castor resins, and blown, blended, dehydrated, esterified, fractionated, hydrogenated, saponified or sulfonated castor oil when such products are delivered during the then current calendar quarter, to other persons for use in accordance with the provisions of DFO–1 as amended. In effect, however, it is provided that such

[1] Executive Order No. 10161 (15 F. R. 6105), Executive Order No. 10200 (16 F. R. 61), Defense Production Administration Delegation No. 1 (15 F. R. 738), Defense Food Delegation No. 1 (15 F. R. 6424; 16 F. R. 2446, 3311, 3519), Memorandum of Agreement between the Administrator (PMA) and the Administrator, (NPA), 16 F. R. 3410, and NPA Delegation 10 (16 F. R. 3669).

production will be limited to such reasonable quantities as these producers may need to fill their delivery orders during the quarter and not maintain in inventory on the last day of such quarter an amount of such products in excess of their September 30, 1950, inventories.

Defense Food Order No. 1 (16 F. R. 2970) is hereby amended as follows:

A. By deleting the provisions in paragraph (a) of section 1 *Definitions* and inserting, in lieu thereof, the following:

(a) "Castor oil" means that oil, commonly known as castor oil, whether crude, raw, filtered or refined, produced from the castor bean. The term also includes the lipide products which result from the blowing, blending, dehydrating, esterifying, fractionating, hydrogenating, saponifying, sulfonating, or other processing of castor oil. Such term, however, does not include tank bottoms or residues from storage tanks in which castor oil was stored.

B. By deleting the provisions in section 2 *Restrictions on inventory and use of castor oil* and inserting, in lieu thereof, the following:

SEC. 2. *Restrictions on inventory and use of castor oil.* (a) No person shall receive, accept delivery of, or use castor oil except as provided in this order.

(b) Beginning July 1, 1951, and subject to the limitations in paragraph (d) of this section, no person, other than a producer, importer, public warehouseman, or distributor, shall, during any day, receive or accept delivery of any quantity of castor oil if such receipt or delivery when added to the total quantity of castor oil owned by such person during such day would exceed an amount equal to one-third of his permitted usage of castor oil during the then current calendar quarter: *Provided*, That

(1) if such person customarily purchases castor oil in drum lots he may continue to do so and may exceed the limitation provided above by an amount less than 420 pounds; or

(2) if such person customarily purchases castor oil in tank car quantities he may continue to do so and may exceed the limitation provided above by an amount less than the total capacity of a tank car.

(c) Commencing with the calendar quarter beginning on July 1, 1951, no person shall use, during any calendar quarter, in any class use listed in Appendix A an aggregate quantity of castor oil in excess of the quantity obtained by multiplying the quantity of castor oil he used in the same class use during the base period by the percent specified in Appendix A for such class use. However, any person who used during the base period castor oil in the form of castor resins which he acquired from another person for any class use listed in Appendix A may include as a part of his base period castor oil use 40 percent of the weight of the solids of the castor resins so used. The use of castor resins acquired from another person shall, for the purpose of this order, be deemed as a use of castor oil to the extent of 40 percent of the weight of the castor resins solids used.

(d) During any calendar quarter, any person may use castor oil in any amount in the production of castor resins, and blown, blended, dehydrated, esterified, fractionated, hydrogenated, saponified, or sulfonated castor oil: Provided, that the aggregate quantity of such products (irrespective of whether produced by such person) owned by him on the last day of such calendar quarter does not exceed the total quantity of the same products owned by him on September 30, 1950. However, the use of any such product is subject to the limitations prescribed in paragraph (c) of this section.

(e) Any person who used not more than a total of 4,200 pounds of castor oil during the base period may use, during any calendar quarter, an aggregate amount of castor oil which is not in excess of his actual base period use.

(f) Any person who used more than a total of 4,200 pounds of castor oil during the base period and whose use during any calendar quarter is otherwise limited under this order to less than 4,200 pounds may, during such calendar quarter, use an aggregate amount of castor oil not in excess of 4,200 pounds.

(g) The Director is authorized to amend Appendix A, from time to time, whenever he determines it to be necessary or appropriate to promote the national defense.

C. By deleting the provisions in paragraph (b) of Sec. 3 *Exemptions* and inserting, in lieu thereof, the following:

(b) This order shall not apply to any person whose use of castor oil during a calendar quarter does not exceed 60 pounds of castor oil.

D. By inserting the words "during any calendar quarter" immediately following the phrase "of castor oil" in the introductory clause of paragraph (a) of section 4 *Records and reports.*

E. By deleting the provisions in *Appendix A to Defense Food Order No. 1* and inserting, in lieu thereof, the following:

Class Use	*Percent*
Sebacic acid	Unlimited
Medicinal and pharmaceutical preparations	100
Protective linings for the inside of food containers	100
Demulsification of petroleum products	100
Synthetic, foam and natural rubber	100
Rubber factice	100
Hydraulic fluid	100
Electrical insulation	100
Leather	100
Textiles	60
Imitation leather and coated fabrics	60
Brake lining	60
Paint, varnish, and lacquer	60
Pigment and dye	60
Lubricating grease	60
Plastics	60
All other	30

This order shall become effective upon publication in the FEDERAL REGISTER. With respect to violations, rights accrued, liabilities incurred, or appeals taken with respect to said Defense Food Order No. 1 prior to the effective time of the provisions hereof, all provisions of said Defense Food Order No. 1 shall be deemed to continue in full force and effect for the purpose of sustaining any proper suit, action, or other proceeding with respect to any such violation, right, liability, or appeal.

NOTE: The reporting requirements of this order have been approved by, and subsequent reporting and record-keeping requirements will be subject to the approval of, Bureau of the Budget in accordance with the Federal Reports Act of 1942.

DFO-3—AGRICULTURAL IMPORTS RESTRICTIONS

Correction

In Federal Register Document 51-7640, appearing at page 6389 of the issue for Saturday, June 30, 1951, the introductory paragraph should read as follows:

It is hereby found and determined that the provisions of this order are necessary and appropriate to promote the national defense; and this order is, therefore, made effective pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), and delegations of authority thereunder. Consultation with industry representatives in the formulation of this order has been rendered impracticable. All of the items subject to this import order are presently included among the items subject to similar controls under the Agriculture-Import Order (14 F. R. 3701, 4660; 16 F. R. 1113). The statutory authority pursuant to which the Agriculture-Import Order was issued will expire at the close of June 30, 1951, unless it is extended. It is essential that import controls over the items covered by this Defense Food Order not be allowed to lapse. Time is not available to permit communication with representatives of the numerous segments of the economy affected by this order. Accordingly, consultation with industry representatives has been omitted.

TITLE 36—PARKS, FORESTS, AND MEMORIALS

Chapter II—Forest Service, Department of Agriculture

PART 211—ADMINISTRATION

APPEALS FROM ADMINISTRATIVE ACTION

By virtue of the authority vested in the Secretary of Agriculture by the act of June 4, 1897 (30 Stat. 35, 16 U. S. C. 551), and the act of February 1, 1905 (33 Stat. 628, 16 U. S. C. 472), Regulation A-10 of the regulations relating to the occupancy, use, protection and administration of the national forests, which constitutes § 211.2, Chapter II, Title 36, Code of Federal Regulations, is hereby amended to read as follows:

§ 211.2 *Appeals from administrative action.* (a) An appeal may be taken from any administrative action or decision by filing with the officer who rendered the decision a written request for reconsideration thereof or notice of appeal. Decisions of forest officers shall be final unless appeal is taken therefrom within thirty days from the date of the decision or unless the appellant furnishes satisfactory reasons for allowing a longer time. The decision appealed from shall be reviewed by the immediate superior of the officer by whom the decision was rendered; that is, in the following order: Forest supervisor, regional forester, Chief of the Forest Service, and Secretary of Agriculture.

(b) Unless the written notice of appeals or a subsequent written application contains an acceptable reason for allowing a longer time for the preparation of the case, the appellant shall file within thirty days after the filing of the notice of appeal a statement or brief setting forth in detail the respects in which the action or decision from which appeal is taken is contrary to or in conflict with the law, the regulations of the Secretary, or the determined facts. Upon receipt of such statement or brief the officer from whose action or decision the appeal is made shall prepare a statement or brief reviewing the case and presenting the facts and considerations upon which his action or decision is based. The two statements or briefs, together with all papers conprising the record in the case, shall then be transmitted to the officer to whom the appeal is made, who will thereupon review the case and advise both the appellant and the subordinate officer of his decision.

(c) The officer to whom an appeal is made, upon the written request of the appellant, will afford the appellant the opportunity to present his case at a hearing. Such officer will select the time and place at which the hearing will be held, and will designate the person to conduct the hearing.

(d) The appellant may be represented by an attorney at such a hearing. The Forest Service may request the Office of the Solicitor to represent it at such a hearing.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 1—ESTABLISHMENT AND ORGANIZATION OF THE POST OFFICE DEPARTMENT

OFFICE OF HEARING EXAMINER; ASSIGNMENT AND DUTIES

In § 1.9 *Office of the Postmaster General* (39 CFR 1.9, 15 F. R. 4681), make the following changes:

a. Amend paragraph (b) to read as follows:

(b) *Officers attached to.* The Deputy Postmaster General, the Administrative Assistant to the Postmaster General, the Solicitor, the Chief Post Office Inspector, the Executive Assistant to the Postmaster General, the Chief Clerk and Director of Personnel, the Comptroller, the Purchasing Agent, and the Hearing Examiners.

b. In paragraph (f) (1) strike out "with the supervision of all proceedings before the department, arising out of the enforcement of the postal fraud, lottery and fictitious statutes, and with the making of recommendations to the Postmaster General relative to the issuance of orders pursuant to the provisions of such laws", and insert in lieu thereof "with the preparation and presentation before the hearing examiners of all cases in which final adjudication is required by the Administrative Procedure Act to be made upon the record after opportunity for agency hearing."

c. Add paragraph (l) to read as follows:

(l) *Hearing examiners.* The hearing examiners, one of whom shall be designated as the Chief Hearing Examiner, are assigned, under the direction and control of the Postmaster General, the duty of hearing and receiving evidence in all proceedings before the Post Office Department wherein final adjudication is required by the Administrative Procedure Act to be made upon the record after opportunity for an agency hearing. The Chief Hearing Examiner and all hearing examiners assigned shall exercise all power and authority vested in them by law and by the rules of practice promulgated by the Postmaster General. In the absence of the Chief Hearing Examiner the hearing examiners in the order of their standing shall act in his stead.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; Reorg. Plan No. 3 of 1949; 5 U. S. C. 22, 133z-15, 369)

The foregoing amendments shall become effective July 8, 1951.

[SEAL] J. M. DONALDSON,
Postmaster General.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 106]

DRY BEAN WAREHOUSE REGULATIONS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given in accordance with section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003 (a)) that the Secretary of Agriculture proposes to amend the Dry Bean Warehouse Regulations (7 CFR Part 106) under the United States Warehouse Act, as amended (7 U. S. C. 241-273) as follows:

1. Section 106.2 (q) defining "dockage" would be deleted.

2. Section 106.2 (r) would be redesignated as "(q)" and amended to read:

(q) "Defects" means defects as defined in the official bean standards of the United States.

3. A new § 106.3a would be added to read:

§ 106.3a *Space to be covered by application.* All space within the same city or town operated for the storage of beans by an applicant for a warehouseman's license shall be included in the application. Should a licensed warehouseman acquire any additional bean storage space within the same city or town in which his licensed warehouse is located, he shall file promptly an application to include such space in his license, or surrender the license.

4. The third sentence in § 106.7 would be amended by redesignating paragraph (e) thereof as (f), deleting the word "or" immediately preceding it and inserting a new paragraph (e) to read "has failed to file an application to include additional warehouse space under license as provided for in § 106.3a, or". The fourth sentence in said section would be amended to read: "Whenever any of the conditions mentioned in paragraphs (a) through (f) of this section shall come into existence it shall be the duty of the warehouseman to notify the Administrator immediately of such condition."

5. Section 106.16 (a) (9) would be amended to read "(9) the net weight of the beans including defects, if any".

6. Section 106.16 (a) would be further amended by deleting therefrom the phrase ", and (11) a statement indicating the amount of shrinkage and/or pickage agreed upon between the depositor and the warehouseman, in the case of nonidentity preserved beans,", adding a period at the end of the remaining portion of § 106.16 (a), and inserting the word "and" before the figure "(10)".

7. Section 106.16 would be amended by adding thereto new paragraphs (g), (h), and (i) reading, respectively, as follows:

(g) Every receipt issued for beans shall specify whether the beans covered by it are stored identity preserved or on a fungible basis.

(h) Every receipt issued for uncleaned beans or beans "in the dirt", stored on a fungible basis, shall embody within its written or printed terms a statement showing the percentage of sound beans, and the total percentage of defects, in addition to the other statements required by this section. Such a receipt may also provide that the beans covered by it may be cleaned while the receipt is outstanding.

(i) Every receipt issued for beans to be stored identity preserved shall provide for delivery of the identical beans deposited in the warehouse. Every receipt issued for beans which were cleaned before storage and are to be stored on a fungible basis shall provide for delivery of the net weight, class, and grade of beans specified in the receipt. Every receipt issued for uncleaned beans to be stored on a fungible basis shall provide for delivery of (1) if the beans are not cleaned while in storage, the net weight and class of beans containing not less than the percentage of sound beans specified in the receipt, and (2) if the beans are cleaned while in storage, beans grading U. S. No. 3 or better of the class specified in the receipt and of sufficient quantity to yield, after allowance for defects in the beans being delivered, the weight of sound beans covered by the receipt.

8. Section 106.18 (b) would be amended to read:

(b) Before such new or duplicate receipt may be issued the warehouseman and the person to whom it is to be issued shall comply with the applicable statutes of the United States or of any of the States relating to issuance of such a receipt. If there is no such statute applicable, the warehouseman shall require the person to whom the new or duplicate receipt is to be issued to make and file with the warehouseman (1) an affidavit showing that he is lawfully entitled to the possession of the original receipt, that he has not negotiated or assigned it, how the original receipt was lost or destroyed, and if lost, that diligent effort has been made to find the receipt without success, and (2) a bond in an amount double the value, at the time the bond is given, of the beans represented by the lost or destroyed receipt. Such bond shall be in the form approved for the purpose by the Secretary, or his designated representative, shall be conditioned to indemnify the warehouseman against any loss sustained by reason of the issuance of such new or duplicate receipt, and shall have as surety thereon preferably a surety company which is authorized to do business, and is subject to service of process in a suit on the bond, in the State in which the warehouse is located, or at least two individuals who are residents of such State and each of whom owns real property therein having a value, in excess of all exemptions and encumbrances, equal to the amount of the bond. However, when the beans for which a new or duplicate receipt is to be issued belong to a Federal Government Agency and there is no Federal statute applicable and compliance with the relevant State statutes or the requirements of this paragraph as set forth above would burden the proper performance of the functions of such agency, in lieu of such compliance a new or duplicate receipt may be issued upon the furnishing of bond by the United States Treasury Department under section 3b of the Government Losses In Shipment Act (5 U. S. C. 134b–2) or, if the commodity belongs to the Commodity Credit Corporation, upon the furnishing of a Certificate of Indemnity issued by an authorized official of the Commodity Credit Corporation.

9. Section 106.21 would be amended by adding at the end thereof a new sentence reading as follows: "Before delivery is made of the last portion of a lot of beans covered by a nonnegotiable receipt, the receipt itself shall be surrendered."

10. Section 106.27 relating to shrinkage of beans would be deleted and §§ 106.28 through 106.34 would be renumbered as §§ 106.27 through 106.33.

11. Present § 106.35 would be redesignated as § 106.34 and would be amended by adding at the end thereof the following sentence: "After beans stored as substandard grade beans in accordance with § 106.45 have been cleaned while in storage, their grade and weight shall promptly be redetermined and recertified by a licensed inspector and weigher and copies of the reinspection and reweighing certificates shall be disposed of as provided in § 106.54."

12. A new § 106.35 would be added to read:

§ 106.35. *Storage of uncleaned beans.* Uncleaned beans, or beans "in the dirt", stored on a fungible basis as substandard grade beans under § 106.45, may be cleaned while in storage without prior return of the receipt therefor if such receipt so provides and calls for the delivery of (a) in case the beans are not cleaned while in storage, the net weight and class of beans containing not less than the percentage of sound beans specified in the receipt; and (b) in case the beans are cleaned while in storage, beans grading U. S. No. 3 or better of the class specified in the receipt, and of sufficient quantity to yield, after allowance for defects in the beans being delivered, the weight of sound beans covered by the receipt. The obligation of a warehouseman to deliver beans under such a receipt may be discharged by a delivery as provided in either paragraphs (a) or (b) of this section. The warehouseman shall not make any milling or cleaning charge for beans delivered as provided in paragraph (a) of this section.

13. Section 106.36 would be amended to read:

§ 106.36 *Delivery of beans from storage.* Except as may be provided by law or by the regulations in this part, each warehouseman upon proper presentation of a receipt for beans and payment or tender of all advances and legal charges as stated in the receipt shall deliver beans in accordance with the terms of the receipt.

14. Section 106.37 would be amended to read:

§ 106.37 *System of accounts.* Each warehouseman shall use for his warehouse a system of accounts, approved by the Administrator, which shall show for all beans stored, the name of the depositor, the weight of the beans, the number of bags in each lot when beans are stored in bags, the grade when grade is required to be or is ascertained, the number of any inspection or weight certificate isued on the beans, the location in the warehouse, and the dates received for and delivered out of storage. In the case of beans the identity of which is to be preserved, the tag number or stencil identification mark provided for in § 106.32 shall be shown. A record shall also be kept of receipts issued and cancelled. A separate record of the foregoing shall be kept for each depositor. The accounts shall also include a detailed record of all moneys received and disbursed and of all effective insurance policies.

15. Section 106.42 would be amended to read:

§ 106.42 *Weighing apparatus.* The weighing apparatus used for ascertaining the weight of beans stated in a receipt or certicate shall be a part of the equipment of the warehouse, shall be so located that all beans can be weighed in and out of the warehouse, shall be under the control and supervision of the warehouseman at all times, and shall be subject to examination by representatives of the Department and to disapproval by the Administrator. If the Administrator disapproves any weighing apparatus it shall not thereafter be used in ascertaining the weight of any beans for the purposes of the act and the regulations in this part unless such disapproval in withdrawn.

16. Section 106.45 would be amended to read:

§ 106.45 *Uncleaned beans; beans unsuitable for storage.* Uncleaned beans, or beans "in the dirt", may be stored as substandard grade beans. However, a warehouseman shall not, under any circumstances, accept for storage any beans which have a moisture content in excess of 17 percent, or which contain foreign material likely to injure the keeping qualities of the beans or adversely affect their commercial value for their particular grade, or which are otherwise of a condition rendering them unsuitable for storage, but he may accept such beans for conditioning purposes and for storage after conditioning.

17. Section 106.54 would be amended to read:

§ 106.54 *Copies of certificates.* When an inspection or weight certificate has been issued by a licensed inspector or weigher, a copy of such certificate shall be filed with the warehouseman in whose warehouse the beans covered by such certificate are stored. Such copy shall become a part of the records of the warehouseman, In the case of beans cleaned while in storage and regraded and reweighed as required by § 106.34, the original copy of the certificates issued on such regrading and reweighing shall be filed with the warehouseman, and shall be used for the purpose of determining the class and grade of beans with which said cleaned beans may lawfully be mingled in storage. The number of the warehouse receipt issued for the beans covered by any certificate shall be written on the certificate before filing.

18. Section 106.63 (g) would be amended to read:

(g) the class, the grade, the total and individual percentages of defects as specfied in the official bean standards, the percentage of sound beans, and the condition of the beans for storage at the time of inspection.

19. A new § 106.63a would be added to read:

§ 106.63a *Defects.* Defects shall be calculated in terms of percentage based upon the total weight of the beans including the defects.

20. Section 106.64 (g) would be amended to read:

(g) the net weight of the beans including the defects, if any.

21. Wherever in the regulations in Part 106 the word "variety" appears, the word "class" would be substituted therefor, and wherever in said regulations the figures "§ 106.33" appear, the figures "§ 106.32" would be substituted therefor.

The primary purpose of the proposed amendments is to permit the storage in federally licensed warehouses of uncleaned beans on a fungible basis and the cleaning of such beans while in storage without the return of the warehouse receipts therefor. It is also proposed to impose stricter requirements with respect to the delivery of beans under receipts issued for beans "in the dirt" which are not cleaned while in storage. It is further proposed to require applications for warehouse licenses to cover all space used by the applicants for bean storage purposes in the same city or town; to provide different methods than are now prescribed in the regulations by which Federal Government agencies can obtain duplicates of lost or destroyed receipts for products owned by them; to enlarge upon the requirements for warehousemen's records and weighing apparatus; and to make certain formal changes in the regulations for consistency or clarity.

Any interested person who wishes to submit written data, views, or arguments concerning the foregoing proposed amendments may do so by filing them with the Director of the Transportation and Warehousing Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C. within 15 days after publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 3d day of July 1951.

Secretary of Agriculture.

BURLEY, FLUE-CURED, FIRE-CURED, DARK AIR-CURED, AND VIRGINIA SUN-CURED TOBACCO

NOTICE OF FORMULATION OF REGULATIONS RELATING TO ESTABLISHMENT OF TOBACCO FARM ACREAGE ALLOTMENTS

Pursuant to the authority contained in the applicable provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301, 1312, 1313, 1375), the Secretary of Agriculture is preparing to formulate regulations governing the establishment of farm acreage allotments and normal yields for marketing quotas to be in effect during the 1951–52 marketing year for Burley, flue-cured, fire-cured, dark air-cured, and Virginia sun-cured tobacco.

Subsection (a) of section 312 of the act requires the Secretary to proclaim a national marketing quota for each marketing year for each kind of tobacco for which a national marketing quota was proclaimed for the immediately preceding marketing year. Marketing quotas were proclaimed for the 1951–52 marketing year for Burley tobacco (15 F. R. 8216) (16 F. R. 1931), flue-cured tobacco (15 F. R. 8216) (16 F. R. 1931), fire-cured tobacco (15 F. R. 8237), dark air-cured tobacco (15 F. R. 8237), and Virginia sun-cured tobacco (15 F. R. 8237).

Growers of Burley and flue-cured tobacco voting in referenda held on November 26, 1949, and July 23, 1949, respectively, approved marketing quotas for the marketing years 1950–51 through 1952–53. Growers of fire-cured and dark air-cured tobacco voting in referenda held on November 27, 1948, approved marketing quotas for the marketing years 1949–50 through 1951–52. Therefore, the regulations to be formulated with respect to fire-cured and dark air-cured tobacco for the 1952–53 marketing year will be contingent on referenda to be held this fall on quotas for such kinds of tobacco. Growers of Virginia sun-cured tobacco voting in a referendum held on December 15, 1949, approved marketing quotas for the marketing years 1950–51 through 1952–53.

It is proposed that the regulations for the 1952–53 marketing year be substantially the same as the regulations now in effect for the 1951–52 marketing year.

Prior to the final adoption and issuance of these regulations, consideration will be given to any data, views, and recommendations pertaining thereto which are submitted in writing to the Director, Tobacco Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C. All submissions must be postmarked not later than ten days after the date of publication of this notice in the FEDERAL REGISTER in order to be considered.

Issued at Washington, D. C. this 2d day of July 1951.

[SEAL] G. F. GEISSLER,
Administrator.

[7 CFR Part 946]

HANDLING OF MILK IN LOUISVILLE, KY., MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS THERETO WITH RESPECT TO A PROPOSED MARKETING AGREEMENT AND A PROPOSED ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order, as amended, regulating the handling of milk in the Louisville, Kentucky, marketing area.

Interested parties may file written exceptions to this recommended decision with the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 10th day after the publication of this recommended decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. Public hearings, on the record of which the proposed marketing agreement and the proposed order, as amended, were called by the Production and Marketing Administration, United States Department of Agriculture, following receipt of petitions filed by the Falls Cities Cooperative Milk Producers' Association, Inc., Louisville, Kentucky. Additional proposals were submitted by Louisville Milk Dealers' Association, Ideal Pure Milk Company, Inc., and Dairy Branch, Production and Marketing Administration. The public hearings were conducted at Louisville, Kentucky on December 18–21, 1950 and on March 9 and 14, 1951 pursuant to notices duly published in the FEDERAL REGISTER (15 F. R. 8827 and 16 F. R. 2041, respectively).

The material issues presented on the record of the hearings were whether:

1. The level of Class I prices should be revised.

2. Deductions for the fall production incentive payment plan should be increased and the method of distributing payments should be revised.

3. An emergency exists which warrants immediate effectuation of the proposed amendments to the provisions relating to classification, pricing, and payments.

4. The order should be amended to provide for a definition of "pool plant" which is based on the extent to which the operations of such plants are associated with the marketing of fluid milk in the marketing area, and which would include all portions of such plants used during the month in the processing of producer milk.

5. The definition of "producer" should be amended to clearly define the regular

source of supply of graded milk for the market.

6. Provisions applicable to the procedure for determining plant shrinkage and the classification thereof should be amended.

7. Language of the order should be clarified with respect to responsibility of handlers in determining the classification and reclassification of skim milk and butterfat.

8. Class I and Class II milk should be included in one class.

9. The order should be clarified with respect to the classification of milk which was received from producers and transferred to other plants.

10. The level of the basic formula price should be revised.

11. The level of prices for Class III should be revised.

12. The Class I butterfat differential should be reduced.

13. Prices charged handlers for Class I milk and uniform prices to be paid producers for milk received at pool plants located 50 miles or more from Louisville should be adjusted by a location differential.

14. Other administrative changes should be made.

Findings and conclusions. The evidence introduced at the hearings and the record thereof indicated the need for prompt action with respect to issues Nos. 1 through 3. Accordingly, a recommended decision with respect to these issues was issued April 11, 1951 (16 F. R. 3307). After consideration of exceptions thereto, the Secretary issued a final decision April 23, 1951 (16 F. R. 3588) and an order April 25, 1951 (16 F. R. 3639) effective May 1, 1951. The following findings and conclusions on issues Nos. 4 through 14 are based upon the evidence introduced at the hearings and the record thereof and are supplementary to the findings and conclusions made with respect to the aforesaid decision.

4. The order should be amended to provide for a definition of "pool plant" which would make the participation of supply plants in the pool dependent upon the level of participation of such plants in the marketing of fluid milk in the marketing area, and which would include all portions of such plant used during the month in the processing of producer milk.

Currently, the order provides for the participation in the market wide pool of any plant at which milk is received from producers and from which milk or cream is disposed of in the marketing area for consumption as fluid milk or fluid cream, or any plant at which milk is received from producers and which is approved by the appropriate health authority in the marketing area to furnish milk or cream to a plant from which milk or cream is so disposed.

Producers contend that the present provision is inadequate in that sources of milk which have not fully demonstrated themselves to be a part of the regular supply for the market, may be priced and included in the pool. The only requirement is that a plant be approved by the appropriate health authority in the marketing area for receiving producer milk which may be furnished to another plant which is also approved by such health authority for the distribution of fluid milk or fluid cream in the marketing area. There is no provision requiring that such milk, or any portion thereof, actually be furnished to the Louisville market.

The record indicates there are three so-called country plants or receiving stations in the Louisville milk shed at which producer milk is received and which have facilities approved by the appropriate health authority in the marketing area for receiving milk for shipment to a plant in the city for distribution on routes. One of these plants, located approximately equidistant from the Cincinnati, Ohio and Louisville marketing areas, is operated by a handler who does not process milk for distribution on routes, but who has made bulk shipments to another handler during the short production season when the milk was needed for bottling purposes. There is some question on the record whether the supply from this plant is available to other handlers for bottling purposes.

The remaining two approved country plants, located at Madison, Indiana and Taylorsville, Kentucky, are operated by a handler as receiving stations for his bottling plant located in the marketing area. The supply of these plants is channeled into manufacturing outlets when it is not needed for fluid uses.

It is not appropriate that approved supplies for Louisville be withheld for manufacturing uses when needed by other handlers for fluid uses. Such supplies are instrumental in determining the order price levels within the market, and therefore should be available for Class I use.

It is therefore concluded that during the period of October through March a receiving station (defined herein as a country plant) may participate in the pool during any of the months in which 10 percent of its receipts of milk from producers is delivered in the form of milk, skim milk, or cream to a plant where milk is processed and distributed as Class I milk on routes or through plant stores in the marketing area (defined herein as a city plant). During the period of April through September, a receiving station would participate in the pool only if more than 50 percent of its combined receipts from producers during the preceding period of October through February were delivered to city plants, unless the operator of such receiving station notifies the market administrator in writing on or before March 15 of the withdrawal of such plant from the pool for the April–September period. In such an event, the operator of the plant would be free of the obligation to pay the minimum order prices to suppliers. In this connection, the interest of producers and handlers in the uniformity of application of class price should be protected by requiring any handler to make a compensatory payment to the producer-settlement fund if he purchases Class I milk from such a plant or from an otherwise unregulated nonpool plant. This payment on milk sold as Class I under the Louisville order would be at the rate of the difference between the Class II and the Class I price adjusted by the butterfat differential to handlers.

Handlers receiving milk from producers and disposing of such milk in the marketing area as Class I would be exempted from certain provisions of the order in the event no more than 10 percent of receipts of producers at such plant is disposed of as Class I on routes or through plant stores in the marketing area. The operator of such a plant would be exempt from all of the provisions of the order except that he would be required to make reports to the market administrator with respect to the quantity of Class I milk disposed of in the marketing area, make payment to the producer-settlement fund of the amount which represents the difference between the value of such quantity of milk at the Class II price and the Class I price, and pay his pro rata share of the cost of administering the order on the quantity of milk disposed of in the marketing area. As now provided in the order such a handler would be included in the pool on the basis of any sales of Class I milk from routes in the marketing area. The proposal recommended would set up a minimum requirement with regard to the quantity of milk which a handler must sell in the area before he is required to have all his receipts of producer milk priced under the order. The minimum requirement of 10 percent would apply also during the months of October through March to those plants receiving milk from producers which milk is transferred to bottling plants. This would prevent having such a handler who had made an incidental sale of Class I milk in the market from being subject to the provisions of the order that month. Conversely, it sets up a qualification with which a plant must comply by shipping at least 10 percent of its receipts of milk from producers for fluid use in the marketing area in order to be considered as a pool plant.

Presently, a plant which is not approved by the local health authorities would not be considered a pool plant nor subject to the provisions of the order by reason of a sale of bottled milk in the marketing area. It is not likely, from the record, that the operator of such a plant would make such a sale without the approval of local health authorities as evidenced by the issuance of a permit to the plant and the farms supplying the milk. Nevertheless, it is necessary that the manner for applying the order provisions in such instances be specified in order to maintain equity among handlers until such time as the problem can be reviewed in detail at a future hearing. This can be accomplished by having such distributors make limited payments to the producer-settlement fund based on the quantity of Class I milk sold from delivery routes and plant stores in the marketing area, file reports with the market administrator, and pay a pro rata share of the cost of administering the order.

In the marketing area some handlers receive both graded and ungraded milk at their plants. In Louisville the Health Department does not permit milk from

ungraded producers to be received and handled in the same portion of a building in which the milk from graded producers is received and processed. In the Indiana portion of the marketing area the health authorities there permit the use of the same facilities for the handling of ungraded milk only after the receiving and processing of graded milk in that plant has been completed. The handlers in Louisville who receive milk from both graded and ungraded dairy farms maintain separate facilities for receiving and processing the milk from ungraded dairy farms. Milk received from graded producers which is in excess of the requirements of the graded plant is normally utilized in the ungraded operation. The quantities of graded milk and butterfat thus utilized may not always be determined nor accurately recorded. When graded milk is thus intermingled with ungraded receipts, it is not possible to isolate the utilization of the graded producer milk as distinguished from the utilization of the ungraded milk. As proposed herein, the total operation would be considered as one unit whenever graded and ungraded milk is intermingled in the same building. To determine and verify the quantities of graded milk which are utilized in the ungraded operation it is necessary to have full information of all operations involving the ungraded milk. Not only is this information necessary to determine the quantity of graded milk which was so utilized but such complete information is needed in order to allocate properly the shrinkage applicable to the graded milk. The problems involved in attempting to determine shrinkage on such milk without having full information of the operations in the ungraded operations to which such graded milk was moved is set forth fully in the discussion of issue No. 6. When no milk is moved between a graded and ungraded operation in the same building the interest of the market administrator would extend only to the operations of the graded section. However, when milk from the graded section is utilized in the ungraded operation the market administrator in order to effectuate the provisions of the act should consider as one plant the total operation and should obtain reports and verify by audit both the graded and ungraded operation in the same building for each month during which graded milk is moved from the graded to the ungraded section.

Producers proposed that in order for a country plant to be qualified to participate in the pool during the months of October through February not less than 40 percent of its receipts of milk from producers should be delivered to a city plant in the month of October, 75 percent in November, 65 percent in December, 55 percent in January, and 40 percent in February. Their proposal would also disqualify a country plant for pool plant status during the months of March through September if the required percentage of its receipts of milk from producers was not delivered to a city plant during each of the preceeding months of October through February. Such a plant after having failed to meet a percentage requirement in any month would not be eligible to become a pool plant until such plant met the percentage requirement beginning with October next following such disqualification. In view of the findings concerning issue No. 1 relative to the supply of and demand for milk, it is concluded that such proposal should be modified to the extent as proposed herein.

5. The "producer" definition should be revised so as to limit the extent to which handlers may divert producer milk during the months of short production. As presently provided in the order, a handler may divert milk of a producer indefinitely from a pool plant to a nonpool plant. The proposed definition would provide that milk of a producer be delivered to a pool plant on at least half of the days during each of the months of October through February in order to be considered a producer under the order for such month for milk diverted to nonpool plants. This proposed change ties in directly with the pool plant definition outlined above for qualifying a country plant as a pool plant. The standards herein proposed establish a reasonable basis for defining as producers those dairy farmers who "ordinarily deliver" fluid milk to the Louisville market and who are regularly associated with it.

The definition of producer should be clarified with respect to those dairy farmers delivering milk to plants which are approved for the sale of fluid milk to Fort Knox Military Reservation and other similer installations in the marketing area. The military installation at Fort Knox is part of the Louisville marketing area. The health authority for this military reservation is an army officer in charge of administering the standards for fluid milk and cream disposed of on the reservation. The standards used in Fort Knox with regard to the approval of producers is not carried on in the same manner as are those in Louisville and other parts of the marketing area. The record does not indicate the exact standards, or the manner of administering them, which are followed by the "appropriate health authority" in Fort Knox. The source of supply of milk for Fort Knox has been and is at present from handlers located in Louisville. In the past, the only physical inspection made directly by the Fort Knox authority has been the milk plants of Louisville handlers from which Class I milk is sold at Fort Knox. Since written dairy farm inspection permits are not issued to producers by the Fort Knox authorities, the producer definition should be so worded as to include in such definition dairy farmers whose milk is disposed of as Class I in Fort Knox, providing such farms meet the inspection standards prescribed by the Fort Knox authority. By so wording the order, provision likewise would be made for establishing the same qualifications for producers whose milk was disposed of to any other military reservation or similar installation of the United States Government which might be established in the marketing area.

6. The quantity of shrinkage which may be allocated to the lower class should be limited at each plant to 2 percent of the quantities of skim milk and butterfat in milk received directly from producers, except for the months of April through July when a maximum of 5 percent of such skim milk shrinkage would be permitted. Currently the order allows up to 2 percent of the butterfat and skim milk shrinkage in milk received from producers or diverted to a nonpool plant to be classified in Class III. When butterfat shrinkage is not in excess of 2 percent, all unaccounted for skim milk may be allocated to Class III. Handlers may also allocate to Class III the skim milk shrinkage above that required to "float" the butterfat in excess of 2 percent of producer milk. The butterfat test used in this computation is the average test of milk, skim milk and cream from producer milk available for use in Class III.

As proposed, the shrinkage allowance for butterfat will not be changed from the maximum allowance of 2 percent now provided in the order. Maximum skim milk shrinkage allocated to the lower class would be a specific percentage of producer receipts instead of varying amounts as heretofore. The current provision for determining the quantity of skim milk which may be included in Class III has tended to create inequities among handlers.

Handlers have experienced larger losses in skim milk than in butterfat. Greater than normal losses result during the period of flush production because of the abnormally large quantities of skim milk handled during such period. In some instances, small quantities of skim milk are dumped because the expense of moving it is greater than the value which can be realized from its sale. There is a demand for skim milk in the fall because the butterfat test of producer milk then is greater than the butterfat test required by handlers for bottling. Under these circumstances, additional skim milk is needed to standardize the excess fat, and consequently less waste and loss of skim milk is experienced during the short production months than in the flush season. A maximum skim milk shrinkage allowance of 5 percent during months of April through July should be adequate to cover unavoidable skim milk losses experienced by handlers during this period.

A study of the records of the individual handlers shows a wide range in their shrinkage experience and this might result from the manner currently provided for in the order for classifying skim milk shrinkage. Currently, handlers classify and report only milk from approved source of supply and the market administrator audits the records of handlers relative to that producer milk which is intermingled with ungraded milk in its ultimate disposition. It is proposed and recommended in another part of this decision that a handler also report and classify receipts of ungraded milk at a plant wherein producer milk is intermingled and processed with ungraded milk. Movement of producer milk is accomplished by: (a) Transfer or diversion to an ungraded plant at another location; (b) transfer by pipeline from the graded to the ungraded section of the same building; or (c) use in the same

plant, after completion of the graded milk operation, in combination with receipt of ungraded milk.

As now provided in the order, when producer milk is transferred to the ungraded portion of the same building, the shrinkage of skim milk and butterfat allowed on such milk is computed on a pro rata basis with the skim milk and butterfat contained in all milk, skim milk, and cream received in the ungraded portion. The shrinkage thus determined is added to the shrinkage of producer milk handled in the handler's graded operation. When "supporting transfer records satisfactory to the market administrator" are not available in connection with the intermingling of graded and ungraded milk, the total unaccounted for milk of the graded and ungraded operations is prorated over the total receipts from producers and from all other sources.

The recommended change, in conjunction with the proposal requiring handlers to report and classify ungraded receipts at a plant where producer milk is intermingled with it, would provide that the shrinkage in milk received from producers would be computed and allocated to producer milk on a pro rata basis with ungraded milk. This would provide uniform treatment for all handlers and would remove administrative difficulties which prevailed heretofore in determining the shrinkage of producer milk.

Handlers proposed that allocation of shrinkage to the lower class be allowed on producer milk received from other plants. This allowance would be in addition to that which is permitted on milk received directly from producers. In effect, this proposal would provide for allowing shrinkage twice on the same milk and would increase the quantity of producer milk which could be classified in the lower class. The prices charged for milk in inter-handler sales can give consideration to such shrinkage at may be involved. The producer's responsibility ends when his milk is delivered to the handler's plant and he should not be expected to stand any reduction in his return by providing increased shrinkage classification in the lower class because of inter-handler movements of milk.

It was brought out on the hearing record that a shrinkage allowance on producer milk diverted to a nonpool plant was not warranted. Milk so diverted is delivered directly from producers' farms to the nonpool plant and producers are paid for the quantity received at such plant. Permitting a shrinkage allowance on such milk arbitrarily increases the quantity of skim milk and butterfat which may be allocated to the lower class at the expense of producers. The order should be clarified so that shrinkage is not permitted on producer milk which does not actually pass through a pool plant.

7. The language of the order should be clarified with respect to responsibility of handlers in determining classification and reclassification of skim milk and butterfat. In conjunction with the proposal covered in issue No. 6, this rewording and clarification of the order requires that a handler establish the utilization of skim milk and butterfat in producer milk before allocating shrinkage on such milk to the lower class. The allocation of shrinkage to Class II would be permitted only after a handler had established that the quantities of skim milk and butterfat utilized were disposed of as milk and milk products. In the event such utilization was not established none of the handler's producer milk would be classified as shrinkage in Class II but all such unaccounted for milk would be classified as Class I. The proposed change would also spell out clearly the responsibility of the handler who first received milk from producers when reclassification of such milk after audit is made by the market administrator.

8. All skim milk and butterfat disposed of in fluid form as milk, cream, skim milk, buttermilk, milk drinks or any other milk or cream products which are required by the appropriate health authority in the marketing area to be made from approved milk or cream should be classified as Class I milk. Skim milk and butterfat used in the manufacture of milk products which need not be made from graded milk would be placed in Class II. Normally such manufactured dairy products are made from graded milk only when a handler's supply of such milk is in excess of his needs for fluid purposes.

As currently provided in the order, Class I milk is skim milk and butterfat disposed of in fluid form as milk, skim milk, buttermilk, milk drinks and that milk which is not specifically accounted for as Class II or Class III milk. Skim milk and butterfat now considered in the category of Class II is that disposed of as fluid cream and any cream product disposed of in fluid form which is required by the appropriate health authority in the marketing area to be made from approved milk or cream. The Class III category contains the skim milk and butterfat used to produce products other than those specified in Classes I and II. The change herein proposed would result in all skim milk and butterfat heretofore considered as Class I and Class II being Class I, and the current Class III would be designated Class II.

The health authorities having jurisdiction in the marketing area require that milk disposed of for consumption as milk, cream, skim milk, buttermilk, and milk drinks be derived from milk produced in conformity with their standards. Accordingly, milk producers in the local supply area are inspected by the appropriate health authorities and those producers in the area who meet the standards are given permits to ship to the marketing area. Normally only inspected producers may supply milk to be disposed of as milk, cream, skim milk, buttermilk and milk drinks. In times of shortage, however, it has been the practice to allow the importation of milk, skim milk and cream from sources outside the milkshed. Such importations must meet sanitary standards similar to those applying to milk produced in the local supply area.

A principle of milk classification systems is that uses of milk with similar economic values be in the same classes. The transportation costs of milk from approved farms are the same whether such milk is used for milk or cream for approved fluid purposes. The cost of producing milk to meet the sanitary standards of the Louisville market are the same for all uses. In view of the foregoing, milk from producers so disposed of as to have been heretofore classified as Class I or Class II should be merged into one class designated as Class I.

At the hearing it was proposed that skim milk and butterfat disposed of as yogart be Class I. Provision is made above for yogart and similar products by providing that if such product is required by the local health authorities in the marketing area to be made from milk from approved sources, the skim milk and butterfat therein should be Class I.

Proposal was made by producers to delete from the order the provision that handlers make payment for Class I milk for relief distribution at the Class III price plus 12 cents. This provision was incorporated into the order at a time when economic conditions were such in the Louisville area so that a significant number of families were not able to purchase milk at the established prices and there was a surplus supply of milk for the market. Conditions have changed since the special category and pricing for "Class I milk for relief distribution" was incorporated in the order. The quantities sold in this category have declined to a negligible amount (0.24 of 1 percent of the total production in February of 1951), and the problem of burdensome surpluses of producer milk which prevailed in the early days of the order has been replaced by that of obtaining an adequate supply of milk for the market. It is concluded that all Class I milk for relief distribution should return to producers the same price as all other Class I milk.

9. The order should be clarified with respect to the classification of milk which was received from producers and transferred to other plants. This revision is necessary to carry out the change in the pool plant definition wherein the operation of the graded and ungraded milk sections of the same building are considered as one plant. Heretofore milk transferred from the graded to the ungraded side of the same plant was classified on the basis of the pro rata utilization of the milk handled in the ungraded side. The wording as proposed with regard to the classification of other source milk will more clearly carry out the intent of the order by preventing the classification of other source milk in such a manner as to allocate to producer milk a lower classification than such other source milk.

10. The basis for determining the value of the skim milk component of the butter-skim formula of the basic formula price should be revised. As now provided in the order the quotation for roller process, non-fat dry milk solids for human consumption, f. o. b. manufacturing plants in the Chicago area is used as the basis for the skim milk value of the butter-skim formula. The proposed change would replace this with the average quotation for spray and roller process skim milk powder. Currently, from the average of the roller powder quotations an amount of 5.5 cents per pound (make allowance) is deducted and each full half cent remaining is multiplied by 3.5 cents. The "make allowance" in the formula proposed would remain at 5.5 cents and the balance remaining after this deduction would be multiplied by 8.2. The net effect of the change proposed above would be to increase the skim milk value by about 15 to 17 cents per hundredweight relative to the present value. Because 15 cents is now added to the butter-powder formula in the basic price, the increase of 15 to 17 cents resulting from the change herein proposed will have the net effect of increasing the Class I price by about 0 to 2 cents per hundredweight.

With the change herein proposed, the basic formula price in the Louisville order will be determined in the same manner as the basic formula price in the Cincinnati order. The Cincinnati order provides for a basic formula price which is the higher of the butter-skim formula (as herein proposed) and the average price paid by 18 midwestern condenseries. These components would be provided for in the Louisville order. An additional alternative in the Louisville order would be the Class III price when that was higher than the other two determinants.

The production areas for the Louisville and Cincinnati markets overlap. Unless Class I prices under the Louisville and Cincinnati orders are maintained in appropriate relationship, producers who are needed to supply the Louisville market would be lost to Cincinnati handlers.

Producers proposed that the average price for 3.5 percent milk paid by the 18 condensaries be converted by direct ratio to the 3.8 percent basis used for pricing under the order. This would replace the Chicago butter price plus 20 percent as the basis for adjusting the announced 3.5 percent condensory price to the order price basis of 3.8 percent. The effect of this change would be to increase the basic formula price alternative derived from this quotation. Another price quotation used in the order is that for 4.0 percent milk at 7 local plants, which is one of alternative price basis for determining the Class III price. This price is reduced to the 3.8 percent basis of the Louisville order in the same manner as is now provided for converting the 18 condensory price to a 3.8 percent basis. Proponents contended that the direct ratio method is justified because it is used in some other markets in converting the 18 condensory price for 3.5 percent milk to a different test, and that some of the plants whose prices paid are used in determining the 18 condensory price pay butterfat differentials on a direct ratio basis. The proposal is not in keeping with the need for maintaining an appropriate relationship between the Louisville and Cincinnati Class I prices. It is concluded that this proposal should be denied.

Substitution of the quotations for spray process skim milk powder instead of roller process quotations in the butter-skim component of the basic formula was proposed by producer representatives. For the reasons set forth in connection with the decision made above to use the average of spray and roller quotations in the basic price this proposal is denied.

11. The price of Class II milk, i. e., that which is used for manufacturing purposes, should be increased during the months of August through March and decreased the flush production months of April through July. As now provided in the order, the pricing of Class III (hereinafter referred to as Class II, the designation used in this decision) is a butter-skim formula or the average price paid by seven local manufacturing plants, whichever is higher. The butter-skim formula price has been the determinant more frequently used as the basis for the Class II price. This price is computed by multiplying 120 percent of the average 92-score butter price by 3.8 and adding thereto 3.5 cents per hundredweight for each full one-half cent that the average quotation for nonfat dry milk solids by roller process for human consumption in the Chicago marketing area is above 5.5 cents. The payment by handlers for butterfat above or below 3.8 percent in Class II milk now provided in the order is at the rate of 120 percent of the Chicago butter price. An additional factor in the surplus class pricing provided in the order is the butter manufacturing credit, which during the months of April, May, and June allows handlers on butterfat in producer milk used in the manufacture of butter ten percent of the price of 92-score butter at Chicago per pound of butterfat. The amount of this credit is limited to ten percent of such handlers disposition of Class I butterfat during the same month.

As proposed, the Class II price for the months of August through March would be the price arrived at by the butter-skim formula which would be used in determining the basic formula price. This formula is described in the discussion of issue No. 10, and would result in an increase to producers for milk sold in the lower class of approximately 15 to 17 cents per hundredweight during the months of August through March. The butterfat differential during these months would remain at 0.12 of the Chicago butter price as now provided in the order. For the months of April through July the Class II price would be revised to provide for changing the butter-skim formula now provided in the order from 120 to 115 percent of the Chicago butter price multiplied by 3.8, and changing the yield factor for skim powder in this formula from 7 to 8.2, and deducting 8 cents. The butterfat differential would be 0.115 of the Chicago butter price. The provision crediting handlers for butter manufacture would be eliminated from the order.

The record shows that the yield of nonfat dry milk solids from 100 pounds of skim milk by roller process in plants operated by Louisville handlers ranged from a monthly average of 7.9 to 9.3 pounds. The average yield for the 2-year period was 8.5 pounds of nonfat dry milk solids from 100 pounds of skim milk. This average yield approximates that of 8.6 pounds per 100 pounds of skim milk which was obtained by the operator of a plant in the Louisville area who manufactures substantial quantities of skim milk powder. Converting this yield to give consideration to the skim milk in 100 pounds of milk establishes the 8.2 yield recommended herein as a reasonable figure. The deductions of 8 cents per hundredweight will maintain the value of skim milk in Class II milk during the months of April through July at approximately the same value as currently provided.

The lower price provided in the formula during the flush production months by the revised butter-skim formula would be offset by the discontinuance of the butter credit allowance to handlers. On the basis of the price quotations for the most recent month available at the time of the hearing, February 1951, the Class II price as determined by the butter-skim formula which is proposed for the months of April through July would have been 13.1 cents less than the current Class II butter-skim provision provides. The butter credit to handlers, which it is proposed to eliminate, would have been 6.9 cents per pound of butterfat or 26.2 cents per hundredweight of 3.8 percent producer milk used in the manufacture of butter. A lower price for all Class II butterfat during these months would provide relief to all handlers in the disposition of surplus milk. Heretofore only those handlers utilizing surplus milk for butter manufacture obtained such relief.

Testimony of handlers indicated that they were required to handle surplus milk from producers during the months of flush production in order to have adequate supply of milk in the fall months. The Class II uses of milk disposed of during the flush production season are not, on the whole, as profitable outlets to handlers as are those outlets in the fall of the year when the supply of producer-milk available for Class II is lower. With a limited supply of milk for Class II, the market for those products which will command the best return are served first; and conversely, during the months of flush production, when the supply is excessive, large quantities of milk are disposed of for use in those products which are least profitable or actually result in a loss to those handlers receiving the milk from producers.

The pricing of milk in the months of flush production should be at the rate at which milk produced for the market will be handled so that such surplus milk production will not disrupt the orderly marketing of milk. The higher prices for Class II milk during the months of short production will also encourage the transfer of milk from manufacturing uses to fluid uses in time of short supply in the fall and winter.

Revising the Class II price for April through July by changing the several factors in the butter-skim formula as outlined above and eliminating the "butter credit" heretofore allowed handlers as a reduction in their milk costs, would likely have the net effect of reducing slightly the Class II price during

these months from the level currently prevailing.

Producers proposed that the Class II price be increased by 30 cents per hundredweight for the months of September through December. They contended that by pricing milk for manufacturing uses at such higher prices during these months, handlers who had supplies above their fluid needs during this period of short production would be more inclined to make the milk available to other handlers who needed it for Class I purposes. They further contended that since there was less milk available from producers for Class II use during the September–December period, it "should be priced high." The price of Class II milk has been established on the basis of the price for which unapproved milk could be obtained since such milk, skim milk, and cream competes with producer milk for Class II uses. To ignore consideration of this basis of pricing milk for Class II uses will result in outlets being lost for such milk not only during the short season but also during the flush months when markets for surplus milk are badly needed. This proposal should be denied for these reasons.

The proposal that nonfat dry milk solids quotation for spray process be substituted for the roller processes quotation in computing a formula price for Class II milk should be denied. There are no spray process operations in the Louisville area and none of the producer milk is sold to any outlets making spray powder. There are some plants in the Louisville area having equipment for making roller process powder and such rollers are operated principally during the spring months. Other times during the year, the operations of these rollers may be negligible compared to the operations in the spring months. The demand for skim milk for uses other than for the manufacturing of nonfat dry milk solids is well below the supply during the spring months and to provide for using the higher spray quotations during that period is therefore not warranted. During the remaining months of the year, the roller process quotation for skim milk powder would be replaced by the average of the quotations for spray and roller powder. Although there are no spray plants in the market, the inclusion of the higher quotation in these months is believed to be more representative of value of the uses of skim milk in manufactured products during such months.

Handlers proposed that the butter credit which had heretofore been allowed on producer milk during the months of April through June be extended throughout all months of the year. An equivalent of the butter credit is proposed by reason of the change in the butterfat value of Class II milk and the butterfat differential during the months of April through July. To extend the butter credit or its equivalent during the other months of the year would give encouragement to the use of producer milk in the manufacture of butter when such milk might be needed by other handlers for Class I uses. The proposal for the butterfat credit throughout the year should be denied.

12. The present Class I butterfat differential of the average price of 92-score butter plus 30 percent should be reduced to the average price of 92-score butter plus 25 percent.

During the past two years the average monthly test of all Class I sales was between 3.5 and 3.6 percent, and that of milk received from producers was approximately 4.0 percent. The present differential does not encourage the sale of high test milk and does not properly reflect the value of the skim milk portion of whole milk. Because milk delivered by Louisville producers is at a higher test than that sold as Class I milk in the short production months it is necessary to obtain skim milk from outside sources to standardize producer deliveries of milk. Reducing the Class I butterfat differential as proposed would establish a more appropriate relationship in the value for the skim milk and butterfat in producer milk.

13. The order should not be amended to provide for location differentials applicable to milk received at pool plants located 50 miles or more from Louisville.

The order does not now provide for any location differentials of the type which were proposed. Handlers are required to pay the Class I price provided in the order for all producer milk classified as Class I regardless of the location of their plants, and producers likewise receive the same uniform prices regardless of the location of the plant to which their milk is delivered. Producers proposed that handlers be permitted a location differential to be deducted from the Class I prices on producer milk received at plants located 50 miles or more from Louisville, which was moved to city plants and classified as Class I milk. Producers making deliveries to these plants would receive a uniform price which would be reduced by the same amounts per hundredweight as was proposed for the handler location differential on Class I milk.

At the time of the hearing in December 1950 there was but one plant located more than 50 miles from Louisville which was approved for the shipment of fluid milk to the marketing area. The record fails to substantiate that a plant located more than 50 miles from Louisville and producers delivering to such plant have an advantage over other plants and other producers. The record also does not show that the location differential rates proposed can be justified or are proper when considered in the light of hauling rates presently being paid by producers delivering their milk to receiving stations located at substantial distances from the marketing area. Moreover, the record does not show that the best interests of the Louisville market would be served by establishing location differentials at this time. The proposed location differential should be denied.

14. Definitions should be included in the order for "cooperative associations," "producer milk," and "Chicago butter price." Heretofore none of these terms were specifically defined in the order. These definitions are proposed to shorten the language within the order when reference is made to these terms.

The definition of "delivery period" as defined in the order is deleted. The delivery periods to which reference is made in the order are calendar months and the proposed change would have "month" to replace "delivery period" throughout the order where reference was made thereto.

Duties of the market administrator as set forth in the order should be revised and clarified with regard to certain portions thereof. The provision that the market administrator shall publicly announce the failure of a handler to make reports or payments as required by the order within 15 days should be changed to "within 5 days." This provision is included in orders as a means of notifying producers and those who have an interest in compliance by handlers that a particular handler is not complying with the order so that they may take steps to protect themselves. A period of 5 days intervenes between the time that handlers are required to file reports and the administrator is required to complete the monthly pool computation. The shorter period of 5 days to replace the 15-day period heretofore provided is necessary in order to effectuate the intent of this provision.

The order should spell out within the section listing the duties of the market administrator, the requirement that he should verify all reports and payments which relate to utilization and classification of producer milk. The market administrator has been empowered to and has been performing this function. The change merely sets forth more specifically those duties which he is required to perform.

The market administrator should be required to obtain a bond covering employees who handle funds entrusted to him. Heretofore the order had stated only that the market administrator should be covered by a bond. The reasons for covering the market administrator by a bond apply equally as well to those in his employ who handle funds entrusted to him.

The reporting requirements of the order should be amended to provide that handlers report a breakdown of Class I sales showing quantities of Class I milk which are sold within the marketing area and the quantities sold outside the marketing area. Such information is not only of value to all interested parties for statistical purposes but it is also helpful in making determinations with respect to the supply and demand situation for the Louisville market.

Reports to the market administrator should be made by handlers listing the transportation rates paid by producers for the hauling of their milk from the farm to milk plants. This information is necessary to verify payments to producers and authorizations by them for the deduction of such transportation rates.

Provision should be made in the order to determine the extent to which the various provisions thereof shall apply with respect to a person who may be a handler under the Louisville order and who is also a handler under another order or marketing agreement issued pursuant to the act. Under such circumstances a conflict or duplication of obligations would result. The Louisville order at present does not provide a method whereby such a conflict or duplication could be resolved. It is recognized that any specific rule adopted in the order may be inadequate to resolve all the conflicts and duplications which could ensue under various circumstances and that a hearing might be needed to consider the circumstances of a particular situation. However, in view of the impracticability of amending orders by hearing processes prior to the time at which a conflict or duplication of obligations may arise, it is believed that a specific rule should be adopted. Furthermore, such rule should place the person on notice as to the extent of his obligations under the order. This can best be accomplished by exempting from the pricing and payment provisions of the Louisville order any person who is a handler under the Louisville order and who is also a handler under another order or marketing agreement issued pursuant to the act, with respect to the same milk, a greater portion of which is determined by the Secretary to be disposed of as Class I milk in the marketing area under another order. Such person should be required to make reports to the market administrator at such time and in such manner as the market administrator may request.

The date on which handlers are required to make payment to the producer-settlement fund should be changed from the 15th day to the 13th day after the end of the month and the date for payments by the market administrator to handlers from the producer-settlement fund should be changed from the 20th day to the 14th day after the end of the month. The present schedule of payments is not consistent with that provision of the order requiring that producers be paid on or before the 15th day of the month since handlers receiving payments from the producer-settlement fund could hold up payments to producers if such funds had not been received by the 15th. As herein proposed, with the pool computation completed on or before the 10th of the month as provided in the order, ample time is allowed for handlers to receive billings so as to make payment to the fund by the 13th of the month and the market administrator to make payment out of the fund by the 14th.

It was suggested at the hearing that the sections, paragraphs, subparagraphs, and subdivisions of the order be renumbered in accordance with the revised Federal Register procedure. In this connection, it is believed that the reissuance and publication of the present order in the form of an order, as amended, incorporating the proposed amendments will be of convenience to all interested parties.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers who would be subject to the proposed marketing agreement and order, as amended, and as hereby proposed to be further amended. The briefs contained suggested findings of fact, conclusions, and arguments with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the findings and conclusions in this recommended decision.

General findings. (a) The proposed marketing agreement and the proposed order, as amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and order, as amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Recommended Marketing Agreement and Order, As Amended

The following order, as amended, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The marketing agreement is not included in this recommended decision because the regulatory provisions thereof would be identical with those contained in the order, as amended.

Definitions

§ 946.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 946.2 *Secretary.* "Secretary" means the Secretary of Agriculture or other officer or employee of the United States authorized to exercise the powers or to perform the duties pursuant to the act of the said Secretary of Agriculture.

§ 946.3 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture or other Federal agency authorized to perform the price reporting functions specified in this subpart.

§ 946.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 946.5 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk or its products for its members.

§ 946.6 *Louisville, Kentucky, marketing area.* "Louisville, Kentucky, marketing area," hereinafter called the "marketing area," means the territory within Jefferson County, Kentucky, including but not being limited to the city of Louisville, Fort Knox Military Reservation; the territory within Floyd County, Indiana, including but not being limited to all municipal corporations in said county; and the territory within the townships of Jeffersonville, Utica, Silver Creek, Union, and Charleston, in Clark County, Indiana.

§ 946.7 *City plant.* "City plant" means the building and facilities, except those of a producer-handler, which are used during the month in the processing and packaging of producer milk and from which not less than 10 percent of such milk is distributed in the container in which packaged from delivery routes or plant stores as Class I milk in the marketing area: *Provided*, That such building and facilities shall include any portion thereof which is used during the month in the processing of producer milk for any use.

§ 946.8 *Country plant.* "Country plant" means the building and facilities, except those of a city plant, which are used in the receipt of milk from dairy farmers who hold a dairy farm inspection permit issued by the appropriate health authority having jurisdiction in the marketing area and which are approved by such health authority to furnish milk to a city plant for use as Class I milk: *Provided*, That such building and facilities shall include any portion thereof which is used during the month in the processing of producer milk for any use.

§ 946.9 *Pool plant.* "Pool plant" means:

(a) A city plant;

(b) A country plant during the period of October through March for each month in which not less than 10 percent of its receipts from dairy farmers who hold a dairy farm inspection permit issued by the appropriate health authority having jurisdiction in the marketing area is delivered to a city plant in the form of milk, skim milk, or cream; or

(c) A country plant during the period of April through September from which more than 50 percent of its combined receipts from dairy farmers who hold a dairy farm inspection permit issued by the appropriate health authority having jurisdiction in the marketing area during the preceding period of October through February were delivered to one or more city plants in the form of milk, skim milk or cream, unless the operator of such plant notifies the market administrator in writing on or before March 15th of withdrawal of the plant from the pool for the months of April through September.

§ 946.10 *Nonpool plant.* "Nonpool plant" means any milk manufacturing,

processing or bottling plant other than a pool plant.

§ 946.11 *Handler.* "Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) A producer-handler;

(c) Any cooperative association with respect to milk of producers which it causes to be diverted to a nonpool plant for the account of such cooperative association; or

(d) Any person, other than a producer-handler, in his capacity as operator of a nonpool plant from which Class I milk is disposed of in the marketing area from delivery routes or plant stores during the month.

§ 946.12 *Producer.* "Producer" means any person who produces, under a dairy farm inspection permit issued to such person by the appropriate health authority having jurisdiction in the marketing area (As used in this subpart, "dairy farm inspection permit" shall include approval of milk by the authority to administer regulations governing the quality of milk acceptable to agencies of the United States Government for fluid consumption in its institutions or bases located in the marketing area, which is received at a plant from which any portion of such milk is disposed of to such institutions or bases in the container in which packaged as Class I milk.), milk which is:

(a) Delivered from his farm to a pool plant;

(b) Diverted by a handler to a nonpool plant: *Provided*, That any such milk be diverted shall be deemed to have been received at the pool plant from which it was diverted: *And provided further*, That this definition shall not include during any of the months of October through February, any person whose milk was diverted to a nonpool plant for more than one-half of the days of such month; or

(c) Diverted by a cooperative association to a nonpool plant for the account of the cooperative association: *Provided*, That any such milk so diverted shall be deemed to have been received by the cooperative association.

§ 946.13 *Producer milk.* "Producer milk" means all skim milk and butterfat in milk produced by a producer.

§ 946.14 *Other source milk.* "Other source milk" means all skim milk and butterfat received in any form from a producer-handler and from a source other than producers or pool plants, except the receipt of any non-fluid milk product which is disposed of in non-fluid form.

§ 946.15 *Producer-handler.* "Producer-handler" means any person who processes and packages milk from his own farm production, distributing any portion of such milk within the marketing area as Class I milk and who receives no milk from producers.

§ 946.16 *Chicago butter price.* "Chicago butter price" means the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department of Agriculture during the month.

MARKET ADMINISTRATOR

§ 946.20 *Designation.* The agency for the administration of this subpart shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 946.21 *Powers.* The market administrator shall have the following powers with respect to this subpart:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 946.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including but not limited to the following:

(a) Within 45 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 946.87 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 946.86) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this subpart, and, upon request by the secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination and furnish such information and reports as may be requested by the Secretary;

(g) Verify all reports and payments of each handler by audit of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends, or by such investigation as the market administrator deems necessary;

(h) Prepare and disseminate to the public such statistics and such information as he deems advisable and as do not reveal confidential information;

(i) Publicly announce, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 5 days after the date upon which he is required to perform such acts, has not made reports pursuant to §§ 946.30 through 946.32, or payments pursuant to §§ 946.80 through 946.85;

(j) On or before the 15th day after the end of each month, report to each cooperative association the percentage in each class of the producer milk caused to be delivered by the cooperative association or by its members to each handler during the month. For the purpose of this report the milk so received shall be allocated in each class for each handler in the same ratio as milk received from all producers by such handler during the month.

(k) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, and notify each handler in writing the prices and butterfat differentials determined for each month as follows:

(1) On or before the 10th day after the end of each month, the minimum prices for each class of milk computed pursuant to § 946.51, and the butterfat differentials for each class computed pursuant to § 946.52; and

(2) On or before the 10th day after the end of each month, the uniform price computed pursuant to § 946.71, and the butterfat differential computed pursuant to § 946.81;

(l) On or before the 11th day after the end of each month, the market administrator shall mail to each handler, at his last known address, a statement showing:

(1) The quantities of milk in each class received by such handler from producers and the value thereof; and

(2) The amounts to be paid by such handler pursuant to §§ 946.61, 946.83, 946.86 and 946.87.

REPORTS, RECORDS, AND FACILITIES

§ 946.30 *Reports of receipts and utilization.* On or before the 5th day after the end of each month each handler, except a producer-handler, shall report to the market administrator in the detail and on the forms prescribed by the market administrator as follows:

(a) The quantities of skim milk and butterfat contained in milk received from producers (including such handler's own farm production);

(b) The quantities of skim milk and butterfat contained in receipts from pool plants of other handlers (except the receipt of any nonfluid milk product which is disposed of in nonfluid form);

(c) The quantities of skim milk and butterfat contained in receipts of other source milk;

(d) The utilization of all skim milk and butterfat required to be reported pursuant to this section;

(e) The disposition of Class I milk other than on routes and through plant stores operated wholly or partially within the marketing area; and

(f) Such other information with respect to receipts and utilization as the market administrator may prescribe.

§ 946.31 *Payroll reports.* On or before the 20th day after the end of each month, each handler shall submit to the market administrator his producer payroll for deliveries during the month which may show (a) the total pounds of milk received from each producer and the average butterfat content of such milk, (b) the prices paid and the amount of payment to each producer, and (c) the nature and amount of any credits, deductions, or charges involved in such payments.

§ 946.32 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler shall report to the market administrator, as soon as possible after first receiving milk from any producer, the name and address of such producer, the date upon which such milk was first received, and the plant at which such milk was received: *Provided*, That milk diverted as described in § 946.12 (b) need not be reported pursuant to this paragraph.

(c) On or before the 10th day after the request of the market administrator, each handler shall submit a schedule of rates which are charged and paid for the transportation of milk from the farm of each producer to such handler's plant. Changes in such schedule of rates and the effective dates thereof shall be reported to the market administrator within 10 days.

§ 946.33 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts, records, and reports of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of producer milk and other source milk;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream, and milk products handled;

(c) Payments to producers; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream, and other milk products on hand at the beginning and end of each month.

§ 946.34 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 946.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat which is received within the month by a handler and which is required to be reported pursuant to §§ 946.30 and 946.61 shall be classified by the market administrator pursuant to the provisions of §§ 946.41 through 946.46.

§ 946.41 *Classes of utilization.* Subject to the conditions set forth in §§ 946.42 through 946.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk and butterfat (1) disposed of in fluid form as milk, skim milk, cream (including sour cream), buttermilk, milk drinks (plain or flavored), except skim milk and butterfat disposed of in fluid form for livestock feed, (2) disposed of in fluid form as any milk product which is required by the appropriate health authority in the marketing area to be made from milk, skim milk, or cream, from sources approved by such authority and (3) not accounted for as Class II milk.

(b) Class II milk shall be all skim milk and butterfat the utilization of which is established: (1) As used to produce any product other than those specified in paragraph (a) of this section, (2) as disposed of for livestock feed, (3) as disposed of in any form in bulk and used for non-fluid purposes by soda fountains, restaurants, bakeries, candy and soup manufacturers, and retail food establishments which, under the applicable health regulations, are permitted to receive milk, skim milk, and cream of other than Grade A quality for nonfluid uses, (4) in plant shrinkage of skim milk and butterfat in milk received from producers and other sources computed pursuant to § 946.42.

§ 946.42 *Unaccounted for skim milk and butterfat and plant shrinkage.* Skim milk and butterfat received at a handler's pool plant(s) in excess of such handler's established utilization of skim milk and butterfat pursuant to paragraph (a) and subparagraphs (1) (2) and (3) of paragraph (b) of § 946.41 at such plant(s) shall be known as unaccounted for skim milk and butterfat and classified as follows: *Provided*, That if producer milk is diverted by such handler to a pool plant of another handler without having been received for purposes of weighing and testing in the diverting handler's plant, the respective quantities of skim milk and butterfat contained in such receipts of milk shall be included in the receipts of skim milk and butterfat, respectively, of the second handler in computing his plant shrinkage or unaccounted for skim milk and butterfat and shall be excluded from the receipts of skim milk and butterfat, respectively, in such computation for the diverting handler: *And provided further*, That if producer milk is so diverted to a nonpool plant the respective quantities of skim milk and butterfat contained therein shall be excluded from the receipts of the diverting handler in computing his plant shrinkage or unaccounted for skim milk and butterfat.

(a) Prorate the quantities of unaccounted for skim milk and butterfat between such handler's receipts of skim milk and butterfat, respectively, in the milk received from producers and other source milk.

(b) The following portion of the quantities computed pursuant to paragraph (a) of this section shall be known as shrinkage and classified as Class II milk: *Provided*, That if the quantities of skim milk and butterfat utilized and disposed of in milk and all milk products is not established by such handler all unaccounted for skim milk and butterfat prorated to receipts of milk from producers pursuant to paragraph (a) of this section shall be classified as Class I milk:

(1) That portion of skim milk and butterfat respectively prorated to receipts of other source milk;

(2) That portion which is prorated to skim milk in receipts of milk from producers but which, during the months of August through March, is not in excess of 2 percent of the total quantity of skim milk in such receipts and, during the months of April through July, is not in excess of 5 percent of the total quantity of skim milk in such receipts; and

(3) That portion which is prorated to butterfat in receipts of milk from producers but which is not in excess of 2 percent of the total quantity of butterfat in such receipts.

(c) That portion of skim milk and butterfat which is prorated to receipts of milk from producers, pursuant to paragraph (a) of this section, which is in excess of the amount of skim milk and butterfat, respectively, classified as Class II milk, pursuant to paragraph (b) of this section, shall be classified as Class I milk.

§ 946.43 *Responsibility for classification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect, or if used or reused by such handler or by another handler except a producer-handler in another class.

§ 946.44 *Transfers.* Skim milk or butterfat disposed of by a handler from a pool plant either by transfer or diversion shall be classified as follows:

(a) As Class I milk if transferred or diverted in the form of fluid milk, skim milk, or cream (excluding frozen cream) to a pool plant of another handler, unless utilization in Class II is mutually indicated in writing to the market administrator by both handlers on or before the 5th day after the end of the month within which such transaction occurred: *Provided*, That if upon inspection of the records of the transferee-handler it is found that an equivalent amount of skim milk or butterfat, respectively, was not actually used in such indicated use the remaining quantity

shall be classified as Class I milk: *And provided further*, That if either or both handlers have received other source milk, the skim milk or butterfat so transferred or diverted shall be classified at both plants so as to allocate the highest-priced possible class utilization to producer milk.

(b) As Class I milk if transferred or diverted to a producer-handler in the form of fluid milk, skim milk, or cream (excluding frozen cream).

(c) As Class I milk if transferred or diverted in the form of milk or skim milk to a nonpool plant located 100 miles or more from the City Hall at Louisville, Kentucky, by the shortest hard surface highway distance as determined by the market administrator.

(d) As Class I milk if transferred or diverted in the form of milk or skim milk to a nonpool plant located less than 100 miles from the City Hall at Louisville, Kentucky, by the shortest hard surface highway distance as determined by the market administrator, and as Class I milk if transferred in the form of fluid cream to such a plant, wherever located, unless the following conditions are met:

(1) The handler claims classification in Class II milk on the basis of a utilization mutually indicated in writing to the market administrator by both the handler and the operator of the nonpool plant on or before the 5th day after the end of the month within which such transaction occurred;

(2) The market administrator is permitted to audit the books and records showing the utilization of all skim milk and butterfat received at such nonpool plant; and

(3) An amount of skim milk or butterfat, respectively, not less than that so transferred or diverted was used in the indicated use: *Provided*, That if upon inspection of the records of the nonpool plant it is found that an equivalent of skim milk or butterfat, respectively, was not actually used in such indicated use the remaining quantity shall be classified as Class I milk.

§ 946.45 *Computation of the skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for other obvious errors the report of receipts and utilization submitted by each handler and shall compute the pounds of skim milk and butterfat in each class for such handler.

§ 946.46 *Allocation of skim milk and butterfat classified.* After making the computations pursuant to § 946.45, the market administrator shall determine the classification of milk received from producers as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract the plant shrinkage of skim milk in milk received from producers, determined pursuant to § 946.42 (b) (2), from the total pounds of skim milk in Class II;

(2) Subtract the pounds of skim milk in receipts of other source milk from the remaining pounds of skim milk in Class II: *Provided*, That if the pounds of skim milk to be subtracted is greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk in Class I;

(3) Subtract the pounds of skim milk in milk, skim milk, and cream received from pool plants of other handlers from the pounds of skim milk in the class to which it was assigned: *Provided*, That, if the pounds of skim milk to be subtracted is greater than the pounds of skim milk in such class, the balance shall be subtracted from the pounds of skim milk remaining in the next higher-priced class;

(4) Add the plant shrinkage of skim milk in milk received from producers subtracted in subparagraph (1) of this paragraph, to the remaining pounds of skim milk in Class II; and

(5) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk in milk received from producers, subtract such excess from the remaining pounds of skim milk in series beginning with Class II. Any amount of excess so subtracted shall be called "overage."

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content of milk remaining in each class computed pursuant to paragraphs (a) and (b) of this section.

MINIMUM PRICES

§ 946.50 *Basic formula price.* The basic formula price to be used in determining the price per hundredweight of Class I milk shall be the highest of the prices computed pursuant to paragraphs (a), (b), and (c) of this section and subparagraphs (1) and (2) of § 946.51 (b).

(a) The price per hundredweight computed by adding together the plus values pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Add 20 percent to the Chicago butter price for the month and multiply by 3.8.

(2) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department of Agriculture, deduct 5.5 cents, and multiply by 8.2.

(b) The price per hundredweight computed by adding together the values pursuant to subparagraphs (1) and (2) of this paragraph, dividing by 7, adding 30 percent thereof, and then multiplying by 3.8.

(1) Multiply by 6 the Chicago butter price for the month.

(2) Multiply by 2.4 the simple average, as published by the Department of Agriculture, of the prices determined per pound of "Cheddars" on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, for the trading days that fall within the month.

(c) To the average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

add an amount computed by multiplying the butterfat differential computed pursuant to § 946.52 (b) for the month by 3.

§ 946.51 *Class prices.* Subject to the provisions of § 946.52, the minimum prices per hundredweight to be paid by each handler for milk received at his pool plant(s) from producers during the month shall be as follows:

(a) *Class I milk.* The price of Class I milk shall be the basic formula price plus $1.25 per hundredweight.

(b) *Class II milk.* The price of Class II milk for the months of August through March shall be the price per hundredweight computed pursuant to § 946.50 (a), and for the months of April through July the higher of the prices computed pursuant to subparagraphs (1) and (2) of this paragraph.

(1) From the average of the basic or field prices per hundredweight reported by, and ascertained by the market administrator to have been paid by the following concerns at the plants or places listed below, for ungraded milk of 4.0 percent butterfat content, without deductions for hauling or other charges to be paid by the farmer shipper, received from dairy farmers during the month:

subtract the amount computed by multiplying the butterfat differential computed pursuant to § 946.52 (b) for the month by 2.

(2) The price per hundredweight computed by adding together the plus values pursuant to subdivisions (i) and (ii) of this subparagraph:

(i) Add 15 percent to the Chicago butter price for the month and multiply by 3.8.

(ii) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound for nonfat dry milk solids, roller process, for human consumption,

f. o. b. manufacturing plants in Chicago area as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department of Agriculture, deduct 5.5 cents and multiply by 8.2, and then deduct 8 cents.

§ 946.52 *Butterfat differential to handlers.* If the weighted average butterfat content of milk received from producers allocated to Class I milk or Class II milk, respectively, pursuant to § 946.46, for a handler is more or less than 3.8 percent, there shall be added to or subtracted from, as the case may be, the price for such class, for each $\frac{1}{10}$th of one percent that such weighted average butterfat test is above or below 3.8 percent, a butterfat differential (computed to the nearest tenth of a cent), calculated for each class as follows:

(a) *Class I milk.* Multiply by 1.25 the Chicago butter price for the month and divide the result by 10.

(b) *Class II price.* For the months of August through March, multiply by 1.2 the Chicago butter price for the month and divide the result by 10, and for the months of April through July, multiply by 1.15 the Chicago butter price for the month and divide by 10.

APPLICATION OF PROVISIONS

§ 946.60 *Producer-handlers.* Sections 946.40 through 946.46, 946.50 through 946.52, 946.61, 946.70, 946.71, and 946.80 through 946.88 shall not apply to a producer-handler.

§ 946.61 *Handlers operating nonpool plants.* Sections 946.30 through 946.32, 946.50 through 946.52, 946.70, 946.71, 946.80 through 946.84, 946.86 and 946.87 shall not apply to a handler in his capacity as the operator of a nonpool plant described in § 946.11 (d), except that such handler shall:

(a) On or before the 5th day after the end of the month, make reports to the market administrator in such manner as he may request with respect to such handler's total receipts and utilization of skim milk and butterfat;

(b) On or before the 13th day after the end of each month, pay to the market administrator for deposit in the producer-settlement fund an amount of money computed by multiplying the quantity of Class I milk disposed of in the manner described in § 946.11 (d) by the difference between the price of Class II milk and the price of Class I milk adjusted by the butterfat differential to handlers; and

(c) On or before the 15th day after the end of the month, pay to the market administrator, as such handler's pro rata share of the expense of administration of this order, 2.5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all Class I milk and all milk, skim milk, and cream used to produce Class II products disposed of during the month in the marketing area in the manner described in § 946.11 (d).

§ 946.62 *Handlers subject to other orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by another order or a marketing agreement issued pursuant to the act, the provisions of this subpart shall not apply except the handler shall, with respect to his total receipts of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

DETERMINATION OF UNIFORM PRICE

§ 946.70 *Net obligation of each handler.* The net obligation of each handler for milk received during each month from producers shall be a sum of money computed by the market administrator as follows:

(a) Multiply the quantity of such milk in each class computed pursuant to § 946.46 by the applicable class price;

(b) Add together the resulting amounts;

(c) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 946.46 by the applicable class prices; and

(d) Add the amount computed by multiplying the pounds of other source milk which were allocated to Class I by the difference between the Class II and the Class I prices adjusted by the butterfat differential to handlers.

§ 946.71 *Computation of uniform price.* For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.8 percent butterfat content received from producers as follows:

(a) Combine into one total the net obligations computed for all handlers who made the reports prescribed in § 946.30 for the month and who are not in default of payments pursuant to § 946.83 for the preceding month;

(b) Subtract, if the average butterfat content of the producer milk included in these computations is greater than 3.8 percent, or add, if such average butterfat content is less than 3.8 percent an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 3.8 percent by the butterfat differential computed pursuant to § 946.81 and multiplying the resulting figure by the total hundredweight of such milk;

(c) Subtract for each of the months of April, May, June, and July an amount computed by multiplying the total hundredweight of milk included in these computations by 12 percent of the simple average of the basic formula prices, computed to the nearest cent, for the 12 months of the preceding calendar year;

(d) Add an amount representing the cash balance on hand in the producer-settlement fund, less the total amount of contingent obligations to handlers pursuant to § 946.84 (a), and less the aggregate of the amounts held pursuant to paragraph (c) of this section for payment pursuant to § 946.84 (b);

(e) Divide the resulting total by the total hundredweight of milk included in these computations; and

(f) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (e) of this section. The resulting figure shall be the uniform price for milk of 3.8 percent butterfat content received from producers at a handler's pool plant.

PAYMENTS

§ 946.80 *Time and method of payment.* On or before the 15th day after the end of each month, each handler shall pay to each producer from whom he received milk during the month an amount of money representing not less than the total value of such producer's milk at the uniform price per hundredweight, subject to the producer butterfat differential, and less deductions authorized by such producer: *Provided*, That, if by such date such handler has not received full payment for such month pursuant to § 946.84, he may reduce uniformly per hundredweight for all producers his payments pursuant to this section by an amount not in excess of the per hundredweight reduction in payment from the market administrator; however, the handler shall make such balance of payment to those producers to whom it is due on or before the date for making payments pursuant to this section next following that on which such balance of payment is received from the market administrator.

§ 946.81 *Producer butterfat differential.* In making payment to producers pursuant to § 946.80, each handler shall add to the uniform price not less than, or subtract from the uniform price not more than, as the case may be, for each one-tenth of 1 percent that the average butterfat content of the milk received from the producer is above or below 3.8 percent, the amount set forth in the following schedule for the price range in which falls the Chicago butter price for the month during which such milk was received.

Butter price range (cents):	*Butterfat differential (cents)*

77.50–82.499	8½
82.50–87.499	9
87.50–92.499	9½
92.50 and over	10

§ 946.82 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 946.61, 946.83, and 946.85 and out of which he shall make all payments pursuant to §§ 946.84 and 946.85: *Provided*, That payments due any handler shall be offset by payments due from such handler.

§ 946.83 *Payments to the producer-settlement fund.* On or before the 13th day after the end of each month, each handler shall pay to the market administrator any amount by which the net obligation of such handler for the month is greater than an amount computed by multiplying the hundredweight of milk received by him from producers during the month by the uniform price adjusted for the producer butterfat differential.

§ 946.84 *Payments out of the producer-settlement fund.* (a) On or before the 14th day after the end of each month, the market administrator shall pay to each handler for payment to producers any amount by which the net obligation of such handler for the month is less than an amount computed by multiplying the hundredweight of milk received by him from producers during the month by the uniform price adjusted for the producer butterfat differential: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

(b) On or before the 14th day after the end of each of the months of September, October, November, and December, the market administrator shall pay out of the producer-settlement fund to each producer from whom milk was received by all handlers during the month an amount computed as follows: Divide one-fourth of the aggregate amount held pursuant to § 946.71 (c) by the hundredweight of milk received from producers by all handlers during the month and multiply the resulting amount (computed to the nearest full cent per hundredweight) by the milk received from such producer during the month: *Provided*, That payment under this paragraph to any producer who has given authority to a cooperative association to receive payment for his milk shall be distributed to such cooperative association if the cooperative association requests receipt of such payments.

§ 946.85 *Adjustment of accounts.* Whenever verification by the market administrator of payments by any handler discloses errors made in payments to the producer-settlement fund, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 15 days, make payment to the market administrator of the amount so billed. Whenever such verification discloses that payment is due from the market administrator to any handler, pursuant to § 946.84, the market administrator shall, within 15 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer for milk received by such handler discloses payment of less than is required by § 946.80, the handler shall pay any amount so due not later than the time of making payment to producers next following such disclosure.

§ 946.86 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers pursuant to § 946.80, shall deduct 5 cents per hundredweight, or such amount not in excess thereof as the Secretary may prescribe, with respect to all milk received by such handler from producers (other than such handler's own farm production) during the month and shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received from such producers and to provide such producers with market information. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom the Secretary determines a cooperative association is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from the payments to be made directly to such producers pursuant to § 946.80 as are authorized by such producers, and, on or before the 15th day after the end of each month, pay such deductions to the cooperative association rendering such services.

§ 946.87 *Expense of administration.* As his pro rata share of the expense of administration hereof, each handler shall pay to the market administrator, on or before the 15th day after the end of the month, 2.5 cents per hundredweight, or such amount not in excess thereof as the Secretary may prescribe, with respect to all receipts by such handler during the month of (a) milk from producers (including such handler's own farm production), and (b) other source milk classified as Class I milk pursuant to § 946.46. Each cooperative association which is a handler shall pay such pro rata share of expense on only that milk of producers caused to be delivered by such cooperative association to a nonpool plant and milk received from producers at a pool plant of such cooperative association.

§ 946.88 *Termination of obligations.* The provisions of this section shall apply to any obligation under this subpart for the payment of money irrespective of when such obligation arose.

(a) The obligation of any handler to pay money required to be paid under the terms of this subpart shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producer(s) or cooperative association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representatives all books and records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

§ 946.90 *Effective time.* The provisions of this subpart, or any amendment to this subpart, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated, pursuant to paragraph (b) of this section.

§ 946.91 *Suspension and termination.* Any or all provisions of this subpart, or any amendment to this subpart, shall be suspended or terminated as to any or all handlers after such reasonable notice as the Secretary may give, and shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

§ 946.92 *Continuing power and duty.* (a) If, upon the suspension or termination of any or all provisions of this subpart, there are any obligations arising hereunder the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate, shall (1) continue in such capacity until discharged, (2) from time to time account for all receipts and disbursements and, if so directed by the Secretary, deliver all funds or property on hand, together with the books and records of the market administrator, or such person, to such person as the Secretary shall direct, and (3) if so directed by the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant to this subpart.

§ 946.93. *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this subpart, except §§ 946.35, 946.88, 946.91 through 946.93, the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid and owing at the time of such suspension or termination. Any funds collected pursuant to the provisions hereof, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 946.100 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 946.101 *Separability of provisions.* If any provisions of this subpart, or its application to any person, or circumstances, is held invalid, the application of such provisions and of the remaining provisions of this subpart to other persons or circumstances shall not be affected thereby.

IRISH POTATOES GROWN IN COLORADO

NOTICE OF PROPOSED BUDGET AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the budget and rate of assessment hereinafter set forth, which were recommended by the administrative committee for Area No. 3, established pursuant to Marketing Agreement No. 97 and Order No. 58 (7 CFR Part 958), regulating the handling of Irish potatoes grown in the State of Colorado, issued under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed in triplicate with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposals are as follows:

§ 958.207 *Budget of expenses and rate of assessment.* (1) The expenses necessary to be incurred by the administrative committee for Area No. 3, established pursuant to Marketing Agreement No. 97 and Order No. 58, to enable such committee to carry out its functions pursuant to the provisions of the aforesaid marketing agreement and order, during the fiscal year ending May 31, 1952, will amount to $5,250.00.

(2) The rate of assessment to be paid by each handler who first ships potatoes shall be three eighths of one cent ($0.00375) per hundredweight of potatoes handled by him as the first handler thereof during said fiscal year; and

(3) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97 and Order No. 58 (7 CFR Part 958).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup., 608c)

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

NEVADA

CLASSIFICATION ORDER

JUNE 29, 1951.

1. Pursuant to the authority delegated to me by the Director, Bureau of Land Management, by Order No. 427, dated August 16, 1950, I hereby classify under the Small Tract Act of June 1, 1938 (52 Stat. 609), as amended July 14, 1945 (59 Stat. 467, 43 U. S. C. 682a), as hereinafter indicated, the following described land in the Nevada land district, embracing approximately 80 acres.

NEVADA SMALL TRACT CLASSIFICATION NO. 71

For lease and sale for homesites only:

T. 22 S., R. 61 E., M. D. M.
Sec. 9, W½SW¼.

The land is situated in Clark County, Nevada, about 7 miles south of Las Vegas, one of the largest towns in the state. It can be reached over U. S. Highway 91. The land is desert in character. The area is one that is used extensively for health and recreational purposes.

2. As to applications regularly filed prior to 10:00 a. m., March 29, 1949, and are for the type of site for which the land is classified, this order shall become effective upon the date it is signed.

3. As to the land not covered by applications referred to in paragraph 2, this order shall not become effective to permit leasing under the Small Tract Act until 10:00 a. m., August 31, 1951. At that time such land shall, subject to valid existing rights, become subject to application as follows:

(a) Ninety-day preference period for qualified veterans of World War II from 10:00 a. m., August 31, 1951, to close of business on November 29, 1951.

(b) Advance period for veterans' simultaneous filings from 10:00 a. m., March 29, 1949, to 10:00 a. m., August 31, 1951.

4. Any of the land remaining unappropriated will become subject to application under the Small Tract Act by the public generally, commencing at 10:00 a. m., November 30, 1951.

(a) Advance period for simultaneous nonpreference filings from 10:00 a. m., March 29, 1949, to 10:00 a. m., November 30, 1951.

5. Applications filed within the periods mentioned in paragraphs 3 (b) and 4 (a) will be treated as simultaneously filed.

A veteran will accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims will accompany their application by duly

corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

6. All of the land will be leased in tracts of approximately 2½ acres, each being approximately 330 by 330 feet, except that along the west side of the subdivision there will be a row of tracts 330 by 660 feet, the longer dimension of which will extend east and west, which latter tracts will be subject to a 200-foot highway right-of-way. This highway extends north and south along the western side of said subdivision.

7. Preference right leases referred to in paragraph 2 will be issued for the land described in the application provided the tract conforms to or is made to conform to the area and the dimension specified in paragraph 6.

8. Leases will be for a period of three years. Homesite leases will be for a period of three years. Homesite leases will be at an annual rental of $5.00 and business site leases at an annual rental of $20.00, all of the rental to be paid in advance for the entire period of the lease. Leases will contain an option to purchase clause at the appraised value of $125.00 per tract, except that those tracts bordering the State Highway are appraised at $175.00 per tract. Application for purchase may be filed during the term of the lease, but not more than 30 days prior to the expiration of one year from the date of the lease issuance.

9. Tracts will be subject to rights-of-way for road and public utilities as follows:

16½ feet along the north side of the NW¼SW¼ and SW¼SW¼
16½ feet along the south side of the NW¼SW¼
33 feet along the south side of the SW¼SW¼

Such rights-of-way may be utilized by the Federal Government or the State, County, or municipality in which the tract is situated, or by any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

10. All inquiries relating to these lands should be addressed to the Manager, Nevada Land and Survey Office, Reno, Nevada.

L. T. HOFFMAN,
Regional Administrator.

IDAHO

ORDER PROVIDING FOR OPENING OF PUBLIC LANDS RESTORED FROM BOISE PROJECT

JULY 2, 1951.

An order of the Bureau of Reclamation dated December 20, 1948, concurred in by the Director, Bureau of Land Management, December 27, 1948, revoked the Departmental orders of December 22, 1903, February 10, 1906, and April 26, 1938, so far as they withdrew in the first form prescribed by section 3 of the Reclamation Act of June 17, 1902 (32 Stat. 388), the following-described lands in connection with the Boise Project, Idaho, and provided that such revocation shall not affect the withdrawal of any other lands by said orders or affect any other order withdrawing or reserving the lands described:

BOISE MERIDIAN

T 11 N., R. 3 E.,
Sec. 2, lots 11 and 12.
T. 3 N., R. 3 W.,
Sec. 26, NW¼.

The lands in T. 11 N., R. 3 E., are definitely forest in type, and not of agricultural value, and it is unlikely that they will be classified for disposal under any public-land law. The NW¼ sec. 26, T. 3 N., R. 3 W. is chiefly valuable for gravel.

No applications for these lands may be allowed under the homestead, small tract, desert-land, or any other non-mineral public-land laws, unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application.

This order shall become effective at 10:00 a. m. on the 35th day after the date hereof. At that time the surveyed public lands within the above-described area shall become subject to application, petition, location, and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284), as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for those lands may be obtained on request from the Manager, Land and Survey Office, Boise, Idaho.

WILLIAM ZIMMERMAN, Jr.,
Associate Director.

MONTANA

NOTICE OF REMOVAL OF TRACT FROM PUBLIC WATER RESERVE NO. 107

Pursuant to the authority contained in Departmental Order No. 2583, section 1.1 (a) of August 16, 1950 (15 F. R. 5643), and the instructions of the Frst Assistant Secretary of the Interior of March 29, 1951, notice is hereby given that the following-described public land, which was construed by Public Water Interpretation No. 212 of January 18, 1935, to be included in Public Water Reserve No. 107 created by the Executive order of April 17, 1926, has been found to be unsuitable for withdrawal as a public water reserve and that Interpretation No. 212 will be deleted from the records:

PRINCIPAL MERIDIAN

T. 8 N., R. 41 E.
Sec. 24, SW¼SE¼.

The area described contains 40 acres.

The land is isolated and primarily valuable for grazing, and contains no water. It will not be subject to occupancy or disposition until it has been classified. It is unlikely that it will be classified as suitable for homestead, desert-land, or small-tract use.

This order shall become effective at 10:00 a. m. on the 35th day after the date of publication in FEDERAL REGISTER. At that time the said land shall become subject to application, petition, location, and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284), as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Land Office at Billings, Montana.

OREGON

NOTICE OF REMOVAL OF TRACTS FROM PUBLIC WATER RESERVE NO. 107

Pursuant to the authority contained in Departmental Order No. 2583, section 1.1 (a) of August 16, 1950 (15 F. R. 5643), and the instructions of the First Assistant Secretary of the Interior on March 29, 1941, notice is hereby given that the following-described land which was construed by Interpretation No. 199 of February 27, 1934, to be included in Public Water Reserve No. 107 created by Executive order dated April 17, 1926, has been found to be unsuitable for withdrawal as a public water reserve and that the Interpretation No. 199 will be deleted from the records:

WILLAMETTE MERIDIAN

T. 7 S., R. 42 E.,
Sec. 21, SW¼.

The area described contains 160 acres.

The land affected by this notice is chiefly valuable for grazing. No application for this land may be allowed under the homestead, small tract, or desert-land laws, or any other non-mineral public-land laws unless the land has already been classified as valuable or suitable for such type of application or shall be so classified upon consideration of an application.

This order shall become effective at 10:00 a. m. on the 35th day after publication in the FEDERAL REGISTER. At that time the said land shall become subject to application, petition, location and selection, subject to the provisions of existing withdrawals, the requirements of applicable law and the 90-day preference right filing period for veterans and others entitled to preference

under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279-284), as amended.

Wage Stabilization Board

[General Wage Regulation 12]

ESTABLISHMENT OF CONSTRUCTION INDUSTRY STABILIZATION COMMISSION

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), Executive Order 10233 (16 F. R. 3503), and Economic Stabilization Agency General Order No. 3 (16 F. R. 739), this General Wage Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes a tripartite Construction Industry Stabilization Commission to administer the wage stabilization functions in the building and construction industry. The considerations supporting this regulation are as follows:

The work of the industry is performed on separate project sites, rather than in fixed industrial plants. Both contractors and workers are mobile. Contractors move into an area, complete their project as required or allowed by such variables as weather conditions and contractual provisions, and move on to a new job site. Workers may be employed by a number of different contractors, on different projects, in the course of a single season. The employment relationship is thus temporary and intermittent.

The construction industry is highly organized both as to contractors and workers. Most of the approximately 2,500,000 employees belong to one of the 19 international unions affiliated with the Building and Construction Trades Department of the AFL, and most contractors, general, specialty or home builders, bargain through associations. Collective bargaining typically takes place between the unions and associations in a locality, and normally proceeds with each craft union negotiating separately. There may also be participation by the national unions and contractors associations. There are accordingly many thousands of separate agreements entered into each year. The wage rates determined through these negotiations are adopted in many cases by contractors who are not association members.

Wage rates for federally financed construction projects in the building and construction industry are determined by the Secretary of Labor under the Davis-Bacon and similar Acts which contain provisions stating that the minimum wages to be paid various classes of laborers and mechanics shall be based upon the wages that are determined by the Secretary of Labor to be prevailing for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the locality in which the work is to be performed. Inasmuch as it would be impractical and unstabilizing to have more than one rate for a particular craft and type of project in an area, rates established under the wage stabilization program and those established by Davis-Bacon determinations must be coordinated and integrated. This cannot be done effectively on a regional basis; it must be accomplished at the national level.

The organization and functions of the Commission are similar to those of the Wage Adjustment Board, which was responsible for wage stabilization in World War II, and continued operation after other wage controls were removed. This record led to the request, on February 9, 1951, by representatives of the Building and Construction Trades Department, AFL, and nine national contractors' associations that the Board establish a similar agency.

The regulation authorizes the Commission to stabilize wages on the basis of areas traditionally established for collective bargaining purposes. This is called for by the nature and practice of the industry and is in accord with stabilization experience.

The special characteristics of the industry make many of the Board's present regulations, intended for general applicability to industrial employment relations, technically unsuited to the building and construction industry. Effective administration of the wage stabilization function requires a specialized, expert Commission. In no other way can the case load and other problems posed by the operational and bargaining peculiarities of this industry be solved.

Due consideration has been given to the standards and procedures set forth in Title IV and Title VII of the Defense Production Act of 1950. This regulation is in accord with a joint request signed by representatives of both contractor associations and labor organizations in the building and construction industry. The regulation is issued by a tripartite Board which has consulted representatives of labor and industry, including trade associations representatives. In the judgment of the Wage Stabilization Board, this regulation is generally fair and equitable and will effectuate the purposes of Title IV of the Defense Production Act of 1950.

REGULATORY PROVISIONS

Sec.
1. Organization of Construction Industry Stabilization Commission.
2. Functions of the Construction Industry Stabilization Commission.
3. Jurisdiction of the Construction Industry Stabilization Commission.

AUTHORITY: Sections 1 through 3 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong.; E. O. 10161 (15 F. R. 6105); E. O. 10233 (16 F. R. 3503); General Order No. 3, Economic Stabilization Administrator (16 F. R. 739).

SECTION 1. *Organization of Construction Industry Stabilization Commission.* (a) The Wage Stabilization Board hereby establishes a Construction Industry Stabilization Commission. The Commission shall consist of twelve members appointed by the Board, of whom four, including the Chairman and the Vice Chairman, shall be representative of the public, four representative of labor in the building and construction industry, and four representative of management in the building and construction industry, including two representative of general contractors and two representatives of sub-contractors.

(b) The Board in consultation with the Secretary of Labor, and the Commission, will appoint the key personnel of the Commission. Other staff and services for the Commission shall be furnished by the United States Department of Labor. Employees assigned to the Commission by the Department shall be responsible to the Commission in respect to the functions to be performed by them for the Commission.

(c) The Commission is authorized to establish rules for its internal organization and procedure, including quorum rules, provision for and designation of alternate members, and establishment of panels and committees.

SEC. 2. *Functions of the Construction Industry Stabilization Commission.* (a) The Commission shall administer the wage stabilization functions in the building and construction industry. In performing these functions, the Commission shall conform to the regulations, policies, orders and decisions of the Board and its authority shall be limited to that provided in this regulation and in Executive Order 10161 and 10233. The Commission may issue other regulations, rulings, and procedures applicable to the building and construction industry, upon approval of the Board.

(b) The Commission shall stabilize rates of "wages, salaries and other compensation", as defined in section 702 (c) of the Defense Production Act of 1950, in the building and construction industry, on the basis of area rates so far as practicable. In securing wage data, the Commission shall utilize to the fullest practicable extent the information available in the Wage Determination Branch of the United States Department of Labor.

(c) Any ruling or decision issued by the Commission in a particular case shall be final unless reviewed and modified by the Board on its own motion or unless review by the Board is obtained pursuant to the procedural regulations of the Board.

SEC. 3. *Jurisdiction of the Construction Industry Stabilization Commission.* The jurisdiction of the Commission covers the administration of stabilization rules with respect to all wages and salaries paid to mechanics and laborers in the building and construction industry employed directly upon the site of the work.

(a) The term "mechanics and laborers" includes employees performing manual labor in connection with and at the site of any building and construction project, including working foremen and mechanic's apprentices. The term does not include employees whose work, although connected with building and construction projects, is non-manual or not performed directly and primarily at the site of a particular building project, such as executive, administrative, technical and clerical employees, and manual employees working in shops or away from the site of the project.

(b) The term "building and construction industry" includes all persons whether employers, contractors, employees or others, engaged in erecting, constructing, altering, remodeling, painting and decorating installations such as buildings, bridges, highways and the like. Work performed in the building and construction industry includes the transporting of materials and supplies to or from a particular building or construction project by the employees of the employer or contractor performing the construction and the manufacturing of materials, supplies or equipment on the site of a project by the employer or contractor for use thereon but does not otherwise include the manufacturing or furnishing of materials nor the performance of servicing or maintenance work. Maintenance work is work performed by workers employed on a permanent basis in a particular plant or facility for the purpose of keeping such plant or facility in efficient operating condition but does not include similar work performed on a contract basis, for various plants and facilities under different ownership.

(c) The term "site of the work" means the place or places at which the direct labor involved in a building or construction project is performed and includes temporary installations used in connection with a particular project even though such installations may not be directly on the site of the project. Installations of a permanent or commercial nature used to serve numerous projects are not considered as being on the site of construction.

(d) The term "project" means a particular building job or a particular construction job undertaken by an employer in the building and construction industry at a specified location. A project may be classified by the Commission as involving one of three types of construction, namely building construction, heavy construction and highway construction, and the approved wage rates for a particular job classification in a particular area may vary depending on the type of construction involved in a project.

(e) The term "area" means the geographical area, generally at least a county or metropolitan area, which is the historical basis for collective bargaining for the particular craft and type of construction.

Adopted by unanimous vote of the Board on May 31, 1951.

GEORGE W. TAYLOR,
Chairman.

FEDERAL POWER COMMISSION

[Docket No. G-1725]

PANHANDLE EASTERN PIPE LINE CO.

NOTICE OF APPLICATION FOR ORDER PERMITTING AND APPROVING PARTIAL ABANDONMENT OF SERVICE

JULY 2, 1951.

Take notice that Panhandle Eastern Pipe Line Company (Applicant), a Delaware corporation with its principal place of business at 1221 Baltimore Avenue, Kansas City 6, Missouri, filed on June 21, 1951, an application pursuant to section 7 of the Natural Gas Act for an order permitting and approving partial abandonment of natural gas service as hereinafter set forth.

Applicant proposes to reduce its natural-gas deliveries to Michigan Consolidated Gas Company at Detroit, Michigan, from a daily maximum volume of 125,000 Mcf per day, as required under its existing contract, as supplemented, to a daily maximum volume of 87,500 Mcf per day, or 32 million Mcf per year. Said reduction is to become effective January 1, 1952. Applicant states that its existing contract with Michigan Consolidated will terminate on December 31, 1951, after which date it proposes to serve Michigan Consolidated on the reduced basis by virtue of findings and orders of the Federal Power Commission issued in Docket No. G-669, In the Mat-

ter of Michigan-Wisconsin Pipe Line. Applicant states that it will tender Michigan Consolidated Gas Company a new contract effectuating the proposed reduced natural gas service.

Protests or petitions to intervene may be filed with the Federal Power Comission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 20th day of July 1951. The application is on file with the Commission for public inspection.

SHIPPENSBURG GAS CO.

NOTICE OF APPLICATION

JULY 2, 1951.

Shippensburg Gas Company (Applicant), a Pennsylvania corporation with its principal place of business at Shippensburg, Pennsylvania, filed on June 25, 1951, an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the construction and operation of approximately 67,600 feet of 6-inch natural-gas transmission pipeline, extending from a point on the main natural-gas pipeline of Texas Eastern Transmission Corporation in Pennsylvania to Shippensburg's present manufactured-gas distribution system in the town of Shippensburg, Pennsylvania. Applicant proposes to purchase up to 376 Mcf of natural gas per day from Texas Eastern and to transport such gas through the proposed facilities for distribution in the Town of Shippensburg and environs. Applicant stated in its application that Texas Eastern proposes by its application in Docket No. G-1693 to sell up to 376 Mcf of natural gas per day to it.

Protest or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 20th day of July 1951. The application is on file with the Commission for public inspection.

Division of State and Local School Systems.
Division of Higher Education.
Division of Vocational Education.

(b) *Office of the Commissioner.* (1) The Commissioner of Education administers the program of the Office.

(2) The Executive Officer directs the functions and activities of administrative management and services to the Office. This office also administers the collection of loans made to students under the Student War Loans Program (56 Stat. 576; 57 Stat. 501; 11 F. R. 177A).

(3) The Program Development and Coordination Branch studies and identifies emerging problems and trends in American education, plans and recommends Office programs and objectives, reviews proposed projects and activities for conformity to over-all goals, assists in implementation of programs, and reviews Division operations for effectiveness and conformity to policy. In addition it provides central statistical research services, informational services, and publication controls and services for the Office.

(4) There is also in the Office of the Commissioner an Assistant Commissioner who coordinates defense activities of the Office of Education and administers the National Scientific Register. The National Scientific Register Project has been established in the Office of Education under an agreement with the National Security Resources Board pursuant to the National Security Act of 1947 (61 Stat. 495).

(c) *Division of State and Local School Systems.* The Division of State and Local School Systems is headed by an Assistant Commissioner for State and Local School Systems. The Division provides educational leadership in the general field of elementary and secondary education. It furnishes advisory services to State and local school systems and educational organizations in the field of elementary and secondary education, on such matters as administration and supervision, instruction, and auxiliary services. The Division administers the program for the exchange of teachers and students between the United States and other countries and for the training of teachers from foreign countries under sec. 1, 53 Stat. 1290; 22 U. S. C. 501-502; and as delegated by the Department of State under 62 Stat. 6 (22 U. S. C. 1435; 22 C. F. R. 65.1-65.12 inclusive). The Division also administers the programs for financial assistance to local school districts in Federally affected areas for maintenance and operation (Public Law 874, 81st Cong.; 64 Stat. 1100; 20 U. S. C. 236-244), for school facilities inventories and surveys (Pub. Law 815, Title I, 81st Cong.; 64 Stat. 967; 20 U. S. C. 251-255), and for school construction (Public Law 815, Title II, 81st Cong., 64 Stat. 967; 20 U. S. C. 271-280).

(d) *Division of Higher Education.* The Division of Higher Education is headed by an Assistant Commissioner for Higher Education. The Division provides educational leadership in the general field of higher education. It furnishes advisory services to institutions of higher education on such matters as administration, supervision, and instruction. The Division also administers the grants-in-aid to land grant colleges under the provisions of the Morrill Act and supplementary acts (secs. 4 and 5, 12 Stat. 503; 14 Stat. 208; 22 Stat. 484; secs. 1 to 6, 26 Stat. 417; 34 Stat. 1281; 44 Stat. 247; sec. 22, 49 Stat. 439; 54 Stat. 39; 7 U. S. C. 301, 305, 307, 308, 321-326, 328, 329, 331; 5 U. S. C. 133t note). The Division studies the needs for and utilization of housing facilities in colleges and universities and makes recommendations to the Administrator of the Housing and Home Finance Agency with reference to the making of loans to these institutions to provide housing for their students and faculties (Pub. Law 475, 81st Congress). The Division studies foreign school systems and makes reports thereon. It also evaluates foreign credentials of students as requested by institutions of higher education.

(e) *Division of Vocational Education.* The Division of Vocational Education is headed by an Assistant Commissioner for Vocational Education. In his absence or disability the Assistant Director, State Plans and Grants, acts for him. The Division administers grants-in-aid for vocational education under the provisions of the Smith-Hughes Vocational Education Act and the Vocational Education Act of 1946 (sec. 1 to 18, 39 Stat. 929, as amended, and sec. 1 to 9, 60 Stat. 775; 20 U. S. C. 11-30; 45 CFR 102.1-102.219, inclusive), and provides leadership in the general field of vocational education. It also furnishes advisory services to State Boards for Vocational Education, other Federal agencies, and professional organizations on such matters as guidance and counseling, and vocational education in agriculture, home economics, trade and industry, and distributive and other commercial occupations.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2652]

AMERICAN & FOREIGN POWER CO. INC.

ORDER AUTHORIZING PROPOSED EXTENSION OF LOAN AGREEMENT FROM JULY 1, 1951 TO JULY 1, 1952 AND THE BORROWING FROM CERTAIN BANKING INSTITUTIONS

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 29th day of June A. D., 1951.

American & Foreign Power Company Inc. ("Foreign Power"), a registered holding company, having filed a declaration with the Commission pursuant to sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935, regarding the following transactions:

The Commission, on December 30, 1949, issued its Findings, Opinion and Order authorizing Foreign Power to obtain a 5-year 3½ percent bank loan in the amount of $15,000,000 pursuant to a Loan Agreement dated December 16, 1949, from Bankers Trust Company, Mellon National Bank and Trust Company, and The National City Bank of New York ("Banks"). Pursuant to that Loan Agreement, Foreign Power borrowed on December 30, 1949, the principal amount of $10,000,000 retaining the right to borrow the remaining $5,000,000 at any time on or before July 1, 1951.

Foreign Power now proposes (a) the extension from July 1, 1951 to July 1, 1952, pursuant to a Supplemental Loan Agreement dated June 11, 1951, of the period during which it shall have the right to borrow the remaining $5,000,000 of the original $15,000,000 credit available to the Company under the Loan Agreement dated December 16, 1949, with the Banks and (b) the borrowing by Foreign Power, if such borrowing is decided necessary, of all or any part of said remaining $5,000,000 at any time on or before July 1, 1952. Such borrowing, if made, would be evidenced by promissory notes made payable to the Banks. The Supplemental Loan Agreement provides, among other things, that the interest rate, if such borrowing is made, would be 3½ percent per annum and that a commitment fee of ½ of 1 percent per annum would continue to be payable by the Company on the daily averaged unused portion of the commitment of each of the three Banks until the expiration or cancellation of the commitment.

The declarant represents that, if the proposed borrowing is made, the proceeds would be used to aid its subsidiaries in financing extensive construction programs to be carried out over the next few years. It is further represented that the actual borrowing is contingent upon whether Foreign Power is successful in obtaining a line of credit from the Export-Import Bank of Washington for use in aiding the construction program of the Company's subsidiaries.

Said declaration having been filed on June 13, 1951, and notice of said filing having been given in the form and manner prescribed by Rule U-23 promulgated pursuant to the act, and the Commission not having received a request for a hearing with respect to said declaration within the period specified in said notice, or otherwise, and not having ordered a hearing thereon; and

The Commission finding with respect to the declaration that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the Public Utility Holding Company Act of 1935, that said declaration be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[Vesting Order 18086]

LABOUCHERE & CO.

In re: Stock registered in the name of Labouchere & Co., Amsterdam, Holland, and owned by persons whose names are unknown. F-49-730.

Under the authority of the Trading With the Enemy Act, as amended, Executive Orders 9193, as amended, 9788 and 9989, and pursuant to law, after investigation, it is hereby found:

1. That the property described as follows: Those certain shares of stock described in Exhibit A, set forth below and by reference made a part hereof, registered in the name of Labouchere & Co., together with all declared and unpaid dividends thereon, excepting from the foregoing, however, those shares of stock described in Exhibit A, together with all declared and unpaid dividends thereon, concerning which, on or prior to the effective date of this vesting order, the issuing corporation or its transfer agent in the United States has received a license or a copy of a license removing such property from the restrictions of Executive Order 8389, as amended, or has been advised in writing by a banking institution in the United States of the removal of such restrictions and of the authorization therefor;

is property within the United States;

2. That the property described in subparagraph 1 hereof is owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or is evidence of ownership or control by persons, names unknown, who, if individuals, there is reasonable cause to believe are residents of a designated enemy country and which, if partnerships, associations, corporations, or other organizations, there is reasonable cause to believe are organized under the laws of a designated enemy country or on or since the effective date of Executive Order 8389, as amended, have had their principal places of business in a designated enemy country;

3. That the persons referred to in subparagraph 2 hereof are nationals of a designated enemy country;

and it is hereby determined:

4. That to the extent that the persons referred to in subparagraph 2 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country.

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended, and the term "designated enemy country" has reference to Germany or Japan. The term "banking institution" as used herein shall have the meaning prescribed in section 5F of Executive Order 8389, as amended.

Executed at Washington, D. C., on June 20, 1951.

For the Attorney General.

[SEAL] HAROLD I. BAYNTON,
Assistant Attorney General,
Director, Office of Alien Property.

VOLUME 16 NUMBER 132

Washington, Tuesday, July 10, 1951

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10269

DELEGATING TO THE DIRECTOR OF DEFENSE MOBILIZATION THE AUTHORITY OF THE PRESIDENT TO DETERMINE, WITH RESPECT TO THE NEED FOR SCHOOL FACILITIES, AREAS WHICH ARE CRITICAL BY REASON OF NATIONAL-DEFENSE ACTIVITIES

By virtue of the authority vested in me as President of the United States, it is ordered as follows:

1. There is hereby delegated to the Director of Defense Mobilization, or an officer of the Government designated by him and acting subject to his direction and control, the authority vested in the President by the paragraph appearing under the heading "Federal Security Agency—Office of Education—Grants for Surveys and School Construction" of the Third Supplemental Appropriation Act, 1951, Public Law 45, 82nd Congress, to determine areas which are critical areas by reason of national-defense activities.

2. The Commissioner of Education shall furnish the Director of Defense Mobilization, or the officer designated by the said Director under paragraph 1 hereof, such information as may be requested by the Director, or such officer, concerning measures taken to provide school facilities in areas determined, pursuant to paragraph 1 of this order, to be critical areas by reason of national-defense activities.

RULES AND REGULATIONS

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 2—APPOINTMENT THROUGH THE COMPETITIVE SYSTEM

PART 7—APPOINTMENT OF EMPLOYEES OF OTHER AGENCIES WITHOUT REEMPLOYMENT RIGHTS AND OF FORMER FEDERAL EMPLOYEES

PART 8—PROMOTION, DEMOTION, AND REASSIGNMENT AND MOVEMENT OF EMPLOYEES BETWEEN AGENCIES WITH REEMPLOYMENT RIGHTS

MISCELLANEOUS AMENDMENTS

Sections 2.115 (b), 7.105 (a) (5), 8.109 and 8.115 (a) are amended to read as set out below. These amendments are effective upon publication in the FEDERAL REGISTER.

The amendments to §§ 2.115 (b), 7.105 (a) (5) and 8.115 (a) are in the nature of cross references to § 8.109. The latter section has been revised completely. The result of these changes will be that the restrictions in § 8.109 will apply equally to competitive indefinite appointments made under agency recruiting authority, non-competitive appointments under authority of § 7.105 (a), non-competitive personnel changes within an agency made under § 8.108, and non-competitive indefinite appointments with reemployment rights made under § 8.115. The restrictions are not applicable in making competitive probational or indefinite appointments from civil service registers of eligibles.

It should be noted that § 8.109 now includes restrictions on personnel actions within a set period following competitive appointment. It should be noted further that under § 8.109 (b) there is no longer any time-in-grade restriction on promotions to positions at or below GS–5, or equivalent. This paragraph also permits promotions of two grades to positions below GS–12, or equivalent, to be made within one waiting period (6 months), either one grade at a time or two grades at one time.

1. Section 2.115 (b) is amended by the addition of a sentence at the end of the paragraph. As amended, it reads as follows:

§ 2.115 *Indefinite appointment.*
* * *

(b) *Special requirements when appointments are made in absence of eligibles.* Whenever there are insufficient available eligibles on registers, in making appointments under this section agencies shall (1) give perference first to 10-point veterans and second to 5-point veterans; and (2) obtain a decision from the Commission whenever it is necessary to determine whether any applicant is disqualified because of physical unfitness. In making appointments under this authority the restrictions of § 8.109 of this chapter must be observed.

2. Section 7.105 (a) (5) is amended to read as follows:

§ 7.105. *Agency authority and general requirements.* (a) After September 1, 1950, the employment non-competitively of employees of other agencies without reemployment rights and of former Federal employees shall be by indefinite appointment only. The Commission hereby delegates authority to agencies to make such indefinite appointments subject to the following conditions:
* * *

(5) The standards of the Commission must be met and the restrictions of § 8.109 of this chapter observed.

3. Section 8.109 is amended to read as follows:

§ 8.109 *Restrictions on promotion, appointment at a higher grade and reassignment to a different line of work.* (a) No promotion, appointment at a higher grade, or reassignment to a different line of work shall be made within 3 months of the person's latest competitive indefinite or probational appointment if the position to be filled is in grade GS–5, or equivalent, or lower, or within 6 months if the position to be filled is in a higher grade.

(b) No person shall be appointed or promoted to a position in any grade from GS–5 to GS–11, inclusive (or equivalent) which is more than two grades, or to a position in grade GS–12, or higher (or equivalent) which is more than one grade above the lowest grade held by him in the Federal civil service within the preceding six months under indefinite or permanent appointment.

(c) The Commission by prior general or specific approval may permit exceptions in the interest of the service to the restrictions in this section.

4. Section 8.115 (a) is amended to read as follows:

§ 8.115 *Appointment of employees with reemployment rights.* (a) The Commission hereby delegates authority to agencies to give indefinite appointments to employees with reemployment rights provided the standards of the Commission are met and the restrictions of § 8.109 are observed.

[998.302, Amdt. 1]

PART 998—IRISH POTATOES GROWN IN NEW JERSEY

LIMITATION OF SHIPMENTS

Findings. 1. Pursuant to Marketing Agreement No. 116 and Order No. 98 (7 CFR Part 998) regulating the handling of Irish potatoes grown in New Jersey, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of recommendations and information submitted by the New Jersey Potato Marketing Committee, established under said marketing agreement and order, and other available information, it is hereby found that the amended limitation of shipments as hereinafter provided will tend to effectuate the declared policy of the act.

2. It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until thirty days after publication thereof in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (i) shipments of the 1951 crop Irish potatoes grown in the production area will have begun, (ii) more orderly marketing in the public interest than would otherwise prevail will be promoted by limiting shipments of potatoes on and after the effective date hereinafter provided in the manner set forth, (iii) compliance with this section will not require any preparation on the part of handlers which cannot be completed by such effective date, (iv) a reasonable time is permitted, under the circumstances, for such preparation, (v) the time intervening between the date when adequate information became available to the New Jersey Potato Marketing Committee to make its recommendation and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and (vi) information regarding the committee's recommendation has been made available to producers and handlers in the production area.

Order, as amended. The provisions in paragraph (b) (1) of § 998.302 (16 F. R. 6234) shall, on and after the effective date hereof, read as follows:

(1) During the period beginning July 12, 1951, and ending December 29, 1951, both dates inclusive, no handler shall ship potatoes grown in New Jersey which do not meet the requirements of U. S. Commercial, or better, grade, of which not less than 85 percent are of U. S. No. 1 quality, and which are of sizes not less than 2 inches minimum diameter, as such grades, qualities, and sizes are defined in the U. S. Standards for Potatoes (7 CFR 51.366), including the tolerances set forth therein, except that, in addition to the aforesaid potatoes, handlers may ship as such any U. S. No. 1, Size B potatoes grown in New Jersey, as such grades and sizes are defined in the aforementioned U. S. Standards for Potatoes, including the tolerances set forth therein.

(Sec. 5, 49 Stat. 753, as amended, 7 U. S. C. and Sup., 608c)

Done at Washington, D. C., this 5th day of July 1951 to become effective July 12, 1951.

Director, Fruit and Vegetable Branch, Production and Marketing Administration.

Chapter IV—Displaced Persons Commission

PART 702—SELECTION AND ELIGIBILITY

SELECTION OF APPLICANTS

In accordance with section 3 (a) of the Displaced Persons Act of 1948, as amended by Public Law 60, 82d Congress, § 702.1 of Chapter 4, Title 8, is hereby amended to read as follows:

§ 702.1 *Selection of applicants.* (a) Selection of applicants under sections 2 (c), 2 (e), 2 (f), 2 (g) and 12 (a) of the act for processing for admission to the United States shall be made by the Commission on the basis of assurances submitted in accordance with Part 701 of this chapter.

(b) For procedures under section 2 (d) of the act see § 701.5 of this chapter.

(c) No applicant under sections 2 (c), 2 (d) or 2 (g) of the act shall be entitled to a visa unless the Commission initiated the selection or processing of such applicant on or before July 31, 1951.

(d) Selection or processing of an applicant under the act is initiated by the Commission on or before July 31, 1951 when on or before that date:

(1) The Commission validated an assurance submitted by an individual sponsor, a public agency or voluntary agency recognized by the Commission for this purpose, in behalf of a named applicant under sections 2 (c), 2 (d) or 2 (g) of the act;

(2) The Commission received a nomination of an applicant under sections 2 (c), 2 (d) or 2 (g) of the act under an unnamed or blanket assurance from a public agency or voluntary agency recognized by the Commission for this purpose;

(3) The Commission initiated processing, under its pre-assurance program, of an applicant under sections 2 (c), 2 (d) or 2 (g) of the act, or the Commission selected an applicant under sections 2 (c), 2 (d) or 2 (g) of the act to fill an assurance for an unnamed person;

(4) Application is made to an American Consul by or on behalf of an applicant under section 2 (d) of the act in accordance with the procedures established under § 701.5 (f) of this chapter.

The foregoing amendment shall be effective upon the date of publication in the FEDERAL REGISTER. Compliance with the provisions of section 4 (a) of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1003) as to notice of proposed rule making is found to be contrary to the public interest because Public Law 774, 80th Congress (62 Stat. 1009), as amended by the act of June 16, 1950, which was implemented by the regulations which became effective on June 17, 1950, and the amendments thereto which became effective on April 7, 1951, and June 9, 1951, and as amended by the act of June 28, 1950, which is implemented by the foregoing amendment and became effective on June 28, 1950, and the execution of functions of the Displaced Persons Commission under that statute as amended, would be unduly impeded by such notice. For the same reason it is found that the provisions of section 4 (c) of the Administrative Procedure act providing for delayed effective date are inapplicable.

(Sec 8, 62 Stat. 1012, as amended; 50 U. S. C. App. 1957. Interprets or applies sec. 13, 62 Stat. 1014; 50 U. S. C. App. 1962)

Acting Chairman,

TITLE 29—LABOR

Chapter V—Wage and Hour Division, Department of Labor

PART 779—RETAIL OR SERVICE ESTABLISHMENT AND RELATED EXEMPTIONS

FROZEN-FOOD LOCKER PLANTS

Part 779 is hereby amended by adding a new § 779.29 to read as follows:

§ 779.29 *Application of the 13 (a) (2) and 13 (a) (4) exemptions to frozen-food locker plants.* (a) The general principles governing the application of the 13 (a) (2) and 13 (a) (4) exemptions apply, as is explained more fully in paragraphs (b) and (c) of this section, to establishments engaged in providing frozen-food locker service to farmers and other private individuals for the cold storage of meats, fruits and vegetables, in activities incidental to such service, and, in many cases, in other activities. It is the purpose of this section to show generally how these principles apply and, particularly, how they apply where the locker establishment also performs such services with respect to the customer's own goods as the custom slaughtering and dressing of livestock and poultry and related activities for cold storage purposes, or engages on its own account in such activities as the slaughtering and dressing of livestock or poultry and related activities for purposes of sale.

(b) Frozen-food locker plants provide locker service for the cold storage of frozen meats, fruits and vegetables and engage in incidental activities such as the cutting of meat, cleaning, packaging or wrapping and quick freezing, of meats, fruits, or vegetables for such locker service. In such establishments lockers are rented principally to farmers and other private individuals for the purpose of storage by them of such goods for their own personal or family use. Storage space and related services may also be provided for business or commercial use such as to hotels, stores or restaurants, or to farmers or other customers who use it to store meat and other goods for future sale. Such locker plants may also engage in such activities as the custom slaughtering and dressing of livestock or poultry and the curing, smoking or other processing of meat owned by farmers and other private individuals for storage by those customers either in their home freezers or in locker plants for the customers' personal or family use. The custom slaughtering or processing activities of such locker establishments may be performed on the premises of the establishments or at some location away from the establishment. An establishment engaged in some or all of these activities may be exempt under section 13 (a) (2) of the act if it meets the specific tests of that exemption. In applying these tests, the receipts from the locker service and the incidental activities mentioned in the first sentence of this paragraph, and from the slaughtering, dressing or other processing of livestock or poultry performed for farmers and other private individuals for their own use, but not where the goods are to be sold to others by the customer, will be counted as receipts from sales of services recognized as retail in the industry. Receipts from commercial storage and activities incidental thereto and from the sale of hides, offal or other by-products will be counted as receipts from sales of goods or services made for resale or which are not recognized as retail sales of goods or services in the industry. If the locker establishment meets the tests of the exemption, all employees employed by it, including those employees who are engaged at a location away from the establishment in performing the slaughtering or processing service sold by the locker establishment will be exempt.

(c) Some locker plant establishments also include a meat market of the type which slaughters its own livestock or poultry (as distinguished from the slaughtering performed as a service to customers on the customers' own livestock) and processes such meat for sale by it to the general public. In performing such operations as the slaughtering, curing, and smoking of meat and the rendering of fats for sale, the establishment is making or processing goods that it sells and is not performing retail services for its customers. Employees engaged in these activities in such an establishment, therefore, are not exempt under section 13 (a) (2) but may be exempt if the establishment meets the tests of a combination 13 (a) (2)–13 (a) (4) exemption in accordance with the principles stated in § 779.27. As a general rule, such a meat market which slaughters its own livestock and sells its meat to the general public is a type of establishment which may be recognized as a retail establishment in the industry within the meaning of the 13 (a) (4) exemption. Whether a particular establishment, however, is so recognized depends upon the facts of the case. It should be noted that where such slaughtering, curing or smoking is, for any reason, performed away from the premises of the establishment where the meat is sold, the employees engaged in such activities are not employees employed by a retail establishment which "makes or processes at the retail establishment the goods that it sells" within the meaning of the 13 (a) (4) exemption and cannot, therefore, be exempt under that section. It should also be noted that section 7 (c) of the act provides an exemption from its overtime requirements (but not from the minimum wage requirements) during not more than 14 workweeks in each calendar year for employees employed in a place of employment where their employer is engaged in handling, slaughtering or dressing poultry or livestock. This exemption may be claimed for employees in such a place of employment who are engaged only in performing such handling, slaughtering, and dressing operations and operations necessarily incident thereto, in the event that such employees are found not to come within the 13 (a) (2) or 13 (a) (4) exemption under the principles discussed in this section.

(52 Stat. 1060, as amended, sec. 16 (c), 63 Stat. 920; 29 U. S. C. and Sup. 201–219)

Signed at Washington, D. C., this 2d day of July 1951.

WM. R. MCCOMB,
Administrator,
Wage and Hour Division.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Ceiling Price Regulation, Amendment 16]

GENERAL CEILING PRICE REGULATION

EXEMPTION OF VEGETABLE PLANTS

Pursuant to the Defense Production Act of 1950 (Pub. Law, 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this amendment to the General Ceiling Price Regulation (16 F. R. 808) is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment exempts from the General Ceiling Price Regulation sales and deliveries of vegetable plants, such as tomato, cabbage and pepper plants. This exemption from price control gives the same treatment as was given to seeds in the original regulation and as was also given to flowering plants, nursery stock and other floral products by Amendment 8.

Many vegetables, such as those listed above, are grown from seeds planted in greenhouses by commercial operators and the plants when they reach a cer-

tain size are sold through commercial channels to home gardeners and others who do not have the facilities for raising their own plants. Tomato plants, which perhaps represent the largest volume of production of such vegetable plants, are also purchased by canners who sell them to the growers with whom they enter into contracts for tomatoes for processing. This is the only effective way a canner can control the variety of tomato he is to receive for processing.

Vegetable plants are grown under the same conditions as nursery stock and flowering plants, and the same considerations which warranted the exemption from price control of such products are applicable. Furthermore due to the seasonal nature of the production of such plants, the base period of the GCPR is inappropriate in most producing areas, and sellers in such areas would have to resort to the Office of Price Stabilization for individual authorizations of their ceiling prices.

These commodities do not enter significantly into the cost of living. For the foregoing reasons the Director of Price Stabilization finds that the exemption from price control of vegetable plants is necessary to prevent hardships and inequities, and is not inconsistent with the purposes of the Defense Production Act of 1950.

AMENDATORY PROVISION

Section 14 (s) (17) of the General Ceiling Price Regulation is amended by adding immediately after the phrase "nursery stock" the following: "vegetable plants;".

(Sec. 704, Pub. Law 774, 81st Cong.)

Effective date. This amendment shall become effective July 13, 1951.

Director of Price Stabilization.

[General Ceiling Price Regulation, Amendment 1 to Revision 1 to Supplementary Regulation 2]

GCPR, SR 2, REV. 1—RETAIL COAL DEALERS

COAL BAGGED FOR ALASKA

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 1 to Supplementary Regulation 2, Revision 1 to the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

Historically, coal has been bagged in used sacks and shipped to Alaskan points for use as fuel. The actual sacking and shipping is handled by a few retail coal dealers in Seattle, Washington. The coal used originates in Utah because it is the nearest coal suitable for the purpose. The amount of coal involved is not large, approximately 6,000 tons annually, and the shipments have to be made during the summer months because of weather conditions at other times.

The price paid by the dealers for the used sacks has increased substantially. In some sizes the prices have doubled. The usual capacity of the sacks is 100 and 125 lbs. each, requiring 16 to 20 sacks per ton of coal.

Investigations by this office indicate that the increase in the price of the bags so used is in conformity with the provisions of the General Ceiling Price Regulation. If the coal described herein is to continue to be shipped to Alaska, the dealers involved must be granted some adjustment of ceiling price in order to relieve the inequitable cost price relationship that has developed. This Amendment 1 to Supplementary Regulation 2, Revision 1 will grant such relief but will not increase the dealers' margin. A used textile bag regulation is now under consideration by this office and should be issued within the near future. If this regulation affects the cost of used bags, this amendment may be further amended to bring this adjustment in line with the used bag regulation. Because time is of the essence to dealers who sack and ship coal to Alaskan points, this temporary relief is granted.

AMENDATORY PROVISIONS

Section 3 of Supplementary Regulation 2, Revision 1 to the General Ceiling Price Regulation is hereby amended by adding paragraph (f), as follows:

(f) Retail coal dealers bagging coal in used bags for shipment to Alaska may increase the price charged for such coal by the amount of $1.25 per ton.

(Sec. 704, Pub. Law 774, 81st Cong.)

Effective date. This amendment 1 to Supplementary Regulation 2, Revision 1 to the General Ceiling Price Regulation shall become effective July 13, 1951.

[General Ceiling Price Regulation, Amendment 4 to Supplementary Regulation 15]

GCPR, SR 15—EXCEPTIONS FOR CERTAIN SERVICES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this amendment to Supplementary Regulation 15 (16 F. R. 2908), is hereby issued.

STATEMENT OF CONSIDERATIONS

Exceptions for services covered by General Ceiling Price Regulation, Supplementary Regulation 15, as amended, are now covered by the provisions of General Overriding Regulation 14.

AMENDATORY PROVISIONS

1. Section 1 of Supplementary Regulation 15 to the General Ceiling Price Regulation is hereby amended to read as follows:

SECTION 1. *What this supplementary regulation does.* The purpose of this regulation is to suspend the rates, fees, charges and compensation charged for certain services from the provisions of the General Ceiling Price Regulation.

2. Section 2 (b), as amended, of Supplementary Regulation 15 to the General Ceiling Price Regulation is hereby revoked.

(Sec. 704, Pub. Law 774, 81st Cong.)

Effective date. This amendment 4 to Supplementary Regulation 15 to the General Ceiling Price Regulation is effective July 9, 1951.

[General Overriding Regulation 14]

GOR 14—EXCEPTED SERVICES

Pursuant to the Defense Production Act of 1950 (Pub. Law 774, 81st Cong.), as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this General Overriding Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This General Overriding Regulation is an across-the-board regulation which exempts certain services from price control. All services now or hereafter totally exempted from price control will be listed in this General Overriding Regulation.

Some of the listed services have already been exempted under the provisions of Supplementary Regulation 15 to the General Ceiling Price Regulation. This supplementary regulation is simultaneously being revoked insofar as it deals with total exemptions. After this date, it will deal only with temporary suspensions and adjustable pricing authority as to sellers of certain services. The services which are now temporarily suspended are services furnished by hospitals and summer camps and certain services related to harvesting and packing of fresh fruits, vegetables, berries and nuts. The adjustable pricing authority is now applicable to contract carriers by motor vehicle and lessors of trucks and passenger cars.

Those services already exempted under such Supplementary Regulation 15 and which are merely incorporated into this General Overriding Regulation for convenience are services rendered by schools, printing and binding services pursuant to contract with the United States Government Printing Office, drilling of oil and gas wells and certain other services related to oil and gas wells, and certain rates regulated by the Department of Agriculture under the Packers and Stockyards Act. The statement of considerations for such Supplementary Regulation 15 discusses the reasons for these exemptions.

A number of services are exempted from price control for the first time by this General Overriding Regulation. They fall within three groups: (1) services over which the Office of Price Stabilization has no control by virtue of the provisions of section 402 (e) of the Defense Production Act of 1950; (2) services which have minor significance and slight effect upon the cost of living; and (3) services which cannot practicably be controlled.

In the first category are a number of exemptions for professional services as well as exemptions relating to publishing, broadcasting, motion picture and insurance fields. These groups are dealt with by section 402 (e) of the Defense Production Act of 1950.

In the second category are services such as the repair and maintenance of antiques, shoe shining by shoe shine boys, taxidermy, etc.

The third group includes stevedoring and watchman and guard services. These services involve such a narrow margin over labor cost and often involve such an individualized pattern of charging that the administrative difficulties of control out-weigh the benefits.

The use of parking space on streets and thoroughfares when regulated by governmentally operated parking meters is exempted from price control. Parking fees usually partake more of the nature of a tax or the exercise of a municipal police power in the regulation of the use of public streets than a charge for a service. This exemption from parking does not apply to parking charges in lots operated by governmental agencies or private persons.

A number of services are exempted by an occupational designation. It is made clear in the regulation that the exemption extends to services which fall within the scope of the particular occupation and which are not performed as an incident to a non-exempt service.

All services rendered by employees are exempted since the control of wages and salaries is not within the scope of Office of Price Stabilization activities. Services rendered by way of employment are under Wage Stabilization Board jurisdiction.

This additional list was prepared after the Director of Price Stabilization had consulted with numerous representatives from various service fields and had given consideration to their recommendations. Subjecting the charges for these services to price control would have no appreciable effect on the program of price stabilization and would impose an unnecessary administrative and enforcement burden. In the judgment of the Director of Price Stabilization, in view of the nature of the additional services exempted, no ceilings are required to be applied to prices for such services.

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Applicability.
3. Exceptions.

AUTHORITY: Sections 1 to 3 issued under sec. 704, Pub. Law 774, 81st Cong. Interpret or apply Title IV, Pub. Law 774, 81st Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this regulation does.* This regulation excepts from any ceiling price restrictions imposed by the Office of Price Stabilization the rates, fees and charges for supplying the services enumerated.

SEC. 2. *Applicability.* The provisions of this General Overriding Regulation are applicable to services supplied in the 48 States of the United States, the District of Columbia, and Alaska, Guam, Hawaii, Puerto Rico, Samoa and the Virgin Islands.

SEC. 3. *Exceptions.* (a) No ceiling price regulation now or hereafter issued by the Office of Price Stabilization shall apply to the rates, fees and charges for the supply of the services listed below and the services which fall within the scope of the occupations listed below:

Chapter VI—National Production Authority, Department of Commerce

[CMP Regulation No. 5]

CMP REG. 5—MAINTENANCE, REPAIR, AND OPERATING SUPPLIES AND MINOR CAPITAL ADDITIONS UNDER THE CONTROLLED MATERIALS PLAN

This regulation is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this regulation, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all industries affected in advance of the issuance of this regulation has been rendered impracticable because the regulation affects almost all industries.

NPA Reg. 4 is revoked effective July 6, 1951. Direction 2 to NPA Reg. 4, as amended June 25, 1951, shall be considered as a direction to this regulation. On and after July 6, 1951, any reference to NPA Reg. 4 contained in any order or regulation of NPA (other than this regulation) shall be deemed a reference to CMP Regulation No. 5.

AUTHORITY: Sections 1 to 17 issued under sec. 704, Pub. Law. 774, 81st Cong., Pub. Law 69, 82d Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this regulation does.* The purpose of this regulation is to provide a uniform procedure by which any business enterprise, Government agency, or public or private institution may obtain limited quantities of controlled materials and products and materials other than controlled materials for maintenance, repair, and operating supplies (hereinafter collectively referred to as "MRO") as well as for minor capital additions. It provides for the establishment of quarterly quotas for MRO. The regulation does not limit the quantity of materials and products which a person may obtain without using the procedure provided in this regulation. However, a person who makes use of the procedure provided in this regulation to obtain in any quarter materials or products in excess of 20 percent of his quota shall comply with the quota limitations whether or not he is able to obtain additional materials and products without using the procedure provided in this regulation. A person may use the procedure provided in this regulation to obtain MRO and minor capital additions up to $1,000 in any one quarter regardless of his quota. The procedure provided in this regulation may not be used to secure materials for personal or household use.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Person" means any individual, partnership, corporation, association, or other organized group, and includes any business enterprise, Government agency, or institution. If, in the calendar year 1950, or in his last fiscal year ending prior to March 1, 1951, a person operated more than one plant, division, department, branch, or other unit, and maintained for any such unit separate records showing expenditures therefor for MRO, he may elect to treat any one or more of such units as a separate person for the purposes of this regulation, or to treat his entire operation within the United States, its territories and possessions, as a single person. An election so made may not thereafter be changed without prior written approval of NPA.

(b) "NPA" means the National Production Authority.

(c) "Business enterprise" means a lawful activity conducted for profit in the United States, its territories or possessions.

(d) "Government agency" means the United States, its territories and possessions, any of the 48 States, or the District of Columbia, any political subdivision of any of the foregoing, and any agency of any of the foregoing which is not a business enterprise.

(e) "Institution" means any lawful organization, public or private, within the United States, its territories and possessions, which is neither a business enterprise nor a Government agency. It includes, but is not limited to schools, libraries, hospitals, churches, clubs, and welfare establishments.

(f) "Maintenance" means the minimum upkeep necessary to continue any plant, facility, or equipment in sound working condition, and "repair" means the restoration of any plant, facility, or equipment to sound working condition when it has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts, or the like. Neither "maintenance" nor "repair" includes the replacement of any plant, facility, or equipment, or the improvement of any plant, facility, or equipment by replacing material which is still in sound working condition with materials of a new or different kind, quality, or design.

(g) "Operating supplies" means, in the case of a business enterprise, any kind of material carried by such business enterprise as operating supplies according to its established accounting practice. It includes items, such as hand tools, purchased by an employer for sale to his employees solely for use in his business if such items would have constituted operating supplies had they been issued to employees without charge. "Operating supplies" means, in the case of a Government agency or an institution, any kind of material used by the agency or institution in conducting any activity or rendering any service, provided such material is consumed in the course of operation and was not carried as capital equipment by the agency or institution according to its established accounting practice. Materials incorporated in a product are operating supplies if, but only if, they were carried as operating supplies according to the established accounting practice of the business enterprise, Government agency, or institution. The term "operating supplies" does not include any controlled material required by a controlled materials producer for the production of other controlled materials, regardless of the accounting methods of such producer, and regardless of the fact that they are not physically incorporated in his product. Such materials are obtained as provided in section 21 of CMP Regulation No. 1.

(h) "Minor capital addition" means any improvement or addition of a kind carried by a person as capital according to his established accounting practice, the total cost of which (excluding the purchaser's cost of labor) does not exceed $750 for any one complete capital addition. No capital addition may be subdivided for the purpose of bringing it or any part of it within this definition. In computing the cost of such improvement or addition, for the purpose of this regulation, the cost of all materials obtained for such improvement or addition shall be included whether or not acquired by use of an allotment symbol or rating, and whether or not ordered or delivered at different times and obtained from different suppliers. Where the capital addition or improvement involves construction of a type which requires authorization under NPA Order M–4, the procedure provided for herein may not be used to obtain materials therefor unless the authorization specifically so provides.

(i) "MRO" means materials for maintenance, repair, and operating supplies. It does not include capital additions. The term "minor capital addition" is specifically used whenever it is intended to be included within the provisions of this regulation. Materials produced or obtained for sale to other persons or for installation upon or attachment to the property of another person, and materials required for the production of such materials are not "MRO" as to the producer or supplier.

(j) "Material" means any raw, in-process, or manufactured commodity equipment, component, accessory, part, or product of any kind.

(k) "Controlled material" means steel, copper, and aluminum in the forms and shapes indicated in Schedule I of CMP Regulation No. 1.

(l) "Established accounting practice" means, in the case of a person in operation on or before December 31, 1950, the accounting practice in use by such person on that date or on the last day of his operation prior thereto. In the case of a person whose operation begins after December 31, 1950, the term means the accounting practice established by him in such operation.

SEC. 3. *How a person obtains controlled materials.* (a) Subject to the quantity restrictions contained in section 7 of this regulation, every business enterprise, Government agency, and institution shall have the right to use the allotment symbol MRO on delivery orders for controlled materials for maintenance, repair, and operating supplies, and minor capital additions. The assignment of the right to use the allotment symbol MRO does not constitute the making of an allotment of the amount of controlled materials for MRO and minor capital additions specified in section 7 of this regulation. The allotment symbol MRO may be used to acquire only that amount of controlled material actually needed for MRO and minor capital additions.

(b) A delivery order bearing the symbol MRO, together with the certification provided for in section 11 of this regulation, shall constitute an authorized controlled material order for the purposes of all CMP regulations.

SEC. 4. *How a person obtains products and materials other than controlled materials.* (a) Subject to the quantity restrictions contained in section 7 of this regulation, every business enterprise, Government agency, and institution shall have the right to use the rating DO–MRO on delivery orders for products and materials other than controlled materials for maintenance, repair, and operating supplies, and minor capital additions. The rating DO–MRO may be used to acquire such products and materials only up to that portion of the amount specified in section 7 of this regulation which is actually needed for the purposes of MRO and minor capital additions.

(b) A delivery order bearing the rating DO–MRO, together with the certification provided for in section 11 of this regulation, shall constitute a rated order with an allotment symbol for the purpose of all NPA regulations and orders.

SEC. 5. *Status of orders rated DO–97.* (a) Notwithstanding the provisions of section 4 (c) of CMP Regulation No. 3, a delivery order for controlled materials calling for delivery in the third quarter, 1951, placed prior to the effective date of this regulation in accordance with the provisions of NPA Reg. 4 and bearing the rating DO–97 shall constitute an authorized controlled material order for the purpose of all CMP regulations.

(b) Notwithstanding the provisions of section 5 (c) of CMP Regulation No. 3, a delivery order for products and materials other than controlled materials calling for delivery in the third quarter, 1951, placed prior to the effective date of this regulation in accordance with the provisions of NPA Reg. 4 and bearing the rating DO–97 shall constitute a rated order with the allotment symbol MRO for the purpose of all CMP regulations.

(c) A producer of a Class A or of a Class B product who has, prior to the effective date of this regulation, extended an order bearing the rating DO–97 to a supplier of a controlled material, and who has received an authorized production schedule with a related allotment, shall charge against such allotment, any kind of any controlled material which he receives pursuant to such order.

(d) A delivery order calling for delivery after the third quarter, 1951, placed prior to the effective date of this regulation in accordance with the provisions of NPA Reg. 4 and bearing the rating DO–97 must be converted into an authorized controlled material order or into a rated order with the allotment symbol MRO, as the case may be, in accordance with the provisions of CMP Regulation No. 3. In the absence of such conversion on or before August 15, 1951, the order shall constitute an unrated order.

(e) A delivery order for MRO or minor capital additions placed after the effective date of this regulation and in accordance with its provisions must bear the allotment symbol MRO or the rating DO–MRO, as the case may be.

SEC. 6. *Materials for which the allotment symbol MRO and the rating DO–MRO may not be applied or extended—*(a) *Prohibited list.* The allotment symbol MRO and the rating DO–MRO shall not be applied or extended by a person to obtain any of the materials or articles listed in Schedules I and II of this regulation, or to obtain any equipment pursuant to any lease.

(b) *Limitation for minor capital additions.* The allotment symbol MRO and the rating DO–MRO may not be applied by a person to obtain in any quarter (calendar or fiscal) materials for a total of minor capital additions exceeding in the aggregate 10 percent of the quarterly MRO quota established as provided in section 7 of this regulation or $750, whichever is greater.

(c) *Limitation on extension of the rating DO–MRO.* A producer of Class A products who receives a delivery order with the rating DO–MRO shall not extend such rating, but shall obtain his production materials in accordance with the provisions of section 15 of CMP Regulation No. 1. A producer of Class B products who receives a delivery order with the rating DO–MRO shall not extend such rating, but shall obtain his production materials from an industry division or claimant agency, as provided in CMP Regulations No. 1 and No. 3. All other suppliers may extend a DO–MRO rating to obtain materials to the extent permitted by and in accordance with the provisions of NPA Reg. 2.

SEC. 7. *Quarterly MRO quotas.*—(a) *The quota base.* A person who applies the allotment symbol MRO to buy controlled materials or the rating DO–MRO to buy products and materials other than controlled materials must establish his quarterly MRO quota. The MRO quota base to be used in establishing the MRO quota shall include all expenditures made by a person in the base period for MRO (except for materials referred to in Schedule II of this regulation), even though such MRO consists of materials listed in Schedule I of this regulation. Expenditures during the base period for capital additions shall not be included in the quota base.

(b) *Standard base period.* The standard base period is the calendar year 1950.

(c) *Fiscal year base period.* If a person operated on the basis of a fiscal year prior to March 1, 1951, he may elect to take as his base period his last fiscal year ending prior to that date. After such an election has been made, it may not thereafter be changed without the prior written approval of NPA.

(d) *Standard quota.* The standard quarterly quota is 30 percent of the quota base.

(e) *Seasonal quota.* A person may elect to establish seasonal quarterly quotas. An election so made may not be changed thereafter without the prior written approval of NPA. Such seasonal quota for any quarter shall be 120 percent of the expenditures by the person for MRO during the corresponding quarter in 1950.

(f) *Persons not in operation throughout the base period.* A person not in operation throughout the entire base period shall establish and report his quarterly MRO quota as follows:

(1) *Person operating during part of the base period.* A person who was in operation during a part but not all of the calendar year 1950 (or of his last fiscal year ending prior to March 1, 1951) shall determine his quota base by computing the amount he would have spent for MRO (except for materials referred to in Schedule II) had he continued the same rate of expenditure throughout the year as during that part of the year in which he was in operation, making nec-

essary corrections to compensate for seasonal or other exceptional characteristics of the period in which he was in operation. His standard quarterly MRO quota shall be 30 percent of his quota base. If he elects to establish seasonal quarterly quotas, as above provided, he may divide 120 percent of his quota base into four quarterly MRO quotas in accordance with the seasonal demands of the activity in which he is engaged.

(2) *Persons not in operation during the base period.* If a person was not in operation in any part of the calendar year 1950 (or of his last fiscal year ending prior to March 1, 1951), his quarterly MRO quota (standard or seasonal) shall be the amount which he determines to be necessary for his operation. The quota of such person may not, however, exceed $5,000 for any quarter without the prior written approval of NPA.

(3) *Notice to NPA.* A person who establishes a quarterly MRO quota in excess of $1,000 pursuant to subparagraphs (1) or (2) of this paragraph (f) shall, within 30 days after he first applies either the allotment symbol MRO or the rating DO–MRO, notify NPA in writing of the quota he has established, the base period he has used, the method he used in computing his quota, and the corrections he made for seasonal or other factors.

(g) *Future use of increased quotas.* If the quarterly MRO quota of a person is increased by specific authorization of NPA pursuant to section 15 of this regulation, the increased quota becomes his standard quota unless the increase is granted on a temporary or seasonal basis or is otherwise restricted by the terms of the authorization. An increased quarterly MRO quota granted as a seasonal quota may be used only in the corresponding quarter of subsequent years.

(h) *Increase not retroactive.* An increase in quota granted pursuant to section 15 of this regulation is not retroactive.

SEC. 8. *Charges against quota*—(a) *When to charge against quota.* A person may elect to charge expenditures against his MRO quota for the quarter (calendar or fiscal) in which his purchase order specifies delivery is to be made (the delivery basis), or against his MRO quota for the quarter in which the materials are actually received (the receipts basis). Having elected to use one method, he may not thereafter change to the other without the prior written approval of NPA.

(b) *What to charge against quota.* A person shall charge against his MRO quota in each quarter:

(1) All expenditures for materials for MRO (except materials referred to in Schedule II) ordered for delivery (or, if on the receipts basis, received) during the quarter, whether or not obtained by use of the allotment symbol MRO or the rating DO–MRO, and

(2) All expenditures for minor capital additions ordered for delivery (or, if on the receipts basis, received) during the quarter if, but only if, obtained by the use of the allotment symbol MRO or the rating DO–MRO.

(c) *Exceptions.* (1) A person may order (or receive) in any quarter MRO and materials for minor capital additions aggregating not more than $1,000 without regard to quota limitations.

(2) Any person who uses the allotment symbol MRO or the rating DO-MRO to order for delivery (or, if on the receipts basis, to receive) during any quarter materials which aggregate not more than 20 percent of his MRO quota for such quarter, may, in addition, order for delivery (or receive) in such quarter other material for MRO and minor capital additions without use of the allotment symbol MRO or the rating DO-MRO and without regard to quota limitations.

SEC. 9. *Materials obtained for benefit of another*—(a) *Materials supplied by a repairman.* Any business enterprise (such as a repair shop) engaged in doing maintenance or repair work or installing minor capital additions for any other person may apply the allotment symbol MRO to obtain controlled materials and the rating DO-MRO to obtain products and materials other than controlled materials to the same extent that such other person would be entitled to apply the allotment symbol or rating if he were doing the work himself. The cost of materials so obtained shall be charged to the MRO quota of the person for whom the work is done.

(b) *Obligation to supply MRO under lease or other agreement.* A person who is obligated to maintain, repair, or operate any plant, facility, or equipment, under the terms of any lease or other agreement for the use of such property by another person, may apply the allotment symbol MRO or the rating DO–MRO to obtain materials needed for such purposes. Expenditures for such materials shall be charged to the MRO quota of the person thus applying the allotment symbol MRO or the rating DO–MRO except that, if his purchase is made on a reimbursable basis for the account of the person using the property, the MRO quota of the latter shall be charged.

SEC. 10. *Use of materials for another purpose.* If a person has obtained materials for MRO or minor capital additions by applying the allotment symbol MRO or the rating DO–MRO, as the case may be, he may use them for a different purpose if under an authorized production schedule or authorized construction schedule he could have applied any other allotment number or symbol or rating to acquire them for such purpose. However, if he does use them for such other purpose, he may not use the allotment symbol MRO or the rating DO–MRO to replace them in inventory. To replace such materials in inventory he may use only the allotment number or symbol, or DO rating under such authorized production or construction schedule which he might have applied to obtain them for the purpose for which he used them. If he uses such materials obtained by applying the allotment symbol MRO or rating DO–MRO for such other purpose, his records must be adequate to show that his purchases of material are substantially proportionate to his authorized uses.

SEC. 11. *Certification.* A delivery order for MRO or materials for minor capital additions must contain a certification in addition to the allotment symbol MRO or the rating DO–MRO. Unless another form of certification is specifically prescribed by an applicable order or regulation of NPA, such certification shall be in the following words:

Certified under CMP Regulation No. 5

and shall be signed as provided in NPA Reg. 2. This certification shall constitute a representation to the supplier and to NPA that the purchaser is authorized to use the allotment symbol or the rating under the provisions of this regulation to obtain the materials covered by the delivery order.

SEC. 12. *Supplier receiving orders improperly bearing the allotment symbol MRO or the rating DO–MRO.* When a supplier has received a purchase order bearing the allotment symbol MRO or the rating DO–MRO, which symbol or rating he knows, or has reason to believe, has been used in violation of any NPA regulation or order, the supplier shall refuse to accept it as an authorized controlled material order or rated order, as the case may be. In such event, the supplier shall advise the buyer of his reason for such refusal, and shall also advise NPA of his receipt of the order, his refusal to accept it, and his reason for such refusal.

SEC. 13. *Relation to other regulations and orders*—(a) *Rules governing use of the allotment symbol MRO or the rating DO–MRO.* Any person who is entitled to obtain materials for his MRO or minor capital additions under any other NPA regulation or order, shall be governed by the provisions of such other order or regulation and shall not use the allotment symbol MRO or the rating DO–MRO as provided in this regulation.

(b) *Inventory limitations.* Nothing in this regulation shall be deemed to authorize any person to order or receive any controlled materials if acceptance thereof would increase his inventory beyond the limitations permitted by CMP Regulation No. 2, or the limit fixed in any other applicable NPA regulation or order. Nothing in this regulation shall be deemed to authorize any person to order or receive products or materials other than controlled materials if acceptance thereof would increase his inventory beyond a minimum practicable working inventory as defined in NPA Reg. 1 or beyond the limit fixed in any other applicable NPA order or regulation.

(c) *Delegations to Government agencies.* This regulation does not revoke or prevent the use of any authority delegated by NPA to any other Government agency whereby such agency may use allotment symbols other than MRO or ratings other than DO-MRO, as the case may be, for direct procurement of its own requirements of MRO or minor capital additions.

(d) *Other regulations and orders.* Nothing in this regulation shall be construed to relieve any person from the obligation of complying with such limitations on acquisition or use of materials or such other provisions as may be contained in any applicable regulation or order of NPA or with any order of any other competent authority.

SEC. 14. *Records and reports*—(a) *Records to be kept.* Each person who makes any use of the allotment symbol MRO or the rating DO–MRO pursuant to this regulation shall make and preserve at his regular place of business for at least 2 years accurate and complete records showing what his quarterly MRO quotas are, how he computed them, the factual justification for them and for corrections or revisions thereof, any elections made as to the use of seasonal quotas, methods of figuring quotas and charges against them, or other options exercised, and records of receipts, deliveries, inventories, and use of all materials for use as MRO or minor capital additions, whether or not by use of the allotment symbol or rating, in sufficient detail to permit an audit that will permit determination for each transaction whether the provisions of this regulation have been met. This requirement does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records disclose the above data and supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) *Inspection and audit.* All records required by this regulation shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of NPA.

(c) *Other records and reports.* Persons subject to this regulation shall maintain such further records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 15. *Applications for adjustment or exception.* (a) Any person subject to any provision of this regulation may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests claiming that the public interest is prejudiced, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing submitted in triplicate on Form NPAF–78. The request shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

(b) Subject to the provisions of paragraphs (g) and (h) of section 7 of this regulation, any adjustments or exceptions granted under the provisions of NPA Reg. 4 shall continue to apply under this regulation.

SEC. 16. *Communications.* All communications concerning this regulation shall be addressed to the National Production Authority, Washington 25, D. C., Ref: CMP Regulation No. 5.

SEC. 17. *Violations.* Any person who wilfully violates any provision of this regulation or any other regulation or order of NPA, or who wilfully conceals a material fact or furnishes false information in the course of operation under this regulation, is guilty of a crime and, upon conviction, may be punished by fine or imprisonment, or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This regulation shall take effect on July 6, 1951.

NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.

SCHEDULE I

Materials to which the allotment symbol MRO or the rating DO–MRO may not be applied or extended under CMP Regulation No. 5:

1. All basic, organic, or inorganic chemicals, their intermediates and derivatives other than compounded end-products not customarily sold as chemicals.
2. Items appearing in List A or List B of NPA Order M–47A, as the same may be amended from time to time.
3. Nylon fibers and yarns.
4. Packaging materials and containers.
5. Paint, lacquer, and varnish.
6. Paper and paper products.
7. Paperboard and paperboard products.
8. Printed matter.
9. Photographic film.
10. Rails, tie plates, track spikes, splice bars, rail joints, frogs, and switches. (See NPA Order M–73)
11. Rubber tires and tubes.

SCHEDULE II

Materials contained in NPA Reg. 2, List A, as the same may be amended or supplemented from time to time, the allocation and distribution of which are subject to regulation by other Government agencies and which, therefore, are not subject to any DO rating issued by or under the authority of NPA.

[CMP Regulation No. 7]

CMP REG. 7—REPAIR PARTS AND MATERIALS FOR REPAIRMEN UNDER THE CONTROLLED MATERIALS PLAN

This regulation is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this regulation, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all industries affected in advance of the issuance of this regulation has been rendered impracticable because the regulation affects almost all industries.

AUTHORITY: Sections 1 to 12 issued under sec. 704, Pub. Law 774, 81st Cong., Pub. Law 69, 82nd Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this regulation does.* The purpose of this regulation is to describe the rules under which a person in the business of making repairs may obtain controlled materials and products and materials other than controlled materials under the Controlled Materials Plan for use in maintenance and repair work for persons who do not have and are not entitled to establish a quota under CMP Regulation No. 5. A repairman obtains materials for maintenance and repair work for persons who have a quota under CMP Regulation No. 5 by using the allotment symbol MRO and the rating DO–MRO of such person as provided in section 9 of CMP Regulation No. 5. This regulation does not limit the quantity of controlled materials or products and materials other than controlled materials which a repairman may obtain without using the procedure established by this regulation. However, if a repairman makes use of the procedure provided in this regulation in any quarter to obtain materials, he is subject to all the provisions of this regulation. This regulation also imposes special restrictions on inventory applicable to every repairman.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Controlled material" means steel, copper, and aluminum in the forms and shapes indicated in Schedule I of CMP Regulation No. 1.

(b) "Repairman" means any person in the business of providing maintenance or making repairs commercially for other persons. The term "repairman" includes but is not limited to a carpenter, electrician, electrical contractor, motor rewinder, plumber, or the operator of an automotive repair shop, bicycle repair shop, blacksmith shop, boiler repair shop, domestic appliance repair shop, farm machinery repair shop, radio and/or television repair shop, refrigeration repair shop, upholstery repair shop, and sheet metal shop. It also includes repair shops owned by the persons for whom the repair work is done if the person can

segregate the purchases of his repair shop from his other purchases and if he employs at least one person who spends his full time on maintenance and repair. The term also includes any person who reconditions or rebuilds damaged or used items for resale.

(c) "Repair parts and materials" means any item which a repairman stocks and uses for repair work. The term "repair parts and materials" does not include a complete item which is ordinarily usable as a unit. For example, a repairman may use the allotment symbol or the rating specified in this regulation to obtain an item such as a furnace grate to repair a furnace. He may not, however, use the symbol or rating to obtain a new furnace for installation as a complete unit.

(d) "Maintenance" means the minimum upkeep necessary to continue any building, appliance, machine, or piece of equipment in sound working condition, and "repair" means the restoration of a building, appliance, machine, or piece of equipment to sound working condition, when it has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts, or the like. Neither "maintenance" nor "repair" includes the replacement of a plant, facility, or equipment, or the improvement of any plant, facility, or equipment by replacing parts or materials which are in sound working condition with parts or materials of a new or different kind, quality, or design.

(e) "Person" means any individual, partnership, corporation, association, or any other organized group of persons, and includes agencies of the United States or any other government.

(f) "NPA" means the National Production Authority.

SEC. 3. *Amount of controlled materials that a repairman may buy.* (a) During the calendar quarter commencing on July 1, 1951, and during each calendar quarter thereafter, a repairman may use the allotment symbol RE on delivery orders for controlled materials to the extent he actually requires such materials in doing maintenance and repair work for persons who do not have and are not entitled to establish a quota under CMP Regulation No. 5, but for not in excess of the following quantities:

Carbon steel (including wrought iron), alloy steel (except stainless steel), stainless steel (to include not more than 3 tons of alloy steel and 1 ton of stainless steel)	20 tons.
Copper and copper-base alloy brass mill products, copper and copper-base alloy foundry products and powder	500 pounds.
Aluminum	500 pounds.

A repairman who requires copper wire mill products for functional uses in his repair and maintenance work may use during the calendar quarter commencing on July 1, 1951, and during each calendar quarter thereafter, the allotment symbol RE on delivery orders for copper wire mill products to the extent he actually requires such materials in maintenance and repair work for persons who do not have and are not entitled to establish a quota under CMP Regulation No. 5, but for not in excess of $150 worth or 20 percent of what he used in his repair and maintenance work in the calendar year 1950, whichever is greater. A delivery order for controlled materials bearing the symbol RE, together with the certification provided in section 5 of this regulation, shall constitute an authorized controlled material order for the purpose of all CMP regulations.

(b) A repairman who does repair or maintenance work for persons who have the right to use the allotment symbol MRO under CMP Regulation No. 5, or an allotment symbol under any other NPA regulation or order, to buy controlled materials for their own maintenance and repair or minor capital additions, must use the allotment symbol MRO and the certification provided in CMP Regulation No. 5, or the allotment symbol and certification specified in such other regulation or order, to obtain the amount of controlled materials he needs to do their work or to replace in inventory what he has already used for that purpose. He shall not use the allotment symbol RE to acquire controlled materials for maintenance and repair work for such persons.

SEC. 4. *How a repairman obtains products and materials other than controlled materials.* (a) Commencing July 1, 1951, a repairman may use the rating DO-RE on delivery orders for products and materials other than controlled materials which he actually needs to perform his repair and maintenance work and for which he has not received from another person a purchase order bearing a DO-MRO rating. A delivery order bearing the rating DO-RE together with the certification provided in section 5 of this regulation, shall constitute a rated order with an allotment symbol for the purpose of all CMP regulations.

(b) A repairman who does repair or maintenance work for persons who have the right to use the rating DO–MRO under CMP Regulation No. 5, or another rating under any other NPA regulation or order, to buy products and materials other than controlled materials for their own maintenance and repair or minor capital additions, must use the rating DO-MRO and the certification provided in CMP Regulation No. 5, or the rating and certification provided in such other regulation or order, to obtain the products and materials which he needs to do their work or to replace in inventory what he has already used for that purpose. He shall not use the rating DO-RE to acquire products and materials other than controlled materials for maintenance and repair work for such persons.

SEC. 5. *Certification.* A repairman shall place on each of his delivery orders for repair parts and materials under this regulation, in addition to the allotment symbol RE provided in section 3 (a) or the rating DO–RE provided in section 4 (a) of this regulation, a certification in the following form:

Certified under CMP Regulation No. 7.

Such certification shall be signed as provided in NPA Reg. 2. This certification shall constitute a representation to the supplier and to NPA that the repairman is authorized to use the allotment symbol RE or the rating DO–RE under the provisions of this regulation to obtain the materials covered by the delivery order.

SEC. 6. *Use of materials by a repairman.* A repairman may use the repair parts and materials which he buys under this regulation only to do maintenance and repair work, as defined in section 2 (d) of this regulation. He may not use what he buys under this regulation to make products, such as repair parts, which he does not expect to use himself in making repairs, nor may he use it to replace materials or parts solely to improve the original design. A repairman may, however, use repair parts and materials which he buys under this regulation to recondition or rebuild a damaged or used item which he plans to sell.

SEC. 7. *Restrictions on inventory.* Whether or not he uses the procedure specified in this regulation to obtain materials, a repairman may not receive or accept delivery of any item of controlled material if his inventory of that item is, or by such receipt would become, more than he needs to operate his business as a repairman during the next 60 calendar days, or of any item of a product or material other than a controlled material, if his inventory of that item is, or by such receipt would become, in excess of a "practicable minimum working inventory," as defined in NPA Reg. 1. If his inventory of those items of repair parts and materials which are normally marketed only in minimum sales quantities is less than such permitted amount, a repairman may order and receive from his supplier a minimum sales quantity, even if his inventory of such item or items is thereby increased beyond such permitted amount.

SEC. 8. *Applicability of other regulations and orders.* Nothing in this regulation shall be construed to relieve any person from complying with all other applicable regulations and orders of NPA.

SEC. 9. *Records and reports.* (a) Each person subject to this regulation shall retain for at least 2 years at his regular place of business all documents on which he relies as entitling him to accept delivery of controlled materials or of products and materials other than controlled materials, segregated and available for inspection by representatives of NPA, or filed in such manner that they can be readily segregated and made available for such inspection.

(b) The provisions of this section do not require any particular accounting method, provided the records maintained supply the information specified by this section and furnish an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(c) Persons subject to this regulation shall maintain such further records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 10. *Applications for adjustment or exception.* Any person subject to any provision of this regulation may file a request for adjustment, exception, or other relief upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests claiming that the public interest is prejudiced, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing submitted in triplicate, shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor. If the request for relief is a request for authorization to use the allotment symbol RE, to obtain more controlled materials than permitted under section 3 (a) of this regulation, such request shall also state the additional amount of controlled materials required, the type of maintenance and repair work being done, and the kind of customers for which it is being done.

SEC. 11. *Communications.* All communications concerning this regulation shall be addressed to the National Production Authority, Washington 25, D. C.; Ref: CMP Regulation No. 7.

SEC. 12. *Violations.* Any person who wilfully violates any provision of this regulation or any other order or regulation of NPA, or who wilfully conceals a material fact or furnishes false information in the course of operation under this regulation, is guilty of a crime and, upon conviction, may be punished by fine or imprisonment, or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This regulation shall take effect on July 6, 1951.

[NPA Order M–70, as Amended July 6, 1951]

M–70—MARINE MAINTENANCE, REPAIR, AND OPERATING SUPPLIES AND MINOR CAPITAL ADDITIONS

This order as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order as amended, consultation with industry representatives has been rendered impracticable due to the necessity for immediate action.

NPA Order M–70 is hereby amended in the following respects: Sections 8 through 17 are renumbered as sections 9 through 18; a new section 8, respecting the status of orders rated DO–91P, is added; and a new sentence is added to section 14 as renumbered. As so amended, NPA Order M–70 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. DO rating assigned.
4. Water transportation system consumer's use of rating and quota limitations.
5. Supplier's use of rating, increase of inventory, and inventory limitation.
6. Ship repair yard's use of rating, increase of inventory, and inventory limitation.
7. Foreign flag vessel's use of rating.
8. Status of orders rated DO–91P.
9. Canadian flag vessel's use of rating.
10. Application and certification of rating.
11. Limitation on application of rating.
12. Limitation on extension of rating.
13. Prohibited deliveries.
14. Application to other orders and regulations.
15. Records, reports, audit, and inspection.
16. Applications for adjustment or exception.
17. Communications.
18. Violations.

AUTHORITY: Sections 1 to 18 issued under sec. 704, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* The purpose of this order is to provide a procedure whereby maintenance, repair, and operating supplies, as well as minor capital additions, for water transportation systems may be obtained during the third calendar quarter of 1951 or until the NPA Controlled Materials Plan shall be effective as to such items. It provides a procedure to be used for the application of DO ratings during the said third quarter.

SEC. 2. *Definitions.* For the purposes of this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Water transportation system" means any domestically owned American flag vessel of any type on the inland waterways, or Great Lakes, or in coastwise, intercoastal, or seagoing service, except a vessel subject to the jurisdiction of the Coast Guard or to the jurisdiction of the Department of Defense as a claimant agency under DPA Order 1, except floating equipment owned by a railroad when MRO is furnished or performed by such railroad, and except vessels operated exclusively for pleasure.

(c) "Water transportation system consumer" means the owner, lessee, or charterer of a water transportation system.

(d) "Foreign flag vessels" means those vessels registered in countries other than the United States or Canada.

(e) "Canadian flag vessels" means those vessels registered in the Dominion of Canada.

(f) "Supplier" means a distributor of marine MRO or minor capital additions for the use of water transportation systems.

(g) "Ship repair yard" means any person, located in the United States, its territories or possessions, who regularly provides MRO or minor capital additions for boats and vessels.

(h) "Maintenance" means the minimum upkeep necessary to continue any unit of water transportation or a part or a component thereof in sound working condititon. 'Maintenance" also means the reactivation of vessels in storage or not in usable condition.

(i) "Repair" means the restoration to sound working condition of any vessel or a part or a component thereof when it has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts, or the like.

(j) "Maintenance" and "repair" include the replacement of any marine equipment regardless of its accounting classification, but neither "maintenance" nor "repair" includes addition to a unit of water transportation or a part or a component thereof which is in sound working condition with material of a new or different kind, quality, or design. Where a replacement is more economical than a repair, such replacement shall not be undertaken under any provision of this order in the absence of the specific approval of the National Production Authority.

(k) "Operating supplies" means material, other than fuel, which is used or consumed in the course of operations of a water transportation system.

(l) "Minor capital additions" means any improvement, addition, betterment, or conversion of a kind carried as capital by a water transportation system, but no such improvement, addition, betterment, or conversion shall exceed $750 in cost. In computing the cost of such improvement, addition, betterment, or conversion for purposes of this order, the cost of all materials obtained by the person pursuant to the same project or plan shall be included even though the respective materials are ordered or delivered at different times and are obtained from different sources of supply. No capital addition shall be subdivided for the purpose of bringing it or any part of it within the foregoing limitations. "Minor capital addition" does not include conversions covered by present or future orders or directives issued by the National Production Authority.

(m) "MRO" means maintenance, repair, and operating supplies as defined in this section but exclusive of fuel, and does not include minor capital additions. The latter term is specifically used in this order wherever the meaning so requires. Materials or products sold by a supplier thereof or a ship repair yard for

"MRO" shall not be deemed "MRO" as to such supplier. While the order applies to water transportation system consumers, suppliers, and ship repair yards and supersedes NPA Reg. 4, as amended, with respect to their marine MRO, it does not provide for their other "MRO" and minor capital additions, the procurement of which remains subject to all of the provision of NPA Reg. 4, as amended.

(n) "Controlled materials" means steel, copper, and aluminum in the forms and shapes specified in Schedule I of CMP Regulation No. 1.

(o) "NPA" means the National Production Authority.

SEC. 3. *DO rating assigned.* Subject to the limitations of section 4 of this order with respect to water transportation system consumers, section 5 of this order with respect to suppliers, section 6 with respect to ship repair yards, section 7 with respect to foreign flag vessels, and section 9 with respect to Canadian flag vessels, the NPA hereby assigns to such persons the right to apply a DO–91P rating to obtain MRO and minor capital additions for delivery during the third calendar quarter of 1951. The DO–91P rating shall be applied as provided in section 10 of this order.

SEC. 4. *Water transportation system consumer's use of rating and quota limitations.* A water transportation system consumer who desires to apply the DO rating herein assigned shall apply the rating only to the extent and in the manner prescribed by this section as follows:

(a) *Quarterly MRO and minor capital additions quota.* Every water transportation system consumer applying the DO–91P rating to obtain the MRO and minor capital additions of a water transportation system or systems must establish a quarterly quota for this purpose, which quota shall be 120 percent of the amount he expended to obtain MRO for his water transportation system or systems during the fourth calendar quarter of 1950, unless he elects to use the first calendar quarter of 1951. An election to use the first calendar quarter of 1951 may not subsequently be changed without the prior written authorization of NPA. In computing his quota, the water transportation system consumer shall include total expenditures for such MRO during the quarter selected, excluding expenditures for minor capital additions.

(b) *Charges against quota.* Any water transportation system consumer who applies the DO–91P rating for the purposes of this section shall charge against his quarterly MRO quota:

(1) The cost of all MRO ordered for delivery during the quarter, whether or not obtained by use of the DO–91P rating, and

(2) The cost of all minor capital additions ordered for delivery during the quarter only if obtained by use of the DO–91P rating.

(c) *Prohibition against exceeding quota.* No person shall order for delivery during the third calendar quarter of 1951 a quantity of material chargeable against his MRO quota which exceeds the amount of such quota.

SEC. 5. *Supplier's use of rating, increase of inventory, and inventory limitation.* A supplier may apply the DO–91P rating to obtain stocks of inventory for delivery during the third calendar quarter of 1951 to the extent necessary to bring his inventory to 120 percent of the dollar amount of his average, end-of-the-month inventory during the fourth calendar quarter of 1950, or to a practicable minimum working inventory as defined by NPA Reg. 1, as amended, whichever is less. No inventory stocks obtained by use of the DO–91P rating shall be used, sold, transferred, or otherwise disposed of, for any purpose other than the maintenance, repair, or operation of a water transportation system, foreign flag vessel, or Canadian flag vessel, including minor capital additions therefor. Further, any inventory stocks obtained by the use of the DO–91P rating may be used only to fill orders rated with a DO–91P rating.

SEC. 6. *Ship repair yard's use of rating, increase of inventory, and inventory limitation*—(a) *Controlled materials.* No ship repair yard shall apply the DO–91P rating to obtain MRO of controlled materials. Ship repair yards will obtain controlled materials in accordance with the provisions of CMP Regulations Nos. 1 and 3.

(b) *Increase of inventory and inventory limitation on materials other than controlled materials.* A ship repair yard may apply the DO–91P rating to obtain stocks of inventory of materials other than controlled materials for delivery during the third calendar quarter of 1951 to the extent necessary to bring such inventory to 120 percent of the dollar amount of his average, end-of-the-month inventory of such materials other than controlled materials during the fourth calendar quarter of 1950, or to a practicable minimum working inventory as defined by NPA Reg. 1, as amended, whichever is less. No inventory stocks obtained by use of the DO–91P rating shall be used, sold, transferred, or otherwise disposed of, for any purpose other than the maintenance, repair, or operation of a water transportation system, foreign flag vessel, or Canadian flag vessel, including minor capital additions therefor. Further, any inventory stocks obtained by the use of the DO–91P rating may be used only to fill orders rated with a DO–91P rating.

SEC. 7. *Foreign flag vessel's use of rating.* The DO–91P rating herein assigned may not be applied to obtain MRO or minor capital additions for foreign flag vessels unless authorized in writing by NPA pursuant to a written application for such authority. Such application shall be made in triplicate on Form NPAF–104 and filed with the National Production Authority, Washington 25, D. C. Where a foreign flag vessel is damaged at sea and cannot continue safely to its own port, either under its own power or otherwise, but is able to reach a port in the United States for repairs, application may be made by telegraph or radiogram stating such facts, the identification of the vessel, and any other facts believed pertinent. Such telegraph or radiogram application shall be supported, as soon as possible, by filing completed Form NPAF–104 in triplicate with NPA.

SEC. 8. *Status of orders rated DO–91P.* (a) Notwithstanding the provisions of section 4 (c) of CMP Regulation No. 3 and of paragraph (d) of this section, a delivery order for controlled materials placed prior to the effective date of this amendment, calling for delivery in the third calendar quarter of 1951, placed by a water transportation system consumer pursuant to section 4 of this order or by a supplier pursuant to section 5 of this order, and bearing the rating DO–91P, shall constitute an authorized controlled material order for the purposes of all CMP regulations and the purposes of this order.

(b) Notwithstanding the provisions of section 5 (c) of CMP Regulation No. 3 and of paragraph (d) of this section, a delivery order for products and materials other than controlled materials placed prior to the effective date of this amendment, calling for delivery in the third calendar quarter of 1951, placed in accordance with the provisions of sections 4, 5, or 6 of this order, and bearing the rating DO–91P, shall constitute a rated order with the allotment number R–9 for the purpose of this order and all CMP regulations.

(c) A delivery order calling for delivery after the third calendar quarter of 1951, and placed prior to the effective date of this amendment but in accordance with the provisions of this order prior to this amendment, and bearing the rating DO–91P, must be converted into an authorized controlled material order or into a rated order with the allotment number R–9, as the case may be, in accordance with the provisions of CMP Regulation No. 3. In the absence of such conversion on or before August 15, 1951, the order shall constitute an unrated order.

(d) Unless NPA shall otherwise provide, the allotment number R–9 shall be used on all delivery orders for controlled materials, and the DO rating DO–R9 shall be used on all delivery orders for products and materials other than controlled materials placed pursuant to this order. Such orders shall be certified as provided in section 10 of this order, and such certification shall constitute a representation to the seller and NPA that the purchaser is authorized to use the allotment number or the rating under the provisions of this order to obtain the materials covered by the delivery order.

SEC. 9. *Canadian flag vessel's use of rating.* Notwithstanding the provisions of NPA Reg. 3, as amended, Canadian flag vessels shall apply for assistance in connection with MRO and minor capital additions in the same manner as provided in section 7 of this order and, when authorized, shall apply the DO–91P rating and not the DO–47 rating authorized by said Reg. 3.

SEC. 10. *Application and certification of rating*—(a) *By water transportation system consumer and supplier.* The DO rating may be applied by a water transportation system consumer or supplier by placing on an order, or on a separate piece of paper attached to the order, the symbol "DO–91P," together with the words "Certified under NPA Order M–70 and NPA Reg. 2." Such certification shall be signed as prescribed in section 8 of NPA Reg. 2. This certification constitutes a representation to the recipient and to NPA that the person using the DO–91P rating is authorized to use it as provided in this order.

(b) *By ship repair yard.* (1) The DO rating and certification on an order by a ship repair yard for materials other than controlled materials shall be applied and certified in accordance with paragraph (a) of this section.

(2) The DO rating and certification on an order by a ship repair yard for controlled materials shall be applied and certified in accordance with paragraph (a) of this section and, in addition, the certification shall contain the serial number assigned by NPA in granting the assistance.

(c) *By foreign flag and Canadian vessels.* The DO rating and certification by a foreign flag or Canadian vessel shall be applied and certified in accordance with paragraph (a) of this section and, in addition, the certification shall contain the serial number assigned by NPA in granting the assistance.

SEC. 11. *Limitation on application of rating.* No person shall apply the DO–91P rating to obtain material:

(a) For any unauthorized purpose or in amounts greater than required for an authorized purpose under this order

(b) Which can be obtained within the time required without the use of a rating.

(c) The use of which can be eliminated without serious loss of efficiency by substitution of less scarce material.

SEC. 12. *Limitation on extension of rating.* A supplier or ship repair yard may apply the DO–91P rating assigned by this order and within its limitations, but neither a supplier nor a ship repair yard may extend, either to obtain materials other than controlled materials normally carried in his inventory or to obtain controlled materials, a DO–91P rating received by him from another person.

SEC. 13. *Prohibited deliveries.* No person shall accept an order for, or sell, deliver, or cause to be delivered, material which he knows, or has reason to believe, will be accepted, held, or used in violation of any provision of this order.

SEC. 14. *Application to other orders and regulations.* The provisions of NPA Reg. 4, as amended, relating to MRO and minor capital additions, are superseded to the extent that they are inconsistent with this order, except that a DO–91P rating may not be applied under this order to the items listed in List A of NPA Reg. 2, or Table I of NPA Reg. 4, as they may be amended from time to time. The provisions of NPA Reg. 3, as amended, relating to MRO and minor capital additions for persons located in Canada, are superseded to the extent that they are inconsistent with this order. All of the provisions of CMP Regulation No. 3, section 5, as to status of delivery orders, shall apply to orders bearing an allotment number or DO rating pursuant to section 8 of this order.

SEC. 15. *Records, reports, audit, and inspection.* (a) Each person participating in any transaction covered by this order shall retain in his files, for at least 2 years, records of receipts, deliveries, inventory, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method, nor does it require alteration of the system of records customarily maintained, provided the system provides an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 16. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and in triplicate, shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor. More particularly, the applicant shall fully describe the nature of his business or other activity, indicating any seasonal or other unusual features, products made or distributed, or services or other activities performed, and the quarterly volume of such business or other activity since January 1, 1950. The applicant shall state the total amount spent for MRO in each quarter since January 1, 1950, and, if increase in quota is requested, specify the amount of increase requested.

SEC. 17. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M–70.

SEC. 18. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment, or both. In addition, administrative action may be taken against such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order shall take effect on July 6, 1951.

[NPA Reg. 4, Revocation]

REG. 4—MAINTENANCE, REPAIR, AND OPERATING SUPPLIES AND MINOR CAPITAL ADDITIONS

NPA Reg. 4, as amended May 22, 1951, is revoked, effective July 6, 1951. NPA Reg. 4 has been superseded by CMP Regulations Nos. 5 and 7. Adjustments or exceptions granted under the provisions of NPA Reg. 4 shall continue to apply under CMP Regulation No. 5 as provided in section 15 of CMP Regulation No. 5.

This revocation does not affect any liabilities incurred for violation of NPA Reg. 4, as amended from time to time, or for violation of any adjustments, exceptions, directions, directives, or other actions of the National Production Authority under it.

Issued this 6th day of July 1951.

NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.

[NPA Order M–1, as Amended July 6, 1951]

M–1—IRON AND STEEL

This order, M–1, as amended, is found necessary and appropriate to promote the national defense and is issued pursuant to authority granted by section

101 of the Defense Production Act of 1950. In the issuance of this order as originally issued and as previously amended, there was consultation with industry representatives, including trade association representatives, and consideration was given to their recommendations. In its issuance as amended July 6, 1951, however, consultation with industry representatives has been rendered impracticable, due to the necessity for immediate action.

NPA Order M–1, as last amended June 8, 1951, is hereby amended in the following respects: Sections 5 and 6 and Table I of the order are amended to change certain of the product limitation percentages contained in part C of said Table I, and to change the basis for computing required shipments of alloy steel products from one related to a base period to one related to planned monthly production. Section 8 is amended to place a floor of 100 percent on deliveries of cold-finished carbon steel bars made by a producer supplier to a converter customer. A new section 15 is added, and sections 15 and 20 are renumbered as sections 16 to 21. As so amended, NPA Order M–1 reads as follows:

Sec.

1. What this order does.
2. Forms of iron and steel products to which this order applies.
3. Required shipment dates.
4. Rejection of rated orders (lead time).
5. Product limitation for acceptance of rated orders.
6. Conditions for acceptance of rated orders.
7. Changes in lead time.
8. Allotments for further conversion.
9. Extension of ratings for further conversion of steel products.
10. NPA assistance in placing rated orders.
11. Scheduled programs.
12. Minimum orders.
13. Inventories.
14. Ferro-alloys.
15. Meaning of rated orders.
16. Applications for adjustment or exception.

20. Audit and inspection.
21. Violations.

AUTHORITY: Sections 1 to 21 issued under sec. 704, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order applies particularly to producers of iron and steel and provides rules for placing, accepting, and scheduling rated orders for iron and steel. Its purpose is to provide equitable distribution of rated orders among all iron and steel producers of the particular products in order to make possible maximum production and to reduce to a minimum disruption of normal distribution. It makes provision for required acceptance of rated orders based on a percentage of previous shipments, and provides for allotment and maximum inventories. It supplements NPA Regs. 1 and 2, but only those provisions of Regs. 1 and 2 which are inconsistent with this order are superseded, and all other provisions of those regulations continue to apply to the iron and steel industry.

SEC. 2. *Forms of iron and steel products to which this order applies.* The iron and steel products to which this order applies are set out in Table I at the end of this order. Table I also sets out the lead time (days) and product limitation for acceptance of rated orders. This order also applies to all second quality materials and shearings and material sorted or salvaged from steel scrap and sold for other than remelting purposes.

SEC. 3. *Required shipment dates.* A rated order for iron or steel in any of the forms listed in part A of Table I must specify shipment on a particular date or in a particular month, which, in no case, may be earlier than required by the person placing the order. The producer of iron or steel must schedule the order for shipment within the requested month as close to the requested shipment date as is practicable considering the need for maximum production.

SEC. 4. *Rejection of rated orders (lead time).* A producer of iron or steel in a form listed in part A of Table I need not accept a rated order which is received by him less than the number of days (lead time) set forth in part B of Table I prior to the first day of the month in which shipment is requested, unless specifically directed to accept such order by the National Production Authority.

SEC. 5. *Product limitation for acceptance of rated orders.* Unless specifically directed by NPA, no iron or steel producer shall be required to accept rated orders for shipment from any one producing unit regardless of location, in any month (a) in excess of the percentages set forth in columns (1) and (2) in part C of Table I, of his average monthly shipments of the products indicated in said columns (1) and (2), as made by him during the period from January 1, 1950, through August 31, 1950, or (b) in excess of the percentages set forth in column (3) in part C of Table I of his planned monthly production of the products indicated in said column (3). Where no percentage limitation is set forth as to any product, it is expected that the amount of such product to be called for by rated orders will be relatively small.

SEC. 6. *Conditions for acceptance of rated orders.* Unless otherwise specifically directed by the National Production Authority, and subject to the provisions of NPA Reg. 2, each iron or steel producer shall be required to accept rated orders calling for shipment in any one month from any one of his producing units regardless of location, of products listed in part A of Table I (a) up to the amount of the percentages listed in columns (1) and (2) in part C of Table I of his average monthly shipments of such products from that producing unit during the period from January 1, 1950, through August 31, 1950, and (b) up to the amount of the percentages listed in column 3 in part C of Table I of his planned monthly production of the products indicated in said column 3. Where no percentage is listed in part C, in regard to any iron or steel product, each iron or steel producer shall be required to accept all rated orders served upon him, subject to the provisions of NPA Reg. 2, unless otherwise specifically directed by the National Production Authority.

SEC. 7. *Changes in lead time.* (a) If an iron or steel producer would have an open space on his production schedule created by the difference between the lead time of 45 days as established by this order as originally issued or as subsequently amended, and a longer lead time as established by section 4 of this order, he shall continue to accept rated orders to fill such open space on his production schedule, on the basis of a lead time of 45 days, before he applies the newly established longer lead time. In filling such open space on his production schedule, as above referred to, an iron or steel producer shall be governed by the product limitation percentage appearing in part C of Table I.

Example: Under the previously established lead time of 45 days, a steel producer would, up to December 17, 1950, accept DO rated orders for shipment in February 1951. Where a lead time has been increased to 120 days, he would, up to January 31, 1951, accept DO rated orders for shipment in June 1951. In the application of this example, the steel producer would continue to accept DO rated orders for shipment in March and April 1951, on a 45-day lead time until he had arrived in any one month at the product limitation percentage of that product as set forth in part C, of Table I. Thereafter, he would conform to the new lead time of 120 days for shipment in the succeeding months.

(b) In the example in paragraph (a) of this section, if the product limitation percentage under part C of Table I as to that particular iron or steel product has been increased from 5 percent to 10 percent, the iron or steel producer should accept DO rated orders up to the amount of the new product limitation percentage figure, commencing with shipments for the month of March 1951, and should continue at that new figure thereafter.

SEC. 8. *Allotments for further conversion.* A steel producer who buys from another steel producer a steel product listed under the heading "Steel mill products" in part A of Table I (herein called "steel mill products"), and by further processing converts, for resale, the purchased steel into another steel mill product, is engaged in further conversion. For the purpose of this section, the steel producer who sells a steel mill product for further conversion shall be called a producer supplier and the steel producer engaged in further conversion shall be called a converter. Each producer supplier shall make a monthly allotment to each of his converter customers of his production of each steel mill product in accordance with provisions of this section. In order to determine such monthly allotment for each converter customer, each producer supplier shall determine the amount of each steel mill product which will be available for that particular month after making provision for production under DO rated orders and other orders which said steel producer is required to accept by specific direction by the NPA. The ratio of the tonnage thus remaining to the total average monthly shipments of each such product during the base period, from January 1, 1950, through September 30, 1950, shall be applied to the average monthly shipments of each such product to each converter customer during said base period. The result shall be the monthly allotment for each converter customer: *Provided, however,* That the monthly allotment of cold finished carbon steel bars shall in no case be less than 100 percent of the average monthly tonnage of such steel mill product shipped to each converter customer during said base period, and that the monthly allotment of each of the other carbon steel mill products (except carbon plates for line pipe) shall in no case be less than 90 percent of the average monthly tonnage of each of the other carbon steel mill products shipped to each converter customer during said base period. Any such allotment of a carbon steel mill product shall include the tonnage to be shipped on all DO rated orders for that particular product received by the steel producer from such converter customer for shipment during the month for which the allotment had been made. A producer supplier must accept orders placed by his converter customer up to the limit of his allotment: *Provided, however,* That such orders are placed in accordance with the lead times in part B of Table I. Shipments, except for carbon steel mill products for which a minimum tonnage is provided in this section, under such allotments shall be made in addition to shipments to the same converter customer pursuant to authorized extension of DO ratings. Orders placed under the provisions hereof must be for substantially the same product as was supplied to each such converter customer during said base period, except for minor variations in size and design. In determining the amount of the monthly allotments, adjustments may be made by a producer supplier, with the consent of the converter customer involved, to provide for any abnormal situations which affect any steel products. Converter customers in Canada shall be entitled to the benefits of this section, and producer suppliers in the United States shall make monthly allotments to Canadian converter customers in accordance with the provisions of this section.

SEC. 9. *Extension of ratings for further conversion of steel products.* All DO ratings extended for the purpose of further conversion of steel products shall have the symbol FC added to the two-digit designation following the prefix DO on the order.

SEC. 10. *NPA assistance in placing rated orders.* Any person who is unable to place a rated order for iron or steel due to the limitations imposed by sections 5 and 6 of this order should apply to NPA, Iron and Steel Division, Ref.: M–1, specifying the producers who refused to accept the order. NPA will arrange to assist him in locating other sources of supply.

SEC. 11. *Scheduled programs.* NPA will from time to time approve scheduled programs calling for the production and delivery of iron and steel products for stated purposes, over specified periods of time. Upon approval of major programs of this type, supplements to this order will be issued describing such programs and specifying the manner in which they are to be carried out by the iron and steel industry. Thereafter, directives will be issued to individual concerns establishing schedules for their participation in such programs. Such directives shall be complied with by the recipients in accordance with the terms thereof, unless otherwise directed by NPA.

SEC. 12. *Minimum orders.* The minimum orders that may be placed with DO ratings or under NPA directives are set out in Table II at the end of this order. The minimum quantity for each size and grade of any item for shipment at any time to any one destination is listed opposite the appropriate item. If all other requirements of this order have been met, orders for such minimum quantities shall be accepted.

SEC. 13. *Inventories.* In addition to the provisions of NPA Reg. 1, relating to inventory control, it is considered that a more exact requirement applying to users of iron or steel products is necessary. No person obtaining iron or steel products for use in manufacture, processing, or construction, may receive or accept delivery of a quantity of iron or steel products if his inventory is, or by such receipt would become, in excess of that necessary to meet his deliveries or supply his services on the basis of his scheduled method and rate of operation pursuant to this order during the succeeding 45-day period for steel products, and gray and malleable iron castings, and 30-day period for pig iron, or in excess of a practicable minimum working inventory (as defined in NPA Reg. 1), whichever is less. For the purpose of this section, iron and steel products listed in Table I in which only minor changes or alterations have been effected shall be included in inventory. NPA Reg. 1 will apply to iron and steel products except as modified by this section. Said 45-day limitation does not apply to persons who order structural steel for use in construction (including buildings, bridges, and other structures of a like type) and who order it delivered cut to the specifications required for a specific project and who normally keep such steel segregated for the specific project. Instead, no such person may accept delivery of such steel more than 45 days before it is scheduled to be fabricated or, if it is not to be further fabricated, before it is scheduled to be assembled.

SEC. 14. *Ferro-alloys.* (a) As used in this section and in section 18 of this order, "ferro-alloys" means and includes, in such form or condition that the same may be used in the production of alloy iron, steel, or nonferrous products, the following elements and their compounds, and scrap containing usable quantities of any one or more of such elements or of any compound or compounds of any one or more of such elements: Boron, calcium, chromium, cobalt, columbium, manganese, molybdenum, nickel, silicon, tantalum, titanium, tungsten, vanadium, and zirconium.

(b) Every person shall comply with any direction or directions issued by NPA respecting the use, and restrictions and limitations on the use, of any ferro-alloy or alloys in the production of alloy iron, steel, or non-ferrous products.

(c) No person shall receive or accept delivery of any ferro-alloy to be used for alloying purposes at a time when his inventory thereof exceeds, or by acceptance of such delivery would be made to exceed, 45 days' requirements on the basis of his then scheduled method and rate of operation or a practicable minimum working inventory (as defined in NPA Reg. 1), whichever is less. The provisions of this paragraph shall be construed to supersede the inventory limitation provisions of NPA Orders M–10 (Cobalt), M–14 (Nickel), M–30 (Tungsten), M–33 (Molybdenum), and M–49 (Columbium and Tantalum), so far as the inventory limitation provisions of said orders apply to persons having in inventory any ferro-alloy to be used for alloying purposes.

SEC. 15. *Meaning of rated orders.* As set out in Direction 1, to NPA Order M–1, dated June 15, 1951 the term "rated orders" as used in sections 5 and 6 of this order shall be deemed to include both DO rated orders and authorized controlled material orders (as defined in section 2 (q) of CMP Regulation No. 1). As further set out in said Direction 1, the term "DO rated orders" as used in section 8 of this order shall be deemed to include both DO rated orders and authorized controlled material orders (as defined in section 2 (q) of CMP Regulation No. 1).

SEC. 16. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, that any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In considering requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing, shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 17. *Communications.* All communications concerning this order shall be addressed to National Production Authority, Washington 25, D. C., Ref: M–1.

SEC. 18. *Reports.* (a) Persons subject to this order shall make such records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F). In accordance with this section, all steel producers are required to report on Form NPAF–100—Steel Producers' Monthly Production Directive Report; and on Form NPAF–17—Steel Producers' Monthly Report of Shipments and Past Due Orders, the record of the shipments and past due orders by DO ratings and programs made effective by NPA directives.

(b) Every person shall submit to NPA such reports as it shall require with respect to the receipt, consumption, shipment, and maintenance in inventory of any ferro-alloy as defined in section 14 (a) of this order: *Provided*, That no person shall be required to file, as to any ferro-alloy, any report in addition to such report with respect thereto as he files pursuant to any order of NPA establishing allocation or inventory control over the use of such ferro-alloy.

SEC. 19. *Records.* Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

SEC. 20. *Audit and inspection.* All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the NPA.

SEC. 21. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect on July 6, 1951.

MANLY FLEISCHMANN,
Administrator.

[1] Subject to direct negotiation by NPA.
[2] If annealed or heat-treated, add an additional 15 days.
[3] If cold finished, add an additional 15 days.
[4] Rounds and squares under 3 inches included in set asides for blooms, slabs, billets. Rounds and squares over 3 inches by production directives.
[5] Of each item.
[6] Such percentage being the total for any combination of these products.
[7] For electrical sheets and strip, use this table:

Lead time	Percentage limitation	Definition
Low grade, 45	25	AISI M50, M43, M36
Medium grade, 45	70	AISI M27, M22, M19
High grade, 60	80	AISI M17, M15, M14 and oriented

[8] By directive.
[9] Rounds and squares under 3 inches included in set asides for bars—hot-rolled, other. Rounds and squares 3 inches and over by production directives.
[10] Alloy for steel and iron castings means all grades not included as stainless or carbon (including low-alloy) steel and iron castings.
[11] Lead times apply to unmachined castings after approval of patterns for production.
[12] All castings containing 5 percent or more of alloying metals are to be considered "stainless."
[13] Set aside for projectile and shell quality included in set aside for blooms, slabs, billets.
[14] Set aside for projectile and shell quality included in set asides for bar—hot-rolled.
[15] Set asides for alloy are based on planned production instead of base period.

TABLE II—MINIMUM ORDERS THAT MAY BE PLACED ON STEEL MILLS, STEEL AND IRON FOUNDRIES, STEEL FORGE SHOPS, AND MERCHANT PIG IRON PRODUCERS FOR THE PRODUCTS SPECIFIED

(Special grades, shapes, specifications, processes, and similar factors must be handled by negotiation)

Name of product	Minimum quantity for each size and grade of any item for shipment at any one time to any one destination
STEEL MILL PRODUCTS	
Carbon and low-alloy steel:	
Ingots, blooms, billets, slabs, and tube rounds, sheet bars, skelp, etc., rerolling quality	25 net tons.
Blooms, billets, and slabs, forging quality	Product of 1 ingot.
Wire rods, hot-rolled	5 net tons.
Structural shapes	5 net tons.
Plates:	
Rolled armor	By negotiation.[1]
Continuous strip mill production	10 net tons.
Sheared, universal, or bar mill production	3 net tons.
Rails, wheels, and axles	5 net tons.
Track accessories (joint bars, tie plates, track spikes)	5 net tons.
Bars, hot-rolled:	
Projectile and shell quality	Product of 1 heat.[2]
Round bars up to and including 3" and squares, hexagons, half rounds, ovals, etc., of approximately equivalent sectional area	5 net tons.
Round and square bars over 3" to but not including 8"	15 net tons.
Bar size shapes (angles, tees, channels and zees under 3")	5 net tons.
Bars, cold finished	3 net tons.
Bars, tool steel	500 pounds.
Pipe, published carload minimum (mixed sizes and grades)	
Tubing:	
Seamless cold-drawn (O. D. in inches):	
Up to ¾" inclusive	1,000 feet.
Over ¾" to 1½" inclusive	800 feet.
Over 1½" to 3" inclusive	600 feet.
Over 3" to 6" inclusive	400 feet.
Over 6"	250 feet.
Seamless hot-rolled	By negotiation.[1]
Welded	By negotiation.[1]
Wire rods. (See above.)	
Wire, drawn, for further fabrication and manufacturing:	
Low-carbon	1 net ton.
High-carbon (0.49 carbon and higher):	
0.0475" and heavier	1 net ton.
Under 0.0475" to 0.021" inclusive	1,000 pounds.
Under 0.021"	500 pounds.
Wire merchant trade products, assorted	5 net tons.
Tin mill products—any 1 gauge	5,000 pounds.
Sheet, hot- and cold-rolled	5 net tons.
Strip, hot- and cold-rolled	3 net tons.
Stainless steel: No minimum on standard grades and sizes. For unusual grades or sizes the minimum order is to be worked out by negotiation.[1]	
Full alloy steel:	
Ingots	Product of 1 heat.[2]
Billet, projectile and shell quality	By negotiation.[1]
STEEL MILL PRODUCTS—continued	
Full alloy steel—Continued	
Blooms, slabs, billets (except projectile and shell quality) tube rounds, sheet bars, etc.:	
7" square (or equivalent cross sectional area) and under	5 net tons.
Larger than 7" square (or equivalent cross sectional area)	10 net tons.
Both of the above may be modified because of a mill's ingot size and/or rolling schedules.	
Wire rods	5 net tons.
Structural shapes	By negotiation.[1]
Plates:	
Rolled armor	By negotiation.[1]
Other, whether rolled on continuous strip, sheared, universal or bar mill.	10 net tons.
(A steel producer need not accept an order unless the total quantity ordered is sufficient to make a heat of steel or unless ingots or slabs are available in stock or unless similar material is regularly being produced.)	
Rails	By negotiation.[1]
Wheels	By negotiation.[1]
Axles	By negotiation.[1]
Bars, hot-rolled, projectile and shell quality	By negotiation.[1]
Bars, hot-rolled, other:	
Rounds and squares 3½" and smaller	5 net tons.
Rounds and squares larger than 3½"	By negotiation.[1]
Hexagons and flats	5 net tons.
Bars, cold-finished	3 net tons.
Bars, tool steel	500 pounds.
Oil-country goods	By negotiation.
Mechanical tubing	5 net tons.
Pressure tubing	By negotiation.[1]
Sheet and strip	By negotiation.[1]
STEEL CASTINGS (UNMACHINED)	
High alloy and stainless (heat and corrosion resisting)	(3).
Carbon and low-alloy	(3).
STEEL PRODUCTS, FABRICATED	
Forgings (rough as forged)	By negotiation.[1]
Wire rope and strand	1,000-foot lengths.
Welded wire mesh	Full rolls of manufacturers' standard stock sizes.
Netting	Full rolls of manufacturers' standard stock sizes.
IRON PRODUCTS	
Pig iron	Car load.
Gray iron castings, excluding soil and pressure pipe and fittings (unmachined)	(3).
Malleable castings (unmachined)	(3).

[1] "By negotiation" means negotiation between the mill and its customer. If no acceptable arrangements are worked out, the NPA should be notified.
[2] "1 heat" means one batch of metal made in 1 furnace.
[3] 2,000 pounds or less from any 1 pattern or mold, or a minimum production run by the producing foundry even though the delivery from such minimum run may cause the consumers' inventory to exceed the 45-day minimum stated in section 13.

[NPA Order M–5, as Amended July 6, 1951]

M–5—RATED ORDERS FOR ALUMINUM

This amendment to NPA Order M–5, as amended March 26, 1951, is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950. In the formulation of this order as amended, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

This amendment affects NPA Order M–5 by changing the aluminum forms and shapes to which the order applies to conform them with those listed in Schedule I of CMP Regulation No. 1; by bringing authorized controlled material orders within its provisions; by increasing the percentages of production which must be devoted to filling rated orders, including authorized controlled material orders; by providing maximum limitations on the size of orders which distributors are obliged to accept; and by making other changes.

As amended, this order reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Limitations on acceptance of authorized controlled material orders and rated orders.
4. Production requirements of primary producers, secondary smelters, and independent fabricators.
5. Distributors.
6. NPA assistance in placing authorized controlled material orders and rated orders.
7. Applications for adjustment or exception.
8. Communications.
9. Records and reports.
10. Violations.

AUTHORITY: Sections 1 to 10 issued under sec. 704, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order applies to primary producers, secondary smelters, independent fabricators, distributors, and importers of aluminum, and provides rules for accepting and scheduling authorized controlled material orders and rated orders for aluminum. Its purpose is to make possible maximum production of aluminum by reducing to a minimum disruption of normal production and distribution and by providing equitable distribution of authorized controlled material orders and rated orders among all aluminum primary producers, secondary smelters, independent fabricators, and distributors. It supplements NPA Reg. 2 and

CMP Regulations Nos. 1 and 3, but the provisions of these regulations are superseded to the extent they are inconsistent with the provisions of this order, as amended. The order also provides for the distribution of aluminum production materials and the issuance of production directives to primary producers, secondary smelters, and independent fabricators.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "NPA" means the National Production Authority.

(c) "Aluminum" means only the following aluminum forms and shapes:

Rolled bar, rod, wire, structural shapes.
Extruded bar, rod, shapes, tubing (including drawn tubing).
Sheet, plate, foil (including strip).
Powder (atomized or flake, including paste).
Pig or ingot, granular or shot.

(d) "Aluminum pig" means aluminum of variable composition produced by the electrolytic reduction of alumina.

(e) "Pig or ingot, granular or shot, secondary" means any aluminum produced by a secondary smelter, or pig or ingot, granular or shot, produced by a primary producer in a secondary smelter operation.

(f) "Primary producer" means a person producing aluminum both in the form of pig and in any one or more of the other forms or shapes listed in paragraph (c) of this section.

(g) "Secondary smelter" means any person who remelts virgin scrap to produce properly alloyed, refined, chemically tested, specification casting ingot, or deoxidizing or granular aluminum, and who has the equipment and technical knowledge necessary to perform this function without down-grading or waste.

(h) "Independent fabricator" means any person (except a secondary smelter) who does not produce aluminum pig, but who produces for sale aluminum in any of the other forms and shapes listed in paragraph (c) of this section.

(i) "Distributor" means any person regularly engaged in the business of maintaining facilities and equipment for the stocking and distribution of aluminum stock items for sale or resale in the form in which received, or after performing such operations as cutting to length, slitting, shearing to size or shape, or sorting and grading. A person who, in connection with any sale from his stock, bends, punches, or performs any fabricating or processing operation designed to prepare aluminum for final use or assembly, is not a distributor with respect to such sale. The term "distributor" excludes any person who purchases any of the aluminum forms and products listed in paragraph (c) of this section for resale but who does not take physical delivery of the material into his own stock at a location regularly maintained for such purpose.

(j) "Importer" means a person who imports aluminum in the forms and shapes listed in paragraph (c) of this section either for his own account or for the account of another person.

(k) "Production directive" means a directive issued by the National Production Authority, directing a primary producer, a secondary smelter, or an independent fabricator to produce during a designated period a specified quantity of any one or more of the aluminum forms and shapes listed in paragraph (c) of this section.

(l) "Authorized controlled material order" means a delivery order for any controlled material (as distinct from a product containing controlled material) which is placed pursuant to an allotment, as provided in section 19 of CMP Regulation No. 1, or which is specifically designated to be such by any other regulation or order of NPA.

(m) "AM order" means an authorized controlled material order bearing the allotment symbol "AM" calling for delivery of aluminum controlled material to a producer of aluminum controlled material for use in the production of such material.

SEC. 3. *Limitations on acceptance of authorized controlled material orders and rated orders.* Unless specifically directed by NPA: (a) No primary producer of aluminum shall be required to accept authorized controlled material orders and/or rated orders for aluminum for shipment in July or August 1951 in excess of 60 percent of his scheduled production in terms of primary pig tonnage for that month; no secondary smelter of aluminum shall be required to accept authorized controlled material orders and/or rated orders for aluminum for shipment in July or August 1951 in excess of 60 percent of his scheduled production in terms of total ingot tonnage for that month; no independent fabricator of aluminum shall be required to accept authorized controlled material orders and/or rated orders for aluminum for shipment in July or August 1951 in excess of 60 percent of his average monthly shipments during the first 8 months of 1950.

(b) No primary producer, secondary smelter, or independent fabricator of aluminum shall be required to accept authorized controlled material orders and/or rated orders for the products listed below for shipment in any one month, commencing with September 1951, in excess of the following percentages by weight of his production directive or of his proposed monthly production if no production directive has been issued:

	Percent
Rolled bar, rod, wire, structural shapes	95
Extruded bar, rod, shapes, tubing (including drawn tubing)	95
Sheet, plate, foil (including strip)	90
Powder (atomized or flake, including paste)	95
Pig or ingot, granular or shot, secondary	80
Pig or ingot, granular or shot, other than secondary	[1] 95

[1] Percentage of production available for sale as stated in Form CMP–4B filed by primary producer with NPA.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of section 4 of CMP Regulation No. 3, no rated order calling for delivery during September 1951 shall be displaced from a mill schedule by an authorized controlled material order calling for delivery during such month if, on or before July 7, 1951, such rated order is converted into an authorized controlled material order in accordance with the provisions of section 19 of CMP Regulation No. 1 or is designated as an authorized controlled material order by any regulation or order of NPA.

(d) No aluminum producer, secondary smelter, or independent fabricator shall be required to accept any authorized controlled material order or any rated order for less than the mill quantities set forth in Schedule IV of CMP Regulation No. 1 or which is placed within less time than the "lead time" specified in Schedule III of CMP Regulation No. 1.

(e) No primary producer shall accept any order for "pig or ingot, granular or shot, other than secondary" to be used for any purpose for which "pig or ingot, granular or shot, secondary" is suitable. Any person whose authorized controlled material order or rated order for "pig or ingot, granular or shot, other than secondary" has been rejected by a primary producer under this section may apply to the NPA if he is unable to obtain a proper grade of pig or ingot to meet his authorized production schedule.

SEC. 4. *Production requirements of primary producers, secondary smelters, and independent fabricators.* (a) Primary producers who use aluminum in any of the forms and shapes listed in section 2 (c) of this order for the production of any of the aluminum forms and shapes listed therein shall, as soon as possible after the effective date of this order as amended, submit an application on Form CMP–4B to the National Production Authority, Washington 25, D. C., Ref: M–5, setting forth their aluminum production requirements. If a production directive is issued pursuant to such application, together with a supporting allotment, the primary producer may place authorized controlled material orders with an independent supplier as provided in section 19 of CMP Regulation No. 1, and in such event will use the allotment symbol "AM" together with the allotment number assigned by NPA in connection with such order.

(b) Secondary smelters and independent fabricators who use aluminum in any of the forms and shapes listed in section 2 (c) for the production of any of the aluminum forms and shapes listed therein shall, as soon as possible after the effective date of this order as amended, submit an application on Form CMP–4B to the National Production Authority, Washington 25, D. C., Ref: M–5, setting forth their aluminum production requirements. If a production directive is issued pursuant to such application, together with a supporting allotment, the secondary smelter or independent fabricator may place an authorized controlled material order as provided in section 19 of CMP Regulation No. 1, and in such event will use the allotment symbol "AM" together with the allotment number assigned by NPA in connection with such order.

SEC. 5. *Distributors.* (a) A distributor shall accept authorized controlled material orders and/or rated orders in accordance with the provisions of CMP Regulation No. 4: *Provided, however,* That, unless specifically directed by NPA, no distributor of aluminum shall be required to accept authorized controlled material orders and/or rated orders for shipment in the months of July and August of a total tonnage of aluminum in excess of 60 percent by weight of the products available to him during each of such months; and commencing with September 1951, no distributor of aluminum shall be required to accept authorized controlled material orders and/or rated orders for shipment in any one month of a total tonnage of aluminum in excess of the percentages by weight set forth in section 3 of this order of the products which are available to him during such month: *And provided further,* That, unless specifically directed by NPA, no distributor shall be required to accept any authorized controlled material order or any rated order calling for delivery to any one person at any one destination at any one time of more than 1,000 pounds of any gage, alloy, or size of sheet or plate; or 300 pounds of any alloy, shape, or size of wire, rod, or bar; or 300 pounds of any alloy, shape, or size of tubing, extrusions, or structural shapes.

(b) Distributors shall submit an application on Form CMP–4B to the National Production Authority, Washington 25, D. C., Ref: M–5, setting forth their aluminum requirements. In lieu of an allotment pursuant to such application, NPA may issue a directive pursuant to which the distributor may place authorized controlled material orders as provided in section 19 of CMP Regulation No. 1.

SEC. 6. *NPA assistance in placing authorized controlled material orders and rated orders.* Any person who is unable to place an authorized controlled material order or a rated order for aluminum due to the limitations imposed by section 3 of this order should apply to the National Production Authority, Washington 25, D. C., Ref: M–5, specifying the primary producer, secondary smelter, or independent fabricator who refused to accept the order. The NPA will arrange to assist him in locating sources of supply.

SEC. 7. *Applications for adjustment or exception.* Any person affected by any provision of this order may file with NPA a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 8. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Aluminum and Magnesium Division, Washington 25, D. C., Ref: M–5.

SEC. 9. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 10. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of the NPA, or who wilfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order, as amended, shall take effect, except as otherwise specifically stated, on July 6, 1951.

NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.

[NPA Order M–75]

M–75—STEEL SHIPPING DRUMS

This order is found necessary and appropriate to promote the national defense and is issued pursuant to authority granted by section 101 of the Defense Production Act of 1950. In the formulation of this order there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. However, consultation with representatives of all trades and industries affected in advance of the issuance of this order has been rendered impracticable by the fact that the order affects a large number of different trades and industries.

AUTHORITY: Sections 1 to 11 issued under sec. 704, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong. Interpret or apply sec. 101, Pub. Law 774, 81st Cong., Pub. Law 69, 82d Cong.; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61.

SECTION 1. *What this order does.* This order places restrictions on the sale or delivery of steel shipping drums, buckets, kits, and pails, and on the uses to which such containers may be put. Schedule I appearing at the end of this order lists certain commodities and classes of commodities which may not be packed in drums on or after September 1, 1951.

SEC. 2. *Definitions.* As used in this order:

(a) "Drum" means any single-walled container, cylindrical or bilged, having a capacity of 110 gallons or less and constructed of 28-gage or heavier steel, including, but not limited to, buckets, kits, and pails. The term "drum" includes both new and used drums unless the context otherwise requires, but does not include beer barrels, even if single-walled, cans as defined in NPA Order M–25, high or low pressure gas steel cylinders, nor any container of any type not usable commercially for transporting a commodity or product.

(b) "Used drum" means any drum which has been used for the shipping of, the storage of, or the intra- or interplant transfer of any commodity or product. The affixing of ends or other parts to used drums shall not cause them to be regarded as new drums.

(c) "New drum" means any drum which is not a used drum. The term "new drum" includes rejects or seconds.

(d) "Reject" or "second" means any newly manufactured drum which, because of some defect, cannot be used for the purpose for which it was intended.

(e) "Listed commodity" means any commodity or product which is listed, or is included in a class of commodities which is listed, in Schedule I appearing at the end of this order.

(f) "Unlisted commodity" means any commodity or product which is not a listed commodity.

(g) "Base period" means the calendar year 1950.

(h) "Packer" means any person who either (1) purchases empty drums and fills such drums in packing any product or (2) purchases empty drums, has them filled for his account by another party, but who controls sale and distribution of the finished product after packing.

(i) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

SEC. 3. *General restriction on packers.* No packer shall purchase, accept delivery of, or use drums on or after July 7, 1951, except as permitted by this order.

SEC. 4. *Restrictions on use of drums.* Subject to the exceptions set forth in section 7 of this order:

(a) No packer shall use any drum on or after September 1, 1951, for the packing of a listed commodity.

(b) No packer shall use any drum on or after July 7, 1951, for the packing of any listed or unlisted commodity which he did not pack in drums during the 12-month period ending June 30, 1951.

(c) No packer, in the packing of unlisted commodities, shall use in the calendar quarter beginning July 1, 1951, or in any succeeding calendar quarter, a tonnage of new drums greater than 22.5 percent of the tonnage of new drums used by him during the base period for the packing of unlisted commodities: *Provided, however,* That the packer of any unlisted commodity which is packed seasonally may use in the packing thereof in any calendar quarter a tonnage of new drums not greater than 90 percent of the tonnage of new drums used by him in the packing thereof during the corresponding calendar quarter, of the base period.

(d) Any packer, on and after July 7, 1951, may pack an unlisted commodity in a used drum, except as provided in paragraph (b) of this section.

SEC. 5. *Restrictions on inventory.* No packer shall receive or accept delivery of drums at a time when his inventory thereof exceeds, or by acceptance of such delivery would be made to exceed, a 45-day supply, on the basis of his then scheduled method and rate of operation, taking into account customary seasonal fluctuations. In computing his inventory of drums, a packer shall include all drums (including those susceptible of being reconditioned) in his possession or in the possession of his reconditioner or reconditioners. He need not include drums in transit to him or to a reconditioner or to a customer, or drums in the possession of a customer. Any packer who, on the effective date of this order, has outstanding any order for drums calling for delivery in quantities greater than he would be permitted to receive under this section shall forthwith notify his supplier of the extent to which delivery cannot be accepted as scheduled, and every such order shall be adjusted accordingly.

SEC. 6. *Restrictions on manufacture and delivery.* (a) No person shall manufacture, sell, or deliver any drum which he knows or has reason to believe will be accepted or used in violation of the terms of this order or any other order or regulation of the National Production Authority.

(b) No person shall sell or deliver any drums to a packer unless the packer shall have furnished to the seller a signed certification as follows:

> The undersigned, subject to statutory penalties, certifies that the acceptance of delivery and the use by the undersigned of the drums herein ordered will not be in violation of NPA Order M-75.

This certification constitutes a representation by the packer to the seller and to the National Production Authority that delivery of such drums may be accepted by the packer under this order, and will not be used by the packer in violation of this order.

SEC. 7. *Exceptions.* (a) There shall be exempt from the restrictions and limitations of this order any use of drums which are required to fill any purchase order issued by or for the account of the Atomic Energy Commission or any of the Armed Forces of the United States, including the United States Coast Guard, and bearing a DO rating. There shall likewise be exempt any use of drums by said Commission or by any of said Armed Forces or by said Coast Guard. Any other use of drums, whether pursuant to a DO rated order or otherwise, is subject to the provisions of this order.

(b) The provisions of paragraph (a) and (b) of section 4 of this order shall not apply to the use of drums for packing any listed or unlisted commodity for the transportation, storage, or handling of which a particular type of drum is required under the provisions of the Consolidated Freight Classification or by regulation or order of the Interstate Commerce Commission or the United States Coast Guard.

(c) Notwithstanding the listing of inedible molasses in Schedule I, packers thereof may pack it in a used drum or drums owned by a farmer when it is ordered by him for his own use. In any such case, the packer shall not make shipment or delivery of inedible molasses so packed until he has received from the purchaser a signed certificate stating that he is a farmer, that such inedible molasses is for his own use, and that he is the owner of the drum or drums so used for packing it.

SEC. 8. *Applications for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, that any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request for adjustment or exception under this section shall be filed in triplicate on Form NPAF-101, copies of which may be obtained from any field office of the Department of Commerce.

SEC. 9. *Records and reports.* (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of the National Production Authority.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139–139F).

SEC. 10. *Communications.* All communications concerning this order, shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M-75.

SEC. 11. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of the National Production Authority, or who wilfully conceals a material fact or furnishes false information in the course of operation under this order, is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Schedule I is hereto attached and made a part of this order.

This order shall take effect, except as otherwise provided herein, on July 6, 1951.

NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART A—REGISTRATION AND RESEARCH

1. In § 21.103, paragraph (b) is amended to read as follows:

§ 21.103 *Effective date of change or discontinuance of subsistence allowance. (See in addition § 21.107 (f), (h), and (i).)* * * *

(b) The effective date of discontinuance of subsistence allowance shall be:

(1) In the event of death of the veteran as of the date of death.

(2) In the event of disapproval of a course and/or a school or training establishment by the State approving agency or by the Administrator, as of the effective date of disapproval, or as of the date determined by the manager under the provisions of § 21.418 (d), whichever is later.

(3) In the event a course of on-the-job training or institutional on-farm training fails to continue to meet the requirements of paragraph 11 (b) and (c), Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note), as of the effective date of such finding by the State approving agency, or by the manager, whichever is earlier. In the event a course in a profit school fails to meet the criteria of paragraph 11 (e), Part VIII, as of the effective date of such finding by the State approving agency.

(4) In the event of termination of training because of the veteran's reentry into the active military service, as of the date prior to such reentry into the military service, except where an earlier date is in order in accordance with subparagraph (5) of this paragraph.

(5) In the event a veteran interrupts training prior to completion of the course or completion of the period of enrollment and gives the Veterans' Administration prior notice of such interruption, as of the last date of attendance.

(6) In the event a veteran is pursuing a course of training on July 25, 1956, and such veteran was not an enlistee under the provisions of section 11 (a), Public Law 190, 79th Congress, as of July 25, 1956.

(7) In the event a veteran is pursuing a course of training on July 25, 1956, and such veteran was an enlistee under the provisions of section 11 (a), Public Law 190, 79th Congress, as of the date 9 years after the date of his release from a period of active military or naval service contracted for thereunder, or such prior date as may be established under applicable regulations, whichever is earlier.

(8) In the event the veteran shall forfeit all rights, claims, and benefits under the provisions of section 15, Title I, Public No. 2, 73d Congress (made applicable to benefits granted under Public Law 346, 78th Congress, by the first sentence of section 1500 thereof), as of the date of the commission of the act upon which the central committee on waivers and forfeitures based the forfeiture: *Provided however,* That if the evidence of record establishes that the veteran was guilty of mutiny, treason, sabotage, or rendering assistance to an enemy of the United States or of its allies within the meaning of section 4, Public Law 144, 78th Congress, as of the date of commission of the offense or of original entrance into training, whichever be the later.

2. In § 21.107, paragraphs (b) and (c) are amended to read as follows:

§ 21.107 *Periodic reports of conduct, progress, and compensation for productive labor.* * * *

(b) *Part-time training, institutions of higher learning; other schools on term or semester basis; cooperative courses.* For veterans pursuing part-time courses in institutions of higher learning, or full- or part-time courses in other schools operating on a term or semester basis, and schools providing cooperative courses, the periodic Report of Compensation for Productive Labor and of Conduct and Progress, VA Form 7–1963, will be dispatched to the veteran so as to be received and reviewed by Veterans' Administration for adjustments in April and December of each year. (VA Forms 7–1963 are not required from veterans pursuing part-time courses in institutions of higher learning if they have not applied for subsistence allowance or if the extent of their training does not warrant the payment of subsistence, since conduct and progress reports from collegiate institutions are provided in the specific manner prescribed by § 21.65 (a) (6).) These reports, in addition to the estimate of compensation submitted by the veteran at the time of each enrollment, will provide all the controls necessary throughout the year.

(c) *Other types of training.* Reports of compensation and of conduct and progress for all veterans except those listed in paragraphs (a) and (b) of this section and in § 21.109 (institutional on-farm training), and veterans enrolled only in a correspondence course, will be dispatched so that they may be reviewed in accordance with the following schedule: Cases in which the C-number ends in zero or 1 will be reviewed in January, May and September; ending in 2 or 3 will be reviewed in February, June and October; ending in 4, 5, or 6 will be reviewed in March, July, and November; ending in 7, 8, or 9 will be reviewed in April, August, and December.

(1) Without regard to the type or extent of the course being pursued, all trainees who are employed full- or part-time by the Veterans' Administration will be required to furnish reports in accordance with this tri-annual schedule. Appropriate adjustments will be made in accordance with paragraph (f) of this section.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART B—EDUCATION AND TRAINING

1. In § 21.241, paragraph (g) is amended to read as follows:

§ 21.241 *Furnishing special equipment.* * * *

(g) If for any reason the veteran fails to complete the prescribed course of training in the home for which special equipment has been furnished under paragraph (b) (2) of this section, the veteran will be deemed to be at fault under § 21.243 with respect to such special equipment only, and he will be required to return such equipment to the Veterans' Administration or to pay the reasonable value thereof: *Provided however,* That if the veteran has completed such part of the prescribed course of training that he is found to be employable and has been declared rehabilitated under § 21.281 he will not be deemed to be at fault and he will not be required to return such equipment to the Veterans' Administration or to pay the reasonable value thereof. The veteran will be advised accordingly. With respect to any special equipment furnished to the veteran under paragraph (b) (1) of this section, a separate finding will be made

under § 21.243 of whether the veteran's failure was due to fault on his part.

2. Section 21.243 is amended to read as follows:

§ 21.243 *Release of and repayment for training supplies.* (a) Pursuant to section 4, Public Law 16, 78th Congress, as amended, supplies furnished a trainee are deemed released to him and should not be marked to indicate ownership by the United States.

(b) Pursuant to the authority given to the Administrator in the first proviso of section 4, Public Law 16, 78th Congress, as amended, a veteran will not be required to repay for expendable supplies where he fails to complete his course of vocational rehabilitation. Nor will the veteran be required to repay for nonexpendable supplies unless it be determined that his failure was because of fault on his part. In making such determination, the veteran will be given the benefit of any reasonable doubt.

(c) Determination whether the veteran's failure was or was not because of fault on his part will be made by the chief of education and training or his designee. The findings and action taken in each case will be filed in the training subfolder.

(d) In cases which are found to be meritorious as defined in paragraph (f) of this section even though the veteran is found to be at fault, the veteran will not be required to repay the Veterans' Administration for supplies furnished him at Veterans' Administration expense.

(e) The veteran will be deemed to have failed to complete his course because of fault on his part:

(1) When he withdraws from his course at the request of the institution; or

(2) When he abandons his training without prior or concurrent notice to the Veterans' Administration; or

(3) When his course is discontinued by the Veterans' Administration because of unsatisfactory conduct or progress or both; or

(4) When the failure to complete the course is due to his negligence or misconduct; or

(5) When he abandons his training after pursuing his course for less than 3 months, or less than one-half of the prescribed duration of the course whichever be the lesser period.

(f) A veteran's case will be found to be meritorious under paragraph (d) of this section where

(1) The veteran has reentered or is known to be in the process of reentering the armed forces; or

(2) The veteran completed satisfactorily one-half or more of the prescribed course (or term where applicable in the case of school training) for which the supplies were furnished; or

(3) The veteran certifies that he is using the supplies furnished him at Veterans' Administration expense in employment; or

(4) The value of the supplies is less than $10; or

(5) The veteran dies while in training or in training interrupted status.

(g) Where it is determined that the veteran is at fault and repayment for supplies is not excused under paragraphs (d) and (f) of this section, the veteran will be required to repay the Veterans' Administration for the nonexpendable supplies furnished him at Veterans' Administration expense. The amount to be repaid will be the value at which the supplies were issued to the veteran less a percentage equivalent to the percentage of the prescribed course (or term where applicable in the case of school training) completed. For example, a veteran who has completed one-third of the prescribed course or term for which supplies were furnished will be required to repay two-thirds of the value at which the supplies were issued to the veteran. Under no circumstances will supplies be accepted in lieu of repayment, except as provided in §§ 21.241 (g) and 21.252 (d).

(h) The provisions of this section will apply equally to cases where training is discontinued on or after July 10, 1951, and to cases where training was discontinued prior to July 10, 1951, but disposition of the case was not made under the regulation in effect at that time.

3. In § 21.252, paragraphs (c) and (d) are added as follows:

§ 21.252 *Change of employment objective.* * * *

(c) Where a veteran's disability compensation has been suspended by reason of his failure to report for a physical examination, a change of employment objective will not be approved unless and until the veteran has reported for the required physical examination and has been assigned a disability rating of compensable degree.

(d) Where a change of employment objective is authorized in accord with paragraph (a) of this section the veteran will be required to return or repay for nonexpendable supplies furnished at Veterans' Administration expense for the previous employment objective which are not required for pursuit of training for the new objective.

4. In § 21.314, paragraphs (f) and (g) are amended and paragraph (h) is added as follows:

§ 21.314 *General limitations.* * * *

(f) The Veterans' Administration will not reimburse a trainee who personally buys supplies except trainees in training under Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12 note) in foreign countries as provided in § 21.150. Payment for supplies is made to the educational institution or to the vender from whom they are purchased by the Veterans' Administration. If the institution chooses to return to the veteran the amounts charged him and paid by him so that the charges by the educational institution stand as an unpaid obligation of the Veterans' Administration to the institution, payment may be made if otherwise in order.

(g) When a particular article is furnished for use in one subject and the same article is required for use in other subjects or in another quarter or semester or school year, the article furnished will be made to serve for all such requirements and will not be duplicated for such purpose at government expense.

(h) Where a veteran at the time of enrolling in a course of training on the job does not have entitlement sufficient to pursue the course to completion, the Veterans' Administration will not furnish supplies costing in excess of that amount which bears the same ratio to the cost of the supplies which the veteran is required by the establishment to own for the total course as the veteran's remaining entitlement bears to the total length of the course.

5. Section 21.325 is canceled.

§ 21.325 *Recovery of training supplies.* [Canceled.]

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. 11a, 701, 707, ch. 12 note. Interprets or applies secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500–1504, 1506, 1507, 58 Stat. 286, 300, as amended; 38 U. S. C. 693g, 697–697d, 697f, g, ch. 12 note)

This regulation is effective July 10, 1951.

AUTHORITY: §§ 150.400 to 150.426 issued under R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369.

§ 150.400 *Scope of rules.* The rules of practice in this subpart shall be applicable in all proceedings before the Post Office Department wherein the adjudication is required by the Administrative Procedure Act (5 U. S. C. 1001 et seq.) to be determined on the record after opportunity for an agency hearing.

§ 150.401 *Offices, business hours.* (a) The office of the Solicitor of the Post Office Department is located in Room 3226, Post Office Department Building, 12th Street and Pennsylvania Avenue NW., Washington 25, D. C. The office of the Hearing Examiners' Section and of the Docket Clerk, Hearing Examiners' Section, is located in Room 3107 at the same address.

(b) The offices of the Solicitor, the Hearing Examiners' Section and Docket Clerk are open on each business day, except Saturday, from 8:45 a. m. to 5:15 p. m.

§ 150.402 *Informal proceedings.* Proceedings other than formal proceedings may be instituted with respect to any matter within the scope of the rules in this subpart. Informal proceedings may be handled by correspondence or conference with the persons or concerns involved, and may be disposed of in similar manner unless demand be made by any such person or concern for disposition of the matter by formal proceedings. Any matter not disposed of informally may be made the subject of a formal proceeding.

§ 150.403 *Formal proceedings; complaints.* Whenever the Solicitor of the Post Office Department shall have reason to believe that any person or concern is using the mails in any manner requiring administrative action by the Postmaster General, where the authorized action is required by the Administrative Procedure Act to be taken only after opportunity for agency hearing, he shall prepare and file with the Docket Clerk a complaint which shall name the person or concern involved; state the legal authority and jurisdiction under which the proceeding is initiated; state the facts in a manner sufficient to enable the person or concern named therein to make answer thereto; and recommend the issuance by the Postmaster General of an appropriate order. The person or concern so named in the complaint shall be known as the respondent.

The provisions of this section shall not preclude the institution of informal proceedings provided for in § 150.402.

§ 150.404 *Notice of hearing.* If the Chief Hearing Examiner shall determine that the complaint states facts sufficient to show the probable need for administrative action by the Postmaster General he shall assign the proceeding to a hearing examiner who shall issue a notice of hearing to the respondent, and thereafter exercise all of the powers enumerated in § 150.413.

§ 150.405 *Service of complaint and notice of hearing.* (a) The hearing examiner to whom the case is assigned shall cause a duplicate original of the notice of hearing and a copy of the complaint to be transmitted to the postmaster at the office of address of the respondent or to the Inspector in Charge of the Division in which the respondent is doing business which shall be delivered to the respondent by said postmaster or a supervisory employee of his post office or a post office inspector. A receipt acknowledging delivery of the notice shall be secured from the respondent or his agent, which receipt shall be forwarded to the Docket Clerk, and shall become a part of the record in the case.

(b) In the event that no person can be found upon whom service of the notice of hearing and the complaint can be effected pursuant to pargaraph (a) of this section, or in the event of the refusal of the respondent or his agent to execute the receipt provided for by paragraph (a) of this section, the notice of hearing may be delivered in the usual manner with other mail addressed to the respondent, and a statement to that effect showing the time and place of such delivery signed by the postal employee who so delivered the notice of hearing which statement shall be forwarded to the Docket Clerk and shall constitute prima facie evidence of service of the complaint and notice of hearing.

§ 150.406 *Appearances.* (a) A respondent may appear and be heard in person or by attorney. A partnership may appear and be represented by a member thereof or by attorney. A corporation or association may appear by a duly authorized officer or by attorney.

(b) An attorney representing a respondent must file with the Docket Clerk a written authorization from the respondent to represent him in the proceeding, prior to any participation therein.

(c) Where a respondent is represented by a duly authorized attorney the service of all subsequent pleadings, notices and other papers shall be effected by mailing the same to his attorney at the post office address stated in his written authorization.

(d) Prompt notice of change of attorneys must be filed.

§ 150.407 *Admission to practice.* Attorneys appearing in behalf of respondents shall be required, prior to such appearance, to obtain permission to practice before the Post Office Department in accordance with the "Procedure Governing the Admission of Attorneys to Practice before the Post Office Department" (Subpart B of Part 151 of this chapter): *Provided*, That the hearing examiner may waive this requirement when in his discretion the circumstances so warrant. Upon request the Solicitor will furnish an applicant a copy of the rules of admission to practice.

§ 150.408 *Formal documents.* (a) All documents required to be filed in any proceeding shall be filed with the Docket Clerk who shall cause same to be recorded and filed, and copies thereof delivered to the assigned hearing examiner and to all parties to the proceeding.

(b) Four copies of all documents must be filed, except as otherwise provided by the rules in this subpart, or as ordered by the hearing examiner. One copy shall be signed as the original.

(c) Documents shall state the docket number and title of the proceeding and shall bear the date of the submission by the party filing them.

§ 150.409 *Answers.* (a) The original and three copies of the respondent's answer shall be filed with the Docket Clerk on or before the date fixed for the filing thereof in the notice of hearing. The answer shall contain a concise statement admitting, denying, or explaining each of the allegations set forth in the complaint. Any facts alleged in the complaint which are expressly admitted or not denied in the answer may be considered as proved, and no further evidence in respect of such facts need be adduced at the hearing. The answer shall be signed personally by an individual respondent, or, in the case of a partnership by one of the partners, or, in the case of a corporation or association, by a responsible officer thereof. The answer shall set forth the respondent's address and the name and address of his attorney, if he is so represented. The respondent must state in his answer whether he will or will not appear at the hearing either in person or by attorney.

(b) If the respondent fails to file an answer as directed in the notice of hearing, he shall be deemed to be in default and to have waived hearing and further procedural steps.

§ 150.410 *Compromises.* In proceedings wherein the complaint recommends the issuance of a fraud, lottery, fictitious name or "unlawful" business order under sections 255, 259, and 259 (a) of Title 39, U. S. Code, respondents may make application to the Solicitor for the suspension of further proceedings by the filing of an affidavit providing for the discontinuance and abandonment of the use of the mails in the conduct of the enterprise alleged in the complaint to be unlawful. All such applications must be made prior to the time for the filing of the answer.

§ 150.411 *Amendment of pleadings.* An amendment of a pleading may be offered by any party at any time prior to the close of the hearing. Amendments proposed prior to the hearing should be filed with the Docket Clerk and thereafter with the hearing examiner.

§ 150.412 *Continuances.* Applications for continuances should be filed with the hearing examiner. A continuance will be granted only for substantial cause shown, and then only for a short period.

§ 150.413 *Hearing examiners.* (a) hearing examiners, one of whom shall be designated as the Chief Hearing Examiner, shall be appointed and qualified pursuant to section 11 of the Administrative Procedure Act, 5 U. S. C. 1010.

(b) With respect to any proceeding assigned to him, a hearing examiner shall have the following authority, to:

(1) Administer oaths and affirmations.

(2) Examine witnesses where necessary for clarity of the record.

(3) Rule upon offers of evidence subject to the limitations thereon provided by the rules in this subpart.

(4) Rule upon offers of proof.

(5) Receive oral and documentary evidence for the record.

(6) Grant or deny applications for the taking of depositions in accordance with the rules in this subpart.

(7) Regulate the course of the hearing, maintain discipline and decorum and exclude from the hearing any person found to be guilty of contemptuous conduct.

(8) Require the filing of memoranda of law and presentation of oral argument with respect to any question of law upon which an examiner is required to rule during the course of the hearing.

(9) Hold conferences for the settlement or simplification of issues by consent of the parties.

(10) Dispose of procedural requests and similar matters.

(11) Make initial decisions in conformity with the Administrative Procedure Act as hereinafter set forth in this subpart.

§ 150.414 *Hearings.* (a) Hearings are held in Room 3237, Post Office Department, Washington 25, D. C., and in such other locations as may be designated by the hearing examiner.

(b) Not later than the date fixed in the notice of hearing for the filing of respondent's answer, application may be filed with the hearing examiner by any party to a proceeding requesting transfer of the hearing to a place other than that designated in the notice of hearing. In support of such application the applicant shall submit under oath or affirmation a statement outlining the evidence to be offered in such location; the relevancy thereof; the names and addresses of the witnesses who will testify; and the reasons why said evidence cannot be produced at Washington, D. C. The hearing examiner shall grant or deny such application having due regard for the convenience and necessity of the parties to the proceeding or their representatives.

§ 150.415 *Evidence.* (a) Except as otherwise provided in the rules of practice in this subpart, the rules of evidence governing civil proceedings in matters not involving trial by jury in the courts of the United States shall govern: *Provided, however,* That such rules may be relaxed to such extent as the hearing examiner may deem proper to insure an adequate and fair hearing. Irrelevant, immaterial or repetitious evidence shall be excluded by the hearing examiner.

(b) The testimony of witnesses shall be under oath or affirmation and witnesses shall be subject to cross-examination.

(c) Agreed statements of fact may be received in evidence.

(d) Upon motion duly made at the hearing, official notice or knowledge may be taken of all matters of which judicial notice or knowledge may be taken by the Federal Courts.

(e) Medical or other scientific books or essays will not be admitted in evidence in lieu of oral expert testimony.

(f) Affidavits containing opinions or statements of an affiant will not be received in evidence, except as provided by (h) of this section.

(g) Testimonials will not be received as evidence of the efficacy or quality of any product or thing sold through the mails.

(h) The written statement of a competent witness may be received in evidence provided that such statement is relevant to the issues, and provided further that the witness whose statement is offered shall testify under oath at the hearing that the statement is in all respects true, and, in the case of expert witnesses, that the statement correctly states his opinion or knowledge concerning the matters in issue.

(i) Objections to the admission of evidence shall include a brief statement of the grounds thereof. Formal exceptions to the rulings of the hearing examiner are necessary. The record shall not include argument upon objections to the admission of evidence or to rulings of the hearing examiner unless ordered by the hearing examiner.

§ 150.416 *Subpenas.* The Post Office Department is not authorized by law to issue subpenas requiring the attendance or testimony of witnesses.

§ 150.417 *Witness fees.* The Post Office Department is not authorized by law to pay witness fees or expenses to witnesses for a respondent.

§ 150.418 *Depositions.* (a) Applications for the taking of depositions should be addressed to the hearing examiner; shall be in writing; shall set out the reasons why such deposition should be taken; the time when, the place where, and the name and post office address of the witness whose deposition is desired; the subject matter concerning which the witness is expected to testify; and the name and address of the person before whom the deposition is to be taken.

(b) If the application be granted, the order for the taking of the deposition will specify the time and place thereof, the name of the witness, the person before whom the deposition is to be taken and any other necessary information.

(c) The testimony of the witness shall be reduced to writing and shall be subscribed by the witness and certified in the usual form by the deposition officer, and shall be filed as directed in the order.

(d) At the hearing the deposition may be offered in evidence by the party at whose instance it was taken and, if not so offered, may be offered in whole or in part by the adverse party. If the deposition is not offered and received in evidence, it shall not be considered as a part of the record in the proceeding. The admissibility of depositions or parts thereof shall be governed by the rules of evidence.

(e) The party on behalf of whom the deposition is taken must pay all fees required to be paid to witnesses and deposition officer, and must provide an original and one copy of the deposition for the official record and must serve one copy upon the opposing party.

§ 150.419 *Transcript.* (a) The testimony and proceedings at all hearings at which the respondent appears in person or by attorney shall be recorded and transcribed by the Post Office Department. A copy, or copies, of such transcript may be obtained by respondents upon written application therefor filed with the hearing examiner prior to the completion of the hearing at a cost of 25 cents per page per copy. If more than one copy is desired by the respondent, he shall accompany his application with such part of the estimated cost of such copies as the hearing examiner shall order.

(b) Changes in the transcript may be made only when they involve errors affecting substance. Within 10 days after the transcript has been furnished to any party to a proceeding he may file with the hearing examiner a motion requesting the correction of the transcript. Four copies of said motion shall be forwarded to the hearing examiner, who shall cause same to be recorded and filed and copies thereof delivered to any party to the proceeding who is entitled to a copy of same. Opposing counsel shall notify the hearing examiner in writing of his concurrence or disagreement with the corrections. Thereafter, the hearing examiner shall by order specify the corrections to be made in the transcript. A copy of this order shall be served upon all parties. The hearing examiner on his own initiative may specify corrections to be made in the transcript with prompt notice to parties to the proceeding.

(c) In proceedings in which the respondent fails to file an answer or, having made answer, fails to appear at and participate in the hearing, the hearing examiner may, in lieu of a verbatim transcript, prepare and certify a summary of the proceedings and the testimony of the witnesses appearing for the Government, identifying therein documentary evidence received.

§ 150.420 *The record.* The transcript of testimony or summary of proceedings and testimony together with all pleadings, orders, exhibits, briefs and other documents filed in the proceedings, shall constitute the record of the proceeding. Copies of any part of the record, except the transcript, shall be furnished at the cost of reproduction upon application to the hearing examiner.

§ 150.421 *Proposed findings and conclusions.* (a) Each party to a proceeding, except those who fail to answer the complaint or having answered fail to appear at the hearing, may file proposed findings of fact, conclusions of law and supporting reasons, provided, however, that the hearing examiner may require parties to any proceeding to file proposed findings of fact and conclusions of law and supporting reasons.

(b) The hearing examiner shall specify the date within which such proposed findings of fact, conclusions of law and supporting reasons must be filed by the parties. If not filed by such date they will not be included in the record or given consideration unless additional time is allowed.

(c) Proposed findings of fact shall be set forth in serially numbered paragraphs and shall state with particularity all evidentiary facts in the record (with appropriate citations to the transcript or exhibit relied upon) supporting the conclusions proposed by the party filing same. Each proposed conclusion shall be separately stated.

(d) The hearing examiner may require the parties to submit orally or in writing proposed findings of fact and conclusions of law and argument in support thereof before the close of the hearing.

(e) Where the respondent has failed to file answer, or, having filed answer fails to appear at the hearing, the hearing examiner shall receive such proof as he may deem proper in support of the complaint, and without further procedural steps shall make and file an initial decision which may be adopted as the final decision by the Postmaster General without further notice to the respondent.

§ 150.422 *Hearing examiner's initial decision.* (a) The hearing examiner may render an oral initial decision at the close of the hearing if the nature of the case and the public interest so warrant. Otherwise, he may render such initial decision at a later date as hereinafter provided.

(b) After the filing of proposed findings of fact, conclusions of law and supporting reasons pursuant to the provisions of § 150.421, the hearing examiner shall make and file an initial decision which may become the final decision of the Postmaster General unless an appeal is noted within the time specified in the hearing examiner's notice of initial decision.

(c) The initial decision of the hearing examiner shall include (1) findings and conclusions with the reasons therefor upon all the material issues of fact, law or discretion presented on the record; and (2) an appropriate order to be issued by the Postmaster General.

(d) At any time prior to the filing of his initial decision, the hearing examiner may, for good cause shown, reopen the case for the reception of further evidence.

(e) A copy of the hearing examiner's initial decision shall be served upon each party who participated in the hearing.

§ 150.423 *Appeal from Initial Decision.* (a) Any party of record in a proceeding, except those who fail to answer the complaint or having answered fail to appear at the hearing, may file a notice of intention to appeal in accordance with paragraph (b) of this section.

(b) A notice of appeal must be filed within the time limit specified by the hearing examiner in the notice of initial decision, but in no case more than 10 days after service.

(c) A brief on appeal shall contain the following matter in the order indicated below. Matter which is not presented in a brief will not be considered on appeal.

(1) A subject index of the matters presented, with page references; a table of cases (alphabetically arranged); list of statutes and text books cited with page references.

(2) A concise abstract or statement of the case.

(3) Exceptions to specific findings and conclusions of fact (or parts thereof), or conclusions of law or discretion in the initial decision; exceptions to the failure of the initial decision to include other findings or conclusions of fact, law or discretion, and exceptions to any prejudicial error in procedure.

Exceptions may also set forth proposed findings of fact, conclusions of law or discretion, together with a proposed order with a request that they be substituted for and adopted in place of those to which exception is taken, with specific reference to the parts of the record and the legal or other authorities relied upon.

(4) Argument clearly setting forth points of fact and of law relied upon in support of each exception taken, together with specific references to the parts of the record and the legal or other authorities relied upon.

(d) Appeals shall be based on and limited to matters which have been previously presented to the hearing examiner in proposed finding of fact and conclusions of law, and supporting reasons.

(e) The brief on appeal shall be filed within the time specified therefor by the hearing examiner. Opposing brief shall be filed within the time allowed therefor by the hearing examiner.

(f) Six copies of all briefs shall be filed with the Docket Clerk.

(g) All briefs shall be printed, multigraphed or typewritten on paper 8" x 10½". Printed briefs shall be on good unglazed paper in type not smaller than 10 point double leaded, citations and quotations single leaded, and footnotes not less than 8 point single leaded.

(h) Unless leave be granted, no brief shall exceed 50 printed or 100 typewritten pages.

§ 150.424 *Postmaster General's orders.* (a) Copies of the Postmaster General's decision and order will be transmitted to the hearing examiner who shall cause the order to be incorporated in the record of the proceeding, published in the Postal Bulletin and transmitted to such postmasters and other officers and employees of the postal service as may be required to put the provisions of said order into effect.

(b) A copy of the decision and order shall be promptly served upon each party to the proceeding.

§ 150.425 *Application for modification or revocation of orders.* (a) Any party against whom an order has been issued by the Postmaster General may file with the Docket Clerk an application for modification or revocation thereof, which application shall set forth the grounds upon which it is based.

(b) The Chief Hearing Examiner shall assign the matter to a hearing examiner who shall serve a copy thereof upon the Solicitor, setting a date for his reply thereto. Upon receipt of the reply of the Solicitor, the hearing examiner shall transmit the application, together with his recommendation, to the Postmaster General for final decision.

§ 150.426 *Supplementary orders.* (a) Whenever the Solicitor shall have reason to believe that any person or concern is evading or attempting to evade the provisions of any order issued pursuant to proceedings conducted in accordance with this subpart, he shall prepare and file with the Docket Clerk a complaint setting forth the evasion or attempted evasion of such order and requesting the issuance of a notice calling upon the person or concern accused to show cause why a supplemental order should not be issued against the name or names alleged to be unlawfully employed.

(b) The Chief Hearing Examiner shall assign the matter to a hearing examiner. If the hearing examiner determines that the allegations of the complaint warrant, he shall issue to the accused person or concern a notice to show cause on a specific date why such supplementary order should not be issued.

(c) Service of such notice to show cause and of a copy of the complaint shall be made upon the persons accused in the manner provided in § 150.405.

(d) The person or concern named in such complaint and notice to show cause may file answer thereto pursuant to the requirements of § 150.409.

(e) The hearing examiner shall prepare and present to the Postmaster General an initial decision and shall recommend an order based upon the findings of fact and conclusions of law which shall be prepared by him on the basis of the evidence presented pursuant to the aforesaid order to show cause.

b. In Part 151—Procedures Before the Solicitor (39 CFR Part 151), Subpart A—Rules of Practice in Cases Arising Under Postal Fraud, Lottery, and Fictitious Statutes, and §§ 151.1 to 151.28, are rescinded.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

The foregoing amendments shall be effective July 8, 1951.

[SEAL] J. M. DONALDSON,
Postmaster General.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Bureau of Dairy Industry

[9 CFR Part 301]

SANITARY INSPECTION OF PROCESS OR RENOVATED BUTTER

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering certain proposed amendments of the regulations relating to the sanitary inspection of process or renovated butter (9 CFR 301.1, et seq.), which regulations are effective pursuant to an act of Congress which was approved on June 24, 1946 (60 Stat. 300), and entitled "An act to authorize the condemnation of materials which are intended for use in process or renovated butter and which are unfit for human consumption, and for other purposes."

All persons who desire to submit written data, views, or arguments for consideration in connection with these proposed amendments should file the same in duplicate with the Chief, Bureau of Dairy Industry, Agricultural Research Administration, United States Department of Agriculture, Washington, D. C., not later than 5:30 p. m., e. s. t., on the 20th day after the publication of this notice in the FEDERAL REGISTER.

The proposed amendments are as follows:

1. In § 301.5 (a), make the following changes:

a. Add a new sentence immediately after the present second sentence of said section, reading "Containers constructed of materials mentioned in subparagraphs (1) or (2) of this paragraph of the second preceding sentence shall have smooth inner surfaces without pockets or recesses."; and

b. Add a sentence at the end of said section which will read as follows: "Butter received in a process or renovated butter factory in a container which does not meet the requirements of this paragraph shall be denatured or destroyed in accordance with the provisions of § 301.6 (f), as shall also butter received in containers which are deemed to be unfit for use as such containers because of the presence of rust, because they had not been cleaned properly, or had been improperly used."

As thus amended, the said section will read as follows:

§ 301.5 *Sanitary requirements for process or renovated butter, and for ingredients intended for use in its manufacture—*(a) *Requirements for containers of ingredients.* In order to safeguard the purity and fitness of butter, butter oil, milk, and other ingredients for use in the manufacture of process or renovated butter, no manufacturer shall accept delivery of such an ingredient unless, at the time of such receipt, it is packed in a container which is constructed of: (1) Noncorrosive metal; (2) a corrosive metal which has been coated with some noncorrosive metal; or (3) wood which is tightly fitted together, parchment lined, and tightly headed. Such containers shall be equipped with tightly fitted covers, and shall be kept covered at all times. Containers constructed of materials mentioned in subparagraph (1) or (2) of this paragraph of the second preceding sentence shall have smooth inner surfaces without pockets or recesses. Every such container shall be cleaned and dried thoroughly before it is used again. Butter received in a process or renovated butter factory in a container which does not meet the requirements of this paragraph shall be denatured or destroyed in accordance with the provisions of § 301.6 (f), as shall also butter received in containers which are deemed to be unfit for use as such containers because of the presence of rust, because they had not been cleaned properly, or had been improperly used.

2. In § 301.5 (e), make the following changes:

a. Delete the words "That this restriction shall not apply to any processing of any such butter which has been done by a process or renovated butter manufacturer before the effective time of these regulations, if such butter, in its then processed form, is in the possession of the particular manufacturer at such time: *And provided further,*"; and

b. Change the period at the end of said section to a comma, and add, immediately thereafter, the words "and is identified as to the name and address of the farmer-producer."

The said section, as thus proposed to be amended, will read as follows:

(e) *Butter must be melted, clarified, etc., at factory and under supervision of inspector.* No butter shall be used in the manufacture of process or renovated butter unless the melting, clarifying, refining, and other processing of it has been done at a process or renovated butter factory under the supervision of an inspector: *Provided,* That butter melted by the original farmer-producer thereof and placed and stored by him in a container meeting the specifications prescribed in paragraph (a) of this section which is sold to a process or renovated butter manufacturer (either directly or through a designated representative of such manufacturer) may be used by such manufacturer in the manufacture of process or renovated butter, if it is otherwise eligible for such use, and is identified as to the name and address of the farmer-producer.

3. In § 301.6 (b), add, immediately after the word "louse", appearing in the first sentence of said section, the words ", or fly, or any other insect or animal not specifically mentioned,". The section, as thus amended, will read as follows:

(b) *Process or renovated butter, and prospective ingredients thereof, found to contain any avian animal, etc., including immature stages or parts thereof, or excrement therefrom; destruction or denaturation required.* Any butter, butter oil, milk, or other ingredient intended for use in the manufacture of process or renovated butter which, upon inspection, is found to contain any avian, reptilian, mammalian, amphibian, or piscine animal, or any cockroach, flea, or louse, or fly, or any other insect or animal not specifically mentioned, including immature stages or parts thereof, or any excrement therefrom, shall be deemed to be unfit for such use. The inspector shall mark the container "U. S. Inspected and Condemned," and all of the contents of such container shall be denatured or destroyed by or under the supervision of an inspector in accordance with the provisions of paragraph (f) of this section. The provisions of this paragraph shall also apply to any churning or other lot of process or renovated butter.

4. Delete the provisions of § 301.6 (c).

5. Delete "Before removal from the factory" at the beginning of § 301.7 (a), and add a new sentence at the end of the section so that the said section, as thus amended, will read as follows:

§ 301.7 *Marketing, labeling, and branding of process or renovated butter—*(a) *Statutory packages.* Each package of process or renovated butter shall have legibly printed or stenciled on one of its sides the words "Process Butter," also the factory number, district, and State and the net weight, in the following manner:

Process Butter
Factory No. 2, 2d Dist., New York
Net Weight, 60 Lbs.

The words "Process Butter" shall be in bold-face gothic letters, not less than three-quarters of an inch square, and the other words and figures shall be not less than one-half an inch square. The color of such words and figures shall be in strong contrast to the color of the package. No container of bulk-packed process or renovated butter, and no container of two or more cartons or prints of process or renovated butter shall be removed from the factory unless and until each such container, as well as each such carton or print, is stamped "U. S. Inspected and Passed" by the inspector.

6. In the two provisos of § 301.10, insert the following language: ", except in cases where the chief of bureau determines that a violation was wilful or endangered the public health or safety,", making the section read:

§ 301.10 *Withdrawals of inspections.* In any case in which the chief of bureau determines that the sanitary conditions existing in any process or renovated butter factory do not meet any of the standards prescribed in § 301.4 or § 301.5, he shall cause inspection to be withdrawn from such factory: *Provided,* That, except in cases where the chief of bureau determines that a violation was wilful or endangered the public health or safety, no such withdrawal action shall be made effective unless and until the facts or conduct which the chief of bureau believes may warrant such action have been called to the attention of the manufacturer in writing, and such manufacturer has been accorded an adequate opportunity to demonstrate compliance with all of such standards. In any case in which the chief of bureau determines that any manufacturer of process or renovated butter has failed to comply with any provision of the regulations in this part, other than any of those set forth in §§ 301.4 or 301.5, the chief of bureau is authorized, in his discretion, to withdraw inspection from such manufacturer's factory: *Provided,* That, except in cases where the chief of bureau determines that a violation was wilful or endangered the public health or safety, no such withdrawal action shall be made effective unless and until the facts or conduct which the chief of bureau believes may warrant such action have been called to the attention of the manufacturer in writing, and such manufacturer has been accorded an adequate opportunity to demonstrate or achieve compliance with all such provisions.

Done at Washington, D. C., this 5th day of July 1951.

Production and Marketing Administration

[7 CFR Part 931]

[Docket No. AO-229]

HANDLING OF MILK IN CEDAR RAPIDS-IOWA CITY MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Cedar Rapids, Iowa, on December 11-14, 1950, pursuant to notice thereof which was issued on November 20, 1950 (15 F. R. 8084), upon a proposed marketing agreement and a proposed order regulating the handling of milk in the Cedar Rapids-Iowa City marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on May 5, 1951, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto which was published in the FEDERAL REGISTER on May 10, 1951, subject to the corrections published in the FEDERAL REGISTER on May 16, 1951 (16 F. R. 4344, 4621).

Exceptions to the recommended decision were filed on behalf of the three producer cooperative associations supplying milk to the market. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings, conclusions and actions decided herein are at variance with the exceptions such exceptions are over-ruled.

The major issues developed at the hearing were concerned with:

(1) Whether the handling of milk in the Cedar Rapids-Iowa City marketing area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects interstate or foreign commerce in milk or milk products;

(2) Whether the issuance of an order regulating the handling of milk in the Cedar Rapids-Iowa City marketing area will tend to effectuate the declared policy of the act; and

(3) The appropriate terms and conditions to be included in an order with respect to:

(a) The scope of regulation.
(b) The classification of milk.
(c) Transfers of milk between plants.
(d) Class prices.
(e) Payments to producers.
(f) The administrative assessment.
(g) Marketing services, and
(h) Other administrative provisions.

Findings and conclusions. The findings and conclusions of the recommended decision set forth in the FEDERAL REGISTER (F. R. Doc. 51-5436 16 F. R. 4344, 4621) are hereby approved and adopted as the findings and conclusions of this decision as if set forth in full herein subject to the following amendments:

1. The marketing area should be designated as the Cedar Rapids-Iowa City marketing area. Because the regulation applies to both Cedar Rapids and Iowa City, both communities of importance and of considerable size, both cities should be named in the designation of the marketing area. Accordingly the title, "Cedar Rapids-Iowa City marketing area," should be substituted for the title, "Cedar Rapids, Iowa, marketing area" wherever it appears in the decision.

2. The following paragraph should be inserted following the second paragraph relating to *"The classification of milk"* as it appears in the first column on page 4346 of the FEDERAL REGISTER of May 10, 1951:

Class I should also include the product generally referred to as "concentrated milk," which has recently been introduced in a number of markets. While its distribution has not yet been undertaken in the market, it is not unlikely that it may make its appearance in the market in the near future. This product is not sterilized and is disposed of to consumers, either in liquid or frozen form, for consumption in fluid form by the addition of water. Producers feel that the Class I definition should be broadened to include this product which is designed to replace regular bottled milk in the consumer trade. In areas where it is being sold it is generally required to be made from milk meeting the same requirements as are applicable to fluid whole milk. Accordingly it has been concluded that concentrated milk should properly be classified as Class I milk.

MARKETING AGREEMENT AND ORDER

Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Cedar Rapids-Iowa City Marketing Area" and "Order Regulating the Handling of Milk in the Cedar Rapids-Iowa City Marketing Area"; which have been decided upon as the appropriate and detailed means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order which will be published with this decision.

This decision filed at Washington, D. C., this 5th day of July 1951.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Regulating the Handling of Milk in the Cedar Rapids-Iowa City Marketing Area

§ 931.0 *Findings and determinations—*(a) *Findings upon the basis of the hearing record.* Pursuant to Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act"), and the rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and a proposed order to regulate the handling of milk in the Cedar Rapids-Iowa City marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the re-

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

spective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined herein, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment monthly by each handler, as his pro rata share of such expenses, four cents per hundredweight, or such amount not exceeding four cents per hundredweight as the Secretary may prescribe, with respect to all milk received by him during the month from producers (including such handler's own production) and with respect to other source milk received by him during such month which is classified as Class I.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in the Cedar Rapids-Iowa City marketing area shall be in conformity to and in compliance with the following terms and conditions:

DEFINITIONS

§ 931.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 931.2 *Secretary.* "Secretary" means the Secretary of Agriculture or such other officer or employee of the United States as may be authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 931.3 *Department.* "Department" means the United States Department of Agriculture or such other Federal agency as may be authorized to perform the price reporting functions of the United States Department of Agriculture.

§ 931.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 931.5 *Delivery period.* "Delivery period" means the calendar month or the total portion thereof during which this subpart is in effect.

§ 931.6 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines (a) is qualified under the provisions of the act of Congress of February 11, 1922, as amended, known as the "Capper-Volstead Act"; (b) has full authority in the sale of milk of its members, and (c) is engaged in making collective sales of or marketing milk or its products for its members.

§ 931.7 *Cedar Rapids-Iowa City marketing area.* "Cedar Rapids-Iowa City marketing area," called the "marketing area" in this subpart, means all the territory within the corporate limits of the cities of Cedar Rapids and Iowa City, both in the State of Iowa.

§ 931.8 *Approved plant.* "Approved plant" means a milk processing plant approved by, and under regular inspection of, the proper health authority of either Cedar Rapids or Iowa City and (a) from which milk is disposed of as Class I milk on wholesale or retail routes (including plant stores) within the marketing area, or (b) which furnishes milk to a plant described in paragraph (a) of this section.

§ 931.9 *Handler.* "Handler" means (a) a person in his capacity as the operator of an approved plant, or (b) a cooperative association with respect to milk of producers received at a plant operated by it or caused by it to be delivered to a milk plant other than an approved plant.

§ 931.10 *Producer.* "Producer" means any person who, in conformity with the requirements of the health authorities of the city of Cedar Rapids or Iowa City for the production of milk for consumption as milk, produces milk which (a) is received at an approved plant, (b) is received at a plant operated by a cooperative association, or (c) is caused by a handler to be diverted from a plant described in paragraphs (a) and (b) of this section to a plant from which no Class I milk is disposed of within the marketing area. Milk so diverted shall be deemed to have been received by the handler who caused it to be so diverted. This definition shall not include a person with respect to milk produced by him which is received by a handler who is subject to another Federal marketing order and who is partially exempted from the provisions of this subpart pursuant to § 931.56.

§ 931.11 *Producer-handler.* "Producer-handler" means any person who is both a producer and a handler and who receives no milk directly from the farms of other producers: *Provided*, That the maintenance, care, and management of the dairy animals and other resources necessary to produce the milk and the processing, packaging, and distribution of the milk are the personal enterprise and the personal risk of such person.

§ 931.12 *Producer milk.* "Producer milk" means all skim milk and butterfat which is produced by a producer, other than a producer-handler, and which is received by a handler either directly from producers or from other handlers.

§ 931.13 *Other source milk.* "Other source milk" means all skim milk and butterfat except that contained in producer milk.

MARKET ADMINISTRATOR

§ 931.20 *Designation.* The agency for the administration of this subpart shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 931.21 *Powers.* The market administrator shall have power to:

(a) Administer the terms and provisions of this subpart;

(b) Make rules and regulations to effectuate the terms and provisions of this subpart;

(c) Receive, investigate, and report to the Secretary complaints of violations of the terms and provisions of this subpart; and

(d) Recommend to the Secretary amendments to this subpart.

§ 931.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer the terms and provisions of this subpart;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 931.75, the cost of his bond and the bonds of his employees, his own compensation, and all other expenses, except those incurred under § 931.76, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this subpart and upon request by the Secretary surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(g) Publicly announce unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who within 10 days after the date upon which he is required to perform such acts, has not made (1) reports pursuant to §§ 931.30 and 931.31, or (2) payments pursuant to §§ 931.65, 931.68, and 931.70;

(h) Audit each handler's records and payments by inspection of such handler's records and the records of any person upon whose utilization the classification of skim milk and butterfat for such handler depends;

(i) On or before the 10th day after the end of each delivery period report to each cooperative association which so requests the utilization of the milk caused to be delivered to each handler by such cooperative association. For this purpose such milk shall be prorated to each class in the same proportion that the total receipts of producer milk by such handler were used in each class;

(j) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate the prices determined for each delivery period as follows:

(1) On or before the 5th day of each delivery period, (i) the minimum price for Class I milk computed pursuant to § 931.50 (a) and the butterfat differential computed pursuant to § 931.51 (a), both for the current delivery period, and (ii) the minimum prices for Class II milk and Class III milk computed pursuant to § 931.50 (b) and (c) and the butterfat differentials computed pursuant to § 931.51 (b) and (c) for the previous delivery period, and

(2) On or before the 10th day after the end of each delivery period, the uniform price computed pursuant to § 931.61 and the butterfat differential computed pursuant to § 931.66; and

(k) Prepare and disseminate to the public such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS AND FACILITIES

§ 931.30 *Delivery period reports.* On or before the 7th day after the end of each delivery period each handler, except a producer-handler, shall report to the market administrator in the detail and on the forms prescribed by the market administrator:

(a) The qualities of butterfat and skim milk in milk received from producers;

(b) The quantities of skim milk and butterfat contained in (or used in the production of) receipts from any other handler;

(c) The quantities of skim milk and butterfat contained in receipts of other source milk (except nonfluid milk products disposed of in the form in which received without further processing or packaging by the handler);

(d) The utilization of all receipts required to be reported pursuant to this section; and

(e) Such other information with respect to receipts and utilization as the market administrator may prescribe.

§ 931.31 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) On or before the 20th day of each delivery period each handler shall submit to the market administrator such handler's producer payroll for the preceding delivery period which shall show:

(1) The total pounds of milk received from each producer and cooperative association and the total pounds of butterfat contained in such milk;

(2) The amount of payment to each producer and cooperative association; and

(3) The nature and amount of any deductions involved in such payments.

§ 931.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or to establish the correct data with respect to:

(a) The receipts and utilization in whatever form of all skim milk and butterfat received, including nonfluid milk products disposed of in the form in which received without further processing;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and milk products handled;

(c) Payment to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream, and milk products on hand at the beginning and end of each delivery period.

§ 931.33 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year period the market administrator notifies the handler in writing that the retention of such books and records or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 931.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat in any form received by a handler during the delivery period and required to be reported pursuant to § 931.30 shall be classified by the market administrator pursuant to §§ 931.41 to 931.46, inclusive.

§ 931.41 *Classes of utilization.* Subject to the conditions set forth in §§ 931.43 and 931.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream or any mixture (except those specified in paragraph (b) of this section) of cream and milk or skim milk containing more than 6 percent of butterfat, (2) used in the production of concentrated milk, not sterilized, for consumption in fluid form, and (3) not specifically accounted for under paragraphs (b) and (c) of this section.

(b) Class II milk shall be all skim milk and butterfat used to produce evaporated milk, condensed milk, ice cream, ice cream mix, aerated products containing milk or cream or a combination thereof (such as "Reddi-Wip," "Instant Whip," etc.), cottage cheese, and any milk product other than those specified in paragraphs (a) and (c) of this section.

(c) Class III milk shall be all skim milk and butterfat used to produce butter, American type cheddar cheese, animal feed, casein and nonfat dry milk solids, and in shrinkage up to 2 percent of receipts from producers, and in shrinkage of other source milk.

§ 931.42 *Shrinkage.* The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Compute the total shrinkage of skim milk and butterfat for each handler.

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat received from producers and from other sources.

§ 931.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat (except that transferred to a producer-handler) shall be reclassified if verification by the market administrator discloses that the original classification was incorrect.

§ 931.44 *Transfers.* Skim milk or butterfat disposed of by a handler either by transfer or diversion shall be classified:

(a) As Class I milk if transferred or diverted in the form of milk, skim milk or cream to another handler, except a producer-handler, unless utilization in another class is mutually indicated in writing to the market administrator by both handlers on or before the 7th day after the end of the delivery period within which such transaction occurred, but in no event shall the amount classified in any class exceed the total use in such class by the transferee handler: *Provided*, That, if either or both handlers have received other source milk, the milk so transferred shall be classified at both plants so as to return the highest class utilization to producer milk.

(b) As Class I milk if transferred to a producer-handler in the form of milk, skim milk, or cream.

(c) As Class I milk if transferred or diverted in the form of milk, skim milk, or cream to a plant other than an approved plant, unless:

(1) The handler claims other classification on the basis of utilization mutually indicated in writing to the market administrator by both the handler and purchaser on or before the 7th day after the end of the delivery period within which such transfer or diversion occurred;

(2) Such purchaser maintains books and records showing the utilization of all skim milk and butterfat at his unapproved plant, which are made available if requested by the market administrator for the purpose of verification; and

(3) Such unapproved plant has actually used not less than an equivalent amount of skim milk and butterfat in the use indicated in such statement: *Provided*, That, if verification of such purchaser's records discloses that an equivalent amount of skim milk and butterfat has not been used in such indicated utilization, the remaining pounds shall be classified in series beginning with the next higher priced classification in which such purchaser had utilization.

§ 931.45 *Computation of skim milk and butterfat in each class.* For each delivery period, the market administrator shall correct for mathematical and other obvious errors the delivery period report submitted by each handler and shall compute the total pounds of skim milk and butterfat, respectively, in each class for such handler.

§ 931.46 *Allocation of skim milk and butterfat classified.* After computing pursuant to § 931.45 the classification of all skim milk and butterfat received by a handler, the market administrator shall determine the classification of milk received from producers as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk allocated to shrinkage of producer milk;

(2) Subtract from the remaining pounds of skim milk in each class in series beginning with the lowest priced class in which the handler has use, the pounds of skim milk contained in other source milk;

(3) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk contained in receipts from other handlers in accordance with its classification as determined pursuant to § 931.45;

(4) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(5) If the remaining pounds of skim milk in all classes exceed the pounds of skim milk received from producers, an amount equal to the difference shall be subtracted from the pounds of skim milk in each class in series beginning with the lowest priced class in which the handler has use. Any amount so subtracted shall be called "overage."

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section.

MINIMUM PRICES

§ 931.50 Subject to the provisions of § 931.51, the minimum prices per hundredweight to be paid by each handler for milk received from producers at his plant during the delivery period shall be as follows:

(a) *Class I milk.* The price for Class II milk for the previous delivery period plus the following premiums during the delivery periods indicated:

January, February, March	$0.80
April, May, June	.60
July through December	1.05

(b) *Class II milk.* The highest of the prices resulting from the computations made pursuant to subparagraphs (1) and (2) of this paragraph or to paragraph (c) of this section:

(1) The average of the basic or field prices reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the period beginning with the 16th day of the previous month and ending with the 15th day of the then current month at the following plants for which prices have been reported to the market administrator or to the Department:

Present Operator of Plant and Location of Plant

Amboy Milk Products Co., Amboy, Ill.
Borden Co., Dixon, Ill.
Borden Co., Sterling, Ill.
Carnation Co., Oregon, Ill.
Carnation Co., Morrison, Ill.
United Milk Products Co., Argo Fay, Ill.

(2) The price resulting from the following computations:

(i) Multiply by 6 the simple average as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk creamery butter as reported for the Chicago market during the delivery period by the Department;

(ii) Add an amount equal to 2.4 times the average as computed by the market administrator, of the daily wholesale prices of the cheese known as "Twins" as reported for the Chicago market during the delivery period by the Department;

(iii) Divide the resulting sum by 7;

(iv) Add 30 percent thereof; and

(v) Multiply the resulting sum by 3.5.

(c) *Class III milk.* The sum of the prices resulting from the following computations:

(1) Subtract 6 cents from the price per pound of butter computed pursuant to paragraph (b) (2) (i) of this section and multiply the result by 4.2, and

(2) From the simple average, as computed by the market administrator, of the weighted averages of carlot prices per pound of nonfat dry milk solids, spray and roller process, respectively, in barrels for human consumption, f. o. b. manufacturing plants in the Chicago area as published for the month by the Department, subtract 6½ cents, multiply the result by 8.2 and then multiply the resulting figure by 0.965. If the Department does not publish the above stated price for nonfat dry milk solids there shall be used in lieu thereof the midpoint between the simple averages (using in each price series the midpoint of any price range as one price) as computed by the market administrator, of the weekly Chicago wholesale carlot prices per pound of nonfat dry milk solids in barrels for human consumption, spray and roller process, respectively, as reported within the month by the Department and 8½ cents, rather than 6½ cents, shall be deducted in making this computation.

§ 931.51 *Butterfat differentials to handlers.* If the average butterfat content of the milk of any handler allocated to any class pursuant to § 931.46 is more or less than 3.5 percent there shall be added to the respective class price computed pursuant to § 931.50 for each one-tenth of 1 percent that the average butterfat content of such milk is above 3.5 percent or subtracted for each one-tenth of 1 percent that the average butterfat content of such milk is below 3.5 percent, an amount equal to the applicable butterfat differential computed as follows:

(a) *Class I milk.* Multiply by 1.40 the price per pound of butter computed pursuant to § 931.50 (b) (2) (i) for the preceding period and divide the result by 10.

(b) *Class II milk.* Multiply by 1.20 the price per pound of butter computed pursuant to § 931.50 (b) (2) (i) for the delivery period and divide the result by 10.

(c) *Class III milk.* From the price per pound of butter computed pursuant to § 931.50 (b) (2) (i) for the devilery period, subtract 6 cents, multiply by 1.20 and divide the result by 10.

§ 931.52 *Emergency price provision.* Whenever the provisions of this subpart require the market administrator to use a specific price (or prices) for milk or any milk product for the purpose of determining class prices or for any other purpose the market administrator shall add to the specified price the amount of any subsidy or other similar payment being made by any Federal agency, in connection with the milk or product associated with the price specified: *Provided*, That if for any reason the price specified is not reported or published as indicated, the market administrator shall use the applicable maximum uniform price established by regulations of any Federal agency plus the amount of any subsidy or other similar payment: *Provided further*, That if the specified price is not reported or published and there is no applicable maximum uniform price, or if the specified price is not reported or published and the Secretary determines that the market price is below the applicable maximum uniform price, the market administrator shall use a price determined by the Secretary to be equivalent to or comparable with the price specified.

APPLICATION OF PROVISIONS

§ 931.55 *Producer-handler.* Sections 931.40 through 931.52 and 931.60 through 931.76 shall not apply to a producer-handler.

§ 931.56 *Handlers subject to other Federal orders.* In the case of any handler who the Secretary determines, disposes of a greater portion of his milk as Class I milk in another marketing area regulated by another milk marketing agreement or order issued pursuant to the act, the provisions of this subpart shall not apply except as follows:

(a) The handler shall with respect to his total receipts of skim milk and butterfat make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(b) If the price which such handler is required to pay, under the other Federal order to which he is subject, for skim milk and butterfat which would be classified as Class I milk under this subpart is less than the price provided by this subpart, such handler shall pay to the market administrator for deposit into the producer-settlement fund (with respect to all skim milk and butterfat disposed of as Class I milk within the marketing area) an amount equal to the difference between the value of such skim milk or butterfat as computed pursuant to this subpart and its value as determined pursuant to the other order to which he is subject.

DETERMINATION OF UNIFORM PRICES

§ 931.60 *Computation of value of milk.* The value of milk received during each delivery period by each handler from producers shall be a sum of money computed by the market administrator by multiplying the pounds of such milk in each class by the applicable class prices and adding together the resulting amounts: *Provided*, That if the handler had overage of either skim milk or butterfat there shall be added to the above values an amount computed by multiplying the pounds of overage by the applicable class prices.

§ 931.61 *Computation of uniform price.* For each delivery period the market administrator shall compute the uniform price per hundredweight for milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 931.60 for all handlers who made the reports prescribed by § 931.30 and who made the payments pursuant to § 931.65 for the preceding delivery period;

(b) Add not less than one-half of the cash balance on hand in the producer-settlement fund less the total amount of the contingent obligations to handlers pursuant to § 931.67.

(c) Subtract, if the average butterfat content of the milk included in these computations is greater than 3.5 percent, or add, if such average butterfat content is less than 3.5 percent an amount computed by: Multiplying the amount by which the average butterfat content of such milk varies from 3.5 percent by the butterfat differential computed pursuant to § 931.66 and mutiplying the resulting figure by the total hundredweight of such milk;

(d) Divide the resulting amount by the total hundredweight of milk included in these computations; and

(e) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for milk of 3.5 percent butterfat content received from producers.

§ 931.62 *Notification of handlers.* On or before the 10th day after the end of each delivery period, the market administrator shall mail to each handler at his last known address, a statement showing:

(a) The classification and value of the milk received from producers by such handler.

(b) The applicable class prices and the uniform price; and

(c) The amount due such handler or the amount to be paid by such handler as the case may be pursuant to §§ 931.68 and 931.69.

PAYMENT FOR MILK

§ 931.65 *Time and method of payment.* Each handler shall make payment as follows:

(a) On or before the 15th day after the end of the delivery period during which the milk was received to each producer for milk, except that for which payment is made to a cooperative association pursuant to paragraph (b) of this section, at not less than the uniform price computed pursuant to § 931.61 subject to the butterfat differential computed pursuant to § 931.66.

(b) On or before the 12th day after the end of the delivery period during which the milk was received, to a cooperative association for milk caused to be delivered to such handler from producers by the cooperative association, if the cooperative association is authorized to collect payment for such milk and if it so requests, an amount equal to not less than the sum of the individual payments otherwise payable to such producers.

§ 931.66 *Producer butterfat differential.* In making payments pursuant to § 931.65 there shall be added to or subtracted from the uniform price for each one-tenth of one percent that the average butterfat content of the milk received from producers is above or below 3.5 percent, an amount computed by multiplying by 1.20 the price per pound of butter computed pursuant to § 931.50 (b) (2) (i) for the delivery period, dividing the resulting sum by 10, and adjusting to the nearest one-tenth cent.

§ 931.67 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the producer-settlement fund into which he shall deposit all payments made by handlers pursuant to § 931.68 and out of which he shall make all payments to handlers pursuant to § 931.69.

§ 931.68 *Payments to the producer-settlement fund.* On or before the 12th day after the end of each delivery period, each handler shall pay to the market administrator the amount by which the utilization value of the milk received by such handler from producers during such delivery period is greater than the amount required to be paid producers by such handler pursuant to § 931.65.

§ 931.69 *Payments out of the producer-settlement fund.* On or before the 12th day after the end of each delivery period, the market administrator shall pay to each handler the amount by which the utilization value of the milk received by such handler from producers during the delivery period is less than the amount required to be paid producers by such handler pursuant to § 931.65: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly the payments to all handlers and shall complete such payments as soon as the necessary funds are available. No handler who has not received the balance of such payments from the market administrator shall be considered in violation of § 931.65 if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

§ 931.70 *Adjustment of accounts.* Whenever audit by the market administrator of any handler's reports, books, records or accounts discloses errors resulting in moneys due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due, and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred.

§ 931.71 *Termination of obligations.* The provisions of this section shall apply to any obligation under this subpart for the payment of money irrespective of when such obligation arose.

(a) The obligation of any handler to pay money required to be paid under the terms of this subpart shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The delivery period(s) during which the milk with respect to which the obligation exists was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producer(s) or cooperative association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator all books and records required by this subpart to be made available, the market administrator may, within the two year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two year period with respect to such obligation shall not begin to run until the first day of the calendar month following the delivery period during which all such books and records pertaining to such obligations are made available to the market administrator.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month, during which the milk involved in the claim was re-

ceived if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed unless the handler, within the applicable period of time, pursuant to section 8c (15) (A) of the act, files a petition claiming such money.

OTHER PAYMENTS

§ 931.75 *Expense of administration.* As his pro rata share of the expense of administration of this subpart, each handler shall pay to the market administrator on or before the 12th day after the end of each delivery period, 4 cents per hundredweight, or such lesser amount as the Secretary from time to time may prescribe with respect to all milk received within the delivery period from producers (including such handler's own production) and with respect to all other source milk classified as Class I.

§ 931.76 *Marketing services.* (a) Except as set forth in paragraph (b) of this section each handler, in making payments to producers (other than himself) pursuant to § 931.65 shall deduct 5 cents per hundredweight or such lesser amount as the Secretary from time to time may prescribe, and shall pay such deductions to the market administrator on or before the 12th day after the end of such delivery period. Such moneys shall be used by the market administrator to check weights of, sample, and test milk received from producers and to provide producers with market information.

(b) In the case of producers for whom a cooperative association is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers and on or before the 12th day after the end of such delivery period pay such deductions to the cooperative association rendering such services.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 931.80 *Effective time.* The provisions of this subpart, or any amendment to this subpart, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 931.81 *Suspension or termination.* The Secretary shall, whenever he finds that, this subpart, or any provision of this subpart obstructs or does not tend to effectuate the declared policy of the act, terminate or suspend the operation of this subpart or any such provisions of this subpart.

§ 931.82 *Continuing obligations.* If upon the suspension or termination of any or all provisions of this subpart, there are any obligations under this subpart the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 931.83 *Liquidation.* Upon the suspension or termination of the provisions of this subpart, except this section, the liquidating agent shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 931.90 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 931.91 *Separability of provisions.* If any provision of this subpart or its application to any person or circumstance, is held invalid, the application of such provision and of the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

ORDER DIRECTING THAT A REFERENDUM BE CONDUCTED AMONG PRODUCERS; DETERMINATION OF A REPRESENTATIVE PERIOD; AND DESIGNATION OF AN AGENT TO CONDUCT SUCH REFERENDUM

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (19)), it is hereby directed that a referendum be conducted among producers (as defined in the proposed order regulating the handling of milk in the Cedar Rapids-Iowa City marketing area which is filed simultaneously herewith) who, during the month of January 1951, were engaged in the production of milk for sale in the marketing area specified in the aforesaid order to determine whether such producers favor the issuance of the order which is a part of the decision of the Secretary of Agriculture filed simultaneously herewith.

The month of January 1951 is hereby determined to be a representative period for the conduct of such referendum. John B. Rosenbury is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177).

Done at Washington, D. C., this 5th day of July 1951.

IRISH POTATOES GROWN IN NEW JERSEY

NOTICE OF PROPOSED BUDGET AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the budget and rate of assessment hereinafter set forth, which were recommended by the New Jersey Potato Marketing Committee, established pursuant to Marketing Agreement No. 116 and Order No. 98 (7 CFR Part 998), regulating the handling of Irish potatoes grown in the State of New Jersey, issued under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed in triplicate with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposals are as follows:

§ 998.202 *Budget of expenses and rate of assessment.* (a) The expenses necessary to be incurred by the New Jersey Potato Marketing Committee, established pursuant to Marketing Agreement No. 116 and Order No. 98, to enable such committee to carry out its functions pursuant to the provisions of the aforesaid marketing agreement and order, during the fiscal year ending April 30, 1952, will amount to $18.750.00.

(b) The rate of assessment to be paid by each handler who first ships potatoes shall be one-half of one cent ($0.005) per hundredweight of potatoes handled by him as the first handler thereof during said fiscal year; and

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 116 and Order No. 98 (7 CFR Part 998).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup., 608c)

Done at Washington, D. C., this 5th day of July 1951.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 9889]

AMERICAN TELEPHONE AND TELEGRAPH CO. AND ASSOCIATED COMPANIES OF BELL SYSTEM

ORDER POSTPONING HEARING

In the matter of rates and charges for interstate and foreign communication services furnished by the American Telephone and Telegraph Company and the Associated Companies of the Bell System.

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 28th day of June 1951;

The Commission, having under consideration the proceedings herein and its order, dated February 14, 1951, postponing the dates for answer and hearing herein until July 16, and August 20, 1951, respectively, in order to permit the Commission to consider jointly with the National Association of Railroad and Utilities Commissioners questions regarding telephone separation procedures, and in order to enable the Commission to observe trends in revenues and expenses;

It appearing, that the above joint studies are still in progress, along with other joint studies regarding plans to make possible the elimination of the disparity which exists between rates and charges for state and interstate message toll telephone services; and that the dates for answer and hearing herein should be further postponed for a limited time until the Commission has had an opportunity to review the results of the above studies and the application of such results to the issues in the proceedings herein;

It is ordered, That, on the Commission's own motion, the dates for answer and hearing specified in the above order of February 14, 1951, are hereby postponed until September 28, 1951 and October 29, 1951, respectively.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. G-1567, G-1663]

MISSISSIPPI POWER AND LIGHT CO.

ORDER FIXING DATE OF HEARING AND CONSOLIDATING PROCEEDINGS

On December 21, 1950, Mississippi Power and Light Company filed an application in Docket No. G-1567 for a disclaimer of jurisdiction, or, in the alternative, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the leasing and operation of certain natural-gas facilities in Mississippi, known as the Bolivar and DeSoto Natural Gas Districts.

On April 12, 1951, Mississippi Power and Light Company filed a similar application in Docket No. G-1663 for a disclaimer of jurisdiction, or, in the alternative, for authorization to lease and operate the Carthage Natural Gas District transmission line.

The two applications involve similar questions and may appropriately be heard together.

The Commission finds:

(1) The proceedings are proper ones for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its applications be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings, and no request to be heard, protest, or petition having been filed subsequent to the giving of due notice of the filing of the applications, including publication in the FEDERAL REGISTER on January 18, 1951 (16 F. R. 477) and May 11, 1951 (16 F. R. 4375), respectively.

(2) The applications in Docket Nos. G-1567 and G-1663 should be consolidated for purpose of hearing.

The Commission orders:

(A) The proceedings in Docket Nos. G-1567 and G-1663 be and they hereby are consolidated for purpose of hearing.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, as amended, and the Commission's rules of practice and procedure, a hearing be held on July 17, 1951, at 9:30 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(C) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

[Docket No. G-1618]

NORTHERN NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

JULY 2, 1951.

On February 21, 1951, Northern Natural Gas Company (Applicant) filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing the construction and operation of additional natural-gas transmission pipeline facilities estimated to cost $33,095,000 and designed to increase Applicant's system delivery capacity from 600,000 to 825,000 Mcf of natural gas per day, subject to the jurisdiction of the Commission, as described in the application and the supplements thereto on file with the Commission and open to public inspection, and in the notice of application published in the FEDERAL REGISTER on March 8, 1951 (16 F. R. 2169-2170).

The application as filed was incomplete, and as a result the Commission, by letter dated March 23, 1951, requested that Applicant file certain additional data and information to supplement the application. In response, Applicant filed on April 30 and May 7, 1951, its first and second supplements to the original application. On April 30, 1951, Applicant requested that this matter be set for hearing and that a certificate be granted at the earliest possible time.

Analysis by our Staff of the April 30 and May 7, 1951, supplements and the data filed therewith disclosed apparent deficiencies in the application and a necessity for a thorough investigation of these deficiencies, principally, in Applicant's gas-supply presentation. Due to the magnitude and complexity of the problems presented by Applicant's project and the inadequate supporting data submitted, it is not expected that a proper investigation, which we have instructed our Staff to make as promptly as possible, can be completed before September 1951. Applicant has heretofore been advised informally of this situation, and accordingly, that it was unlikely that the application could be scheduled for hearing, as required by statute, before that time.

The Commission finds: It is appropriate in carrying out the provisions of the said act that the aforesaid application filed on February 21, 1951, as supplemented, be set for hearing as hereinafter provided and ordered.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, as amended, and the Commission's rules of practice and procedure, a hearing be held commencing on September 17, 1951, at 10:00 a. m. e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by aforesaid application filed on February 21, 1951, as supplemented, in this proceeding.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: July 3, 1951.

[Docket Nos. G-1693, G-1473, G-1649, G-1727]

TEXAS EASTERN TRANSMISSION CORP. ET AL.

ORDER FIXING DATE OF HEARING AND CONSOLIDATING PROCEEDINGS

In the matters of Texas Eastern Transmission Corporation, Docket No. G-1693; Alabama-Tennessee Natural Gas Company, Docket No. G-1473; Tennessee Gas Company, Docket No. G-1649; Shippensburg Gas Company, Docket No. G-1727.

Shippensburg Gas Company, a Pennsylvania corporation with its principal place of business at Shippensburg, Pennsylvania, filed on June 25, 1951, an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act authorizing the construction and operation of approximately 67,600 feet of 6-inch natural gas transmission pipeline extending from a point on the interstate natural gas pipeline of Texas Eastern Transmission Corporation to Shippensburg's present manufactured gas distribution system in the town of Shippensburg, Pennsylvania. Applicant proposes to purchase up to 376 Mcf of natural gas per day from Texas Eastern and to transport such gas through the proposed facilities for distribution in the Town of Shippensburg. Shippensburg stated in its application that Texas Eastern had proposed by its application in Docket No. G-1693 to sell up to 376 Mcf of natural gas per day to it.

On June 27, 1951, the Commission issued an order fixing date of hearing and consolidating the proceedings in Docket Nos. G-1693, G-1473 and G-1647. The application in Docket No. G-1727 should be consolidated with the foregoing dockets and set for hearing at the time and place previously designated for hearing of the foregoing dockets in order to expedite the disposition of the case and save duplication of hearings.

The Commission finds: Orderly procedure requires that the proceedings in Docket Nos G-1693, G-1473, G-1649 and G-1727 be consolidated for purpose of hearing and be heard at the time previously set for the hearing of the first three of the foregoing Dockets.

The Commission orders:

(A) The proceedings in Dockets Nos. G-1693, G-1473, and G-1649, and G-1727 be and they are hereby consolidated for purpose of hearing.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held commencing on July 24, 1951, at 10:00 a. m. e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such applications.

(c) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: July 3, 1951.

[Rev. S. O. 562, King's I. C. C. Order 50]

CHESAPEAKE AND OHIO RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Homer C. King, Agent, certain railroad carriers operating in Norfolk, Virginia, because of congestion, are unable to dump all cars of coal routed over their lines at their pier facilities at Norfolk, Virginia. It is ordered, that:

(a) *Rerouting of traffic.* The Chesapeake and Ohio Railroad Company is hereby authorized and directed to reroute or divert to the Norfolk and Western Railway Company for dumping at Norfolk and Western piers, Norfolk, Virginia, via the Norfolk and Portsmouth Belt Line Railroad Company and The Virginian Railway Company, the number of cars of coal which the Norfolk and Western Railway Company will accept and dump for the C & O account. Billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad named, desiring to divert or reroute traffic over the line or lines of another carrier under this order, shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2464]

NEW ENGLAND GAS AND ELECTRIC ASSN. AND NEW HAMPSHIRE ELECTRIC CO.

SUPPLEMENTAL ORDER RELEASING JURISDICTION OVER FEES AND EXPENSES

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 2d day of July A. D. 1951.

New England Gas and Electric Association ("Negea"), a registered holding company, and one of its subsidiaries, New Hampshire Electric Company ("New Hampshire"), having filed an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("the act") proposing, among other things, (a) the sale by Negea of its holdings of all of the preferred stock of New Hampshire pursuant to the competitive bidding requirements of Rule U-50 and (b) an offer to Negea's common shareholders of a portion of New Hampshire's outstanding common stock and the sale to underwriters, also pursuant to the competitive bidding requirements of Rule U-50, of the balance of New Hampshire's common stock, including the shares not subscribed for by Negea's shareholders, the bid to set the offering price to Negea's shareholders; and

The Commission by its order dated March 6, 1951, having granted the application and permitted the declaration to become effective, and said order having contained a reservation of jurisdiction over fees and expenses to be incurred in connection with the proposed transactions; and

The applicants-declarants having notified the Commission that no bids were received pursuant to the invitation for proposals to purchase the preferred and common stocks of New Hampshire; and having filed a further amendment to the application-declaration stating that the fees and expenses applicable to the proposed transactions are to be paid by Negea and amount to $31,000 including legal fees in the amount of $2,147.50 payable to Burns, Blake & Rich, counsel for Negea; legal fees in the amount of $1,535 payable to W. A. Hill, general counsel for New Hampshire; legal fees in the amount of $5,275 payable to Palmer Dodge Gardner Bickford & Bradford, counsel designated by Negea to represent the prospective underwriters; and a fee of $6,400 payable to Old Colony Trust Company of Boston, as warrant agent for the common stock of New Hampshire; and

The Commission having examined said amendment and having considered the fees and expenses specified therein and having concluded that said fees and expenses are not unreasonable;

It is ordered, That the jurisdiction heretofore reserved herein with respect to fees and expenses, be and the same hereby is, released.

By the Commission.

CINCINNATI STOCK EXCHANGE

NOTICE OF PROPOSAL TO DECLARE EFFECTIVE A PLAN FILED FOR DISPOSAL OF CERTAIN DOCUMENTS

Notice is hereby given that the Securities and Exchange Commission has under consideration a plan filed on June 20, 1951, by the Cincinnati Stock Exchange pursuant to (§ 240.17a-6) (Rule X-17A-6) under the Securities Exchange Act of 1934, for disposal of the following material which has been on file with that Exchange for more than five years under the stated sections of the act or the rules and regulations thereunder:

(1) Forms 1-J, 15-AN, and An-4 filed pursuant to section 12.

(2) Reports filed pursuant to section 13, except reports on Form 8-K reporting other than quarterly sales.

(3) Documents and reports filed pursuant to sections 14 and 16.

The Cincinnati Stock Exchange proposes to commence the disposition of the specified material in October 1951. The plan also contemplates that thereafter, in October of each year, regular disposition will be made of similar material which has been on file more than five years. Information contained in the material proposed to be disposed of is on file with the Commission where it will continue to be available.

The Securities and Exchange Commission proposes to declare the plan of the Cincinnati Stock Exchange effective on condition that if at any time it appears to the Commission necessary or appropriate in the public interest or for the protection of investors so to do, the Commission may suspend or terminate the effectiveness of said plan by sending at least ten days' written notice to the Exchange.

These proposals are made pursuant to the provisions of the Securities Exchange Act of 1934, particularly sections 17 (a), 23 (a) and 24 (b) thereof and Rule X-17A-6 thereunder. All interested persons are invited to submit their views and comments in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before July 17, 1951.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

HAMBURGER & CO.'S BANKIERSKANTOOR, N. V.

In re: Accounts maintained in the name of Hamburger & Co.'s Bankierskantoor, N. V., Amsterdam, The Netherlands, and owned by persons whose names are unknown. F-28-28215-E-1.

Under the authority of the Trading With the Enemy Act, as amended, Executive Orders 9193, as amended, 9788 and 9989, and pursuant to law, after investigation, it is hereby found:

1. That the property described as follows: All property, rights and interests in the accounts identified in Exhibit A set forth below and by reference made a part hereof, together with

(a) Any other property, rights and interests which represent accumulations or accruals to, changes in form of, or substitutions for, any of the property, rights and interests in said identified accounts on October 2, 1950, and which are now held in other accounts being maintained as blocked or otherwise subject to the restrictions of Executive Order 8389, as amended, or regulations, rulings, orders or instructions issued thereunder, and

(b) Any and all rights in, to and under any securities (including, without limitation, bonds, coupons, mortgage participation certificates, shares of stock, scrip and warrants) and any and all declared and unpaid dividends on any shares of stock in any of said accounts,

excepting from the foregoing, however, all lawful liens and setoffs of the respective institutions in the United States with whom the aforesaid accounts are maintained,

is property within the United States;

2. That the property described in subparagraph 1 hereof is owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or is evidence of ownership or control by persons, names unknown, who, if individuals, there is reasonable cause to believe are residents of a designated enemy country and which, if partnerships, associations, corporations, or other organizations, there is reasonable cause to believe are organized under the laws of a designated enemy country or on or since the effective date of Executive Order 8389, as amended, have had their principal places of business in a designated enemy country;

3. That the persons referred to in subparagraph 2 hereof are nationals of a designated enemy country;

and it is hereby determined:

4. That to the extent that the persons referred to in subparagraph 2 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country.

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended, and the term "designated enemy country" has reference to Germany or Japan.

JOHANNA BRUNNER ET AL.

In re: Rights of Johanna Brunner et al., under insurance contract. File No. F-28-101-H-2.

Vesting Order No. 13371 dated June 9, 1949, is hereby amended to read as follows:

Under the authority of the Trading With the Enemy Act, as amended, Executive Order 9193, as amended, and Executive Order 9788, and pursuant to law, after investigation, it is hereby found:

1. That Johanna Brunner, Guenther Brunner and Hans Brunner, whose last known address is Germany, are residents of Germany and nationals of a designated enemy country (Germany);

2. That the net proceeds due or to become due under a contract of insurance evidenced by policy No. 423808, issued by The Guardian Life Insurance Company of America, New York, New York, to Max J. Brunner, together with the right to demand, receive and collect said net proceeds, is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

3. That to the extent that the persons named in subparagraph 1 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 2, 1951.

For the Attorney General.

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of or owing to, or which is evidence of ownership or control by the persons referred to in subparagraph 6 hereof, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

12. That to the extent that the persons referred to in subparagraphs 3, 4, 5 and 6 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 2, 1951.

For the Attorney General.

TITLE 6—AGRICULTURAL CREDIT

Chapter III—Farmers Home Administration, Department of Agriculture

Subchapter A—Farm Housing Loans and Grants

PART 302—APPLICANTS

SUBPART A—CRITERIA FOR SELECTION

REQUIREMENTS AND LIMITATIONS

1. Section 302.2 (a), Title 6, Code of Federal Regulations (14 F. R. 6546) is amended so that subparagraph (1) is revised and subparagraphs (10), (11), and (12) are added, to provide for purchase contract holders qualifying as home owners for the purposes of the Farm Housing program, to exclude homestead entrymen from qualifying for assistance prior to receiving patents on their farms, and to acquire adequate and appropriate farm planning by the borrower. The amended portions and the additional portions of said section read as follows:

§ 302.2 *Requirements* (a) *General requirements.* • • •

(1) Be an owner of a farm as defined in § 301.1 (c) of this chapter.

(i) Subject to conditions varying by States, purchase contract holders may qualify as owners of farms for the purposes of the Farm Housing program. The State Director, with the advice of the representative of the Office of the Solicitor, will issue regulations prescribing the conditions under which purchase contract holders may qualify for Farm Housing loans.

(ii) Homestead entrymen prior to a patent on their farms will not qualify for Farm Housing loans.

• • • • •

(10) Plan to provide housing or other farm building improvements that are not in excess of those ecomonically essential to the operation of the farm.

(11) Plan to provide housing or other farm buildings that will not be considered excessive when compared with similar accommodations in the community that provide decent, safe, and sanitary farm housing and adequate farm buildings.

(12) Produce or plan to produce crops and livestock that can be produced successfully in the community.

2. Section 302.4, Title 6, Code of Federal Regulations (14 F. R. 6546) is amended so that paragraph (b) is revised to stipulate the restrictions on the eligibility of employees and former employees of the Farmers Home Administration to receive Farm Housing assistance and so that paragraphs (c) and (d) are added to provide the conditions under which joint owners of farms may qualify for Farm Housing assistance and Farm Housing loans may be made to Farm Ownership borrowers. The amended portions and the additional portions of said section read as follows:

§ 302.4 *Limitations.* • • •

(b) An employee of the Farmers Home Administration (including County Committeemen) will not be approved for Farm Housing assistance. Nor will Farm Housing assistance be approved to such an employee within one year after his resignation or retirement unless such assistance is authorized by the Administrator. The Administrator may, upon receipt of a request and justification from the State Director, waive the restriction against approval of Farm Housing assistance to a former employee within one year after his resignation or retirement: *Provided*, That:

(1) Failure to authorize Farm Housing assistance in such a case would cause hardship to the applicant, and

(2) The applicant's former employment with the Farmers Home Administration will not result in special consideration for his application.

(c) Where a farm is owned by more than one person, such joint owners may qualify for a Farm Housing loan provided that all of them together are without sufficient resources to finance the necessary improvements on their own account and are unable to obtain the necessary credit from other sources upon terms and conditions which they would reasonably be expected to fulfill. In such a case all the joint owners will be required to execute the Farm Housing mortgage so that their interests in the farm will be subjected to the mortgage lien. If the foregoing conditions are fulfilled, a loan may be made to one or more of the joint owners provided that each applicant, as distinguished from the owners who would merely execute the mortgage, is otherwise qualified for the loan.

(d) No Farm Housing loan will be made to an applicant who is obtaining a Farm Ownership loan. No Farm Housing loan will be made to an applicant who is already a Farm Ownership borrower unless an exception is authorized by the Administrator in accordance with this paragraph. In an exceptional case, where a Farm Ownership borrower has had his loan for several years and due to circumstances beyond his control he needs additional funds for essential building improvements that cannot be met with a subsequent Farm Ownership loan, the Administrator may authorize a Farm Housing loan upon request of the State Director. Each request for authority to approve a Farm Housing loan to a Farm Ownership borrower must include complete facts regarding the case, as well as an adequate justification by the State Director. Before authorizing a Farm Housing loan to a Farm Ownership borrower, it must be clearly established that:

(1) The Building improvements proposed by the Farm Ownership borrower are essential to the efficient operation of his farm.

(2) The building credit needs of the applicant cannot be met with a subsequent Farm Ownership loan.

(3) The borrower has the debt-paying ability to repay the proposed Farm Housing loan in addition to his existing indebtedness.

(4) The unpaid balance of the Farm Ownership loan plus the amount of the proposed Farm Housing loan does not exceed the normal market value of the farm or the "average value" for the county, whichever is the lesser.

DERIVATION: §§ 302.2 and 302.4 contained in FHA Instruction 411.11.

PART 306—FARM HOUSING ASSISTANCE FOR CERTAIN RESTRICTED INDIANS

LOANS AND GRANTS

Subchapter A, Title 6, Code of Federal Regulations (14 F. R. 6544) is amended to add Part 306 to provide for extending Farm Housing assistance to certain restricted Indians. Part 306 reads as follows:

SUBPART A—GENERAL

Sec.	
306.1	General.
306.2	Definition of the term "Indian".

SUBPART B—LOAN AND GRANT PROCESSING

306.21	Making Farm Housing loans and grants to Indians.
306.22	Applications.
306.23	Docket development.
306.24	Action by the Office of the Solicitor preparatory to loan closing.
306.25	Loan closing.

SUBPART C—SERVICING

Sec.
306.31 Servicing Farm Housing loans and grants.

AUTHORITY: §§ 306.1 to 306.31 issued under sec. 510, 63 Stat. 438; 42 U. S. C. 1480. Interpret or apply secs. 501, 502, 503, 504, 63 Stat. 432, 433, 434; 42 U. S. C. 1471, 1472, 1473, 1474.

DERIVATION: §§ 306.1 to 306.31 contained in the order of the Administrator dated June 22, 1951.

SUBPART A—GENERAL

§ 306.1 *General.* (a) This part prescribes the procedure to be followed in extending Farm Housing assistance to certain restricted Indians.

(b) Individual unrestricted Indians who hold their land under fee patents or unrestricted deeds will be considered for Farm Housing assistance on the same basis as any other applicant.

(c) Farm Housing loans or grants may not be made to individual Indians who have been assigned land in tribal ownership or to Indian tribes.

§ 306.2 *Definition of the term "Indian."* The term "Indian" as used hereafter in this part means an individual Indian who holds land in severalty under a trust patent or patent or deed containing restrictions against alienation, whether acquired by allotment or purchase.

SUBPART B—LOAN AND GRANT PROCESSING

§ 306.21 *Making Farm Housing loans and grants to Indians.* Existing Farm Housing regulations pertaining to the processing of loans and grants will be complied with except as provided in this subpart.

§ 306.22 *Applications.* If, after reviewing the information contained in Form FHA–443, "Application for Farm Housing Assistance," received from an Indian, the County Committee determines that there is likelihood that the Indian applicant may qualify for Farm Housing assistance, the County Supervisor will request the Area Director of the Bureau of Indian Affairs to furnish the following information regarding the applicant for further consideration by the County Committee:

(a) A statement concerning the applicant's work habits, credit rating, farming experience, managerial ability, and any other similar information that is pertinent to consideration of the application.

(b) A statement of any known health problems of the applicant and his family.

(c) A reference to the statute under which the applicant holds title to his land.

(d) A reference to the statute which authorizes the Secretary of the Interior to approve the Farmers Home Administration mortgage on the farm of the applicant.

(e) A copy of the legal description of the farm.

(f) A copy of any existing lien and, if available, a statement of the amount of the outstanding balance of the lien.

(g) A statement as to whether or not the land held by the applicant is taxable.

(h) A statement as to whether the applicant receives any compensation from the Agency.

(i) A statement as to whether the applicant has exclusive control of his own funds or whether any of his funds are subject to control by the Bureau of Indian Affairs and in the latter instance, a complete report on such funds, together with a statement as to whether any such funds, including grant funds, may be released and used by the applicant for payment on the proposed Farm Housing loan.

(j) A statement regarding the applicant's financial condition to the extent that such information is known by the Reservation Superintendent.

(k) A commitment by the Department of the Interior that the Farm Housing mortgage will be approved provided the Indian's application for a Farm Housing loan is approved by the Farmers Home Administration.

§ 306.23 *Docket development.* If a commitment to approve any Farm Housing mortgage of the applicant is made by the Department of the Interior and the County Committee recommends on Form FHA–439, "County Committee Recommendations," that Farm Housing assistance may be extended to the Indian applicant, the loan or grant docket will be developed and processed in accordance with §§ 305.1 to 305.6 of this subchapter except as follows:

(a) *Supplementary attachments to Form FHA–443A, "Report on Farm Housing Applications."* The information furnished by the Bureau of Indian Affairs regarding the Indian applicant as provided in § 306.22 will be included in the attachments to Form FHA–443A.

(b) *Docket identification.* Each loan or grant docket will be identified by entering the words "Restricted Indian" in the "Race" block of Form FHA–444, "Farm Housing Fund Analysis," and in the "Farm Housing" block of Form FHA–476, "Transmittal and Flow Sheet."

(c) *Title evidence.* When an Indian applicant's title is recorded solely in the records of the United States Department of the Interior, the Indian applicant will be required to furnish a certificate by an authorized officer of the Department of the Interior showing the nature and condition of the applicant's title as disclosed by the official records of the Department of the Interior. When an Indian applicant's title is recorded in the local county records, he will be required to furnish the same type of title evidence as any other Farm Housing applicant.

§ 306.24 *Action by the Office of the Solicitor preparatory to loan closing—*(a) *Addition to mortgage form of certificate of approval by Department of the Interior.* When preparing closing instructions the representative of the Office of the Solicitor will insert at the end of the mortgage, after the form provided for acknowledgment of the borrower's signature, the following statement to be filled out and signed on behalf of the Secretary of the Interior by a duly authorized Area Director of the Bureau of Indian Affairs.

CERTIFICATE OF APPROVAL

Pursuant to the act of ---------- and authority delegated to the Commissioner of Indian Affairs by Order 2508 of the Secretary of the Interior, dated ---------- (---- Federal Register ----) and to the Area Directors by Order ------ dated ---------- (---- Federal Register ----), the foregoing mortgage is hereby approved on behalf of the Secretary of the Interior.

---------- ----------
Area Director, Bureau of Indian Affairs, United States Department of the Interior.

---------- ----------
Date Name Typed

The representative of the Office of the Solicitor also will add immediately after the foregoing form of certificate an appropriate form of acknowledgement for execution by a notary public or other duly authorized official.

(b) At the time closing instructions are sent to the County Supervisor, the representative of the Office of the Solicitor will mail the original unexecuted mortgage to the Area Director of the Bureau of Indian Affairs with a request to execute, with proper acknowledgment, the aforementioned certificate of approval and forward the mortgage to the County Supervisor. The representative of the Office of the Solicitor will include the County Supervisor's name and address in his communication to the Area Director.

§ 306.25 *Loan closing.* (a) The County Supervisor will not close the loan until the original mortgage with properly executed and acknowledged certificate of approval is received from the Area Director of the Bureau of Indian Affairs, and no funds will be disbursed from the borrower's supervised bank account until the mortgagee is fully executed and filed for record.

(b) When the mortgage is recorded and the County Supervisor conforms the usual copy of the mortgage with the original, he will include conformance of the certificate of approval.

(c) When repayment of a Farm Housing loan to an Indian is dependent in whole or in part upon income he will receive from trust property, the County Supervisor may at any time request the Indian to execute the Department of the Interior, Office of Indian Affairs, Form 5–845, "Assignment of Income From Trust Property," in favor of the Farmers Home Administration. Ordinarily, this form should be executed prior to or at the time of loan closing. Copies of this form will be made available to the County Supervisor by the Reservation Superintendent upon request. When this form is used by an Indian receiving a Farm Housing loan, the County Supervisor will modify the form as follows:

(1) For each case, in the first paragraph, line 3, between the words "loan" and "all," add the following: "--------percent (--------%) of"

(2) For each case in which the trust property includes property other than land, the following additional changes will be made:

(i) In the first paragraph, line 4, strike the word "land" and insert "property."

(ii) In the second paragraph, line 2, strike the word "land" and insert "property."

(iii) In the fourth paragraph, line 2, strike the words "lands are" and insert "property is."

SUBPART C—SERVICING

§ 306.31 *Servicing Farm Housing loans and grants.* Farm Housing loans and grants made to Indians in accordance with the provisions of this part will be serviced in accordance with existing Farm Housing regulations. The County Supervisor will make collections and be responsible for all other servicing actions. However, the County Supervisor may request the Bureau of Indian Affairs to give assistance in servicing these Indian loans, including seizure or repossession of land given as security for the loan.

TITLE 7—AGRICULTURE

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 986—HANDLING OF HOPS GROWN IN OREGON, CALIFORNIA, WASHINGTON, AND IDAHO, AND OF HOP PRODUCTS PRODUCED THEREFROM IN THESE STATES

REVISED MINIMUM STANDARDS OF QUALITY

Notice of proposed rule making with respect to a change in the minimum standards of quality for hops, pursuant to the provisions of Marketing Agreement No. 107 and Order No. 86 regulating the handling of hops grown in Oregon, California, Washington, and Idaho, and of hop products produced therefrom in these States (7 CFR Part 986), effective pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), was published in the FEDERAL REGISTER of May 8, 1951 (16 F. R. 4257).

The Hop Control Board, the administrative agency established pursuant to the provisions of the aforesaid marketing agreement and order, at a meeting in San Francisco on July 21–22, 1950, by unanimous resolution requested action by the Secretary to change the minimum standards of quality for hops from 15 percent to 10 percent leaf and stem content. Subsequently the Board invited hop growers, dealers, and brewers to submit evidence to the Department in regard to the propriety or impropriety of revising the minimum standards. The Department received 130 notarized statements mostly from brewers, but including a few from hop dealers, favoring the change recommended by the Board. Only one communication in opposition to the recommended change was received. Evidence submitted was generally to the effect that excessive leaves and stems in hops used in production of fermented malt beverages impart a harsh or bitter flavor to such beverages and are therefore unacceptable to brewers; that fermented malt beverages produced from such hops are unacceptable to the public; and that hops with more than 10 percent leaf and stem content in some instances have clogged valves and otherwise interfered with brewing operations making it difficult to obtain a uniform product.

A report by the Grain Branch, Production and Marketing Administration, which operates the hop inspection service, shows average leaf and stem content for the hop crops of 1946, 1947, 1948, 1949, and 1950, respectively, as follows: 6.05 percent, 6.42 percent, 5.75 percent, 3.91 percent, and 3.9 percent. For the 1949 and 1950 crops, when the marketing order was in effect, only 0.2 and 0.1 percent of the respective crops contained leaves and stems in excess of 10 percent.

During the prescribed period for filing written data, views, or arguments in regard to the proposed change in the minimum standards, four letters in respect thereto were received by the Department. Only one letter opposed issuance of the order. It was on the basis that during World War II and immediately thereafter, when there was a severe labor shortage for hand picking, hops with over 10 percent leaf and stem content had been harvested and accepted by buyers; and that in case of a recurrence of severe labor shortages, it might become difficult for growers who hand pick their hops to meet the proposed minimum standards. However, in view of the record of the last two years in respect to leaf and stem content, and since machines are now used in harvesting a large part of the crop and are generally available for custom picking, it should be possible for all growers to meet the new standards. No data or information were presented which the

Department considers adequate for changing the proposed rule. After consideration of all relevant matters it is ordered as follows:

§ 986.601 *Standards of quality for hops.* Effective on and after 12:01 a. m., P. s. t., August 1, 1951, in lieu of the initial standards and requirements which are set forth in § 986.5 (a) (2) of the marketing agreement and order regulating the handling of hops grown in Oregon, California, Washington, and Idaho, and of hop products produced therefrom in these States (7 CFR Part 986), no hops produced after that time shall be deemed merchantable or entitled to certification which contain over 10 percent by weight of leaves and stems as defined in § 986.5 (a) (1) of said marketing agreement and order, and as determined by the Federal-State inspection service.

Finding of good cause for not waiting 30 days after the execution of this order to make it effective. Good cause exists for making this order effective on August 1, 1951, in lieu of waiting 30 days after its publication in the FEDERAL REGISTER to make it effective (see section 4 (c) of the Administrative Procedure Act, 5 U. S. C. 1001 et seq.). Such date is the beginning of the next marketing season, and hops for such marketing season will not be harvested prior thereto. The changed quality standards should apply to all hops which are harvested during such marketing season. Interested parties have, for some time, been aware of the fact that this action was contemplated, since the matter was discussed and recommended at a meeting of the Hop Control Board which was held on July 21–22, 1950, and notice of proposed rule making was published in the FEDERAL REGISTER on May 8, 1951. In addition, the period from the date of the publication of this order in the FEDERAL REGISTER to its effective time will be more than ample time to enable interested parties to prepare for the regulation which is prescribed in this order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c; 7 CFR 986.5)

Issued at Washington, D. C., this 6th day of July 1951.

Subchapter C—Regulations Affecting Subsidized Vessels and Operators

[General Order 74]

PART 292—PROCEDURE TO BE FOLLOWED BY OPERATORS IN THE RENDITION TO THE MARITIME ADMINISTRATION OF ANNUAL AND FINAL ACCOUNTINGS UNDER OPERATING-DIFFERENTIAL SUBSIDY AGREEMENTS

The Maritime Administration (as successor to the United States Maritime Commission), acting pursuant to the authority granted by the Merchant Marine Act, 1936, as amended, adopted the following order and the "Procedure to be followed by Operators in the Rendition to the Maritime Administration of Annual and Final Accountings under Operating-Differential Subsidy Agreements" referred to in said order and annexed thereto. It is ordered as follows:

Sec.
292.1 Annual and final accounting by operators under operating-differential subsidy agreements; procedure.
292.2 Definitions.
292.3 Accounting requirements.
292.4 "Capital necessarily employed."
292.5 Net profit.
292.6 Statements required by the Administration.
292.7 Certifications and verifications.
292.8 Statement of purposes and reservations.

AUTHORITY: §§ 292.1 to 292.8 issued under sec. 204, 49 Stat. 1987, as amended; 46 U. S. C. 1114; 15 F. R. 3178, 3 CFR, 1950 Supp.

§ 292.1 *Annual and final accountings by operators under operating-differential subsidy agreements; procedure.* Every holder of an operating-differential subsidy agreement executed with the Maritime Commission or the Federal Maritime Board shall (a) within ninety (90) days after publication of this part in the FEDERAL REGISTER, prepare and submit to the Maritime Administration, in the form and manner prescribed in §§ 292.2 to 292.8, inclusive, a separate accounting of its operations for each accounting period commencing with the resumption or commencement of its subsidized operations on or after January 1, 1947 through December 31, 1950: *Provided*, That such accounting shall not be required with respect to any accounting period included in a terminated "recapture period" (as defined in § 291.5 (f) of this chapter (General Order 71 of the United States Maritime Commission)) with respect to which all accrued operating-differential subsidy was recaptured or is recapturable by the Administration: *Provided further*, That upon application of the Operator the Administration may extend, for such further period as in its judgment is warranted by the circumstances in any instance, the time limit prescribed in this section for the submission of such accountings, and (b) within one hundred and eighty (180) days after termination of each subsequent accounting period (as defined in the said annexed procedure) prepare and submit to the Maritime Administration a similar accounting for such accounting period: *Provided, however*, That upon application of the Operator the Administration may extend, for such further period as in its judgment is warranted by the circumstances in any instance, the time limit prescribed in this section for the submission of such accountings.

§ 292.2 *Definitions.* Except where the context clearly indicates otherwise, as used in this part:

(a) "Commission" or "Administration" refers to the United States of America acting by and through the Maritime Administration, as successor to the United States Maritime Commission.

(b) "Operator" refers to the holder of an Operating-Differential Subsidy Agreement with the Federal Maritime Board.

(c) "Agreement" refers to an Agreement providing for the payment of an operating-differential subsidy pursuant to Title VI or to section 708 of Title VII of the Merchant Marine Act, 1936, as amended. (References in this part to particular articles of the Agreement relate to such articles of Part II—General Provisions—of the standard form of Operating-Differential Subsidy Agreement adopted by the United States Maritime Commission on December 21, 1949.)

(d) "Uniform System of Accounts" refers to the "Uniform System of Accounts for Operating-Differential Subsidy Contractors" (1) prescribed by the United States Maritime Commission in General Order No. 22, January 1, 1938, as supplemented, with respect to accountings for periods through December 31, 1950, and (2) prescribed by the Maritime Administration in Part 282 of this chapter (General Order 22, revised October 16, 1950), with respect to accountings for periods commencing on or after January 1, 1951.

(e) "Accounting period" refers to the calendar year, or applicable portion thereof, with respect to which a separate determination of "capital necessarily employed in the business" is required to be made.

§ 292.3 *Accounting requirements*—(a) *Contract provisions.* (1) Article II-24 of the Agreement provides, among other things, that there shall be a final accounting thereunder between the Operator and the Commission as soon as practicable after the end of each calendar year and upon termination of the Agreement (whether such termination shall occur by expiration of the stated period thereof or otherwise).

(2) Article II-20 of the Agreement provides, among other things, that

(i) The Operator and every affiliate, domestic agent, subsidiary, or holding company connected with, or directly or indirectly controlling or controlled by, the Operator (*a*) shall keep its books, records, and accounts relating to the property and to the maintenance, operation, and servicing of the vessel(s), service(s), route(s), and line(s) covered by the Agreement in such form and under such rules and regulations as may be prescribed by the Commission, but the Commission shall not require the duplication of books, records, and accounts required to be kept in some other form by the Interstate Commerce Commission; and (*b*) shall file, upon notice from the Commission, balance sheets, profit and loss statements, and such other statements of financial operations, special reports, memoranda of any facts and transactions, as in the opinion of the Commission affect the financial results in, the performance of, or transactions or operations under, the Agreement. The Commission reserves the right to require that all or any of such statements, reports and memoranda shall be certified by independent certified public accountants acceptable to the Commission.

(ii) The Commission is authorized to examine and audit the books, records, and accounts of all persons referred to above in this Article whenever it may deem it necessary or desirable, including but without limitation an analysis of the surplus and all supporting accounts. The Operator agrees that any and all auditors, inspectors, attorneys, and other employees designated by the Commission, shall have full, free and complete access at all reasonable times to all vessels owned by the Operator when in port or undergoing repairs and to all books, records, papers, memoranda or other documents of the Operator wherever located or of any holding company, subsidiary company or affiliated company of the Operator pertaining to any activities relating in any way to the vessel(s), service(s), route(s), or line(s) covered by the agreement, and further agrees to permit the making of photostatic or other copies of any such books, records, papers, memoranda or other documents and to furnish without charge adequate office space and other facilities reasonably required by such auditors, inspectors, attorneys and other employees in the performance of their duties.

(b) *Annual and final accountings.* Pursuant to the applicable provisions of the Agreement, the Administration hereby requires that each Operator submit a separate accounting of its operations for each accounting period commencing with the resumption or commencement of its subsidized operations on or after January 1, 1947, including, but not limited to, the Operator's determinations of—

(1) Profits in excess of ten percentum per annum on "capital necessarily employed" which are subject to recapture by the Administration;

(2) Requirements with respect to deposits in the statutory Capital and Special Reserve Funds of the Operator;

(3) The amount, if any, of unpaid subsidy accrued with respect to operations after December 31, 1946, during the then current recapture period in excess of any amount of the recapture accrual required by law to be withheld by the Administration;

(4) The amount, if any, of subsidy payments theretofore made to the Operator with respect to operations under the Agreement after December 31, 1946, during the then current recapture period (and not previously repaid) in excess of the sum by which the cumulative amount of subsidy then estimated to have accrued to the Operator on account of such operations is greater than any amount of the then estimated recapture accrual required by law to be withheld by the Administration;

Provided, That, such accounting shall not be required with respect to any accounting period included in a terminated "recapture period" (as defined in § 291.5 (f) of this chapter (General Order 71 of the United States Maritime Commission)) with respect to which all accrued operating-differential subsidy was recaptured or is recapturable by the Administration.

The accounting comprising the statements prescribed in § 292.6 (Statements required by the Administration) shall be submitted in sextuplicate to the Administration through the local District Comptroller, or Area or Port Auditor in the district, area, or port in which the home office of the Operator is located, or (if there be no such Comptroller, or Auditor of the Administration in the district, area, or port in which the home office of the Operator is located) to the Comptroller, Maritime Administration, Washington 25, D. C. While it is preferable that the required statements be typewritten, completely legible original handwritten statements accompanied by five photostatic copies thereof (which likewise must be completely legible) will be acceptable.

(c) *Subsequent adjustments.* (1) At the time of the submission of the accounting for each accounting period as required under this part, the Operator shall determine whether adjustments during such period affecting any preceding accounting period during the then current recapture period amounted, in the net aggregate, to $100,000 or 1/10 of one percent of the net worth of the Operator as at the end of such preceding period, whichever is the lesser, and, if so, the Operator shall submit a revised accounting for such preceding accounting period: *Provided*, That, at the time of the submission of the accounting for the accounting period immediately following the end of a recapture period, the Operator shall submit also a revised accounting for the last accounting period within such preceding recapture period, including all adjustments (regardless of amount) affecting such recapture period that occurred subsequent to the completion of the accounting therefor.

(2) If, in any instance, at the time of the submission of an accounting, no such adjustment affecting any preceding accounting period during the then current recapture period has occurred subsequent to the submission of the accounting for such period, the Operator shall submit to the Administration an appropriate certification to that effect over the signature of a duly authorized officer.

§ 292.4 *"Capital necessarily employed".* (a) Article II-29 of the Agreement provides that, for the purposes thereof—

(1) "Capital necessarily employed in the business" and "capital investment necessarily employed in the operation of the subsidized vessel(s), service(s), route(s), and line(s)" shall, with respect to all annual or other accounting periods which terminated concurrently with or prior to the termination of the recapture period which was current on December 31, 1946, be determined as provided in the applicable rules and regulations as adopted and prescribed by the United States Maritime Commission in Part 286 of this chapter (General Order 31, as amended), exclusive, however, of the provisions of Part 291 of this chapter (General Order 71);

(2) With respect to all annual or other accounting periods terminating subsequent to the annual or other accounting periods mentioned in subparagraph (1) of this paragraph and in the case of contracts taking effect on or after January 1, 1947, the provisions of Part 291 of this chapter (General Order 71, as amended from time to time), defining the terms "capital necessarily employed in the business" and "capital investment necessarily employed in the operation of the subsidized vessel(s), service(s), route(s), and line(s)", shall be controlling, and the provisions of Part 286 of this chapter (General Order 31, as amended from time to time), shall be applicable only to the extent that such provisions are consistent with the provisions of Part 291 of this chapter (General Order 71, as amended from time to time).

(b) Should any change be made in the provisions of the Agreement or in Part 291 of this chapter (General Order 71), with respect to the effective date of that part, this procedure will be deemed to be automatically modified to correspond with such change.

§ 292.5 *Net profit.* Article II-29 of the Agreement provides that, for the purposes thereof, "net earnings" or "net profit" shall be determined as provided in the applicable rules and regulations adopted and prescribed by the United States Maritime Commission in Part 286 of this chapter (General Order 31, as amended from time to time).

§ 292.6 *Statements required by the Administration.* The accountings required under this part, as referred to in paragraph (b) of § 292.3, shall include the following statements (Illustrative examples of such statements, based on hypothetical figures, will be supplied by the Comptroller. The Operator may change or vary the design of any of these statements: *Provided*, That the statements substituted will produce the same results and reflect all of the information required: *And provided further*, That no substantial change or variation in the design of such statements shall be made without the prior concurrence of the local District Comptroller, or Area or Port Auditor of the Administration or, if there be no such Comptroller or auditor of the Administration in the District, area, or port in which the home office of the Operator is located, then the request for such concurrence should be addressed to the Comptroller, Maritime Administration, Washington 25, D. C. These examples have been based on the Uniform System of Accounts prescribed by the United States Maritime Commission in General Order 22, January 1, 1938, as supplemented, and are, there-

fore, applicable to accountings for periods through December 31, 1950. With respect to accountings for subsequent periods, the statements should be conformed to the Uniform System of Accounts prescribed by the Maritime Administration in Part 282 of this chapter (General Order 22, Revised October 16, 1950)):

EXHIBIT A—ANALYSIS OF ADJUSTED NET WORTH, ALLOCATION OF "CAPITAL NECESSARILY EMPLOYED", AND DISTRIBUTION OF "NET EARNINGS" FOR THE PURPOSES OF APPLYING THE RESERVE AND RECAPTURE PROVISIONS OF THE OPERATING-DIFFERENTIAL SUBSIDY AGREEMENT, AS DETERMINED IN ACCORDANCE WITH PART 286 OF THIS CHAPTER (GENERAL ORDER 31) (FOR PERIOD, IF ANY, PRIOR TO EFFECTIVE DATE OF PART 291 OF THIS CHAPTER (GENERAL ORDER 71))

The procedure for the preparation of this statement contemplates that "capital necessarily employed in the business", with respect to all annual or other accounting periods which terminated concurrently with or prior to the termination of the recapture period which was current on December 31, 1946, shall be determined as provided in the applicable rules and regulations as adopted and prescribed by the Commission in Part 286 of this chapter (General Order 31, as amended).

EXHIBIT A—ALLOCATION OF "CAPITAL NECESSARILY EMPLOYED" AND DISTRIBUTION OF "NET EARNINGS" FOR THE PURPOSES OF APPLYING THE RESERVE AND RECAPTURE PROVISIONS OF THE OPERATING-DIFFERENTIAL SUBSIDY AGREEMENT, AS DETERMINED IN ACCORDANCE WITH PART 291 OF THIS CHAPTER (GENERAL ORDER 71) AND PART 286 OF THIS CHAPTER (GENERAL ORDER 31) (FOR PERIOD AFTER EFFECTIVE DATE OF PART 291 OF THIS CHAPTER (GENERAL ORDER 71))

The procedure for the preparation of this statement contemplates that "capital necessarily employed in the business", with respect to all annual or other accounting periods terminating subsequent to the termination of the recapture period which was current on December 31, 1946 and in instances of agreements taking effect on or after January 1, 1947, shall be determined as provided in Part 291 of this chapter (General Order 71, as amended from time to time).

EXHIBIT AA—REVISED ANALYSIS OF ADJUSTED NET WORTH, ALLOCATION OF "CAPITAL NECESSARILY EMPLOYED", AND DISTRIBUTION OF "NET EARNINGS" (FOR PRECEDING YEAR) FOR THE PURPOSES OF APPLYING THE RESERVE AND RECAPTURE PROVISIONS OF THE OPERATING-DIFFERENTIAL SUBSIDY AGREEMENT, AS DETERMINED IN ACCORDANCE WITH PART 286 OF THIS CHAPTER (GENERAL ORDER 31) (FOR PERIOD, IF ANY, PRIOR TO EFFECTIVE DATE OF PART 291 OF THIS CHAPTER (GENERAL ORDER 71))

The procedure for the preparation of this statement contemplates the revision of the statement for the preceding year simultaneously with the preparation of the current year's statement to give effect to subsequent adjustments.

EXHIBIT B—COMPARATIVE BALANCE SHEET

The procedure for the preparation of this statement contemplates:

1. That for each annual or other accounting period there shall be submitted in comparative form a balance sheet as at the end of the month immediately preceding the date of the beginning of such accounting period and as at the end of the last month within such accounting period;

2. That the accounts reflected in each such balance sheet shall be those prescribed in the Uniform System of Accounts and none other; and

3. That the assets reflected in each such balance sheet shall be stated in conformity with generally accepted accounting principles applied on a consistent basis; that adequate reserves shall be shown for accounts receivable doubtful of collection and for such other items as require valuation reserves to reflect their true value; and that there shall be included an adequate statement of all known and ascertainable liabilities.

EXHIBIT C—INCOME SHEET

The procedure for the preparation of this statement contemplates:

1. That there shall be submitted income sheets which accurately reflect the results of all operations for each applicable calendar year or other accounting period;

2. That the income and expenses reflected on such income sheets shall be allocated on the bases prescribed in Part 286 of this chapter (General Order 31);

3. That the items of income and expense reflected in each such income sheet shall be those prescribed in the Uniform System of Accounts and none other; and

4. That such income sheets shall include, with respect to each applicable calendar year or other accounting period, distribution of any "additional charter hire" accrued to the Administration in instances where the operations of the Operator include vessels chartered from the Commission under bareboat charters entered into pursuant to Title VII of the Merchant Marine Act, 1936, as amended, or Section 5 of the Merchant Ship Sales Act of 1946, or under the form of agreement known as "Warshipdemiseout 203".

EXHIBIT D—STATEMENT OF OPERATING-DIFFERENTIAL SUBSIDY ACCRUED DURING THE PERIOD

There shall be submitted for each calendar year or other accounting period with respect to which a separate income sheet is required hereunder a statement reflecting the accrual of operating-differential subsidy (in such detail as is reflected in the illustrative example included among those to be supplied by the Comptroller): *Provided*, That, until final operating-differential subsidy rates are established, the submission of this statement may be postponed upon the understanding that when, at that time, revised accountings are submitted they will be accompanied by this statement.

EXHIBIT E—WORKING TRIAL BALANCE

The procedure for the preparation of this statement contemplates:

1. That there shall be prepared a working trial balance as at each date with respect to which a separate balance sheet is required hereunder;

2. That the balances reflected in the general ledger at the respective dates shall be listed by accounts and distributed to the appropriate columns provided therefor in the illustrative example included among those to be supplied by the Comptroller;

3. That the Operator shall determine that all items included in each asset and liability account have been properly classified and adjusted, that the balances are correct, and do not contain items of income or expense applicable to either a prior or current accounting period (Schedules reflecting the extent of the analysis of such accounts shall be included among the working papers available for examination by the Administration's auditors);

4. That the Operator shall determine that the items included in each income and expense account have been properly classified and adjusted, that the balances are correct, and that such balances are entirely applicable to the accounting period involved (Schedules reflecting the extent of the analysis of such accounts shall be included among the working papers available for examination by the Administration's auditors);

5. That the Operator shall determine that proper accounting disposition has been made of the balance in each clearance account; and

6. That all adjustments to the accounts listed in the working trial balance shall be accomplished by posting thereto journal entries, prepared in numerical sequence and containing a complete description as to the reasons for the adjustment, copies of such journal entries to be made available to the Administration upon request.

SCHEDULES A–1 THROUGH A–8—SUPPORTING DETAILS OF "CAPITAL NECESSARILY EMPLOYED"

These schedules (as illustrated in the examples included among those to be supplied by the Comptroller) shall reflect the detailed calculation in support of each item distributed as "capital necessarily employed" on Exhibit A—Allocation of "Capital Necessarily Employed" and Distribution of "Net Earnings" for the Purposes of Applying the Reserve and Recapture Provisions of the Operating-Differential Subsidy Agreement, as Determined in Accordance with Part 291 of this chapter (General Order 71) and Part 286 of this chapter (General Order 31).

SCHEDULE B–1—ANALYSIS OF SURPLUS

The procedure for the preparation of this statement contemplates:

1. That there shall be submitted an analysis of surplus in support of each balance sheet required hereunder; and

2. That such analysis, in support of the beginning balance sheet, shall reflect

(i) Surplus as per books and general financial statements (as submitted by the Operator to the Administration) at the end of the year preceding the resumption of subsidized operations of the Operator;

(ii) Net profit (or loss) during the ensuing calendar year;

(iii) Direct adjustments to surplus during such period; and

(iv) The balance as at the end of such period.

SCHEDULE B–1–a—REVISED ANALYSIS OF SURPLUS (FOR PRECEDING YEAR)

The procedure for the preparation of this statement contemplates the revision of the statement for the preceding year simultaneously with the preparation of the current year's statement to give effect to subsequent adjustments, if a revised accounting is required pursuant to subparagraph (1) of paragraph (c) of § 292.3.

SCHEDULE C–I—ANALYSIS OF PROFIT AND LOSS

The procedure for the preparation of this statement contemplates:

1. That there shall be submitted in support of each working trial balance required hereunder an analysis of profit and loss for the calendar year or other accounting period involved and that such analysis shall be grouped by accounts in the manner indicated in the illustrative example included among those to be supplied by the Comptroller;

2. That such analysis shall include all adjustments effected by the Operator and, as part of the working trial balance, shall be the basis upon which the Income Sheet (Exhibit C) is prepared; and

3. That all items of income and expense reflected in the analysis of profit and loss shall be those prescribed in the Uniform System of Accounts and none other.

SCHEDULE D–1—REVISED STATEMENT OF OPERATING-DIFFERENTIAL SUBSIDY ACCRUED (FOR PRECEDING CALENDAR YEAR REFLECTING ADJUSTMENTS EFFECTED DURING THE CURRENT CALENDAR YEAR)

The procedure for the preparation of this statement contemplates the revision of the

statement for the preceding year simultaneously with the preparation of the current year's statement to give effect to subsequent adjustments.

APPENDIX A—STATUTORY RESERVE FUND REQUIREMENTS AND DEPOSITS WITH RESPECT THERETO

The procedure for the preparation of this statement contemplates that it will reflect cumulatively, as at the end of each accounting period, the amounts required by statute to be deposited in the Operator's statutory reserve funds or voluntarily deposited therein by the Operator upon authorization of the Administration and the dates on which the deposits so required or authorized were actually made into the statutory reserve funds. In the statement for the first accounting period with respect to which an accounting is required to be submitted hereunder, the totals as at the end of the month during which the last subsidized voyage terminated preceding suspension of subsidized operations due to World War II may be brought forward and the detail may be limited to requirements, authorizations, and deposits for the succeeding period through the end of the particular accounting period with respect to which such statement is submitted. In statements for subsequent accounting periods, the totals as at the end of the preceding accounting period may be brought forward and the detail may be limited to requirements, authorizations, and deposits for the particular accounting period with respect to which such statement is submitted.

§ 292.7 *Certifications and verifications.* (a) The accounting required under this part shall be submitted under cover of an affidavit, executed by the corporate officer responsible for the accuracy and maintenance of the books of account and financial records of the Operator, if a corporation, or by a general partner so responsible if a partnership, which affidavit shall be substantially as follows:

(b) Pursuant to the right reserved unto it under Article II–20 of the Agreement, the Administration hereby requires that, commencing with those for the calendar year 1950, all of the statements comprising the accountings required under this part shall be certified by independent certified public accountants and that:

(1) Such certified public accountants must be independent in fact (An accountant will not be considered independent with respect to any person in whom he has any substantial interest, direct or indirect, or with whom he is, or was during the period of the Agreement involved, connected as an officer, director, executive, or employee. As used in this subparagraph, the term "any person" shall include the Operator, and any holding company, subsidiary, affiliate, or associate of the Operator);

(2) Such certified public accountants must undertake to make their working papers available (in the offices of the Operator) for examination by the Administration's auditors upon request and to permit the Administration's auditors to make copies of such papers to the extent they deem necessary; and

(3) The statements submitted must be accompanied, in addition to the affidavit required of the Operator, by a signed opinion of the independent certified public accountant in the following or substantially similar form:

We [I] have examined the statements comprising the accounting annexed hereto, and have found the statements to have been prepared by the Operator in accordance with the terms and conditions of the Operating-Differential Subsidy Agreement, dated _____, and with the applicable orders, rules, regulations, and instructions issued or adopted by the Maritime Administration. Our [my] examination of the statements included examination of the underlying books of account and records for the period from _____ to _____.

Our [my] examination was made in accordance with generally accepted auditing standards and included all procedures which we [I] considered necessary in the circumstances [state exceptions if any]. In our [my] opinion the annexed statements fairly present the proper determinations of the "capital necessarily employed in the business" of the subsidized vessels and services incident thereto, the amounts of the deposits required to be made in the Capital Reserve Fund and in the Special Reserve Fund, and the amount of excess profits subject to recapture by the Maritime Administration, pursuant to the provisions of the Operating-Differential Subsidy Agreement for the period from _____ to _____.

_____
(Independent Certified Public Accountant[s])

Upon receipt of statements certified by an independent certified public accountant or a firm of independent certified public accountants under the conditions prescribed in this paragraph (b) (whether for the periods commencing with the calendar year 1950, as required, or for periods prior thereto, as the Operator may elect) the Administration will take into consideration the scope of the audit conducted by such independent certified public accountants of the Operator's accounts.

§ 292.8 *Statement of purposes and reservations.* (a) The purpose of the procedure in this part is to establish the means for uniform application to expedite and facilitate the rendition by operators to the Administration of annual and final accountings under an Operating-Differential Subsidy Agreement.

(b) The receipt and consideration of such accountings by the Administration shall be subject to the following reservations:

(1) That all working papers (irrespective of by whom prepared) in support of the various statements comprising such accountings, shall be available for examination by the Administration's auditors upon request and that the Administration's auditors shall be permitted to make copies of such papers to the extent they deem necessary;

(2) That the Administration reserves the right to conduct such audits, examinations, or checks of the Operators' accounts as it may deem necessary before approving the accounting involved;

(3) That the examples to be supplied by the Comptroller of the statements required by the Administration are for illustrative purposes only and are based on hypothetical figures; that no implications should be drawn from the relative magnitude of the figures used in these examples; and that if, in any instance, an example should conflict with the text of the procedure in this part, the latter shall govern;

(4) That the establishment of the procedure in this part (including the illustrative examples referred to therein) is without prejudice to the right of the Administration to determine upon the employment of other bases for allocation and calculation in any instance where, upon the completion of any annual or final accounting, the application of the bases prescribed herein does not, in the judgment of the Administration, produce fair and reasonable results; and

(5) That nothing contained in this part shall be construed as a waiver of any right reserved to the Administration by statute or under the Agreement.

E. L. COCHRANE,
Maritime Administrator.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Internal Revenue

[26 CFR Part 29]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941

NOTICE OF PROPOSED RULE MAKING

Income tax regulations amended to conform to the Revenue Act of 1950 (Public Law 814, 81st Congress).

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 62 and 3791 of the Internal Revenue Code (53 Stat. 32, 467; 26 U. S. C. 62, 3791) and pursuant to the provisions of Public Law 814, 81st Congress, approved September 23, 1950.

[SEAL] GEO. J. SCHOENEMAN,
Commissioner of Internal Revenue.

In order to conform Regulations 111 (26 CFR Part 29) to section 203, relating to treatment of bond premium in case of dealers in tax-exempt securities, and section 217, relating to amortization of premium on convertible bonds, of the Revenue Act of 1950, 81st Congress, 2d Session, approved September 23, 1950, such regulations are hereby amended as follows:

PARAGRAPH 1. There is inserted immediately after § 29.22 (n)–1, as added by Treasury Decision 5425, approved December 29, 1944, the following:

SEC. 203. TREATMENT OF BOND PREMIUM IN CASE OF DEALERS IN TAX-EXEMPT SECURITIES (REVENUE ACT OF 1950, APPROVED SEPTEMBER 23, 1950).

(a) *Amendment of section 22.* Section 22 is hereby amended by adding at the end thereof the following new subsection:

(o) *Dealers in tax-exempt securities*—(1) *Adjustment for bond premium.* In computing the gross income of a taxpayer who holds during the taxable year a short-term municipal bond (as defined in paragraph (2) (A)) primarily for sale to customers in the ordinary course of his trade or business—

(A) If the gross income of the taxpayer from such trade or business is computed by the use of inventories and his inventories are valued on any basis other than cost, the cost of securities sold (as defined in paragraph (2) (B)) during such year shall be reduced by an amount equal to the amortizable bond premium that would be disallowed as a deduction for such year pursuant to section 125 (a) (2) if the definition in section 125 (d) of the term "bond" did not exclude such short-term municipal bond; or

(B) If the gross income of the taxpayer from such trade or business is computed without the use of inventories, or by use of inventories valued at cost, and the short-term municipal bond is sold or otherwise disposed of during such year, the adjusted basis (computed without regard to this subparagraph) of the short-term municipal bond shall be reduced by the amount of the adjustment that would be required under section 113 (b) (1) (H) if the definition in section 125 (d) of the term "bond" did not exclude such short-term municipal bond.

(2) *Definitions.* For the purposes of paragraph (1)—

(A) The term "short-term municipal bond" means any obligation issued by a government or political subdivision thereof if the interest on such obligation is excludible from gross income; but such term does not include such an obligation if (i) it is sold or otherwise disposed of by the taxpayer within thirty days after the date of its acquisition by him, or (ii) its earliest maturity or call date is a date more than five years from the date on which it was acquired by the taxpayer.

(B) The term "cost of securities sold" means the amount ascertained by subtracting the inventory value of the closing inventory of a taxable year from the sum of (i) the inventory value of the opening inventory for such year and (ii) and cost of securities and other property purchased during such year which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year.

* * * * *

(c) *Effective date.*. The amendments made by this section shall be applicable to taxable years ending after June 30, 1950, but in the case of a taxable year beginning before and ending after such date the amendments shall apply only with respect to obligations acquired after such date.

§ 29.22 (o)–1 *Treatment of bond premiums in case of dealers in tax-exempt securities*—(a) *In general.* Section 22 (o) requires certain adjustments to be made by dealers in securities with respect to premiums paid on short-term municipal bonds which are held for sale to customers in the ordinary course of the trade or business. The adjustments depend upon the method of accounting used by the taxpayer in computing the gross income from the trade or business. See paragraphs (b) and (c) of this section. Adjustment under section 22 (o) is required only for taxable years ending after June 30, 1950, and, in the case of a taxable year beginning before June 30, 1950, and ending thereafter is required only with respect to obligations acquired after June 30, 1950.

The term "short-term municipal bond" under section 22 (o) means any obligation issued by a government or political subdivision thereof if the interest on the obligation is excludible from gross income under section 22 (b) (4). Such term, however, does not include an obligation the maturity or earliest call date of which is a date more than five years from the date of acquisition by the taxpayer, or an obligation sold or otherwise disposed of by the taxpayer within 30 days after the date of acquisition by him. A bond which is otherwise within the definition of "short-term municipal bond" is subject to the provisions of section 22 (o) if held by the taxpayer for a period of more than 30 days, whether or not such period is entirely within one taxable year.

(b) *Inventories not valued at cost.* In the case of a dealer in securities who computes gross income from his trade or business by the use of inventories and values such inventories on any basis other than cost, the adjustment required by section 22 (o) is the reduction of "cost of securities sold" by the amount equal to the amortizable bond premium which would be disallowed as a deduction under section 125 (a) (2) if the dealer were an ordinary investor holding such bond. Such amortizable bond premium is computed under section 125 (b) by reference to the cost or other original basis of the bond on the date of acquisition (determined without regard to section 113 (a) (1), relating to inventory value on a subsequent date). If the date of acquisition precedes July 1, 1950, then, in computing under section 125 (b) the amount of such amortizable bond premium, there shall be made adjustments to bond premium proper to reflect unamortized bond premium on such bond for the period including the holding period (as determined under section 117 (h)) prior to the date as of which section 22 (o) first becomes applicable to the bond in the hands of the taxpayer. See § 29.125–2.

The preceding paragraph may be illustrated by the following example:

X, a dealer in securities who values his inventories on a basis other than cost, makes his income tax returns on the calendar year basis. On January 1, 1949, he buys, for $1,060 each, three short-term municipal bonds (A, B, and C) having a face obligation of $1,000, and maturing on January 1, 1954. On July 1, 1950, he buys, for $1,042 each, three more bonds (X, Y, and Z) of the same issue. Bonds A and X are sold on December 31, 1950. Bonds B and Y are sold on December 31, 1951. Bonds C and Z are sold on December 31, 1952. The adjustment for each of the years 1950, 1951, and 1952 is as follows:

Bond	Date acquired	Date Sold	Adjustment for—		
			1950	1951	1952
A	Jan. 1, 1949	Dec. 31, 1950	None		
B	....do....	Dec. 31, 1951	None	$12.00	
C	....do....	Dec. 31, 1952	None	12.00	$12.00
X	July 1, 1950	Dec. 31, 1950	$6.00		
Y	....do....	Dec. 31, 1951	6.00	12.00	
Z	....do....	Dec. 31, 1952	6.00	12.00	12.00
Total			18.00	48.00	24.00

For the purpose of determining such adjustment, the amortizable bond premium is computed under section 125 (b) as follows:

	Bond A, B, or C	Bond X, Y, or Z
Bond premium	$60	$42
Adjustment for period prior to first date of application of section 22 (o):		
Applicable Jan. 1, 1951	24	
Applicable July 1, 1950		0
Amortizable bond premium to maturity	36	42
Amortizable bond premium per month	1	1

The term "cost of securities sold" means the amount ascertained by subtracting the inventory value of the closing inventory of a taxable year from the sum of the inventory value of the opening inventory for such year and the cost of securities and other property purchased during such year which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year.

(c) *Inventories not used or inventories valued at cost.* In the case of a dealer in securities who computes gross income from his trade or business without the use of inventories or by use of inventories valued at cost, the adjustment required by section 22 (o) is a reduction of the adjusted basis of each short-term municipal bond sold or otherwise disposed of during the taxable year. The amount of such reduction is the amount by which the adjusted basis of such bond would be required to be reduced under section 113 (b) (1) (H) were such bond subject to the amortizable bond premium provisions of section 125, that is, the amount of the amortizable bond premium which would be disallowed as a deduction under section 125 (a) (2) if the taxpayer were an ordinary investor.

If the bond was acquired before July 1, 1950, the amount of the reduction shall not include the amount of such amortizable bond premium which would be disallowed as a deduction under section 125 (a) (2), if the taxpayer were an ordinary investor, for any taxable year beginning before July 1, 1950. In the case of such bond, the amortizable bond premium which would be disallowed as a deduction under section 125 (a) (2) is determined after making adjustments to bond premium proper to reflect unamortized bond premium on such bond for the period including the holding period (as determined under section 117 (h)) prior to the date as of which section 22 (o) first becomes applicable to the bond in the hands of the taxpayer. See § 29.125–2.

The preceding paragraph may be illustrated by the following example:

Y, a dealer in securities who values his inventories on the basis of cost, makes his income tax returns on the calendar year basis. On January 1, 1949, he buys, for $1,060 each, three short-term municipal bonds (D, E, and F) having a face obligation of $1,000, and maturing on January 1, 1954. On July 1, 1950, he buys, for $1,042 each, three more bonds (U, V, and W) of the same issue. Bonds D and U are sold on December 31, 1950. Bonds E and V are sold on December 31, 1951. Bonds F and W are sold on December 31, 1952.

Bond	Date acquired	Date sold	Adjustment for—		
			1950	1951	1952
D	Jan. 1, 1949	Dec. 31, 1950	None		
E	....do....	Dec. 31, 1951	None	$12.00	
F	....do....	Dec. 31, 1952	None	None	$24.00
U	July 1, 1950	Dec. 31, 1950	$6.00		
V	....do....	Dec. 31, 1951	None	18.00	
W	....do....	Dec. 31, 1952	None	None	30.00

For the purpose of determining such adjustments, the amortizable bond premium is computed under section 125 (b) as follows:

	Bond D, E, or F	Bond U, V, or W
Bond premium	$60	$42
Adjustment for period prior to first date of application of section 22 (o)—		
Applicable Jan. 1, 1951	24	
Applicable July 1, 1950		0
Amortizable bond premium to maturity	36	42
Amortizable bond premium per month	1	1

PAR. 2. There is inserted immediately preceding § 29.113 (b) (1)–1 the following:

(b) *Technical amendments.* (1) Section 113 (b) (1) is hereby amended by adding at the end thereof the following:

(I) in the case of any short-term municipal bond (as defined in section 22 (o)), to the extent provided in section 22 (o) (1) (B).

* * * * *

(c) *Effective date.* The amendments made by this section shall be applicable to taxable years ending after June 30, 1950, but in the case of a taxable year beginning before and ending after such date the amendments shall apply only with respect to obligations acquired after such date.

PAR. 3. Section 29.113 (b) (1)–1, as amended by Treasury Decision 5402, approved September 5, 1944, is further amended by adding at the end thereof the following: "For adjustment to basis of short-term municipal bonds as defined in section 22 (o) (2) (A), see § 29.22 (o)–1.

PAR. 4. There is inserted immediately preceding § 29.125–1 the following:

(2) Section 125 is hereby amended by adding at the end thereof the following new subsection:

(e) *Dealers in tax-exempt securities.* For special rules applicable, in the case of dealers in securities, with respect to premium attributable to certain wholly tax-exempt securities, see section 22 (o).

(c) *Effective date.* The amendments made by this section shall be applicable to taxable years ending after June 30, 1950, but in the case of a taxable year beginning before and ending after such date the amendments shall apply only with respect to obligations acquired after such date.

SEC. 217. AMORTIZATION OF PREMIUM ON CONVERTIBLE BOND (REVENUE ACT OF 1950, APPROVED SEPTEMBER 23, 1950).

(a) *Premium attributable to conversion features of bond.* Section 125 (b) (1) (relating to determination of amount of bond premium) is hereby amended by adding at the end thereof the following: "In no case shall the amount of bond premium on a convertible bond include any amount attributable to the conversion features of the bond."

(b) *Effective date.* The amendment made by subsection (a) shall be applicable with respect to taxable years beginning after June 15, 1950, and shall also apply, in the case of a taxable year beginning on or before such date, with respect to bonds acquired after such date.

PAR. 5. Section 29.125–1, as amended by Treasury Decision 5425, is further amended by adding at the end of paragraph (a) thereof the following sentence: "See, however, § 29.22 (o)–1."

PAR. 6. Section 29.125–5 is amended by striking therefrom the last sentence and by inserting at the end of such section the following new paragraph:

A convertible bond is within the scope of section 125 if the option to convert on a certain date specified in the bond rests with the holder thereof. However, for the purpose of determining the amount of amortizable bond premium on a convertible bond for a taxable year beginning after June 15, 1950, or for any taxable year in the case of a convertible bond acquired after June 15, 1950, the amount of bond premium shall not include any amount attributable to the conversion features of the bond. For the purpose of this section, the term "convertible bond" includes a bond issued with detachable stock-purchase warrants.

The value of the conversion features of a particular bond shall be determined by ascertaining the assumed price at which such bond would be purchased on the open market if without conversion features, and by subtracting such assumed price from the cost of the bond. The determination of the assumed price of the bond without the conversion features shall be made by ascertaining the yield on which bonds of similar charac-

ter, not having conversion features, are sold on the open market and adjusting the price of the bond in question to this yield. This adjustment may be made by the use of standard bond tables. In selecting quotations for comparative purposes, bonds of the same classification and grade shall be used. The application of the principles set forth in this paragraph may be illustrated as follows:

Example. T purchased for $115 a $100 bond, maturing in five years, on which interest is payable semi-annually at the rate of 3.5 percent a year. This bond is convertible into common stock at the option of the holder. It is found that bonds of the same character, not having conversion features, were sold on the open market on or about the time of T's purchase on a basis to yield 2.80 percent. By recourse to a standard bond table, it is found that the cost of a 3½ percent five year $100 bond to yield 2.80 percent would have been $103.25. Since the taxpayer paid $115 for the convertible bond, the difference between $115 and $103.25, or $11.75, represents the value of the conversion features of the bond at the time of the purchase. The balance of $3.25 represents the bond premium subject to amortization under section 125.

If a convertible bond acquired on or before June 15, 1950, is held during a taxable year beginning after such date, the amortizable bond premium for such taxable year shall be computed as if the provisions for the determination of the bond premium without the inclusion of any amount attributable to the conversion features of the bond were applicable for each year for which the bond was held prior to such taxable year. Thus, if in the example in the preceding paragraph, T had acquired the bond on January 1, 1949, and if T makes his income tax returns on the basis of the calendar year, the amortizable bond premium for 1951 would be $0.65, determined as follows:

Bond premium not attributable to conversion feature	$3.25
Amortizable bond premium for 1949 and 1950, determined by reference to bond premium not attributable to conversion feature	1.30
Portion of bond premium amortizable over remaining life of bond	1.95
Amortizable bond premium for each of the remaining 3 years (one-third of $1.95)	.65

[Docket No. AO 153-A6]

HANDLING OF MILK IN DULUTH-SUPERIOR MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVELY APPROVED MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), hereinafter referred to as the "act," and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handing of milk in the Duluth-Superior marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business the 7th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing, on the record of which the proposed marketing agreement and amendments to the order, as amended, were formulated was conducted at Duluth, Minnesota, on May 15, 1951, pursuant to notice thereof which was issued on May 2, 1951 (16 F. R. 4145).

The material issues of record related to:

1. The classification of concentrated milk intended for consumption in fluid form,

2. Increasing the level of the Class I price, and

3. Increasing the butterfat differential to handlers on Class I milk.

Findings and conclusions. The following findings and conclusions on the material issues are based upon the evidence in the record.

1. The Class I definition should be revised to include fluid milk disposed of in concentrated form for consumer use.

During recent months a product generally referred to as "concentrated milk" has been introduced in a number of markets. While its distribution has not been undertaken in the marketing area as yet, there are one or more plants fairly close to the marketing area which are currently manufacturing this product and it is anticipated that it may be introduced in the market in the near future. This product is not sterilized and is disposed of to consumers for consumption in fluid form by the addition of water, or it may be used in the concentrated form as a cream substitute in coffee or on cereals. Producers and handlers in the market contended that the Class I definition should be broadened to include this product. While the local health authorities have not made a formal ruling as to the requirements for milk to be concentrated, the record indicates the necessity for the product to be made from milk meeting the same requirements as are applicable to fluid whole milk. Accordingly it has been concluded that concentrated milk should properly be classified as Class I milk.

It was also proposed at the hearing, although not included in the notice of hearing, that yogurt be classified as Class I. This product is made by the addition of culture to a relatively low fat milk to which non-fat milk solids have been added. The record shows that in this market there is no necessity for it to be made from Grade A milk and accordingly, it has been concluded that it should not be classified as Class I milk.

2. No change should be made in the present level of Class I price differentials.

It was proposed by the industry committee which requested the hearing that the Class I differential be fixed at $1.50 over the Class II price during all months of the year. A similar proposal was presented at the hearing which was conducted in this market on November 29, 1950. As a result of the November hearing the Class I differential was fixed at $1.00 during May, June, July, and August and at $1.15 during all other months of the year. Producers contend that conditions have so changed since November as to warrant a further increase in price. The record, however, fails to substantiate this viewpoint.

Proponents contended that producers adjacent to the marketing area were discontinuing the production of milk and taking employment in industry in Duluth or Superior. The evidence, however, shows very little change in the number of producers supplying the market. As nearby producers have given up dairying they have been replaced by other producers farther from the market. The result has been a gradual expansion of the milkshed rather than a lessening of the supply of milk for the market.

The area adjacent to Duluth and Superior which includes the milkshed for the market, is an area of relatively high production costs, yet some of the heaviest producing areas of Wisconsin and Minnesota are within easy hauling distance of the market. There are within less than 100 miles of the market several plants handling large volumes of milk of a quality comparable to that required by the health authorities of Duluth and Superior. It appears that any further increase in the Class I price on the market would offer a considerable inducement to one or more of these plants to seek an outlet in the marketing area. The entrance into the market-wide pool of one or more of these large volume plants, which have a much greater percentage of surplus milk than is carried by the market at the present time, would reduce the uniform price to producers by a substantial amount. This could result in producers receiving lower returns for their milk than they are receiving at the present time.

3. The Class I butterfat differential to handlers should be increased from 125 percent of the price of butter to 140 percent of the price of butter.

The Class I butterfat differential has little effect on the price of fluid milk since most of the milk in the market is sold with a butterfat content of 3.5 percent. It will increase slightly the cost to handlers of premium grades of milk which contain a somewhat higher butterfat content.

The butterfat differential is a primary factor in establishing what handlers shall pay for fluid cream since it approximates the actual cost of butterfat disposed of as cream. As a result of the change in the method of accounting which was adopted in the January

amendment to the order, the returns to producers on milk used for cream were reduced below their former level. Witnesses for both producers and handlers testified that the price now fixed in the order is too low to induce the production of an adequate supply of Class I milk for use in cream.

Although the proposal contained in the notice of hearing provided a differential equal to 1.4 times the price of butter, at the hearing and in their briefs producers urged that the differential be increased to 1.6 times the price of butter. The cream price resulting from such a differential would be substantially higher than those prevailing in other markets in the midwest. There is evidence that such a price would reduce cream sales. A check of the records of the market administrator's office reveals that sales of cream by handlers in April of this year were more than 20 percent under the sales in April of 1950. At least a portion of this decrease must be attributed to the substantial increase in the resale price of cream which was made on January 1. Handlers testified that this increase was made in anticipation of an increase in the cost of milk used to produce cream, since they believed that the increase in the Class I price which became effective on that date would also affect the price of cream. Although the actual effect of the amendment was to reduce the price of milk used for cream, handlers have continued to charge the increased price and have paid producers a premium on milk sold as cream. Returns to producers including the premium are somewhat higher than the price recommended herein.

The recommended differential of 1.4 times the price of butter is the same as that used in several other midwestern markets. It will return to producers a somewhat higher price for milk used to produce cream than is currently provided in the order, yet it appears to be low enough to aid in recovering some of the cream sales that have been lost in recent months.

The change in the Class I butterfat differential has necessitated a revision of the language of § 954.81 relating to the producer butterfat differential. No change was proposed or contemplated in the level of the producer butterfat differential and this section has been revised in order to continue the producer butterfat differential at its present level.

General findings. (a) The proposed marketing agreement and the proposed order amending the order, as amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Proposed findings and conclusions. A brief was filed on behalf of one of the producer associations in the market. This brief contained proposed findings of fact, conclusions and argument with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that such suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions in this decision.

Recommended Marketing Agreement and Amendment to the Order

The following amendment to the order is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

1. Delete § 954.41 (a) and substitute therefor the following:

(a) Class I milk shall be all skim milk and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, and cream for fluid consumption (including any mixture of cream and milk or skim milk containing less butterfat than the minimum requirement for cream), (2) used in the production of concentrated milk, not sterilized, for fluid consumption, and (3) not specifically accounted for as used to produce a Class II product.

2. Delete § 954.51 and substitute therefor the following:

§ 954.51 *Butterfat differentials to handlers*—(a) *Class I milk.* If the average butterfat content of the milk disposed of as Class I milk by any handler is more or less than 3.5 percent, there shall be added to the Class I price computed pursuant to § 954.50 (a) for each one-tenth of 1 percent that the average butterfat content of such milk is above 3.5 percent, or subtracted for each one-tenth of 1 percent that the average butterfat content of such milk is below 3.5 percent, an amount computed by multiplying by 1.40 the simple average of the daily wholesale selling prices per pound of Grade A (92-score) bulk creamery butter as reported by the United States Department of Agriculture for the Chicago market during the period from the 25th day of the month second preceding such delivery period through the 24th day of the month immediately preceding such delivery period and divide the result by 10.

(b) *Class II milk.* If the average butterfat content of the Class II milk disposed of by any handler is more or less than 3.5 percent there shall be added to the class price computed pursuant to § 954.50 (b) for each one-tenth of 1 percent that the average butterfat content of such milk is above 3.5 percent or subtracted for each one-tenth of 1 percent that the average butterfat content of such milk is below 3.5 percent, an amount computed by multiplying by 1.25 the simple average of the daily wholesale selling prices per pound of Grade A (92-score) bulk creamery butter as reported by the United States Department of Agriculture for the Chicago market during the period from the 25th day of the month second preceding such delivery period and divide the result by 10.

3. Amend § 954.81 by deleting therefrom the reference "§ 954 51" and substituting therefor "§ 954.51 (b)".

[Docket No. AO 201-A 1]

HANDLING OF DRIED PRUNES PRODUCED IN CALIFORNIA

DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.) (hereinafter referred to as the "act"), and the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at San Francisco, California, on March 8 and 9, 1951, upon proposed amendments to Marketing Agreement No. 110 and Order No. 93 (7 CFR Part 993) regulating the handling of dried prunes produced in California. Said marketing agreement and order are effective pursuant to the provisions of the act.

Upon the basis of the evidence adduced at the aforementioned hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, on June 12, 1951, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. Notice of such recommended decision, and opportunity to file written exceptions with respect thereto, was published in the FEDERAL REGISTER (16 F. R. 5794) on June 16, 1951, and corrected in the FEDERAL REGISTER (16 F. R. 6200) on June 27, 1951. No such written exceptions have been filed and the last day for filing them has expired.

Findings and conclusions. The material issues and all of the findings and conclusions of the aforesaid recom-

mended decision (F. R. Doc. 51-6955; 16 F. R. 5794, 6200) are hereby approved and adopted as the material issues and the findings and conclusions of this decision as if set forth in full herein, except for the corrections set forth below. The corrections are as follows: (a) In the 8th line of the 3d column of page 5806 the first "of" should be "or"; (b) in the 8th line of issue numbered 18, first column of page 5809 the word "delinenated" should be "delineated"; (c) in the 5th line, § 993.62 (g), 3d column of page 5815 the word "weighting" should be "weighing"; (d) in the 23d line, 2d column of page 5816, the word "in" should be "is"; and (e) in the 4th line, 2d column of page 5819 the word "conditions" should be "condition."

Marketing agreement and order. Annexed hereto, and made a part hereof, are two documents entitled, respectively, "Marketing Agreement, as amended, Regulating the Handling of Dried Prunes Produced in California" and "Order, as amended, Regulating the Handling of Dried Prunes Produced in California," which have been decided upon as the appropriate and detailed means of effecting the foregoing conclusions. The marketing agreement, as amended, and the order as amended, shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing order have been met.

It is hereby ordered, That all of this decision, except the annexed marketing agreement, as amended, be published in the FEDERAL REGISTER. The regulatory provisions of the said agreement are identical with those contained in the attached order, which will be published with this decision.

Done at Washington, D. C., this 6th day of July 1951.

993.97 Exhibit A: minimum standards.

AUTHORITY: §§ 993.1 to 993.97 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c.

Findings and determinations—(a) *Findings upon the basis of the hearing record.* (1) The findings hereinafter set forth are supplementary and in addition to the findings and determinations which were previously made in connection with the original issuance of the marketing agreement and order (7 CFR Part 993); and all of said previous findings and determinations, except the finding as to the base period for the parity computation, are hereby ratified and confirmed except insofar as such findings and determinations may be in conflict with the findings set forth herein; (2) The amended order, as hereinafter set forth, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act; (3) Said amended order will be applicable only to persons in the respective classes of industrial and commercial activities specified or necessarily included, in the proposals upon which the amendment hearing has been held; and (4) There are no differences in the production and marketing of dried prunes in the production area covered by said amended order, which make necessary different terms applicable to different parts of such area.

Order relative to handling. It is, therefore, ordered, That the handling of dried prunes produced in California shall, from the effective time of this amended order, be in conformity to, and in compliance with, the terms and conditions of this amended order.

DEFINITIONS

§ 993.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the United States Department of Agriculture who is, or who may hereafter be, authorized to exercise the powers and to perform the duties of the Secretary under the act.

§ 993.2 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 993.3 *Person.* "Person" means an individual, partnership, corporation, association, or any other business unit.

§ 993.4 *Prunes.* "Prunes" means and includes all sun-dried or artificially dehydrated plums, of any type or variety, produced from plums grown in the State of California, except: (a) Sulfur-bleached prunes which are produced from yellow varieties of plums and are commonly known as silver prunes; (b) plums which have not been dried or dehydrated to a point where they are capable of being stored prior to packaging, without deterioration or spoilage, unless refrigeration or other artificial means of preservation are used, and so long as they are treated by a process which is in conformity with, or generally similar to, the processes for treatment of plums of that type which have been developed or recommended by the Food Technology Division, College of Agriculture, University of California, for the specialty pack known as "high moisture content prunes", but this exception shall not apply if and when such plums are dried to the point where they are capable of being stored, without deterioration or spoilage, unrefrigerated or not otherwise artificially preserved; and (c) prunes as used in § 993.62.

§ 993.5 *Natural condition prunes.* "Natural condition prunes" means prunes which have not been processed.

§ 993.6 *Processed prunes.* "Processed prunes" means prunes which have been cleaned, or treated with water or steam: *Provided*, That prunes shall not become processed prunes at the time they are cleaned by a producer or a dehydrator in the course of preparing them for delivery to a producer, dehydrator, or handler.

§ 993.7 *Standard prunes.* "Standard prunes" means any lot of natural condition prunes meeting the applicable grade and size standards prescribed pursuant to § 993.48.

§ 993.8 *Standard processed prunes.* "Standard processed prunes" means any lot of processed prunes meeting the applicable grade and size standards prescribed pursuant to § 993.49.

§ 993.9 *Substandard prunes.* "Substandard prunes" means any lot of processed or natural condition prunes failing to meet the applicable grade and size standards prescribed pursuant to §§ 993.48 and 993.49.

§ 993.10 *Handle.* "Handle" means to receive, process, package, sell, consign, transport, or ship or in any other way to place prunes in the current of commerce (except as a carrier of prunes owned by another person), whatever may be the ultimate destination or end use of the prunes: *Provided*, That, this term shall not include: (a) The selling or delivering of prunes by a producer or dehydrator to a producer, dehydrator, or handler within the State of California; (b) the receiving of prunes by a producer or dehydrator from a producer or dehydrator; and (c) the buying, receiving, selling, or otherwise dealing by a person with prunes which have already been handled within the meaning of this definition by another person, but this exclusion shall be of no effect for the purpose of applying the applicable restrictions of § 993.49 or § 993.50 to the subsequent handling of prunes in the event a handler's prunes are excepted from restrictions in the manner specified in § 993.49 (e) (1) or § 993.50 (c).

§ 993.11 *Handler.* "Handler" means any person who handles prunes.

§ 993.12 *Dehydrator.* "Dehydrator" means any person who produces prunes by drying or dehydrating plums by means of sun-drying or artificial heat.

§ 993.13 *Producer.* "Producer" means any person who is engaged, in a proprietary capacity, in growing plums for drying or dehydrating into prunes.

§ 993.14 *Ton.* "Ton" means a short ton of 2,000 pounds.

§ 993.15 *Grade.* "Grade" means the classification of prunes for quality and condition according to the grading specifications established pursuant to the provisions of this subpart.

§ 993.16 *Size.* "Size" means the number of prunes contained in a pound or the classification of prunes into their various count groups in accordance with the usual practice of the industry.

§ 993.17 *Crop year.* "Crop year" means the 12-month period beginning August 1 of any year and ending July 31 of the following year.

§ 993.18 *Domestic.* "Domestic" means the continental United States, Alaska, Canal Zone, Hawaii, Puerto Rico, Virgin Islands, and Canada.

§ 993.19 *Proper storage.* "Proper storage" means storage of such character as will maintain prunes in the same condition as when received by the handler, except for normal and natural deterioration and shrinkage.

§ 993.20 *Part and subpart.* "Part" means the order regulating the handling of dried prunes produced in California, and all rules, regulations, and supplementary orders issued thereunder. This order regulating the handling of dried prunes produced in California shall be a "subpart" of such part.

PRUNE ADMINISTRATIVE COMMITTEE

§ 993.24 *Establishment of Prune Administrative Committee.* A Prune Administrative Committee (hereinafter referred to as the "committee"), consisting of 21 members, with an alternate member for each such member, is hereby established to administer the terms and provisions of this part, of whom, with their respective alternates, 14 shall represent producers and seven shall represent handlers.

§ 993.25 *Term of office.* The term of office of members, and their respective alternates, shall be two years, ending on May 31 of even numbered years, and any later date which may be necessary for the selection and qualification of their respective successors.

§ 993.26 *Selection.* Selection of members of the committee, and their respective alternates, shall be made by the Secretary, for the producer and handler groups from the nominations submitted for that purpose by the respective groups, or from among other qualified persons, in the discretion of the Secretary, but such selections shall be made by the Secretary from the classes within each group and in the proportions set forth in § 993.28.

§ 993.27 *Eligibility.* Each producer member and alternate member of the committee shall be, during his term of office, a producer in the district from which he is appointed, and, if such person also handled prunes during the crop year immediately preceding that for which he is selected, at least 51 percent of the prunes so handled by him during such preceding crop year must have been produced from plums grown by him: *Provided*, That, producer-at-large members and their alternates, if they otherwise meet the foregoing eligibility requirements, may be producers in any districts. Each handler member and alternate member of the committee shall be either a handler of prunes or an employee or agent of a handler of prunes actually engaged in the handling of prunes while he is such member or alternate member.

§ 993.28 *Nominees* — (a) *Producer nominees*—(1) *Independent producers.* One nominee for member on the committee and one nominee for an alternate member shall be nominated to the Secretary by majority vote in elections in which only producers who are not members of a cooperative marketing association shall participate in each of the seven districts in the State of California which are described below in this subparagraph. The committee shall cause such elections to be held in each district in each election year prior to March 31. At such election, each such producer shall be entitled to cast only one vote in each balloting for member nominee and in each balloting for alternate member nominee and each such producer shall be permitted to vote only in a district in which he is a producer. No producer shall vote in more than one district. In case a producer is a producer in more than one district, he shall elect by written notification to the committee in which of such districts he will cast his vote for such nominees. The seven districts which are referred to above are described as follows:

District No. 1. The counties of Siskiyou, Modoc, Shasta, Trinity, Lassen, Plumas, Sierra, Tehama, Glenn, Butte, Colusa, Sutter, Yuba, Nevada, and Placer.

District No. 2. The counties of Napa, Yolo, and Solano.

District No. 3. The counties of Mendocino, Lake, Sonoma, Marin, Del Norte, and Humboldt.

District No. 4. The counties of San Francisco, San Mateo, and Santa Cruz, and all that portion of the territory in Santa Clara County west of a line described as follows: beginning at the intersection of Alviso Road and San Francisco Bay in Alviso; thence south via Alviso Road to First Street in San Jose; thence south on said First Street to San Carlos Street in San Jose; thence west on San Carlos Street to Meridian Road; thence south on Meridian Road to Dry Creek Road; thence west on Dry Creek Road to the San Jose-Los Gatos Highway; thence southwesterly on the San Jose-Los Gatos Highway to Union Avenue, also known as Ware Avenue; thence south on Union Avenue, also known as Ware Avenue, along a straight line continuing to the Santa Cruz County line.

District No. 5. All of Alameda County and that part of Santa Clara County east and south of District No. 4, extending in a southerly direction to a straight line extending from along the main portion of the Cochran Road, northeasterly to the Stanislaus County line and southwesterly to the Santa Cruz County line.

District No. 6. The counties of San Benito, Monterey, and San Luis Obispo, and all of that portion of Santa Clara County not included in Districts No. 4 and No. 5.

District No. 7. All of the counties in the State of California not included in Districts No. 1 to No. 6, inclusive.

At any time the Secretary concludes that the respective areas covered by the aforementioned seven districts, as delineated above, no longer represent approximately equal segments from the standpoints of numbers of producers of prunes or productions of prune tonnages, he may change such areas with a view to reestablishing such equalization on the basis of the existing situations.

(2) *Cooperative producers.* Prior to March 1 of each election year, the committee shall report to the Secretary the total tonnage of prunes handled by all handlers as the first handlers thereof and the total tonnage of prunes handled by cooperative marketing associations as the first handlers thereof during the

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing orders have been met.

crop year preceding such election year. Prior to March 15 of each election year, the Secretary shall determine and announce the number of producer member nominees and producer alternate member nominees which shall be nominated by cooperative marketing associations handling prunes on behalf of their members. Such number of nominees shall bear, as far as practicable, the same percentage compared to the total of 14 producer members and their alternates as the prune tonnage handled by cooperative marketing associations as the first handlers thereof bears to the total tonnage handled by all handlers as the first handlers thereof during the crop year preceding such election year. Prior to March 31 of each election year the cooperative marketing associations handling prunes shall nominate to the Secretary on behalf of their members such number of producer nominees and their respective alternates.

(3) *Producers-at-large.* The number of nominees and their respective alternates then required to make up the total of 14 producer member nominees and their alternates shall be nominated to the Secretary by the seven independent producer nominees nominated for members on the committee pursuant to the provisions of this section. Such nominations shall be made prior to April 15 and shall be by majority vote.

(b) *Handler nominees.* Prior to March 15 of each election year, the Secretary shall determine and announce the number of handler member nominees and handler alternate member nominees which shall be nominated by cooperative marketing associations handling prunes, on the same basis as his determination of the number of cooperative producer nominees, as set forth in paragraph (a) (2) of this section, and at the same time he shall determine and announce, for those handlers who are not cooperative marketing associations (referred to in this subpart as "independent handlers"), the number of handler member nominees and handler alternate member nominees to be nominated by large handlers, the number to be nominated by medium handlers, and the number to be nominated by small handlers. Large handlers shall be deemed to be those who during the preceding crop year individually handled as the first handlers thereof, 17 or more percent of the total tonnage handled by independent handlers as the first handlers thereof; medium handlers, those who during the preceding crop year individually handled as the first handlers thereof, 8 or more percent but less than 17 percent of the total tonnage handled by independent handlers as the first handlers thereof; and small handlers, those who during the preceding crop year individually handled as the first handlers thereof, less than 8 percent of the total tonnage handled by independent handlers as the first handlers thereof. The Secretary shall, in his discretion and insofar as it is possible to do so, apportion 40 percent of the independent handler nominees to large handlers, 20 percent of the independent handler nominees to medium handlers, and 40 percent of the independent handler nominees to small handlers, but in the event that these proportions cannot be followed, there shall be at least one independent handler member nominee and handler alternate member nominee apportioned to each of the three classes of independent handlers, and the nominees for any remaining member positions, including the respective alternates, shall be apportioned to the size class or classes as determined at a general meeting of independent handlers which shall be called for that purpose by the committee, such determination to be made on the basis of a majority vote of all independent handlers who are present at such meeting and participate in the voting, and on the further basis of one vote for each such handler in each balloting. Prior to March 31 of each election year, the cooperative marketing associations handling prunes shall nominate to the Secretary such number of handler member nominees and their respective alternates as the Secretary has determined and announced for cooperative marketing associations. Prior to March 31, at a meeting called for that purpose by the committee, each class of independent handlers shall nominate the number of handler member nominees and their respective alternates as determined and announced by the Secretary for each class, respectively. At such meeting, nominations shall be made by each class of independent handlers for nominees of that class, on the basis of a majority vote of all handler members of that class present and participating in the voting and on the further basis of one vote for each handler in each class in each balloting for nominees of that class.

§ 993.29 *Alternates.* An alternate for a member of the committee shall act in the place and stead of such member (a) during his absence, and (b) in the event of his removal, resignation, disqualification, or death, until a successor for such member's unexpired term has been selected and has qualified.

§ 993.30 *Failure to nominate.* In the event nominations for any positions on the committee are not received within the prescribed periods, the Secretary may select such members or their alternates, without regard to nominations, but each such selection shall be on the bases prescribed in § 993.28.

§ 993.31 *Acceptance.* Each person selected as a member or alternate member of the committee shall, prior to serving on the committee, qualify by filing with the Secretary a written acceptance within 15 days after receiving notice of his selection.

§ 993.32 *Vacancies.* In the event of any vacancy occasioned by the failure of any person selected as a member or alternate member of the committee to qualify, or, by the removal, resignation, disqualification, or death of any member or alternate member, a successor for such person's unexpired term shall be nominated within 20 calendar days after such vacancy occurs and selected in the manner provided in this subpart, insofar as applicable.

§ 993.33 *Obligations.* Upon the removal, resignation, disqualification, or expiration of the term of office of any member or alternate member of the committee, such member or alternate member shall account for all receipts and disbursements and deliver to his successor, to the committee, or to a designee of the Secretary all property (including, but not limited to, all books and records) in his possession or under his control as member or alternate member, and he shall execute such assignments and other instruments as may be necessary or appropriate to vest in such successor, committee, or designee full title to such property and funds, and all claims vested in such member or alternate member. Upon the death of any member or alternate member of the committee, full title to such property, funds, and claims vested in such member or alternate member shall be vested in his successor or, until such successor has been selected and has qualified, in the committee.

§ 993.34 *Voting procedure and verbatim record.* Except as specifically otherwise provided in this section, all decisions of the committee shall be by majority vote of the members present and voting and a quorum must be present. A quorum shall consist of at least 12 members of whom at least eight must be producer members and at least four must be handler members. Except in case of emergency, a minimum of five days advance notice must be given with respect to any meeting of the committee. In case of an emergency, to be determined within the discretion of the chairman of the committee, as much advance notice of a meeting as is practicable in the circumstances shall be given. The committee may vote by mail or telegram upon due notice to all members, but any proposition to be so voted upon first shall be explained accurately, fully, and identically by mail or telegram to all members. When any proposition is submitted for voting by such method, one dissenting vote shall prevent its adoption. Any recommendation submitted to the Secretary by the committee, pursuant to the requirements of §§ 993.41 through 993.45, §§ 993.48 through 993.50, or §§ 993.59 through 993.63, shall be on the basis of an affirmative vote by at least 16 members, and the committee shall file with the Secretary, along with such recommendations to the Secretary, a verbatim record of those portions of its meetings relating to such requirements. After any proposition is voted upon by the committee, it shall report promptly to the Secretary the individual affirmative or negative vote on such proposition of each member and of each alternate member acting in the place of a member.

§ 993.35 *Compensation and expenses.* The members of the committee, and their alternates when acting as members, shall receive $10.00 per day for each day devoted to performing their duties hereunder, plus their reasonably necessary expenses.

§ 993.36 *Powers.* The committee shall have the following powers:

(a) To administer the terms and provisions of this subpart;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violations of this subpart; and

(d) To recommend to the Secretary amendments to this subpart.

§ 993.37 *Duties.* The committee shall have, among others, the following duties:

(a) To act as intermediary between the Secretary and any producer, dehydrator, or handler;

(b) To keep minutes, books, and other records which shall clearly reflect all of its acts and transactions, and such minutes, books, and other records shall be subject to examination by the Secretary at any time;

(c) To make, subject to the prior approval of the Secretary, scientific and other studies, and assemble data on the producing, handling, shipping, and marketing conditions relative to prunes, which are necessary in connection with the performance of its official duties;

(d) To select, from among its members, a chairman and other appropriate officers, and to adopt such rules and regulations for the conduct of the business of the committee as it may deem advisable;

(e) To appoint or employ such other persons as it may deem necessary, and to determine the salaries and define the duties of such persons;

(f) To submit to the Secretary not later than June 20 of each year, a budget of its anticipated expenditures and the recommended rate of assessment for the ensuing crop year, and the supporting data therefor;

(g) To submit to the Secretary such available information with respect to prunes as the committee may deem appropriate, or as the Secretary may request;

(h) To prepare and submit to the Secretary monthly statements of the financial operations of the committee, exclusive of surplus tonnage operations, and to make such statements, together with the minutes of the meetings of said committee, available for inspection at the offices of the committee, by producers, dehydrators, and handlers;

(i) To prepare and submit to the Secretary annually, as soon as practicable after the end of each crop year and at such other times as the committee may deem appropriate or the Secretary may request, a statement of the financial operations of the committee with respect to the surplus tonnage for such crop year and to make such statement available at the offices of the committee, for inspection by producers, dehydrators, and handlers;

(j) To cause the books of the committee to be audited by a certified public accountant at least once each crop year, and at such other times as the committee may deem necessary or as the Secretary may request. Such report shall show, among other things, the receipt and expenditure of funds. At least two copies of such audit report shall be submitted to the Secretary; a copy of each such report shall be available, at the offices of the committee, for inspection by producers, dehydrators, and handlers;

(k) To give the Secretary the same notice of meetings of the committee as is given to the members of the committee;

(l) To give producers, dehydrators, and handlers reasonable advance notice of meetings of the committee, and to maintain all such meetings open to such persons;

(m) To investigate compliance with the provisions of this subpart and with any rules and regulations established pursuant to such provisions; and

(n) To establish, with the approval of the Secretary, such rules and procedures relative to administration of this subpart as may be consistent with the provisions contained in this subpart and as may be necessary to accomplish the purposes of the act and the efficient administration of this subpart.

MARKETING POLICY

§ 993.41 *Report of marketing policy.* Prior to the beginning of each crop year, the committee shall prepare and submit to the Secretary a report setting forth its marketing policy for the regulation of the handling of prunes in such crop year, pursuant to §§ 993.48 through 993.63. Such report shall include the data and information used by the committee in the formulation of such marketing policy. In developing the marketing policy, the committee shall give consideration to the following factors:

(a) The estimated tonnage of prunes from preceding crop years held by handlers;

(b) The estimated tonnage of prunes from preceding crop years held by producers and dehydrators;

(c) The estimated production of prunes in such crop year;

(d) An appraisal of the quality and size of prunes of the crop to be produced in such crop year;

(e) The estimated tonnage of prunes marketed in recent crop years segregated by countries as to foreign commerce and segregated by uses as to domestic commerce;

(f) The current prices being received for prunes by producers, dehydrators, and handlers;

(g) The trend and level of consumer income;

(h) The estimated probable market requirements for prunes in such crop year segregated by countries as to foreign commerce and segregated by uses as to domestic commerce; and

(i) Such other factors as may have a bearing on the marketing of prunes.

§ 993.42 *Policy meeting.* The committee shall hold a meeting for the purpose of formulating and adopting the marketing policy for any crop year not later than June 15 preceding the beginning of such crop year.

§ 993.43 *Time of submission.* The marketing policy report for any crop year shall be submitted to the Secretary not later than June 20 preceding the beginning of such crop year.

§ 993.44 *Modifications or changes.* In the event the committee subsequently determines that such marketing policy should be modified or changed by reason of change in economic or other conditions, it shall make such modification or change in the manner provided for above for the original formulation of a marketing policy, insofar as applicable, and shall submit promptly a report of such modified or changed marketing policy to the Secretary, along with the data which it considered in connection with the making of such modification or change.

§ 993.45 *Notice.* The committee shall give reasonable notice through newspapers having general circulation in the area and may give such notice through other channels, if the committee deems it desirable, to producers, dehydrators, and handlers of the contents of each marketing policy report submitted to the Secretary and each report modifying or changing a marketing policy. Copies of all such reports shall be maintained in the offices of the committee where they shall be available for examination by producers, dehydrators, and handlers.

GRADE AND SIZE REGULATIONS

§ 993.48 *Receiving of natural condition prunes by handlers—(a) General.* In order to effectuate the declared policy of the act, no handler shall receive prunes from producers or dehydrators, except in accordance with the terms and conditions with respect to grades and sizes set forth in this section: *Provided,* That no handler shall receive any prunes (either as standard prunes or as substandard prunes) from producers or dehydrators, unless such prunes have been properly dried and cured in original natural condition, without the addition of water, and free from active insect infestation, so that they are capable of being received, stored, and packed without deterioration or spoilage. Any high moisture content prunes, as described in the exception in § 993.4 (b), in the possession of a handler, shall be held separate and apart from any surplus prunes (including both standard and substandard prunes) held by him. If, and so long as, a handler commingles his salable prunes with any surplus prunes, this prohibition as to storage shall apply to the entire mass. In the event such high moisture content prunes are dried or dehydrated to a point where they are capable of being stored, without deterioration or spoilage, unrefrigerated or not otherwise artificially preserved, they shall be deemed, at that time, to have been received by such handler as prunes, and to be subject to all of the conditions and restrictions of this subpart.

(b) *Initial regulation.* Effective as of the effective time of this section and, continuing until such regulation is superseded by other regulations prescribed by the Secretary, no handler shall receive prunes from producers or dehydrators, other than as substandard prunes, unless they meet the minimum standards for natural condition prunes as set forth in § 993.97 (Exhibit A).

(c) *Superseding regulation.* In case the committee should recommend to the Secretary that the initial minimum standards as to grade, as provided for

in paragraph (b) of this section, should be superseded by other minimum standards as to grades and sizes, it shall submit its recommendation to the Secretary, together with the data and information upon which it acted in making such recommendation, including information as to factors affecting the supply of, and demand for, prunes by grades and sizes, and such other information as the Secretary may request. The Secretary shall issue such superseding regulation if he finds, upon the basis of the recommendation and supporting data submitted to him by the committee, or from other pertinent information available to him, that to do so would tend to effectuate the declared policy of the act. Any such superseding regulation, insofar as it applies to grades, shall not be below the applicable minimum standards for grades of natural condition prunes as set forth in § 993.97 (Exhibit A), and any such minimum standards for grades shall provide a maximum tolerance for total defects, and may provide a maximum tolerance for single defects or classes of defects. Any superseding regulations issued by the Secretary shall subsequently be modified, suspended, or terminated, in case he finds that the pertinent facts and circumstances so warrant; and the committee, in submitting any recommendation therefor to the Secretary, shall, in each instance, submit to him the information and data on the basis of which such recommendation is made. The committee shall give prompt notice through newspapers having general circulation in the area and may give such notice through other channels, if the committee deems it desirable, to handlers, dehydrators, and producers of each recommendation submitted by it to the Secretary and of each superseding regulation issued by the Secretary. Such notice of each regulation issued shall include, but not be limited to, written notice by registered mail to all handlers of whom the committee has a record.

(d) *Inspection.* Each handler shall, at his own expense, cause an inspection to be made of prunes tendered to him by any producer or dehydrator. Prior to accepting any such tender of prunes as prunes meeting the applicable minimum standards for grades and sizes, each such handler shall obtain a certificate that the prunes meet the aforementioned requirements for standard prunes as established pursuant to the provisions of paragraphs (b) or (c) of this section, and said handler shall submit such certificate, or cause it to be submitted, together with such other instruments and records as the committee may require, to the committee. Such certificates shall be issued by inspectors of the Dried Fruit Association of California, No. 1 Drumm Street, San Francisco, California. The Secretary may designate another inspection agency in the event the services of the Dried Fruit Association of California prove unsatisfactory. Any prunes so certified as meeting the applicable requirements shall be known and referred to as standard prunes.

(e) *Substandard natural condition prunes*—(1) *Producer's or dehydrator's options.* Any natural condition prunes tendered to a handler by a producer or dehydrator which fail to meet the applicable minimum standards as to grades and sizes, may: (i) At the producer's or dehydrator's option, be returned to such producer or dehydrator for sorting; or, (ii) by agreement between such producer and handler or dehydrator and handler, be received pursuant to the provisions of subparagraph (2) of this paragraph; or, (iii) be turned over to the handler unsorted to be held by him, as substandard natural condition prunes, for the account of the committee. Any such substandard prunes, except as otherwise specifically provided, shall be treated the same as and be subject to the same provisions respecting surplus prunes, as contained in §§ 993.59 through 993.63, and, except those referred to in subparagraph (2) of this paragraph, shall be held by a handler separate and apart from any standard prunes held by him.

(2) *Equivalent quantity basis.* In the event a producer or dehydrator should elect to arrange with a handler for the receiving of substandard prunes tendered by him to such handler for sorting or disposing of such prunes unsorted in conformity with the provisions of this subpart, the inspection agency designated to make inspections of prunes shall issue, at the handler's expense, a certificate of appraisal on such prunes so tendered, which shall show the percentage thereof comprising offgrade prunes necessary to be removed therefrom for the remainder to be standard prunes. A quantity of prunes equivalent to the weight of such offgrade prunes represented by the application of such percentage to the total tonnage so appraised and certified shall be treated as substandard prunes and held as such for the account of the committee: *Provided*, That any prunes so treated as substandard prunes shall be of such comparable size as may be established by the committee through issuance of rules and regulations. No certificate of inspection on such substandard natural condition prunes so tendered shall be required pursuant to this section after a certificate of appraisal has been issued applicable to such prunes.

§ 993.49 *Regulation of the handling of prunes subsequent to their receipt by handlers*—(a) *General.* In order to effectuate the declared policy of the act, no handler shall ship or otherwise make final disposition of natural condition prunes or of processed prunes, except in accordance with the terms and conditions of this section.

(b) *Initial regulation.* Effective as of the effective time of this section, and continuing until such regulation is superseded by other regulations prescribed by the Secretary, except as otherwise specifically provided, no handler shall ship or otherwise make final disposition of natural condition prunes or of processed prunes, which fail to meet the applicable minimum standards set forth in § 993.97 (Exhibit A) for standard prunes or standard processed prunes.

(c) *Superseding regulation.* In case the committee should recommend to the Secretary that the initial minimum standards as to grade, as provided for in paragraph (b) of this section, should be superseded by other minimum standards as to grades and sizes, it shall submit its recommendation to the Secretary together with the data and information upon which it acted in making such recommendation, including information as to factors affecting the supply of, and demand for, prunes by grades and sizes, and such other information as the Secretary may request. The Secretary shall issue such superseding regulation if he finds, upon the basis of the recommendation and supporting data submitted to him by the committee, or from other pertinent information available to him, that to do so would tend to effectuate the declared policy of the act. Any such superseding regulation, insofar as it applies to grades, shall not be below the applicable minimum standards for grades of standard prunes or standard processed prunes, as set forth in § 993.97 (Exhibit A), and any such minimum standards for grades shall provide a maximum tolerance for total defects, and may provide a maximum tolerance for single defects or classes of defects. Any superseding regulation issued by the Secretary may subsequently be modified, suspended, or terminated in case he finds that the pertinent facts and circumstances so warrant, and the committee, in submitting any recommendation therefor to the Secretary shall, in each instance, submit to him the information and data on the basis of which such recommendation is made: *Provided*, That, at all times, the regulation shall be comparable so far as practicable, to the then current regulation in effect with respect to the receiving of natural condition prunes by handlers from producers or dehydrators. The committee shall give prompt notice through newspapers having general circulation in the area and may give such notice through other channels, if the committee deems it desirable, to handlers, dehydrators, and producers of each recommendation submitted by it to the Secretary and of each superseding regulation issued by the Secretary. Such notice of each regulation issued shall include, but not be limited to, written notice by registered mail to all handlers of whom the committee has a record.

(d) *Inspection.* Each handler shall, at his own expense, before shipping or otherwise making final disposition of prunes, unless they are specifically excepted in this section, cause an inspection to be made of such prunes to determine whether they meet the then applicable grade and size standards for standard prunes or standard processed prunes. Each such handler shall not ship or otherwise make final disposition of such prunes, for any use unless they are specifically excepted in this section, if they do not meet such minimum standards. Such handler shall obtain a certificate that such prunes meet the aforementioned minimum standards and such handler shall submit such certificate, or cause it to be submitted, together with such other instruments and records as the committee may require, to the committee. Such certificates shall be issued by inspectors of the Dried Fruit Association of California, No. 1 Drumm Street, San Francisco, California. The Secretary may designate another inspection agency in the event the services of the Dried Fruit Association of California prove unsatisfactory.

(e) *Exceptions to restrictions*—(1) *Inter-plant and inter-handler transfers.* Notwithstanding the restrictions contained in paragraphs (b) or (c) of this section, any handler may transfer prunes from one plant owned by him to another plant owned by him within the State of California without having any inspection made as provided for in paragraph (d) of this section, and any handler may ship prunes from his plant to another handler's plant within the State of California without having an inspection made as provided for in paragraph (d) of this section. A report of such inter-handler transfer shall be made promptly by the transferring handler to the committee. The receiving handler shall, before shipping or otherwise making final disposition of such prunes, comply with the requirements of this section.

(2) *Defective prunes accumulated from standard prunes and prunes received by a handler for his own account which fail to meet the quality standards for disposition.* Any defective prunes which may be accumulated by a handler by removing them from his standard prunes and any prunes received by a handler for his own account which fail to meet the quality standards for the disposition of prunes, may be disposed of, or marketed for disposition, as animal feed, pitted prunes, or as other prune products in which they lose their form and character as prunes by conversion prior to consumption: *Provided*, That any such prunes which are disposed of, or marketed for disposition, for human consumption shall meet those minimum standards prescribed in § 993.97 (Exhibit A) as relate to the defects of mold, imbedded dirt, insect infestation, and decay. The committee shall issue any such rules and regulations as may be necessary to insure such uses. Each handler shall, at his own expense, before shipping or otherwise making final disposition of prunes under this subparagraph, cause an inspection to be made of such prunes by the inspection agency. Such handler shall obtain from the inspection agency a certificate that such prunes meet the applicable conditions contained in this subparagraph, and submit it, or cause it to be submitted, together with such other instruments and records as the committee may require, to the committee. Otherwise, such prunes may be shipped or disposed of for the purposes specified in this subparagraph without regard to the restrictions contained in paragraphs (b), (c), and (d) of this section.

§ 993.50 *Regulation of the handling of prunes during any crop year when the estimated seasonal average price is in excess of parity*—(a) *Determination.* If the Secretary should find that the estimated seasonal average price for prunes for any crop year will be in excess of the price level contemplated by the provisions of section 2 (1) of the act, he shall issue an order in which such findings is set forth, and, in such order, he may provide that, for such crop year, the handling of prunes shall be in accordance with the provisions set forth in this section.

(b) *Receiving of prunes by handlers.* In lieu of the provisions set forth in § 993.48, a handler may receive any tender of prunes from a producer or dehydrator: *Provided*, That such prunes have been properly dried and cured in original natural condition, without the addition of water, and free from active insect infestation, so that they are capable of being received, stored, and packed without deterioration or spoilage. For the assistance of the committee in its supervision of operations under this section, each handler shall, at his own expense, cause an inspection to be made by the inspection agency for the purpose of ascertaining the net weight of the delivery and the percentage of defective prunes in such delivery which is in excess of the maximum tolerances specified in § 993.97 (Exhibit A, paragraph C of subdivision I), and whether the prunes in the delivery meet the requirements of paragraph D of said subdivision I. In the case of each such inspection, the handler shall obtain from the inspection agency a certificate showing the results of the inspection including the percentage of such excess by defects or groups of defects, as the committee may require, and he shall submit such certificate, or cause it to be submitted, together with such other instruments and records as the committee may require, to the committee.

(c) *Disposition of prunes by handlers.* In lieu of the requirements set forth in § 993.49, no handler shall ship or otherwise make final disposition of prunes (regardless of whether natural condition or processed prunes), for human consumption as prunes, which fail to meet the applicable minimum standards set forth in § 993.97 (Exhibit A) for natural condition prunes or processed prunes, as the case may be. Also, no handler shall ship or otherwise make final disposition of natural condition prunes or of processed prunes for use in the manufacture of any prune product for human consumption as food, which fail to meet the applicable minimum standards set forth in § 993.97 (Exhibit A) for natural condition prunes or processed prunes, as the case may be, which relate to the defects of mold, insect infestation, imbedded dirt, and decay. Any handler may ship or otherwise make final disposition of any natural condition prunes or of any processed prunes, as the case may be, for any use other than those referred to in the two preceding sentences. Such disposition without regard to the quality of prunes shall include, but is not limited to, disposition for animal feed, botanicals, and distillation. Each handler shall, at his own expense, before shipping or otherwise making final disposition of prunes, cause an inspection to be made by the inspection agency to determine whether they meet the applicable grade standards, as set forth above in this paragraph, and he shall obtain from the inspection agency a certificate that such prunes meet the aforementioned applicable minimum standards and submit such certificate, or cause it to be submitted, together with such other instruments and records as the committee may require, to the committee. Nothwithstanding the aforesaid restrictions, any handler may transfer prunes from one plant owned by him to another plant owned by him within the State of California, and any handler may ship prunes from his plant to another handler's plant within the State of California, without having such inspection made and certificate issued. A report of each interhandler transfer shall be made promptly by the transferring handler to the committee, and the receiving handler shall, before shipping or otherwise making final disposition of such prunes, comply with the requirements of this paragraph. The committee is hereby authorized to exercise such supervision as may be reasonably necessary to insure that prunes are disposed of for the respective uses for which they were intended, and that the prunes used for each particular purpose meet the applicable minimum grade standards prescribed in this paragraph.

(d) *Inspection agency.* The inspection agency referred to in this section shall be the same as the inspection agency which is provided for in §§ 993.48 and 993.49.

(e) *Assessments.* In lieu of the payment of assessments pursuant to the computation method prescribed in § 993.81 (a), each handler shall pay to the committee, upon demand, with respect to all prunes received by him as the first handler thereof, his pro rata share of such expenses which the Secretary finds will be incurred pursuant to the provisions of § 993.80 by the committee during such crop year. Also, in such an event, each handler's pro rata share of such expenses shall be equal to the ratio between the total tonnage received by him as the first handler thereof during such crop year and the total tonnage received by all handlers as the first handlers thereof during the same crop year. The Secretary shall fix the rate of assessment to be paid by such handlers on the basis of a specified rate per ton. At any time during or after a crop year the Secretary may increase the rate of assessment to apply to all prunes received by handlers as the first handlers thereof during such crop year to obtain sufficient funds to cover any finding by the Secretary relative to the expenses of the committee. Each handler shall pay such additional assessment to the committee upon demand. The Secretary shall reduce the assessment rate applicable to all such tonnage during the particular crop year if he finds that when thus reduced it will provide funds sufficient to enable the committee properly to perform its authorized functions. In all other respects, the provisions of §§ 993.80 through 993.32 shall remain in full force and effect.

(f) *Effective provisions.* In any crop year while the provisions of this section are in effect, the provisions of §§ 993.1 through 993.45, §§ 993.71 through 993.77

and §§ 993.84 through 993.93 shall remain in full force and effect, except to the extent that they may be in conflict with the provisions of this section or of the act.

SALABLE AND SURPLUS TONNAGE REGULATIONS

§ 993.59 *Method of establishing salable and surplus percentages.* After considering all available information and factors used in formulating the marketing policy, the committee, prior to July 15 in any crop year, shall recommend to the Secretary the establishment of a salable percentage and a surplus percentage during the crop year for which the marketing policy has been developed. Whenever the Secretary finds from the recommendation and information submitted by the committee, or from other available information, that to establish a salable percentage and surplus percentage of prunes for any crop year would tend to effectuate the declared policy of the act, he shall so establish such percentages. The total of the salable and surplus percentages fixed each crop year shall equal 100 percent. The salable and surplus percentages fixed for any crop year shall remain in full force and effect throughout the remainder of that crop year and during the following crop year until such percentages are fixed for the following crop year. The committee shall give prompt notice, through newspapers having general circulation in the area and may give such notice through other channels, if the committee deems it desirable, to handlers, dehydrators, and producers of each recommendation submitted by it to the Secretary and of any such percentages made effective by the Secretary. Such notice of the percentages made effective by the Secretary shall include, but not be limited to, written notice by registered mail to all handlers of whom the committee has a record.

§ 993.60 *Salable tonnage.* The salable tonnage of prunes of a handler shall be the sum of the salable tonnage portions of the prunes delivered to the handler by individual producers and dehydrators. The salable tonnage portion of prunes delivered to the handler by an individual producer or dehydrator shall be the tonnage resulting from the application of the salable percentage to the quantity of prunes (including standard and substandard prunes) so delivered, plus any tonnage of standard prunes delivered by such producer or dehydrator to the handler and covered by a diversion certificate; however, if the salable tonnage portion so computed exceeds the quantity of standard prunes delivered to the handler by the individual producer or dehydrator, it shall be reduced to the quantity of standard prunes so delivered. The handler may sell such salable tonnage in any manner he deems advisable subject to the applicable requirements specified in §§ 993.48 and 993.49. No handler shall handle any quantity of prunes in excess of his salable tonnage, except such prunes as may be obtained from surplus tonnage as specified in § 993.63, and except as provided in paragraph (g) of § 993.61. In no event, however, shall a handler be prevented from handling salable tonnage acquired by him from another handler who has received such tonnage from producers, dehydrators, or other handlers in accordance with all the provisions of this subpart.

§ 993.61 *Surplus tonnage*—(a) *Computation.* The surplus tonnage of prunes of a handler shall be the sum of the surplus tonnage portions of the prunes delivered to the handler by individual producers and dehydrators. The surplus tonnage portion of prunes delivered to the handler by an individual producer or dehydrator shall be the tonnage resulting from the application of the surplus percentage to the quantity of prunes (including standard and substandard prunes) so delivered, less any tonnage of standard prunes delivered by such producer or dehydrator to the handler and covered by a diversion certificate; however, if the surplus tonnage portion so computed is less than the quantity of substandard prunes delivered to the handler by the individual producer or dehydrator, it shall be increased to the quantity of substandard prunes so delivered. The committee shall authorize and permit a nonprofit cooperative agricultural marketing association, which has contractual authority to so pool the tonnage of its members, to concentrate the tonnage of its producer members before applying the surplus tonnage provisions of this subpart.

(b) *Holding and delivery.* Each handler shall hold for the committee in proper storage, all surplus tonnage received by him until relieved of such obligation by the committee. The committee may, at any time, require a handler to deliver to it, or to anyone designated by it, at such handler's warehouse or at such other place as the prunes may be stored by the handler, surplus tonnage held by him. The committee may require that such delivery consist of natural condition prunes or it may arrange for such delivery to consist of processed prunes.

(c) *Substandard surplus prunes.* Substandard prunes, except defective prunes referred to in § 993.49 (e) (2), shall be held separate from other prunes held by any handler. The committee shall dispose of substandard prunes as expeditiously as it is practicable to do so, in any manner designated by the committee which is not contrary to any provisions of this subpart for the disposition of substandard prunes.

(d) *Storage facilities.* The committee may rent and operate, or arrange for the use of, facilities for storage and handling of surplus tonnage.

(e) *Exchange.* The committee may establish methods and procedures, including compensating payments, for the exchange by handlers of salable tonnage prunes for surplus standard prunes held by or for the committee, of the various grades and sizes of prunes: *Provided, however,* That no such exchange shall be permitted of substandard prunes. Such transfers shall be on a negotiated basis.

(f) *Payment for services.* Handlers shall be paid for necessary services rendered by them in connection with surplus tonnage, including, but not limited to, receiving, storing, grading, and fumigating, in accordance with a schedule of payments established by the committee and approved by the Secretary. If any handler, prior to December 1 of the crop year, demands removal of such surplus tonnage by the committee, such handler automatically waives payment for any and all charges that may have accrued for storing such surplus tonnage, including in and out charges. When any demand for removal is made, the committee shall remove such surplus tonnage from said handler's possession as expeditiously as practicable, and in any event within 30 days following receipt of written notice.

(g) *Deferment of obligation.* The committee may defer, upon the written request of any handler and for good and sufficient cause, the fulfilling by such handler of his surplus tonnage obligation for a specified period ending not later than November 15 of the then current crop year: *Provided,* That no handler shall dispose of any tonnage of standard prunes during such deferment period in excess of the tonnage he is authorized to handle as specified in § 993.60 plus the tonnage for which such handler holds purchase contracts with producers and dehydrators. As a condition to the granting of any such deferment, the committee shall require the handler to obtain and file with it a written undertaking that by the end of the deferment period he will have fully satisfied his obligation with respect to the holding or control by him of the surplus tonnage applicable to his receipts of prunes from producers and dehydrators. Such undertaking shall be secured by a bond or bonds to be filed with, and acceptable to, the committee, with surety or sureties satisfactory to the committee, running in favor of the committee and the Secretary, and for an amount computed on the basis of the then current market value of the prunes in the quantity for which the deferment is granted. The cost of such bond shall be borne by the handler filing same. Any sums collected through default of a handler on his bond shall, after reimbursement of the committee for any expenses incurred by it in effecting collection, be deposited with the funds obtained by it from the disposition of the surplus tonnage and disbursed by it to persons as set forth in § 993.63 (i) (2). In addition to the foregoing, the committee may establish other reasonable terms and conditions upon which such deferments may be granted.

§ 993.62 *Diversion privileges.* The word "prunes" as used in this section means plums of a variety used in the production of prunes. No producer shall be required to divert all or any portion of these prunes. Any producer may, if he chooses, participate to the extent set forth in this section, by diverting all or a portion of his production of prunes to nonhuman uses or may divert such prunes by leaving them unharvested, or may divert them to such other uses as may be approved by the committee, subject to the following terms and conditions:

(a) The producer shall first make application in writing to the committee for permission to divert prunes, disclosing in such application whether such prunes are to be diverted to nonhuman use, whether they are to be left unharvested, or to what other use they are to be diverted, and describing in detail the location of such prunes or portion thereof.

(b) If the committee approves such application, it shall estimate the amount of the production to be so diverted, on a dried weight basis, and shall advise the applicant, in writing, of its estimate of such dried production and of its approval of the application to divert, subject to satisfactory proof by the applicant that such prunes have actually been diverted as stated in his application.

(c) After receipt by the committee of satisfactory proof of such diversion, the committee shall issue to the applicant and made out in his name, a certificate of salable tonnage or diversion certificate for the dried weight of such prunes equal to the salable percentage as applied to the estimated dried production.

(d) Such diversion certificate shall not be transferable to another producer, or a handler, or any other person, except with the approval of the committee, evidenced by its endorsement of approval on the certificate.

(e) A certificate of salable tonnage or diversion certificate, so issued, shall entitle a producer to deliver to a handler, and a handler to receive, the specified dried weight of prunes free from all surplus set aside requirements in addition to the portion of all of such producer's delivery which would otherwise constitute salable tonnage, and shall entitle a handler, upon presentation of such certificate to the committee to satisfy his surplus tonnage requirements to the extent of the dried weight of prunes specified in such certificate.

(f) Any producer who diverts prunes pursuant to the provisions of this section and any other holder of diversion certificate, shall not be entitled to participate in the proceeds of the surplus tonnage for any prunes so diverted.

(g) Prior to the delivery of the diversion certificate to the producer, he shall pay to the committee the reasonable expense assessed by the committee for examining, estimating, weighing, or otherwise supervising the diversion.

§ 993.63 *Disposition of surplus tonnage*—(a) *Sales to United States Government and foreign governments.* (1) The committee is authorized to sell direct, or to sell to handlers for resale, surplus tonnage to the United States Government or to any agency thereof (including, but not limited to, sales for domestic or foreign relief purposes, school lunch and institutional feeding, or for foreign economic assistance), or to any foreign government. Such sales may be at negotiated prices with adequate consideration to probable processing costs.

(2) The committee shall file with the Secretary, by telegram or air mail letter, seven calendar days prior to making any offer to sell to any foreign government, surplus prunes pursuant to this paragraph, complete information with respect thereto, including the basis therefor. The Secretary shall have the right to disapprove, within such seven-day period, the making of such an offer or any term or condition thereof.

(b) *Sales for export*—(1) *Countries included in estimate of salable percentage.* In the event it appears that the total salable tonnage is not sufficient to meet the estimated domestic and foreign requirements due to the expansion of foreign markets in countries which were considered in estimating the salable percentage to a greater extent than was anticipated at the time of such estimate, the committee may offer to sell, and sell, surplus standard prunes to handlers for sale into, and for use in, such foreign channels in such quantities as are necessary to meet the increased demand. The quantity of prunes included in any offer to sell to individual handlers shall be in the proportion that the respective handler's sales in foreign channels bears to sales in such channels by all handlers. No such sale shall be made by the committee at a price below that which reflects the average price received by producers for salable tonnage during the then current crop year to a date as near as practicable to the date of the offer, as shown by the reports required to be filed under the provisions of § 993.73, plus accrued charges for receiving and storing of surplus tonnage.

(2) *Countries not included in estimate of salable percentage.* The committee may offer to sell, and sell, to any handler, a quantity of surplus standard prunes for export to any foreign country, which country was not included in the estimates upon which the salable percentage was based, in the event of proof of demand for such quantity for such country. Such sale may be made at a negotiated price. The committee shall require proof that any standard prunes so sold were used for the purpose for which they were sold.

(3) *Notice to Secretary of proposed sales for export.* The committee shall file with the Secretary, by telegram or air mail letter, seven calendar days prior to making any offer to sell under either subparagraph (1) or subparagraph (2), surplus standard prunes pursuant to this paragraph, complete information with respect thereto, including the basis for such proposal. The Secretary shall have the right to disapprove, within such seven-day period, the making of such an offer or any term or condition thereof.

(c) *Sales for animal feed and certain manufacturing uses.* The committee may sell any surplus prunes for animal feed, botanicals, distillation, or for any manufacturing uses which were not provided for in estimating the salable quantity of standard prunes for the then current crop year. Such sales may be made at negotiated prices. The committee is hereby authorized to exercise such supervision as may be reasonably necessary to insure that such prunes are disposed of for the respective uses for which they are sold.

(d) *Sales to handlers*—(1) *Authorization under specified supply conditions.* If the committee finds that total contracted sales by all handlers during the crop year exceeds 80 percent of the total salable tonnage received by all handlers plus 80 percent of the estimated tonnage held unsold by producers and dehydrators which would become salable tonnage; or, if the committee finds that more than 20 percent of the uncontracted salable tonnage is being held so tightly by relatively few handlers, dehydrators, or producers as seriously to restrict commerce in prunes, and if 75 percent of all handlers have made a written request therefor and such requesting handlers have purchased over 65 percent of the salable tonnage purchased from producers and dehydrators, the committee may, in either event, sell to handlers standard prunes from the surplus tonnage for use as salable tonnage, subject to the additional conditions set forth in subparagraphs (2), (3), (4), (5) and (6) of this paragraph.

(2) *Authorized commencement date.* No such sale shall be made prior to December 15 of the crop year.

(3) *Quantity limitation.* No single sales offer of surplus tonnage to handlers shall exceed 20 percent of the original estimated salable tonnage.

(4) *Prices.* If any such sale is made for manufacturing purposes in which the prunes will lose their form and character as prunes by conversion prior to consumption, it may be made by the committee at a negotiated price; otherwise, such sales shall not be made by the committee at a price below that which reflects the average price received by producers for salable tonnage during the then current crop year to a date as near as practicable to the date of the offer, as shown by the reports required to be filed under the provisions of § 993.73, plus accrued charges for receiving and storing of surplus tonnage.

(5) *Pro rata shares and termination of offers.* In any offer by the committee to sell surplus tonnage to handlers pursuant to this paragraph, each handler shall be given the first opportunity to purchase his share of the offer, which share shall be determined as the same proportion that the respective surplus tonnage held by him is of the surplus tonnage held by all handlers. In the event that any handler declines or fails to purchase any or all of his share of any such offer, the remaining portion thereof shall be re-offered by the committee to all handlers who purchased all of their respective shares of such offer, in proportion to their respective shares. Any balance remaining unsold after such re-offer shall be withdrawn from the particular offer. Any offer outstanding as of July 5 of any crop year shall be withdrawn and the committee shall not make any further offer to sell surplus tonnage to handlers after that date, except that if the committee determines, with the approval of the Secretary, that a major change in conditions has occurred, such as the involvement of the United States in war or a crop failure in the following year, or any other significant development, which indicates a shortage of supply, the said July 5 limitation shall no longer apply.

(6) *Notice to Secretary of proposed sales to handlers.* The committee shall file with the Secretary, by telegram or

air mail letter, seven calendar days prior to making any offer to sell surplus prunes pursuant to this paragraph, complete information with respect thereto, including the basis therefor. The Secretary shall have the right to disapprove, within such seven-day period, the making of such an offer or any term or condition thereof.

(e) *Sales of standard prunes for manufacturing purposes*—(1) *Manufacturing outlets included in estimate of salable percentage.* In the event it appears that the total salable tonnage is not sufficient to meet the estimated domestic and foreign requirements due to the expansion of manufacturing outlets, which outlets were provided for in estimating the salable percentage, to a greater extent than was anticipated at the time of estimating the salable percentage, the committee may offer to sell, and sell, surplus standard prunes to handlers for resale or use for such manufacturing purposes in which such prunes will lose their form and character as prunes by conversion prior to consumption, in such quantities as are necessary to meet the increased demand. The quantity of prunes offered to individual handlers to meet such deficiency shall be in the proportion that the respective handler's sales or uses for manufacturing bears to sales or uses for manufacturing by all handlers. No such sale shall be made by the committee at a price below that which reflects the average price received by producers for salable tonnage during the then current crop year to a date as near as practicable to the date of the offer, as shown by the reports required to be filed under the provisions of § 993.73, plus accrued charges for receiving and storing of surplus tonnage.

(2) *Manufacturing outlets not included in estimate of salable percentage.* The committee may offer to sell, and sell to any handler, a quantity of surplus standard prunes for any manufacturing use, which manufacturing use was not included in the estimate upon which the salable percentage was based, in the event of proof of demand for such quantity for such purpose. Such sale may be made at a negotiated price. The committee shall require proof that any standard prunes so sold were used for the purpose for which they were sold.

(3) *Notice to Secretary of proposed sales of standard prunes for manufacturing purposes.* The committee shall file with the Secretary, by telegram or air mail letter, seven calendar days prior to making any offer to sell under either subparagraph (1) or subparagraph (2), surplus standard prunes to handlers pursuant to this paragraph, complete information with respect thereto including the basis for such proposal. The Secretary shall have the right to disapprove, within such seven-day period, the making of such offer or any term or condition thereof.

(f) *Sales of substandard prunes for animal feed and for manufacturing purposes.* The committee may sell direct, or sell to handlers for resale, substandard prunes for animal feed, and for any manufacturing purpose in which such prunes will lose their form and character as prunes by conversion prior to consumption: *Provided*, That any such prunes which are sold for disposition for manufacturing purposes for human consumption, either directly to handlers, or for resale by handlers, shall, at the time of such disposition or use, meet those minimum standards prescribed in § 993.97 (Exhibit A) as relate to the defects of mold, imbedded dirt, insect infestation, and decay; and any such prunes so sold by the committee to a person who is not a handler shall meet those quality standards at the time of disposition by the committee: *And provided, further*, That no such sales for manufacturing purposes for human consumption shall be made while standard prunes are available in the surplus tonnage. The committee is hereby authorized to exercise such supervision as may be reasonably necessary to insure that such prunes are disposed of for the respective uses for which they were sold. Such sales may be made at negotiated prices.

(g) *Donations of surplus prunes.* The committee may donate limited quantities of surplus prunes for use in research or promotional activities.

(h) *Unsold surplus tonnage.* The committee shall endeavor to sell all prunes in the surplus tonnage at a rate so as to achieve, as nearly as may be practicable, the complete disposition of the surplus tonnage not later than July 31 of the crop year. Any surplus tonnage remaining unsold as of July 31 shall be disposed of as soon as practicable for animal feed, distillation, or in any other outlets which are not competitive with the sale of prunes in normal marketing channels, not otherwise provided for in this paragraph, unless determination with respect to a shortage of supply has been made as provided for in paragraph (d) (5) of this section. The committee may dispose of unsold surplus prunes after July 31 at negotiated prices.

(i) *Proceeds of sales of surplus tonnage*—(1) *Charges against proceeds.* Expenses incurred by the committee for the receiving, handling, holding, or disposing of any quantity of surplus tonnage shall be charged against the proceeds of sales of surplus tonnage.

(2) *Distribution of net proceeds.* Net proceeds from the disposition of surplus tonnage shall be distributed by the committee either directly, or through handlers as agents of the committee, under safeguards to be established by the committee, to persons in proportion to their contributions thereto, or to assignees of such interests, with appropriate grade and size differentials as established by the committee. Progress payments may be made by the committee in the same manner, as sufficient funds accumulate. Distribution of the proceeds in connection with the surplus tonnage contributed by a nonprofit cooperative agricultural marketing association which has authority to market prunes of its members and to allocate the proceeds therefrom to such members shall be made to such association, if it so requests. Prior to making any such distribution, the committee shall submit to the Secretary a report including all pertinent details with respect thereto.

(j) *Prohibition against the hypothecation of surplus.* In no event shall the committee hypothecate surplus tonnage.

REPORTS AND BOOKS AND OTHER RECORDS

§ 993.71 *Confidential information.* All reports and records furnished or submitted by handlers to the committee which include data or information constituting a trade secret or disclosing of the trade position, financial condition, or business operations of the particular handler from whom received shall be received by, and at all times kept in the custody and under the control of one or more employees of the committee, who shall disclose such information to no person except the Secretary. Notwithstanding the above provisions of this section, information may be disclosed to the committee when reasonably necessary to enable the committee to carry out its functions under this subpart.

§ 993.72 *Reports of acquisitions, sales, uses, and shipments.* Each handler shall file such reports of his acquisitions, sales, uses, and shipments of prunes, as may be requested by the committee.

§ 993.73 *Reports of prices.* Each handler shall file such price reports as may be requested by the committee, showing the weighted average price paid by such handler to producers and dehydrators for each size of prunes and the quantity purchased at each such price, to enable the committee to determine the average price received by producers for the purposes set forth in paragraphs (b), (d) and (e) of § 993.63.

§ 993.74 *Reports of surplus tonnage.* Each handler shall file with the committee such reports of the total substandard prunes and other surplus tonnage by grade and size classifications thereof, held in his warehouses or under his control and the location thereof, as may be requested by the committee.

§ 993.75 *Other reports.* Upon the request of the committee, each handler shall furnish such other reports and information as are needed to enable the committee to perform its functions under this subpart.

§ 993.76 *Records.* Each handler shall maintain such records of prunes received, held, and disposed of by him as are prescribed by the committee and needed by it to perform its functions under this subpart.

§ 993.77 *Verification of reports.* For the purpose of checking and verifying reports filed by handlers or the operation of handlers under the provisions of this subpart, the committee, through its duly authorized agents, shall have access to any premises where prunes may be held by any handler and at any time during reasonable business hours, shall be permitted to inspect any prunes so held by such handler and any and all records of such handler with respect to the holding or disposition of all prunes which may be held or which may have been disposed of by him.

EXPENSES AND ASSESSMENTS

§ 993.80 *Expenses.* The committee is authorized to incur such expenses

(exclusive of expenses for the receiving, handling, holding, or disposing of any quantity of surplus tonnage) as the Secretary finds are reasonable and likely to be incurred by it during each crop year for the maintenance and functioning of the committee and for such other purposes as the Secretary may, pursuant to the provisions of this subpart, determine to be appropriate. The recommendation of the committee as to these expenses and the recommended rate of assessment for each such crop year, together with all data supporting such recommendations, shall be filed with the Secretary not later than June 20 preceding the crop year in connection with which such recommendations are made.

§ 993.81 *Assessments*—(a) *Requirement for payment and rate of assessment.* The funds to cover the expenses of the committee (exclusive of expenses for the receiving, handling, holding, or disposing of any quantity of surplus tonnage) shall be acquired by levying assessments. Each handler shall pay to the committee, upon demand, with respect to all salable tonnage prunes handled by him as the first handler thereof and on all prunes sold to him from surplus tonnage for resale to other than Federal governmental agencies, his pro rata share of such expenses which the Secretary finds will be incurred as aforesaid, by the committee during each crop year. Each handler's pro rata share of such expenses shall be equal to the ratio between the total salable tonnage handled by him as the first handler thereof plus the tonnage sold to him from surplus tonnage for resale to other than Federal governmental agencies, during the applicable crop year, and the total salable tonnage prunes handled by all handlers as the first handlers thereof plus tonnage sold to such handlers from surplus tonnage for resale to other than Federal governmental agencies, during the same crop year. The Secretary shall fix the rate of assessment to be paid by such handlers on the basis of a specified rate per ton. At any time during or after a crop year the Secretary may increase the rate of assessment to apply to all salable tonnage prunes handled by handlers as the first handlers thereof and on all tonnage sold to handlers from surplus tonnage for resale to others than Federal governmental agencies during such crop year to obtain sufficient funds to cover any finding by the Secretary relative to the expenses of the committee. Each handler shall pay such additional assessment to the committee upon demand. The Secretary shall reduce the assessment rate applicable to all such tonnage during the particular crop year if he finds that when thus reduced it will provide funds sufficient to enable the committee properly to perform its functions under this subpart.

(b) *Advance payments.* In order to provide funds to carry out the functions of the committee, the committee may accept advance payments from any handler to be credited toward such assessments as may be levied pursuant to this section against the respective handler.

(c) *Disposition of excess funds from assessments.* If the first audit after the end of any crop year shows that the assessments collected for such crop year exceed the expenses incurred with respect to such crop year, the excess shall be credited to the handlers in proportion to their relative total assessments and the portion to which each handler is entitled shall be credited against assessments in the following crop year, unless the handler shall request payment, in which event prompt payment shall be made.

(d) *Suits for collection.* The committee may, with the approval of the Secretary, maintain in its own name, or in the name of its members, a suit against any handler for the collection of such handler's assessment.

§ 993.82 *Funds.* All funds received by the committee pursuant to the provisions of this subpart shall be used solely for the purposes authorized in this subpart and shall be accounted for in the manner provided for in this subpart. The Secretary may, at any time, require the committee or its members and alternate members to account for all receipts and disbursements.

MISCELLANEOUS PROVISIONS

§ 993.84 *Personal liability.* No member or alternate member of the committee, or any employee, representative, or agent thereof shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person, for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate member, employee, representative, or agent, except for acts of dishonesty.

§ 993.85 *Separability.* If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this subpart or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ 993.86 *Derogation.* Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 993.87 *Duration of immunities.* The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon the termination of this subpart, except with respect to acts done under and during the existence of this subpart.

§ 993.88 *Agents*—(a) *Authorization by Secretary.* The Secretary may, by a designation in writing, name any person, including any officer or employee of the United States Government, or name any bureau or division in the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this subpart.

(b) *Authorization by committee.* The committee may authorize any person or persons or agency to act as its agent or representative in connection with the provisions of this subpart.

§ 993.89 *Effective time.* The provisions of this subpart, as well as any amendments to this subpart, shall become effective at such time as the Secretary may declare, and shall continue in force until terminated, or during suspension, in one of the ways specified in § 993.90.

§ 993.90 *Termination or suspension*—(a) *Failure to effectuate policy of act.* The Secretary may, at any time, terminate the provisions of this subpart, by giving at least one day's notice by means of a press release or in any other manner which he may determine. The Secretary shall terminate or suspend the operation of any or all of the provisions of this subpart, whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(b) *Referendum.* The Secretary shall terminate the provisions of this subpart on or before the fifteenth day of July of any crop year, to be effective at the end of such crop year, whenever he is required to do so by the provisions of section 8c (16) (B) of the act. The Secretary may, at any time he deems it desirable, hold a referendum of producers to determine whether they favor termination of this subpart. However, beginning with 1951, if the Secretary receives a recommendation, adopted by at least a majority vote of the producer members of the committee, requesting the holding of such a referendum, the Secretary shall hold such a referendum: *Provided*, That the Secretary shall not be required to hold such a referendum upon the basis of such a request more than once every two years.

(c) *Termination of act.* The provisions of this subpart shall terminate, in any event, upon the termination of the act.

§ 993.91 *Procedure upon termination.* Upon the termination of this subpart, the members of the committee then functioning shall continue as joint trustees, for the purpose of liquidating the affairs of the committee. Action by such trustees shall require the concurrence of a majority of the said trustees. Such trustees shall continue in such capacity until discharged by the Secretary, and shall, from time to time, account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and the joint trustees, to such person as the Secretary may direct; and shall, upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all the funds, properties, and claims vested in the committee or the joint trustees, pursuant to this subpart. Any person to whom funds, property, or claims have been transferred or delivered by the committee or the joint trustees, pursuant to this section, shall be subject to the same obligations imposed upon the members of the said committee and upon said joint trustees.

§ 993.92 *Effect of termination or amendment.* Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendment to either

thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart, or (b) release or extinguish any violation of this subpart or any regulation issued under this subpart, or (c) affect or impair any rights or remedies of the Secretary, or of any other person, with respect to such violation.

§ 993.93 *Amendments.* Amendments to this subpart may be proposed from time to time, by any person or by the committee, and may be made a part of this subpart by the procedures provided under the act.

§ 993.97 *Exhibit A; minimum standards.*

I. Minimum standards for natural condition prunes:

A. *Defects.* Defects are: (1) off-color; (2) inferior meat condition; (3) fermentation; (4) skin or flesh damage; (5) scab; (6) burned; (7) mold; (8) imbedded dirt; (9) insect infestation; (1) decay.

B. *Explanation of terms.* (1) "Off-color" means a dull color or skin differing noticeably in appearance from that which is characteristic of mature, properly handled fruit of a given variety or type.

(2) "Inferior meat condition" means flesh which is fibrous, woody or otherwise inferior due to immaturity to the extent that the characteristic texture of the meat is substantially affected.

(3) "Fermentation" means damage to the flesh by fermentation to the extent that the characteristic appearance or flavor is substantially affected.

(4) "Skin or flesh damage" means growth cracks, splits, breaks in skin or flesh of the following descriptions:

(a) Callous growth cracks, aggregating more than three-eighths of one inch (⅜") in length;

(b) Splits or skin breaks exposing flesh and affecting materially the normal appearance of the prunes;

(c) Any cracks, splits or breaks open to the pit;

(d) Healed or unhealed surface or flesh blemishes caused by insect injury and which materially affect appearance, edibility or keeping quality;

(e) Skin damage caused by rain or overdipping to the extent that the prunes cannot be processed normally without material sloughing of the skin.

(5) "Scab" means tough or thick scab exceeding in the aggregate the area of a circle three-eights inch (⅜") in diameter or by unsightly scab of another character exceeding in the aggregate the area of a circle three-fourths inch (¾") in diameter.

(6) "Burned" means injury by sunburn or excessive heat in dehydration to the extent that the characteristic appearance, flavor or edibility of the fruit is noticeably affected.

(7) "Mold" means a characteristic fungus growth and is self-explanatory.

(8) "Imbedded dirt" means the presence of dirt or other extraneous material so imbedded in or adhering to the prune that it cannot be removed in normal processing.

(9) "Insect infestation" means the presence of insects, insect fragments or insect remains.

C. *Maximum tolerances.* Tolerance allowances shall be on a weight basis and shall not exceed the following:

(1) The tolerance allowance for decay shall not exceed one percent (1%).

(2) The combined tolerance allowance for mold, imbedded dirt, insect infestation, and decay shall not exceed five percent (5%).

(3) The combined tolerance allowance for fermentation, skin or flesh damage, scab, burned, mold, imbedded dirt, insect infestation, and decay shall not exceed ten percent (10%).

(4) The combined tolerance for off-color, inferior meat condition, fermentation, skin or flesh damage, scab, burned, mold, imbedded dirt, insect infestation, and decay shall not exceed twenty percent (20%).

(5) Prunes showing obvious live insect infestation shall be fumigated prior to acceptance.

D. Natural condition prunes must be properly dried and cured in original natural condition, without the addition of water, and free from active infestation, so that they are capable of being received, stored and packed without deterioration or spoilage.

II. Minimum standards for processed prunes:

A. *Defects.* Defects are: (1) Off-color; (2) Inferior meat condition; (3) Fermentation; (4) Skin or flesh damage; (5) Scab; (6) Burned; (7) Mold; (8) Imbedded dirt; (9) Insect infestation; (10) Decay.

B. *Explanation of terms.* (1) "Off-color" means a dull color or skin differing noticeably in appearance from that which is characteristic of mature, properly handled fruit of a given variety or type.

(2) "Inferior meat condition" means flesh which is fibrous, woody or otherwise inferior due to immaturity to the extent that the characteristic texture of the meat is substantially affected.

(3) "Fermentation" means damage to the flesh by fermentation to the extent that the characteristic appearance or flavor is substantially affected.

(4) "Skin or flesh damage" means growth cracks, splits, breaks in skin or flesh of the following descriptions:

(a) Callous growth cracks, aggregating more than three-eighths of one inch (⅜") in length;

(b) Splits or skin breaks exposing flesh and materially affecting the normal appearance of French prunes; or markedly affecting the normal appearance of varieties other than the French variety;

(c) Any cracks, splits or breaks open to the pit;

(d) Healed or unhealed surface or flesh blemishes caused by insect injury and which materially affect the appearance, edibility or keeping quality.

(5) "Scab" means tough or thick scab exceeding in the aggregate the area of a circle three-eighths of one inch (⅜") in diameter, or by unsightly scab of other character exceeding in the aggregate the area of a circle three-fourths of one inch (¾") in diameter.

(6) "Burned" means injury by sunburn or excessive heat in dehydration to the extent that the characteristic appearance, flavor or edibility of the fruit is noticeably affected.

(7) "Mold" means a characteristic fungus growth and is self-explanatory.

(8) "Imbedded dirt" means the presence of dirt or other extraneous material so imbedded in or adhering to the prune that it cannot be readily removed in washing the fruit.

(9) "Insect infestation" means the presence of insects, insect fragments or insect remains.

C. *Maximum tolerances.* Tolerance allowances shall be on a weight basis and shall not exceed the following:

(1) There shall be no tolerance allowance for live insect infestation.

(2) The tolerance allowance for decay shall not exceed one percent (1%).

(3) The combined tolerance allowance for mold, imbedded dirt, insect infestation, and decay shall not exceed five percent (5%).

(4) The combined tolerance allowance for fermentation, skin or flesh damage, scab, burned, mold, imbedded dirt, insect infestation and decay shall not exceed ten percent (10%).

(5) The combined tolerance for off-color, inferior meat condition, fermentation, skin or flesh damage, scab, burned, mold, imbedded dirt, insect infestation and decay shall not exceed twenty percent (20%).

Order Directing That a Referendum Be Conducted Among Producers of Prune Plums in the State of California for Drying or Dehydrating Into Dried Prunes in Said State; Designating Agents to Conduct Such Referendum; and Determining the Representative Period

Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), it is hereby directed that a referendum be conducted among producers who, during the period July 1, 1950 through June 30, 1951 (which is hereby determined to be a representative period for the purpose of this referendum), were engaged, in the State of California, in the growing of prune plums for the production, for market, of dried prunes to determine whether such producers approve or favor the issuance of an amended order regulating the handling of dried prunes produced in California; said order, as proposed to be amended, being annexed to the decision of the Secretary of Agriculture filed simultaneously herewith.

The procedure applicable to this referendum shall be the "Procedure for the Conduct of Referenda Among Producers in Connection with Marketing Orders (Except Those Applicable to Milk and its Products) to Become Effective Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended" (15 F. R. 5176).

W. Allmendinger, R. G. Rush, G. R. Eastman, and M. G. Young, of the Fruit and Vegetable Branch, Production and Marketing Administration, U. S. Department of Agriculture, are hereby designated as agents of the Secretary of Agriculture to conduct said referendum jointly or severally.

Copies of the text of the aforesaid amended order may be obtained or examined in: The Office of the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C.; the office of the Prune Administrative Committee, No. 2 Pine Street, San Francisco 11, California; the Western Marketing Field Office, Fruit and Vegetable Branch, Production and Marketing Administration, U. S. Department of Agriculture, 333 Fell Street, P. O. Box 3638, San Francisco 2, California; and the county Production and Marketing Administration office in each of the prune producing counties in California.

Ballots to be cast in the referendum may be obtained from the Western Marketing Field Office, Production and Marketing Administration, Fruit and Vegetable Branch, U. S. Department of Agriculture, 333 Fell Street, P. O. Box 3638, San Francisco 2, California, and the County Production and Marketing Administration office in each of the prune producing counties in California.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

SMALL TRACT CLASSIFICATION NO. 41

JULY 3, 1951.

Pursuant to the authority delegated to me by the Director, Bureau of Land Management, under section 2.21 of Order No. 427 approved by the Secretary of the Interior August 16, 1950 (15 F. R. 5641), I hereby classify as hereinafter indicated under the Small Tract Act of June 1, 1938 (52 Stat. 609, 43 U. S. C. 682a), as amended the following described public lands in the Anchorage, Alaska Land District comprising approximately 22 small tracts embracing approximately 115.10 acres:

SEWARD MERIDIAN

FOR LEASING AND SALE

For Cabin Sites

T. 19 N., R. 4 W.,
Section 28:
Lot 4.
Lot 6, that portion which would be if described in terms of a normal subdivision: N½NE¼SW¼.
Lot 7.

For Business Sites

T. 19 N., R. 4 W.,
Section 28:
Lot 5.
Lot 6, that portion which would be if described in terms of a normal subdivision: NE¼SE¼NE¼SW¼.

The land described above is included in the homestead entry of James D. Lovejoy, Anchorage 012004.

This order shall not become effective to change the status of such land or to permit the leasing thereof under the Small Tract Act of June 1, 1938, cited above, except upon the failure of the homestead entry Anchorage 012004 mentioned above. In the event of the failure of said entry, the land will then become available for filings under the Small Tract Act, after due notice to be given by publication, subject to the preference right of veterans of World War II, accorded by the act of September 27, 1944 (58 Stat. 747, 43 U. S. C. 279) and other qualified persons entitled to credit for service under the said act.

National Production Authority

[NPA Delegation 14, as Amended July 11, 1951]

ADMINISTRATOR OF FEDERAL SECURITY AGENCY ET AL.

DELEGATION OF AUTHORITY TO PROCESS APPLICATIONS UNDER NPA ORDER M-4 AND TO MAKE ALLOTMENTS AND ASSIGN RATINGS UNDER CMP REGULATION NO. 6

1. Pursuant to the authority under the Defense Production Act of 1950 (Pub. Law 774, 81st Cong. as extended by Pub. Law 69, 82d Cong.), Executive Orders 10161 (15 F. R. 6105) and 10200 (16 F. R. 61), and Defense Production Administration Delegation 1 (16 F. R. 738), the following functions to be performed pursuant to NPA Order M-4 and CMP Regulation No. 6 are delegated to each of the persons named in Table I, with power to delegate and to authorize successive delegations with respect to the categories of construction set forth in said table opposite his name:

(a) To receive, consider, pass upon, and take action in his own name, including appellate action, upon applications for authorization to commence construction, pursuant to section 6 of NPA Order M-4;

(b) To receive, consider, pass upon, and take action in his own name, including appellate action, upon applications for adjustment or exception based upon a claim of unreasonable hardship, or upon a claim that prohibition of the construction is not in the interest of the national defense, pursuant to section 11 of NPA Order M-4.

2. Notwithstanding paragraph 1 of this delegation, the authority delegated hereby does not include any category of construction specified in List A of NPA Order M-4, except that the Administrator of the Federal Security Agency and the Administrator for Veterans' Affairs may take action with respect to such a category if such construction is required as part of an integrated hospital program; and the Administrator of the Federal Security Agency may take action with respect to a gymnasium provided such gymnasium is a part of a school plant and is to be used primarily for instructional purposes in physical education and training, and does not include facilities for spectator seating.

3. Notwithstanding paragraph 1 of this delegation, the authority delegated hereby does not include the approval of the commencement of construction of any office building, administration building, retail store, retail outlet, or service store, unless such construction is an integral part of a category of construction respectively specified in Table I.

4. Any authorization, adjustment, or exception under NPA Order M-4 issued by any delegate pursuant to this delegation must be correlated with the delegate's activities under the Controlled Materials Plan of the National Production Authority; and the projects approved by each delegate, and the allotment of controlled materials made therefor, will be charged against the total construction program and allotments approved for such delegate by the Defense Production Administration.

5. To authorize construction schedules of prime contractors in accordance with the provisions of CMP Regulation No. 6. To make allotments of controlled materials for construction, to apply or assign to others the right to apply DO ratings and allotment numbers and symbols for procurement of materials and products other than controlled materials which are required for construction under an approved construction program as provided by CMP Regulation No. 6.

6. The authority delegated by paragraph 5 of this delegation shall be exercised within such construction program determinations or other quantitative re-

strictions as may be established by the Defense Production Administration, and in accordance with such instructions, record-keeping and reporting requirements, and policy directives as may be issued from time to time by the National Production Authority. Such delegated authority shall also be exercised in conformity with the regulations and orders of the National Production Authority and in conformity with the provisions of CMP Regulation No. 6 and as contained in the instructions applicable to forms to be made use of in connection with CMP Regulation No. 6 and NPA Order M-4, or such other forms as have been or will be approved by the National Production Authority.

7. Insofar as it is inconsistent herewith, this delegation supersedes NPA Delegation 7.

8. As used in this delegation, the terms "petroleum," "gas," "solid fuels," "electric power," "metals and minerals," "food," "domestic transportation," "storage," and "port facilities" have the same meanings as are set forth in Executive Order 10161.

9. All actions taken pursuant to this delegation shall be in the name of the delegate or other official to whom like authority has been delegated by the delegate, and shall be authenticated by the signature and title of the individual authorized to take such actions.

This delegation shall take effect on July 11, 1951.

NATIONAL PRODUCTION AUTHORITY,
MANLY FLEISCHMANN,
Administrator.
